Eleventh. The Navy has four of these fleet tugs under construction now; rather than building more immediately, this would be a good time to hold up and evaluate the program.

Twelfth. The case for eliminating the fleet oilers is also clear. There are over 30 million deadweight tons of tankers idle on the world market. We should not be building new tankers of any kind in the face of this surplus.

Thirteenth. In 1972 a joint Navy/MARAD study entitled "The Role of Merchant Ships in Wartime Defense Missions" concluded that—

> A potential savings from using merchant ships for wartime underway replenishment are large enough to justify further, more detailed analysis and fleet testing. In addition to the $610 million savings to the Government from using simpler merchant designs in peacetime, an additional savings of $130 million would arise if ships to support two attack carrier groups deploying one month after D-Day were chartered only when war occurs. In peacetime, these ships would earn revenues which defray much of their cost to the Government.

This detailed analysis and testing has not been done, and more funding for fleet oilers should not be provided until it is.

Fourteenth. Merchant ships can perform capably. In 1972 a test was conducted using the merchant vessel *Erna Elizabeth* to participate in naval underway replenishment missions. By all accounts, the ship performed well; however, there has been no further testing

or utilization of merchant vessels for this purpose.

In its report, the Armed Services Committee states:

The shipbuilding program indicates no sense of purpose to achieve a balanced fleet of the appropriate numbers and kinds of ships required by the Navy of the future.

I have attached the full text of my amendment:

AMENDMENT TO BE OFFERED TO H.R. 5970, DOD AUTHORIZATION BILL BY MR. MCCLOSKEY

On page 2, lines 22 and 23, strike "for the AO fleet oiler program, $322,700,000; for the fleet tug program, $52,700,000;".

THE COMPREHENSIVE MEDICAL PRACTICE ACT OF 1977

HON. ANDREW MAGUIRE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. MAGUIRE. Mr. Speaker, I am reintroducing the Comprehensive Medical Practice Act of 1977, a bill that provides a major opportunity to move health care in the United States in a direction that meets the needs of patients more adequately and at lower cost than is presently the case. I introduced this bill originally last year, and have been encouraged by the response and comments I have received.

I. STATEMENT OF THE PROBLEM

Medical costs are increasing at a 14-percent-compounded rate every year. The cost of medical care will soon reach the point where any serious illness will be a financial catastrophe for the average citizen. Medical costs in the United States last year exceeded $118 billion, of which $40 billion came from the Government.

While many of these increased costs are unavoidable, many could be avoided under a more rational medical care delivery system.

In our investigations on the Oversight Subcommittee of the Interstate and Foreign Commerce Committee, we have found evidence that a large number of surgical procedures were being performed which were not medically necessary. We found that a large number of laboratory tests were being performed which were not medically necessary, were inaccurate, or for which charges were made in great excess of their actual cost. We have been told during hearings on national health insurance conducted by the Health and Environment Subcommittee that there are wide variations in the rates of hospitalization and durations of hospital stays throughout the United States. For example, patients in New England stay in the hospital 30 percent longer than in California. The control of quality in medicine is primitive. The individual practicing physician taking care of patients outside the hospital has a difficult time maintaining up-to-date information on pursuing additional education. He also has little opportunity for informal education with his fellow physicians because he is, for the most part, by himself or with his patients.

Medicine in the United States is practiced primarily in a fragmented system with much duplication and poor management; most physicians practice almost in a vacuum. Efforts in preventive care and patient education which would be so cost-effective to society as a whole, are not performed in the individual practitioner's office. He cannot get paid for it, he does not have time for it, and he is not interested in it.

Physicians and other health professionals have little or no exposure to alternatives to the solo practice method for delivering medical care; they have almost no expertise in the efficient management of our scarce health care resources.

Information regarding the efficiency and effectiveness of alternative methods for delivering health care is scarce. We are moving toward a national health insurance program in this country, yet we desperately need information comparing various methods of organizing and delivering medical care to make reasoned decisions regarding how to set up such a national health insurance program.

It is these problems that the Comprehensive Medical Practice Act is designed to solve.

II. ADVANTAGES OF A COMPREHENSIVE MEDICAL PRACTICE

In the bill that I am proposing, I wish to promote formation of practices of groups of physicians so that they may deal with many of the problems mentioned above. Rates of hospitalization and rates of surgery are decreased in group practices. Group practices emphasize ambulatory care.

Because of the integrated nature of group practices, quality programs can be set up, time can be taken by the physicians for additional education, and an informal network of discussion and referral within the practice leads to high-quality, up-to-date medical care.

The size of the comprehensive medical practice allows for efficient management of patients and referrals within the organization. This leads to efficient, integrated, quality care, effective use of preventive medicine, patient education, and the use of less expensive physician extenders.

I have concluded that the encouragement of the formation of comprehensive medical practices will lead to higher quality medical care at lower total cost.

III. MEDICAL CARE AT LOWER TOTAL COST

Provisions of the bill.

The bill defines a comprehensive medical practice as one which consists of several practitioners of whom half are in the primary specialties of family medicine, primary pediatrics, and primary internal medicine, while the others may represent the specialties needed to provide adequate overall care for the patients the practice serves. A comprehensive medical practice is one which offers a variety of medical services reasonably expected to meet the majority of medical needs of the local population. This means that an individual can go to a comprehensive medical practice in his area and usually expect to receive all his medical needs. He will not have to go from doctor's office to doctor's office, to hospital, to laboratory, to X-ray, in order to find answers to his medical questions. This also means that preventive health and patient education can be offered in these practices.

My bill requires that a readily identified individual be primarily responsible for each patient so that the patients will always know whom to call when they have a medical problem. This will lead to continuity of care and a formation of a long-term relationship between the patient and the physician. The bill requires that a single medical record system be kept and that the equipment, facilities and personnel be shared so that efficient use is made of these. It also requires that the comprehensive practices meet accreditation standards set up by the American Group Practice Association and the Joint Commission of Accreditation of Hospitals. This provision will assure that medicaid mills and other unscrupulous or lesser quality groups will not qualify. These accreditation standards also require that proper equipment and personnel are available and that an active and effective quality assurance program is ongoing. I am requiring that the comprehensive medical practice have a unitary administrative structure which assures that the patient will have an individual to go to when he has complaints regarding either the cost of his medical care or its quality.

The bill establishes funding for grants and contracts for feasibility studies for the formation of comprehensive medical practices with the emphasis on making sure that these practices conform with the planning act and that the practices which serve medically underserved areas or nonmetropolitan areas be given priority. Also, grants and contracts and loan guarantees for planning and initial development costs, and direct loans and loan guarantees for operating costs are included.

I have included provisions for expansion of existing group practices, including the formation of satellites. In this country today we have many large, fine practices of medicine and we should encourage them to move out, particularly in the medically underserved areas, and to offer the same high quality care to these individuals as they do to the patients they now serve. This provision allows for grants and contracts for feasibility studies for initial operating costs for planning and projects. Again, the emphasis is to look at medically underserved areas and to patient population areas which are presently not served by a comprehensive medical practice.

The bill contains a malpractice reinsurance program whereby comprehensive medical practices which meet the standards of this bill will be reimbursed for malpractice by the Federal Government.

The bill contains provisions that under title XIX, the comprehensive medical practices receive reimbursement rates of 125 percent of the highest rate pre-

vailing in a State so that the rural practices will have a chance to meet their costs and comprehensive medical practices will be encouraged. Payment of physician extenders, under title XIX, is also included so that the comprehensive medical practices may use the most efficient personnel for delivering the services.

IV. EDUCATION AND TRAINING

The bill contains provisions for training of health professionals in comprehensive medical practices and for teaching of health professional students about the various methods of delivering medical care so that medical students, nursing students, and other professional health students will be exposed to comprehensive medical practices. It offers grants for management training and assistance and for continuing medical education of practice personnel.

V. RESEARCH INTO QUALITY AND EFFICIENCY

The bill provides provisions for research into various methods for delivering medical care with reports to Congress on how the formation of comprehensive medical practices and other alternative forms of delivering medical care may affect the quality and cost of medical care for our Nation.

We are requiring the comprehensive medical practices to cooperate with research studies so that their cost and effectiveness can be studied. At the end of 3 years the Secretary is directed to report to Congress the results of these studies so that Congress can benefit from this information in designing future national health insurance programs.

VI. NATIONAL HEALTH SERVICE CORPS AND STUDENT LOANS

The bill requires the assignment of National Health Service Corps personnel to integrated medical practices wherever possible and provides for student loan forgiveness for practicing in an integrated practice. While I am reintroducing this bill today, I earnestly seek the views and comments of my colleagues as well as those interested in the fostering of timely and innovative approaches to the delivery of health care. For example, perhaps screening and counseling procedures as part of a program of preventive measures might be included; some of the recent work on physician aggregation in the context of multispecialty group practice, both prepaid and fee-for-service, suggest this approach as a further way of preparing for national health insurance.

In summary, I believe the bill promotes the formation of high quality comprehensive group practice as one approach to the provision of high quality care and hopefully reduced costs. These practices should make medical care less costly, more convenient, and closer to the needs of our citizens; the bill mandates studies to see that this actually is the case. The bill is written in such a way as to encourage expansion of medical practices into rural and other medically underserved areas and is built upon the strengths of our present health care system.

GOLDEN ANNIVERSARY FOR GOVERNOR AND MRS. JOHNS

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. FUQUA. Mr. Speaker, Sunday marks the golden wedding anniversary for former Governor and First Lady of Florida, the Honorable and Mrs. Charley E. Johns.

It will be a special day of warm feeling for the friends of this distinguished couple, not because of position or honor, but because of the people they are.

It will also be a day when all of us, their friends, will say another prayer for their son, Jerome, and his family. This young man, a distinguished public servant in his own right, lies in the hospital recuperating from a very serious accident and it will be toward his recovery that Governor and Mrs. Johns' thoughts will be directed.

Few people can match the exciting and exacting life which has been that of the Charley E. Johnses. Few families have given more of themselves in service to others.

Governor Johns' father was once sheriff of Bradford County, Fla., and later was killed in the line of duty as a deputy sheriff in Nassau County, Fla.

Markley Johns, the Governor's brother, died after being designated president of the 1933 Florida Senate and it was his brother's ambition to complete that service—an aspiration realized when he became president of the 1953 Senate.

Tragedy was to strike our Sunshine State and fate again guided the life of Mr. and Mrs. Johns.

Gov. Dan McCarty died on September 28, 1953, after completing less than 9 months in office and Governor Johns, as president of the Senate, assumed the leadership of our State.

It was an administration that spurred highway construction and freed the Overseas Highway from tolls. At the conclusion of McCarty's term, he resumed his place as Senator from Bradford and Union Counties, serving through 1966—a total of 28 years as a legislator and chief executive.

During that career, Governor Johns was a strong advocate of prison reform.

It is fascinating to note that this good friend and gentleman was a railroad conductor and retains his seniority, but has been in the general insurance business for the past 40 years. He is also president of the Community State Bank of Starke.

Sunday has been designated by the Bradford County Commission as Governor and Mrs. Charley E. Johns Day.

It would be impossible to recount all of the contributions to others made by this couple and their family. Governor Johns served in the Florida House of Representatives for 2 years, beginning in 1935, and was then elected to the Senate to serve his other 26 years as a public official.

Those who know him can attest to the fact that no man has ever been more gentle nor compassionate when it comes to concern for others. It can also be said that he is as tough as nails when it comes to battling for his principles, convictions, and friends.

Mrs. Johns is a gentle and beautiful lady who made everything worthwhile.

I consider it a very real personal privilege to pay this tribute. And for all those who cannot be with them Sunday, for them and for me, no words of tribute or gratitude could ever prove adequate.

FOREIGN INVESTMENT IN THE U.S. FISHING INDUSTRY

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. AuCOIN. Mr. Speaker, the evidence continues to mount to suggest that this country's attitude toward foreign investment in the commercial fishing industry might ultimately become the undoing of the 200-mile coastal fishing limit.

Most recent is a letter which I received from the Director of the National Marine Fisheries Service in response to a protest I raised over the acquisition by a Japanese-owned U.S. corporation of the fishing vessel *Misty Moon*.

The letter states clearly that while the agency "sympathize(s) with your concerns, the parties are privileged under present law to enter, with the Maritime administration's approval, into the proposed transaction."

The letter goes on to state, however, that "the Fishery Conservation and Management Act of 1976 has, indeed, caused change in many of the conditions surrounding alien investment in domestic concerns privileged to own vessels entitled to operate in the U.S. zone as domestic fishing vessels. The pre-existing legal and administrative provisions for dealing with this situation have not, however, changed. Quite possibly, they no longer adequately accommodate the concerns and intent involved in enactment of the Fishery Conservation and Management Act."

The concern to which the agency refers is one that led this Congress to enact the 200-mile law 1 year ago. That concern was the fact that foreign vessels were sweeping the sea clean of stocks essential to the well-being of the U.S. fishing industry and the American people, without regard to sustained yield practices.

The 200-mile law put an end to that, so we thought, by expressly prohibiting foreign vessels from fishing for U.S. stocks not declared surplus to U.S. needs. Now we find that instead of a prohibition all we may have caused is a temporary setback for nations bent on gaining access to U.S. fisheries.

The proof lies in the fact that the *Misty Moon* expects to fish for Pacific coast salmon—a species specifically reserved for U.S. fishermen under the 200-

mile act, and, in fact, in such short supply that even American fishing groups are clamoring for a fair share.

I say to my colleagues that we are seeing just the tip of the iceberg. Unless we set forth rules now governing foreign investment in our fisheries the goals of the 200-mile law will be less laudable than laughable.

This is the reason I introduced H.R. 2564 and why I intend to work hard for its enactment. I hope my colleagues will join me.

CIVIL SERVICE RETIREMENT CREDIT FOR JAPANESE AMERICAN WORLD WAR II INTERNEES

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. MINETA. Mr. Speaker, today I am introducing a measure aimed at redressing a serious transgression from the principles of equality and justice upon which this Nation was founded.

In 1942, President Franklin Roosevelt issued Executive Order 9066 which forced the removal of 110,000 Japanese Americans from their homes on the west coast and incarcerated them in internment camps in the interior of the United States. Two-thirds of these persons were American citizens by birth and the remainder were barred from becoming citizens. The only reason for their removal was their Japanese ancestry.

Many of the Japanese Americans who suffered the stress of confinement, lost property, and the humiliation of being regarded as traitors by their own government had previously served this Nation as Federal employees. Others joined the U.S. Civil Service subsequent to their release from the detention and internment camps. Many more went on to serve and defend the United States in the Armed Forces. These people overcame a hostile environment and worked in the camps as teachers, cooks, policemen, medical personnel, military personnel, carpenters, and plumbers. They performed services in the camps which the Federal Government would have otherwise had to provide. Although they were compensated a small amount per month and technically were Federal employees, they received no fringe benefits and were denied the opportunity to participate in any retirement plans.

Although the detention and internment of Japanese Americans occurred more than 30 years ago, we should not allow ourselves to ignore the memory of those dark events. It would only bring further injustice to those denied their human and constitutional rights in the past and would deny the painful but important lessons to be taken from those times.

It is not too late to provide a means of acknowledgment for the suffering and auguish caused Americans of Japanese ancestry during World War II. The legislation I have introduced will, in some measure remedy this inequity in that it will allow for the crediting of time spent by Americans of Japanese ancestry in these camps under the Federal Civil Service Retirement System. In addition, my bill would insure that those who have already retired will also be covered. Legislation was enacted in the 92nd Congress which provided credit under the Social Security Act for the time spent by persons of Japanese ancestry in internment camps. However, Federal Civil Service employees are not eligible for work retirement credit through the social security system for the time they are employed by the Federal Government.

I am pleased to note Mr. Speaker, that this bill currently has 70 cosponsors. In addition, it has the support of a number of national organizations including the Japanese American Citizens League; American Federation of Government Employees; American Postal Workers Union, AFL–CIO; National Jewish Civil Service Employees, Inc.; National Association of Postmasters of the United States; National Post Office Mail Handlers, Watchmen, Messengers and Group Leaders Division of the Laborers' International Union of North America AFL–CIO; National Treasury Employees Union; National Association of Retired Federal Employees; National Federation of Federal Employees; and the Asian and Pacific American Federal Employee Council.

Through the adoption of a measure, such as the one I have introduced, we can achieve a form of equity on two bases. In the narrow sense, we can provide to Federal employees the same treatment afforded to present and future social security recipients interned during World War II. On a broader scale, we can provide some redress for the wrongful and deplorable actions of some 30 years ago—taken in the name of "the national security"—which deprived 110,000 individuals of their civil and human rights.

THE 200TH ANNIVERSARY WORSHIP SERVICE, BALDWIN MEMORIAL UNITED METHODIST CHURCH

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mrs. HOLT. Mr. Speaker, the Baldwin Memorial United Methodist Church of Millersville, Md., is celebrating its 200th anniversary this year. With humility and thanksgiving, the congregation marked the occasion last Sunday with a worship service at which the sermon was preached by Bishop James K. Mathews of the Baltimore Annual Conference.

This event has special significance for my family, because the first services of the congregation in 1777 were conducted at the home of John Sewell, from whom I am descended. Bishop Francis Asbury, the famous circuit rider who established many Methodist societies and chapels in Maryland, often preached at the Sewell home.

Those were the years of the American Revolution, but last Sunday the congregation was remembering those who had preached the Word of God in their parish over a period of 200 years. It is truly wonderful that the good work of this church continues even today, preaching the Gospel to a world that has lost much of its religious faith.

In the 200th Anniversary Worship Service, the people asked God to "continue to lead us in carrying out the responsibilities which our heritage places upon us as Christians and citizens of these United States." I believe that this is a prayer that many of us should utter daily.

I urge the Congress to join me in commending the Bicentennial Committee of the Baldwin Memorial United Methodist Church for the fine work it is doing to emphasize this heritage.

The committee is led by Rev. W. Kenneth Lyons, Jr., pastor of the church. It includes Mrs. Edith Duker, Edmund J. Dunnavant, Mrs. Mary Gottwals, Robert H. Hopper, Mrs. Catherine Hutchins, Mrs. Donelle Lyons, Mrs. Carolyn Miller, Mrs. Ruth Twigg, Mrs. Elizabeth Wilson, Patrick R. Wright, and Donad J. Yeskey, Jr.

THE SACCHARIN BAN

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. McKINNEY. Mr. Speaker, during the recent hearings on the Food and Drug Administration's proposed saccharin ban, held by the Subcommittee on Health and the Environment, I submitted testimony outlining many of my concerns and my reasons for cosponsoring the Martin bill to provide for an appeals process. Since that time the FDA has modified its original announcement and has proposed to permit the sale of saccharin by reclassifying it as a nonprescription drug to be sold over the counter. However, the FDA reaffirmed its intention to ban the artificial sweetener as an ingredient in food and beverages.

That the FDA should modify its original position only further adds to the confusion surrounding this issue and exacerbates emotions. And the statement of FDA Commissioner Donald Kennedy that a "moderate" use of saccharin by every American—the amount in one large diet soft drink taken daily over a lifetime—might lead to 1,200 additional cases of bladder cancer per year, raises serious questions over agency handling of this issue and its responsibility to fully inform the public.

In light of these developments, I believe my testimony remains pertinent and therefore insert it in the RECORD at this point.

The testimony follows:

STATEMENT OF THE HONORABLE STEWART B. MCKINNEY, M.C.

Mr. Chairman:

I too was stunned by the Food and Drug Administration's announcement of its pro-

posed ban on saccharin. The agency releases and the media coverage added to the general bewilderment for everything seemed so bizarre: the massive dosages administered to the rats in the Canadian study upon which the FDA based its ban; the comparable amounts of saccharin that would have to be consumed by humans; scientists debating the merits of the Canadian tests, pointing to other studies that prove the artificial sweetener to be completely harmless; and, of course, the asides that FDA is in industry's pocket and is using saccharin as the means to kill the Delaney Amendment.

While many of the proposals offered by constituents and colleagues to reverse the FDA decision sounded appealing, one thing I have learned from past dealings with the FDA is: be careful, move with deliberate speed. I have learned that few people know the intricacies and vagaries of the Food, Drug and Cosmetic Act. A person can become hopelessly ensnared in that law and find himself in great difficulty if he proceeds from gut reaction. I have found this to be true with respect to the saccharin controversy. Indeed, the more I study this issue the more fascinating it becomes in terms of the countervailing arguments to every premise set forth.

For example, the attention of public outrage has been directed at the Delaney Amendment to the Food, Drug and Cosmetic Act which requires the FDA to act against any substance shown to cause cancer in humans or animals, no matter how remote the risks may seem. Without question, such an unequivocal requirement leaves no room for evaluation of conflicting scientific evidence, nor does it give the FDA any flexibility to assess test data in terms of dosage, for example, and ask whether it makes sense to issue a blanket ban. In effect, the law admits no qualifications, while providing no guidelines.

Many bills have been introduced to amend the Delaney clause, to "make it more in touch with the realities of today's modern science." However, from my research I gather that even if the Delaney Amendment did not exist, the FDA would still have the authority, under the general food additive provisions of the Food, Drug and Cosmetic Act, to ban saccharin as a harmful substance in the food supply. Thus, changes in the language of the Delaney clause would not necessarily insure continued availability of saccharin to consumers and I am concerned that the public may be deluded into thinking that simple repeal of or an amendment to the Delaney clause is the answer.

I believe there is fairly widespread recognition that outright repeal of the Delaney Amendment would be a disservice to the American people. There is no question but that the clause has served our citizens well over the years by protecting them from additives which have been proved dangerous. Indeed, many believe the Delaney language is essential to prevent scientists from having discretion to decide whether the benefits derived from a cancer-causing agent outweigh the risks. Even if all the evidence is in defining acceptable risks to public health and weighing them is an extremely difficult job for there is no universally acceptable scientific basis for such discretion. Moreover, there is no known minimal dose below which a carcinogen can be considered safe and the effects of repeated exposure to carcinogens, even in minute quantities, may not show up for as much as 40 years. Congress then must not act precipitously on this issue and great care must be taken to insure that proposals to amend the Delaney clause are faithful to the basic concept of protecting the public interest.

Frankly, I am worried about the approaches embodied in some of the legislation introduced to resolve this issue. For example, to require all food additive safety tests to be based upon the probable human consumption (i.e., quantity) of the foodstuff or to insert the words, "in reasonable quantities," after "it is found to induce cancer when ingested," can, I believe, only invite further trouble. Such measures have been proposed, of course, because the rats in the Canadian tests were fed such large amounts of saccharin that a human being to ingest a comparable dose might have to drink 800 diet colas per day, or consume 1.5 million packages of artificial saccharin per year. These incredible amounts have met with vast ridicule. However, apparently cautious toxicologists as a matter of practice employ doses in the range of that utilized in the Canadian study before deciding whether a substance is safe. Defining and determining "reasonable amounts" for additives could involve us in endless controversy.

In addition, to require all food additive safety tests to be based upon the cumulative effect of the food additive in the human diet is to tread into the unknown. While indeed saccharin has been used by Americans for approximately 80 years—and much has been made of this fact to prove its safety—until very recently this artificial sweetener was not consumed in significant amounts.

It was during World War II that saccharin came into widespread use and it is expected that, should the suggested problems anticipated by use of this artificial sweetener prove true, increased bladder cancer will be occuring in the children born to mothers who consumed saccharin during World War II. It is estimated that it takes 20 to 40 years for tumors to appear. Because bladder cancers usually do not appear until about the age of 50 or after, it will be some 15 or more years before we can know the actual effect of saccharin use, since those children are now only 35 years old. Only time can provide us with the evidence we need concerning human consumption of saccharin, its interaction with body enzymes, and its carcinogenic propensities. At this time we do not have data regarding the cumulative effect of this particular food additive, much less others presently in use or which may be developed, and it would be dangerous to incorporate such a requirement in the law.

In addition, I cannot support measures amending the Food, Drug and Cosmetic Act to specifically bypass existing statutes and permit the sale and use of saccharin. Such a special legislative exception for saccharin would set a dangerous precedent. Should other additive controversies erupt, similar legislative exemptions would be sought for those agents as well, resulting in the hopeless undermining of the regulatory process. It is not nor can it be the role of Congress to make scientific judgments governing individual food additive decisions.

However, I do believe the saccharin controversy illustrates the need for incorporating an appeals process under the Food, Drug and Cosmetic Act—an appeals process not just for saccharin but for other additives and/or food substances which have been banned in the past and others which may be banned in the future. Hence I have joined my colleague, Congressman James Martin of North Carolina, in co-sponsoring his legislation to provide a mechanism for such an appeals process and to allow for reconsideration of an adverse determination by the FRA. Under this measure, the Secretary of Health, Education, and Welfare would be granted discretion to consider the benefits as well as potential risks of an additive in determining whether to grant approval for its use.

The Martin legislation does not repeal the Delaney clause. Rather, it insures a degree of flexibility in FDA decision-making by allowing an appeal of a proposed ban, something which is absent in the current testing procedure. And in making the finding regarding the public risks and benefits of a food additive, the Secretary of HEW can take into account the best evidence and expert judgment possible. Hence an opportunity would be available for evaluation of the scientific validity of tests and other pertinent animal feeding studies and human epidemiological studies. The FDA could then authorize continued use of the agent only if the Secretary found that the public benefits of such use clearly outweigh public risks.

Essentially the Martin proposal provides a vehicle for providing alternatives to the FDA other than banning a product when adverse test results are reported. If public benefits are then determined to outweigh public risks, the Secretary of HEW could authorize alternatives to reduce human exposure without a total ban. This could lead to restricted use; possibly the sale of saccharin products would be permitted when accompanied by a health warning, such as we have on cigarettes; or some other alternative devised.

To grant flexibility in FDA decision-making raises the question of government's role in protecting the public. Surely no one objects to government action in halting the production of Kepone or other such deadly chemicals that destroy the human nervous system. In that case the evidence was clearly before us in the bodily deterioration of many of our citizens. What, then, is the government's role in protecting the public from an agent not considered dangerous by its users where there is conflicting test data regarding its safety? Without question, flexibility in weighing the benefits against the risks of a food additive is a tremendous responsibility, a very delicate procedure with far-reaching ramifications. However, I believe the additive section of the Food, Drug and Cosmetic Act would be strengthened by the inclusion of the Martin bill. Should the dangers of a food substance be clearly delineated and test data conclusive, the Secretary of HEW would have little difficulty in reaching his determination. In cases like saccharin, however, where test results vary and the scientific community is divided on the question of its safety and efficacy, then the ensuing public uproar can only lead to an undermining of the effectiveness of our food safety laws and the governing regulatory agency. An appeals process is necessary so that the issues can be openly debated. In this way, not only will the public be educated on the possible hazards of the substance but they might also find renewed confidence in government and regulatory agencies.

INTENT OF HOUSE IN MODIFYING WATER POLLUTION CONTROL ACT AMENDMENTS

HON. RAY ROBERTS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. ROBERTS. Mr. Speaker, following our April 5 debate on the Water Pollution Control Act Amendments—H.R. 3199—several Members of the House have inquired as to the intent of certain elements of that legislation. They express fear that our actions will result in voluminous new EPA rules and regulations which will have the effect of further stifling that agency's construction grants program. It is imperative, therefore, that

we make clear, to the maximum extent possible, the intent of the House in proposing and adopting various modifications of the Water Pollution Control Act Amendments.

One such question stems from section 5 of that legislation. This section deals with the mechanics of combining step 2—design—and step 3—construction—grants. Under present procedures, the Environmental Protection Agency requires communities seeking wastewater treatment facilities to proceed through three separate steps prior to initiation of construction. A community asks for grant funds to conduct a feasibility study and to prepare a facility plan. This is known as step 1. Once the facility plan has been prepared, the community must submit a second application and undergo considerable time and effort in obtaining a step 2 grant to cover cost of designing the project. This process requires that a community comply with several hundred pages of regulations prior to authority to proceed with this step. Finally, after step 2 has been accomplished the community comes back with an application for money to begin construction. This is step 3, and the process by which construction funds are obtained is a near duplication of the numerous reviews and approvals accomplished prior to step 2.

Under the House bill passed earlier this week, a grantee on projects totaling less than $1 million, would be authorized to submit a single application for financial assistance covering both design—step 2—and construction—step 3. Instead of two grants, a single award will be made. This will reduce paperwork and processing time by a range of 4 months to 1 year.

This amendment has the support of the mayors, engineers, contractors, manufacturers, EPA, and virtually everyone associated with the construction industry.

However, this same group, and others who are on the firing line in the carrying out of the water pollution control program, have raised an important question. Does the House intend that the combining of step 2/step 3 grants be regarded as synonymous with the combining of step 2/step 3 contracts? While there is widespread support for combining grants, there is equally widespread concern that the language of section 5 also authorizes and endorses grantee reliance upon single contracts awarded to the same company to both design, construct, and, perhaps equip, a treatment facility.

As my colleagues are aware, the Federal Procurement Regulations (41 CFR 1-18.112) stipulate that—

> No contract for construction of a project shall be awarded to a firm or person that designed that project, except with the approval of the head of the procuring agency . . .

I feel certain that the House of Representatives has no desire to reverse this policy.

Accordingly, it is the opinion of the Water Resources Subcommittee of the House Public Works and Transportation Committee that the combining by EPA of step 2, and step 3 construction grants does not constitute blanket authority to that agency to approve single contracts for both design and construction. While this approach may be appropriate on a few selected projects, it is envisioned that the waste water construction grant process will continue to be carried out in the traditional manner. That process is to have plans and specifications prepared by independent engineers. Construction is then performed by independent construction contractors installing power equipment and materials purchased from independent manufacturers. This is the system used on the Federal highway program and it is a system which discourages even the potential for conflicts of interest.

Certainly our legislation is not intended to stimulate companies which manufacture certain equipment or systems to acquire engineering design firms as subsidiaries and then instruct those firms to plan projects in a manner that guarantees installation of the parent corporation's materials in the project.

Combining step 2 and step 3 grants is intended to eliminate one step in EPA's grant issuance process. This will accelerate small projects costing $1 million or less—projects which are estimated to comprise between 25 and 30 percent of all EPA grant awards.

CIVIL ENERGY FROM LASER FUSION: A GROWING REALITY

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. PURSELL. Mr. Speaker, today I am inserting the seventh installment of my series on laser fusion. I would like to discuss the need for civilian research and development in the area of laser fusion.

In the part of the country I come from, the great manufacturing State of Michigan, people are fully aware of the role of industry in the American system. Automobiles, to cite the major example, are made by strong and aggressive industrial organizations, not Government agencies.

We know, too, that research and development was a university function—with the example of the University of Michigan in my district, one of the outstanding institutions of higher learning in the world—and an industrial function long before it was a Government function.

World War II, uavoidably, forced the establishment of research and development facilities which simply did not fit into the industrial structure of the Nation, even though industrial groups managed some of them. Universities managed the rest, such as the magnificent institutions as the Argonne National Laboratory in Chicago which fathered nuclear reactors for power and the weapons laboratories such as Livermore and Los Alamos. These are Government-funded facilities. The Lawrence Livermore Laboratory and the Los Alamos Laboratory are maintained for defense purposes, most of their work is classified. Therefore, they necessarily concentrate on the military application of nuclear energy, and I must say, they have done a superb job in keeping this country ahead in nuclear weapons.

The strength of America in research and development is in all three areas—Government, universities and industry. All must be utilized in maintaining this country's leadership of the free world and in sustaining our own system of individual freedom and economic opportunity in an orderly and just society. We cannot keep our Nation going without a continuing search for and constructive application of new knowledge.

The essence of the search for knowledge is freedom of investigation. It is the source of this Nation's technological strength. The lesson was clear in the testimony given March 4 before the Subcommittee on Fossil and Nuclear Energy Research, Demonstration and Development of the Committee on Science and Technology. The witness was my own constituent, Dr. Henry J. Gomberg, chairman and chief executive officer of KMS Fusion, Inc., of Ann Arbor, supported by his company's executive scientist, Nobel Laureate, Dr. Robert Hofstadter.

They testified to the lack of scientists in industry and the universities seeking the civilian applications for laser fusion.

It is clear now, from work done since 1971 by KMS, and since 1974 in the Government nuclear weapons laboratories, that laser fusion has great promise for civilian applications, particularly as a new source of energy. Unfortunately, ERDA holds rigidly to a policy of keeping laser fusion research work in only Government laboratories.

Dr. Gomberg, referring to testimony prepared by ERDA for the same subcommittee, quoted the major program milestones for the Government's in-house laser fusion program as providing "immediate benefits in weapons technology development, near-term benefits in weapon effects simulation, and lay the groundwork for potential long-term benefits in civilian power technology development."

He agreed with the characterization of the program managed by the ERDA Division of Laser Fusion as an "orderly low-risk approach to feasibility demonstration," pointing out that the majority of the base program is in the weapons laboratories, with industry in a supporting role to the single government-dominated weapon-oriented effort to exploit laser fusion technology to meet the Nation's energy needs.

Dr. Gomberg's criticism of this approach was mild. He acknowledged that he was treading dangerous ground because his company's work is totally dependent upon Government funding. But it is the technological spearhead type of work undertaken by KMS which our country needs. He makes it very clear that we need something more than an orderly low-risk approach, and Dr. Gomberg was equally emphatic that we must have more than one approach, and certainly one not determined by military requirements.

It was his position that the potential for beneficial civilian application of laser fusion is just as great as the military

application. A new source of civil energy is certainly important to national security. But while we wait for military application and civil energy, Dr. Gomberg cites cancer therapy as one application ready for study now by an international team. His company has proposed this study to ERDA but the matter is apparently too far down the military-headed list of priorities.

Not being a member of the subcommittee dealing with this problem, I am taking this opportunity to present to my colleagues in the House my very strong views on the necessity for industrial participation in laser fusion development for civil energy purposes. I want to associate myself with Dr. Gomberg's views, but also go beyond that.

First, if what Dr. Gomberg attests is true, then I think we are confronted with a bureaucracy which hides behind national defense and defies the will of Congress as expressed in authorization and appropriation bills over the past 2 years. The effectiveness of the Congress as a coequal branch of a Government of balanced power depends largely upon control of the purse strings. I think we should examine the record on this matter.

In the conference report to accompany H.R. 14236, report No. 94–1297, public works appropriation bill, fiscal year 1977, it was stated:

> The conferees agree that no less than $10,000,000 of the total amount for the laser fusion program is to continue to ongoing research and development work at KMS during fiscal year 1977.

However, ERDA reduced the amount to $7 million and changed the KMS "ongoing research and development work" to, in the words of the agency's press release "* * * perform research to fabricate target pellets for use in laser fusion experiments," and then to test the pellets "using the ERDA-owned laser system at KMS." The release did not explain that these pellets were for laser fusion experiments to be conducted in the Government laboratories primarily for weapons work and possibly not at all for civil energy.

This was not the ongoing KMS program. This was a program which Dr. Gomberg had advised my predecessor, the Honorable Marvin L. Esch, by letter of December 23, 1976, had been proposed by ERDA in the spring, prior to the passage of the Public Works Appropriations Act. The contract was announced on December 2.

Since the first authorization by the Joint Committee on Atomic Energy in the spring of 1975, the intent of Congress has been clear that the industrially initiated approach to laser fusion being pursued in the KMS laboratories be funded by ERDA. The agency has completely distorted the program to serve its own objectives and support the Government in-house effort.

Early this month, the Los Alamos Scientific Laboratory announced a successful experiment in obtaining thermonuclear neutrons with a gas laser. The accomplishment is significant for civil energy laser fusion, analogous to the May 1974 experiment of KMS. Fourteen months ago, KMS arranged with the Max Plank Institute in Germany to import a gas laser for similar purposes. ERDA denied the funds, $50,000 initially, $200,000 in total.

I have touched the high spots of the record of the Government's handling of the development of laser fusion for civil energy. There is much more in the documentation of the committees and subcommittees of both Houses of Congress, in the files of Michigan Senators and Representatives, at the Ann Arbor offices of KMS, and doubtless in the files of the old Atomic Energy Commission, which from the fall of 1969 until the spring of 1971, banned the work by KMS, and now in the files of ERDA.

This is not a good record. My hope is that the new Department of Energy will have a better record, but we in Congress must continue our vigilence and insure that all reasonable avenues of scientific research are pursued especially in the development of energy.

CAN A LIBERAL BE ANTICOMMUNIST?

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. DORNAN. Mr. Speaker, it has often been stated by some self-styled liberals that those Americans who view communism as a threat to the liberties and security of America are naive doomsayers and alarmists who imagine a Red behind every bush. According to their own interpretation of world events, these purblind liberals insist that Communists desire peace and friendship above all else. If only the United States were to trust the Soviets, to placate the Soviets with gifts, and to negotiate away our antagonistic weapons systems, all would be well with the world. This "liberal" interpretation of East-West relations holds that the two superpowers can work together and that the Soviets and the Americans should be traveling the same road hand in hand. Those who do not agree with this interpretation are pitiful provincials whose opinions should be borne with sufferance and not a little humor.

These spurious statements have been so well publicized that many Americans believe them to be truly representative of the beliefs of all liberals. If someone calls himself a liberal, then he must embrace these fallacious tenets.

But contrary to public opinion, there are liberals who do see the real threat the Soviets pose—although they do not yet see the connection between their two philosophies. These realistic liberals belong to the Committee on the Present Danger which has recently published a report entitled "What Is the Soviet Union Up To?"

Few would describe this committee's members as conservative or accuse them of being naive provincials. Included among its members are some of the most outstanding liberal Americans of recent years: Lane Kirkland, Dean Rusk, Eugene V. Rostow, John P. Roche, and Elmo Zumwalt. Their experience and sophistication cannot be impugned and their liberal credentials are impregnable. And yet these men and their colleagues on the committee see the Soviet threat clearly and say so.

The report which I have mentioned warns of the very real and present danger posed by the Communists. The report notes the inherent differences in the Soviet and American systems and the long term goals of the Communists. The attainment of a Communist world order is the ultimate Soviet objective and the attainment of that goal requires the reduction of the United States to a state of impotence. The informed liberals who drafted the report know further that the Communists use many strategies: Economic, diplomatic, political, ideological, and military.

> In theory and in practice, Soviet grand strategy conceives military power as only one weapon (albeit a central and indispensable one) in a large arsenal of means of persuasion and coercion.

These open-eyed liberals also know the right solution to the threat of world Communist domination: Vigilence and strength on the part of America.

Because I believe that many of my colleagues will not listen to those whom they believe to be naive doomsayers and alarmists, I would like to call their attention to the text of this report and the list of members of the Committee on the Present Danger. What they ignore when mouthed by tough-minded conservatives, they may hear when mouthed by tough-minded liberals.

The text follows:

WHAT IS THE SOVIET UNION UP TO?

A rich, democratic and seemingly secure country such as the United States tends to conceive its national aspirations in domestic terms: full employment, less inflation, better health care, a higher standard of living and improved opportunities. International objectives are defined primarily in broad terms, such as enduring peace, preservation of human rights and a freer flow of people and goods. Both at home and abroad, our open, democratic society, with its many centers of decision-making and limited constitutional government, is committed to these objectives.

The Soviet Union is radically different from our society. It is organized on different principles and driven by different motives. Failure to understand these differences and to take them seriously constitutes a grave danger to the democratic societies. We tend to think of others as being like ourselves and likely to behave as we would under similar circumstances. This habit of "mirror-imaging" leads many Americans to ignore, to rationalize or to underestimate the Soviet challenge.

There are many reasons why the Soviet Union is different from the United States, but the most important are rooted in its history and geography, its economic conditions and structure, and its political system and ideology.

Notwithstanding its vast territory and rich mineral resources, the Soviet Union can only with difficulty support its population. Its extreme northern latitude makes for a short agricultural season, a situation aggravated by the shortage of rain in areas with the best soil. Its mineral resources, often located in areas difficult to reach, are costly to extract. Its transportation network is still inadequate. These factors have historically been among those impelling Russia—Tsarist and Soviet alike—toward the conquest or domination of

neighboring lands. No empire in history has expanded so persistently as the Russian. The Soviet Union is the only great power to have emerged from World War II larger than it was in 1939.

Soviet economic deficiencies and their effects are aggravated by the character of the regime and the lengths to which it goes to maintain its hold. Except for brief periods in its history, Russia has been governed by small elites unresponsive to the needs and dsires of the population at large. After the Bolshevik Revolution of 1917, power bec'me even more concentrated than under the Tsars.

Soviet Russia today is a country in which a ruling elite and those whom it designates live comfortably, while the remaining 250 million citizens not only have few material advantages but are deprived of basic human liberities. This elite can enjoy its monopoly of advantages only so long as it is able to keep the deprived population under effective control—a significant relaxation of that control could spell the end of its favored status and advantages. The elite, however, is not guided merely by self-serving motives. The Soviet leadership asserts that it is the vanguard of a revolutionary society which has discovered the fundamental laws of history. The openly stated ultimate Soviet objective is the worldwide triumph of Communism. This triumph would give the Soviet elite ready access to the world's resources, both human and material; it would also do away with all external challenges to its privileged position by eliminating once and for all alternative political and social systems.

Through its highly authoritarian regime, the Soviet ruling elite is able to coordinate and pursue its international objectives in a relatively coherent manner. This is not to say that it has set "time-tables" or drawn up specific "blueprints" for conquest or domination. Such precise schedules are simply not possible in an unpredictable world. It does mean, however, that the Soviet elite, as directed by the Politburo, c'n exercise total control of the country's political institutions, economic resources and media and set for itself short-term as well as long-term objectives, disregarding the wishes of its own population. By varying its tactics to suit changing circumstances, it can pursue these objectives in an organized and decisive manner, taking advantage of every opportunity to enhance its power in the world.

Because Russia was the first country to experience a Communist revolution and because it is likely to remain the most powerful Communist state, the Soviet elite believes that in a Communist world it should lead and dominate.

However, the Soviet elite now indicates, perhaps for tactical reasons, that it is prepared to accept less. Some outside observers believe that it may have no choice but to acquiesce in the compromise ideal of a polycentric global Communist community in which the Soviet Union is not so much the directing center as the first among equals. In any event, the notion of a stable world order in which nations based on differing political principles cooperate rather than contend is alien to Soviet psychology and doctrine. According to Soviet theory, "peaceful coexistence" is not a concept involving a stable world order, but a strategy that adapts the methods of waging international conflict to the era of nuclear weapons, an era which, because of its inherent dangers, more than ever before calls for the patient and prudent pursuit of global objectives.

The attainment of the ultimate Soviet objective—a Communist world order—requires the reduction of the power, influence and prestige of the United States, the country which the Soviet leaders perceive as the central bastion of the "capitalist" or enemy camp. They see the global conflict as a drawn-out process with the Soviet Union and America the two principal contenders. In that contest they see their task as isolating America and, despite temporary reverses for their side, reducing it to impotence.

In its global activities the Soviet Union pursues a "grand strategy" involving the use of a great variety of means to attain the ultimate end: the reduction of any potential opponent's ability to resist. These means include economic, diplomatic, political and ideological strategies against a background of military strength, to be used separately or together as instrumentalities of power. The Soviet eagerness to increase its trade with the Western world or to participate in arms limitation negotiations does not preclude politico-military campaigns to outflank and envelop centers of non-Communist influence, such as the long and patient Soviet efforts to penetrate and dominate the Middle East, and now the drive, supported by client states, to establish regimes friendly to Soviet domination in Africa.

It would be incorrect to see the US-USSR rivalry exclusively in terms of the military balance. The conflict extends across the spectrum of political, cultural and economic relations. Propaganda is a weapon. Trade is a weapon. In theory and in practice, Soviet "grand strategy" conceives military power as only one weapon (albeit a central and indispensable one) in a large arsenal of means of persuasion and coercion.

The peoples of the Soviet Union have suffered enormously in past world wars. Their rulers would doubtless prefer to gain their objectives without another. But they believe they can survive and win a war if it comes and therefore are not unwilling to risk confrontation in order to attain their objectives.

The principal medium-term objectives of Soviet grand strategy include:

1. Strengthening the Soviet economy through a process of intensive modernization as an essential prerequisite to the improvement of the country's military capacity. This aim is to be achieved in part by heavy borrowing of capital and technology in the advanced "capitalist" countries, and in part by accelerating the integration of the economies of the Communist countries. The desire for access to foreign capital, credit and know-how has been an important factor in the support by the Soviet elite of Western emphasis on "detente."

2. Multiplying and tightening the links connecting Western Europe to the Soviet Union and its dependencies, and concurrently cutting it adrift from the United States. The partial or total integration of West European economies into an expanding Communist economy would give the Soviet bloc that level of productive and technological capacity which it requires to be able to deal with the United States from a position of potentially intimidating strength. With this vital objective in mind, the USSR has acquiesced in the adoption by the leading West European Communist parties of more flexible programs and tactics. The experiences of Chile and Portugal show that only through such an approach can Communist parties have a chance of coming to power and paving the way for Soviet hegemony in Western Europe. They hope to profit from a growing perception in Western Europe of a decline in United States will and power and a concurrent illusion that the Soviet threat has ended. This would bring about the fatal weakening of NATO and help ease the United States out of Europe.

3. Undercutting the economic links connecting the "capitalist" world, and especially the United States, with the countries of the Third World, on the assumption that lack of access to the raw materials, labor and markets available in these countries would throw the industrialized democracies into a series of fatal convulsions. Particular attention is paid to energy resources, especially oil. The USSR wishes both to make oil more costly (in part to profit from its own oil exports) but more importantly to be in a position to control oil supplies necessary to the West and thus to be able to exert political and economic pressure.

4. Containing and isolating China, which the USSR presently does not fear as a military power but about which it has profound, almost atavistic anxieties as a long-term threat. Although Moscow still hopes to mend relations with the post-Mao regime, the Soviet leadership fears that unless China is dismembered through the separation of border regions (such as Manchuria and Tibet) and the creation of buffer states, it will pose a growing long-term threat. The USSR still maintains an estimated 45 divisions in Siberia along the border with China.

Although the pursuit of these four aims calls principally for the use of economic and political measures, the ultimate instrument—and the backbone of Soviet strategy—is military power. The principal instrument at its disposal with which it can realistically expect to surpass the United States, its allies and friends in overall strength is military power.

To be sure, at present the Soviet Union lags behind the United States in both productive capacity and many areas of weapons technology, but our lead in these particulars may not last forever. Moreover, the USSR can compensate for current deficiencies with other advantages. Its leadership is not restrained by democratic dissent, legislative limitations or public opinion in expending the country's resources on the military, and it can and does commit a disproportionately high share of its limited resources to its objectives.

It can also mobilize its population at will, whether to undergo compulsory military training or to participate in civil defense. Nor is it inhibited internally in the way it disposes of these forces; it can send military aid or dispatch its military forces to any part of the world where opportunity beckons. It can also influence client states to take similar action. These inherent advantages cause the Soviet leadership to rely heavily on military policy as an instrument of grand strategy not only in the strictly military sense of subduing and conquering, but also in the political sense of intimidating potential opponents.

The Soviet military buildup of all its armed forces over the past quarter century is, in part, reminiscent of Nazi Germany's rearmament in the 1930s. The Soviet buildup affects all branches of the military: the army, the air force and the navy. In addition Soviet nuclear offensive and defensive forces are designed to enable the USSR to fight, survive and win an all-out nuclear war should it occur.

The SALT I arms limitation agreements have had no visible effect on the Soviet buildup. Indeed, their principal effect so far has been to restrain the United States in the development of those weapons in which it enjoys an advantage. Nor has the self-imposed restraint by the United States in the past decade in the development and deployment of its strategic nuclear forces evoked similar restraint on the part of the USSR. On the contrary: the Soviet Union has shown a determination to forge ahead with the development and deployment of all weapons which promise to enhance its global military posture. Neither Soviet military power nor its rate of growth can be explained or justified on grounds of self-defense.

By its continuing strategic nuclear buildup, the Soviet Union demonstrates that it does not subscribe to American notions of nuclear sufficiency and mutually assured deterrence, which postulate that once a certain quantity and quality of strategic nuclear

weapons is attained, both sides will understand that further accumulation or improvement becomes pointless, and act accordingly. Soviet strategists regard the possession of more and better strategic weapons as a definite military and political asset, and potentially the ultimate instrument of coercion. The intensive programs of civil defense and hardening of command and control posts against nuclear attack undertaken in the Soviet Union in recent years suggest that they take seriously the possibility of nuclear war and believe that, were it to occur, they will be more likely to survive and to recover more rapidly than we.

In recent years, the Soviet Union has been increasing its military expenditures at an annual rate of at least 3 to 4% while the United States has until recently been decreasing its military expenditures at a rate of 3%, taking inflation into account in both cases. The experts disagree as to whether the Soviet Union is already ahead of the United States in military strength, either overall or in particular theaters. However, we are convinced, and there is widespread agreement among knowledgeable experts, that if past trends continue, the USSR will within several years achieve strategic superiority over the United States. The USSR already enjoys conventional superiority in several important theaters.

Superiority in both strategic and conventional weapons could enable the Soviet Union to apply decisive pressure on the United States in conflict situations. The USSR might then compel the United States to retreat, much as the USSR itself was forced to retreat in 1962 during the Cuban missile crisis. As an example, one could conceive of another war in the Middle East in which the USSR, having acquired local conventional superiority and overall nuclear superiority, could compel the United States to withdraw its influence from that area.

Soviet pressure, when supported by strategic and conventional military superiority, would be aimed at forcing our general withdrawal from a leading role in world affairs, and isolating us from other democratic societies, which could not then long survive.

Thus conceived, Soviet superiority would serve basically offensive aims, enabling the USSR to project its power in various parts of the globe without necessarily establishing a major physical presence in any single country. Soviet strategic superiority could lead the USSR to believe that should it eventually succeed in isolating the United States from its allies and the Third World, the United States would be less likely, in a major crisis, to lash out with strategic nuclear weapons, in a desperate attempt to escape subjugation.

The Soviet doctrine calls for ambitious goals; Soviet actions confirm that it continues persistently to pursue those goals. Its resources are limited, it confronts major internal difficulties, and its forays into world politics often experience setbacks. Nevertheless, it is driven by internal, historical and ideological pressures toward an expansionist policy which, given its enormous military might, makes it a uniquely dangerous adversary. There is no evidence that SALT, expanded economic and cultural relations, the Helsinki agreement, or any of the other features of "detente" have weakened the Soviet drive. Its objectives are global, its instrumentalities varied, and its ability to pursue long-term objectives while exploiting short-term opportunities remains unchanged.

To ignore declared Soviet intentions and demonstrated Soviet capabilities in an erroneous conviction that we have enough to defend ourselves and that there is always "time" to strengthen ourselves could prove to be fatal shortsightedness. In the nuclear age "enough" may not be enough, and "time" may run out unless our efforts keep pace.

We live in an age in which there is no alternative to vigilance and credible deterrence at the significant levels of potential conflict. Indeed, this is the prerequisite to the pursuit of genuine detente and the negotiation of prudent and verifiable arms control agreements that effectively serve to reduce the danger of war.

Weakness invites aggression, strength deters it. Thus, American strength holds the key to our quest for peace and to our survival as a free society in a world friendly to our hopes and ideals.

The preceding statement, "What Is the Soviet Union Up To?", was drafted and unanimously approved by all 17 officers and members of the Executive Committee of the Committee on the Present Danger:

Richard V. Allen, President, Potomac International Corp.; former Deputy Assistant to the President for International Economic Affairs.

Henry H. Fowler, Partner, Goldman, Sachs & Co.; former Secretary of the Treasury.

Edmund A. Gullion, Dean, Fletcher School of Law and Diplomacy.

Rita E. Hauser, Attorney, Stroock & Stroock & Lavan; former Representative to the Human Rights Commission of the United Nations.

Max M. Kampelman, Attorney, Fried, Frank, Harris, Shriver & Kampelman; President American Friends of the Hebrew University.

Lane Kirkland, Secretary-Treasurer, AFL-CIO.

Charles Burton Marshall, School of Advanced International Studies, Johns Hopkins University; former Member, Policy Planning Staff, Department of State.

Paul H. Nitze, Chairman, Advisory Council, School of Advanced International Studies, Johns Hopkins University; former Deputy Secretary of Defense.

David Packard, Chairman of the Board, Hewlett-Packard Co.; former Deputy Secretary of Defense.

Richard E. Pipes, Professor of History and Director, Russian Research Institute, Harvard University.

John P. Roche, Professor, Fletcher School of Law and Diplomacy; Special Consultant to President Johnson.

Eugene V. Rostow, Professor of Law, Yale Law School; former Under Secretary of State for Political Affairs.

Dean Rusk, Professor, School of Law, The University of Georgia; former Secretary of State.

Charles Tyroler, II, President, Quadri-Science, Inc.; former Director of Manpower Supply, Department of Defense.

Charls E. Walker, Charls E. Walker Associates, Inc.; former Deputy Secretary of the Treasury.

Richard J. Whalen, Author and Journalist.

Elmo R. Zumwalt, Jr., Admiral, U.S.N. (Ret.); former Chief of Naval Operations.

DEFENSE PRIORITIES

HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. WALKER. Mr. Speaker, my fellow Pennsylvanian, the Honorable Marc Lincoln Marks, addressed the 29th annual military ball at Gannon College in Erie, Pa., on April 16. His remarks to this group of ROTC cadets are particularly cogent in terms of the bill we are to consider tomorrow, the military procurement and research and development authorization for fiscal year 1978. I include Mr. Marks' suggestions in the CONGRESSIONAL RECORD for the benefit and use of my colleagues:

REMARKS BY MARC LINCOLN MARKS

Ladies and gentlemen, I am most honored that I have been selected as the guest speaker at this 29th Annual Military Ball sponsored by the Gannon College ROTC Cadet Battalion.

I see before me tonight fine examples of the dedicated men and women who have so much to contribute to a vital U.S. Army. I commend your enthusiasm and vigor, and wish you well in your endeavors that lie ahead.

As active participants in Army ROTC, you carry forward the American tradition of military training in civilian colleges. Ever since 1819, our institutions of higher learning have contributed well-prepared, intelligent young officers to serve the nation in war and in peace.

During the turbulent Vietnam war years, the role of ROTC and its presence on America's campuses became a matter of controversy. Some colleges went so far as to discontinue their affiliation with ROTC.

There were some who argued in opposition to the long tradition of military instruction in civilian colleges. In their opinion, instruction in warfare had no place in a liberal arts environment. Curiously, those individuals who protested their abhorrence to militarism and the creation of a war-making elite were also the ones who wanted to isolate the training of our future officers and remove them from a broad-based educational atmosphere.

Fortunately, this kind of opposition to ROTC seems to have subsided now that America again is at peace.

ROTC enrollment presently is continuing to rise, and, according to Major General Charles Rogers, the Deputy Chief of Staff for ROTC, there is a "real rewakening" of interest in ROTC. The Department of Defense estimates that ROTC will produce over 10,000 officers for the Army, Navy, and Air Force in 1977. As far as the Army is concerned, at any one time about 70 percent of the second lieutenants and 51 percent of the Regular Army officers on active duty are ROTC products.

It is certain that the importance of Army ROTC will continue to increase in this era of the All-Volunteer Army. The diversity of background, the strong liberal arts training, and the spirit and commitment of ROTC cadets will insure the quality leadership our Army needs.

I have no doubt that you will respond well to the tasks your country will require you. My concern is that the policymakers in Washington plan carefully the role you and others will play in carrying out our defense commitments.

I think we lawmakers and the planners in the Pentagon should give more thought to overall policy objectives. Although I have only been in Washington for a short time, I sense that perhaps too much emphasis is given to individual weapons system rather than to structuring and setting the priorities of a coherent global defense posture.

For example, there has been a lot of debate about whether the B-1 bomber represents a wise expenditure of our tax dollars. While there clearly are important decisions to be made in this regard, I think there are essential questions we first must resolve about what missions there are in the present and the future for manned strategic aircraft in our defense inventory. In other words, let's develop our strategic objectives first, and then consider the weapons systems in light of those objectives.

This problem will be brought home to the House of Representatives next week when we are scheduled to consider the Military Procurement Authorization bill for Fiscal

Year 1978. The bill contains a procurement and research budget of more than $35.9 billion. This figure, set by the House Armed Services Committee, is about $61 million more than the Carter Administration requested.

Certainly $35.9 billion is a staggering amount of money, especially at a time when the public seems to be clamoring for reduced Federal spending.

I am not opposed to spending large sums of money for defense, if such expenditures are necessary to maintain our security. I think most Americans share this view.

What does concern me, however, is that such outlays be well-planned, tailored to meet specific goals, and cost-benefit efficient. In a time of scarce fiscal resources and competing budgetary priorities, we cannot afford to settle for anything less. Reports of defense cost-overruns, equipment that fails to perform according to specifications, and purchases of weapons that lag behind advances in the technological state of the art justly trouble our citizens and undermine confidence in the defense establishment.

As I approach the upcoming votes on the Military Procurement bill, I suppose most of my constituents would give me the following advice: "Make sure you vote to keep us strong militarily. Don't let us fall behind the Russians. But, be careful how you spend my money. Buy what we need, but don't go overboard. Try to get the most bang for the buck."

I will try to respond to these concerns and balance the competing considerations as I listen to the Floor debate and cast my votes on the amendments that are offered when the bill is before us. I will do what I can to insure that our national interests remain secure.

What troubles me is that there will be much time consumed debating whether certain programs should be terminated, maintained, or expanded, but less discussion of a cohesive defense strategy to which they relate. I am afraid that concentration on the technical aspects of this defense budget may obscure the policy questions that should be aired and answered.

When we talk about the defense budget, attention generally is focused on nuclear weapons and the impact of the SALT talks. Interestingly, however, we spend almost 70 percent of our defense dollar on general-purpose ground, naval, and air forces.

Within the context of the important general-purpose forces segment of the defense budget, I would like to point out two areas that highlight the problem I have been discussing.

One of the most controversial issues with respect to conventional forces has been the future of the U.S. Navy. The Navy holds two basic missions—sea control and power projection ashore. Sea control in a wartime situation would keep sea lanes open to allies and allow the United States to project power ashore in the form of carrier and/or amphibious operations.

As with strategic forces, there have been charges that the naval balance is shifting dangerously against the United States. A report by the Potomac Associates think tank points out that this position has been underscored by the recent growth of the Soviet navy, the more frequent presence of Soviet warships in areas distant from the U.S.S.R., and open Soviet proclamations of a more active role for Soviet naval power, especially in a series of articles by Soviet Naval Chief Gorshkov.

In response to these developments, the Ford Administration sought and obtained increased shipbuilding funds, as a first step toward a proclaimed goal of a 600-ship force by the late 1980s. The current force level is just under 500, and ship construction since 1968 has not even been at a replacement level. Full aceptance of the 600-ship goal would mean a major reversal of priorities, and would more than double shipbuilding budgets.

The trend toward greater emphasis on combat ships is continued by the procurement bill approved by the House Armed Services Committee. While the Committee reduced the Carter Administration's request for auxiliary ships, such as tankers and tugs, it increased the number of attack submarines and approved funds for the power plant of a nuclear-powered strike cruiser the Administration had not requested.

I am sure that the wisdom of these additions and reductions will be discussed when the billis on the Floor. No doubt the costs, specifications, and capabilities of the vessels in this part of the legislation will be examined.

I think that the policies we are attempting to implement through decisions on these vessels also should be examined. Are we, in fact, trying to reach a goal of 600 ships? If so, how will these ships be deployed? What sea lanes are we trying to keep open? What, for example, are our naval interests off the coasts of Africa? In the Indian Ocean? What role do our allies play in our global naval posture?

In my opinion, the answers to these sort of questions will determine our priorities concerning submarines, carriers, destroyers and frigates, and support craft. By defining objectives and shaping the tools to carry them out, we can get the most value from our defense dollars.

It is essential that Congress address itself to the task of establishing a comprehensive, national policy on the missions and fleet requirements of the Navy. Indeed, the Center for Defense Information has gone so far to declare that, "The most pressing American military problem is to define the Navy of the future and what must be done to build for it."

Authorizing naval procurements for next year is not a sufficient response to that challenge.

I suppose I've talked long enough about the Navy now, in front of an Army ROTC audience! It's time to turn to the second area of the general-purpose forces part of the budget I want to discuss—U.S. NATO forces.

There is no doubt that the U.S. commitment to NATO will continue to remain strong. Vice President Mondale reassured our Western European allies about this during his trip to Europe in January. "While we are going to find economies in the defense budget," he said, "it will not be reflected in cuts in NATO muscle." The Vice President also stated that the United States would make no unilateral withdrawal of troops from Europe.

The bill reported by the House Armed Services Committee does not contain any cuts with respect to the U.S. role in NATO.

In past Congresses, during consideration of the military procurement legislation there has been heated debate over amendments to reduce the number of U.S. troops stationed in Europe. While it is possible that someone again might offer an amendment to bring about some troop reductions, I don't think the issue has the force it once did. Further, the Carter Administration's opposition to such cutbacks tends to take the steam out of efforts in this regard.

I would like to see Congress focus on the qualitative aspects of our NATO commitment. How best can we respond to the threats posed by the Warsaw Pact?

The Warsaw Pact has a 220,000-man advantage over NATO in combat manpower, and a 12,000-tank edge in terms of armor. The prospect of a quick, non-nuclear Communist Bloc attack on Western Europe continues to trouble NATO planners.

I believe the time is at hand for a re-examination of how we intend to handle this challenge. What part do U.S. ground forces in Europe play in an invasion scenario? Are they adequately equipped to carry out their mission? Can we meet a tactical threat from the Warsaw Pact, or would we be forced to respond with nuclear weapons? These are among the basic questions we need to answer.

With policies firmly established on these matters, then more intelligent decisions can be made concerning the shopping list for weapons. The role of the new main battle tank and the development of new precision-guided "smart" anti-tank weapons can be placed in better perspective once our overall objectives are made more precise.

The future of the Navy and the quality of our commitment to NATO are two examples of areas where Congress needs to work with the Administration to develop long-range, cohesive policy objectives. In my opinion, the creation of more clearly defined defense strategies will bring more lucidity to the weapons procurement process. It will help us make more sense out of what we are buying and why we are buying it. And this, in turn, will allow us to see more clearly how the defense budget relates to our other priorities.

These are some of the general thoughts in my mind as I approach my first votes on military procurement. I intend to do all that I can to guarantee that our country remains strong and secure in the face of any foreign aggression.

Thank you.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, April 21, 1977, may be found in the Daily Digest section of today's RECORD.

MEETINGS SCHEDULED

APRIL 22

8:00 a.m.

Agriculture, Nutrition, and Forestry

To continue markup of S. 275, to amend and extend through 1982, the Agriculture and Consumer Protection Act of 1973.

322 Russell Building

9:00 a.m.

Appropriations

Interior Subcommittee

To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior, to hear public witnesses.

1114 Dirksen Building

Commerce, Science, and Transportation

To hold hearings on the nomination of Jordan J. Baruch, of New Hampshire, to be an Assistant Secretary of Commerce.

5110 Dirksen Building

Foreign Relations
International Operation Subcommittee
To hold hearings on proposed fiscal year 1978 authorizations for the USIA and Department of State Cultural Exchange Program.
4221 Dirksen Building

HOUSE OF REPRESENTATIVES—*Thursday, April 21, 1977*

The House met at 11 o'clock a.m.

Rev. Lawrence J. Seyler, St. Philips Chapel, New Hope, Pa., offered the following prayer:

From the cowardice that shrinks from new truth;
From the laziness that is content with half-truth;
From the arrogance that thinks it knows all truth;
O God of Truth, deliver us.

Gracious God, we give thanks for this good land and its people. We are grateful for these Representatives who have dedicated themselves to public service. Grant them wisdom and strength to serve our country and our world, wisely and honorably. Give them the will to listen to the concerns of this people, but also the courage to lead us, that our prospects for equality, liberty, justice, and peace may be enhanced. Assist us all that we may pass on our rich heritage, reasonably intact, so that generations to come may also give Thee thanks. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate insists upon its amendments to the bill (H.R. 3843) entitled "An act to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, and for other purposes," disagreed by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. PROXMIRE, Mr. SPARKMAN, Mr. WILLIAMS, Mr. BROOKE, and Mr. GARN to be the conferees on the part of the Senate.

TRIBUTE TO REV. LAWRENCE SEYLER

(Mr. KOSTMAYER asked and was given permission to address the House for 1 minute.)

Mr. KOSTMAYER. Mr. Speaker, it is a privilege to have with us today the Reverend Lawrence Seyler to offer the prayer as we begin this session of the House of Representatives.

Reverend Seyler is a graduate of the University of Richmond and the Crozer Theological Seminary. He and his wife Catherine, who is also with us have four children, two of whom, Linda and David Seyler, are here.

Larry Seyler is the vicar of St. Philips Chapel in New Hope, Bucks County, Pa. He is my pastor, and my friend and I am sure my colleagues have received a blessing from his words.

EASTWOOD BAPTIST CHURCH

(Mr. HANLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HANLEY. Mr. Speaker, I would like to take a moment to bring attention to a historic occasion for some residents of New York's 32d Congressional District. They are, this week, celebrating the 50th anniversary of a beautiful community landmark, the Eastwood Baptist Church.

Eastwood Baptist Church was founded September 13, 1926, at a meeting of the Baptist City Missionary Society. The first service was held January 9, 1927, in the Palace Hall, James Street and Stafford Avenue. For several Sundays thereafter, the services were at Eastwood Hose Co. 2, 117 South Edwards Avenue.

On March 14, 1927, those attending a meeting voted to accept a proposal of the Onondaga Social and Missionary Union to buy property at 3212 James Street, home of former Senator John A. Nichols. The name Eastwood Baptist Church was taken April 13, 1927, and a decision was then reached on incorporation according to New York State law.

The Nichols mansion served as the

main meeting place of the congregation until 1954, when a beautiful, new red brick and white building was dedicated. The Nichols mansion was torn down 5 years later to make way for the Clara B. Thorpe Christian Education Building, which was dedicated in 1960.

Sharing in this week's anniversary events are the church's nursery school, its day care center, its creative arts and crafts unit, and its Boy Scout Troop 7. Also, former pastors attending the festivities are Rev. Nicholas Titus of Mystic, Conn., and Rev. Hugh Miller of Poughkeepsie. Elaborate displays of church artifacts are set up, as is a picture display revealing church history.

The highlight of the anniversary celebration will come at this Sunday's worship service, which will mark a celebration of thanksgiving to God for the past 50 years and a commitment to future ministry. The mortgage of the Clara B. Thorpe Building will be burned.

I am sure that we all join in sending Rev. Dr. Ronald E. Vallet and his entire congregation our heartfelt warm wishes on this historic occasion.

PERMISSION FOR COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS TO SIT TODAY DURING 5-MINUTE RULE

Mr. EVANS of Indiana. Mr. Speaker, I ask unanimous consent that the Committee on Banking, Finance and Urban Affairs, may be permitted to sit today during the 5-minute rule to mark up H.R. 6112, the Housing and Community Development Act of 1977.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, do we understand there is a guarantee that the committee will not be meeting at 4:30 when there is a conference of some substance involving the Banking and Currency Committee. Can the gentleman assure us that the business of H.R. 6112 will be finished by that time, and if not completed the committee will adjourn prior to the conference?

Mr. EVANS of Indiana. Well, it is my understanding that it is the intention of the committee to be finished well before 4 o'clock. As the gentleman knows, we will be meeting at 1:30 this afternoon to mark up the bill and we are ready to proceed on title II, which is a much shorter title and there is not a great number of additional amendments, in my understanding, remaining to the bill.

It is also my understanding this request has been cleared with the ranking minority member of the House Committee on Banking, Finance and Urban Affairs.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, I am fully aware of what the committee is doing in this proposed markup session. Like the gentleman in the well, I was in attendance yesterday also.

My concern is that we have a guarantee that those of us who are conferees from the Banking, Finance and Urban Affairs Committee to the conference on the supplemental housing bill (H.R. 328) will be completed by then and, if not completed, the committee will adjourn say at least by 4 o'clock. Can the gentleman give that assurance?

Mr. EVANS of Indiana. Well, if the gentleman will permit me, I do not have the ability to give an ironclad guarantee that the committee will have finished its business by 4 p.m. this afternoon. That is the intention of the chair, as the gentleman is well aware, and I am sure that intention can be met. Beyond that, I cannot speak for the chairman.

Mr. ROUSSELOT. I appreciate the gentleman's comment. I am aware that the ranking minority member, Mr. STANTON, had been informed of the proposed committee markup session but many of us are also concerned about the committee terminating its business even if it had not completed the final draft of the Housing and Community Development Act of 1977 in time for those who are conferees to attend the 4:30 meeting.

Also, of course, the committee meeting will be in conflict with the House consideration of two important legislative bills (H.R. 4877) supplemental appropriation conference report and (H.R. 5970) the Department of Defense authorization for fiscal year 1978. We have a lot of discussion in the Congress about the Defense budget and here we are again, with a bill being marked up at the same time two important bills are on the floor. It is just too bad that we keep everybody running back and forth between the floor and committee chambers. Again, I have an obvious objection to trying to be in two places at once. It is just not a very good legislative practice.

Mr. Speaker, I thank the gentleman and I withdraw my reservation of objection.

Mr. EVANS of Indiana. All right, I thank the gentleman from California.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

SOME CAUTIONS ON PRESIDENT CARTER'S SUGGESTION TO USE MORE COAL

(Mr. SIMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIMON. Mr. Speaker, last night in a generally excellent address the President suggested that we ought to be using about 50 percent more coal. I concur with that. He is correct, but we have to be careful that we do not do two things: One is to devastate our lands. The second is the devastation of our coal miners. On land we are moving, through strip mine legislation. What is being done for the coal miners? I would point out they have twice as many fatalities as any other major industry and three times as many injuries as the national industrial average. And that does not count black lung disease. Our friends who own the coal mines suggest they are now taking care of the devastation called black lung disease, or pneumoconiosis. In the last 4 years 106,000 coal miners have applied for black lung benefits under the part C provisions where the coal mines pay, and of the 106,000 coal miners who have applied for black lung benefits from coal mines, the coal mines have paid—as of today—138 coal miners.

Mr. Speaker, I hope we keep these coal miners in mind.

AMERICAN BUSINESSMEN SEEK BLOOD MONEY

(Mr. BAUMAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. BAUMAN. Mr. Speaker, I do not think American citizens can take any great comfort in the spectacle of American businessmen grovelling before Fidel Castro, standing and applauding this murderous bearded dictator who, for 16 years, has held in imprisonment the once free people of Cuba. Some years ago, I believe it was Nikolai Lenin who made the statement that—

> The capitalists will sell us the rope we use to hang them.

Certainly, some of our businessmen and perhaps the administration are making clear that they are willing to go along with this Communist Cuban Government which now is financing—I assume with the help of the Soviet Union—thousands of troops and advisers in perhaps 15 different nations. These Communist troops and agents are responsible for the callous murder of whites and blacks, missionaries and others, who are being slaughtered by Cuban trained and directed guerrilla forces.

If that is the kind of people we as a nation are prepared to do business with, and if our businessmen are comfortable with blood money, Americans ought to consider exactly the moral state in which we now find ourselves.

SELECTIVE AMNESIA?

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, a curious form of selective amnesia seemed to hit members of the majority last night after the President's speech. Time and again I heard Democratic spokesmen praise the President for presenting a comprehensive energy plan, for all the world as if such a plan had never before been presented.

The fact is, of course, that President Ford presented to the Congress and the American people a comprehensive energy program. I can fully understand that the press of business and the shock of hearing some of the President's more dubious proposals may have erased the memory of President Ford's comprehensive plan from the minds of the majority spokesmen.

I also understand, Mr. Speaker, judging by recent statements made by the Vice President that it is evidently considered unfair for members of the minority, in or out of office, to respond in any way to Presidential actions except to

applaud. I therefore hope that my little reminder that President Carter's attempt to create a comprehensive plan, as unoriginal as it is questionable, will not be seen by the Vice President or by members of his party as a sign that I am being unfair.

May I add that this sudden attack of selective amnesia also served to help the majority forget—at least when its spokesmen were not smiling into the television cameras—that it is the majority's lack of action, lack of purpose, lack of imagination and lack of insight and courage that has led to the disgraceful record of the Congress in the field of energy. I hope they recover their memory quickly, and learn from the lessons of the past.

One further point: Why is the CIA releasing previously classified information just as the President needs such information to support his own political thesis? It seems very curious to me that the CIA should just happen to do that at this time.

CALL OF THE HOUSE

Mr. ROUSSELOT. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. WRIGHT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 141]

Andrews, N.C.	Fraser	Neal
Armstrong	Gammage	Pike
Ashley	Gaydos	Price
Bonker	Gibbons	Roe
Brown, Calif.	Hall	Rose
Chisholm	Harsha	Rosenthal
Conyers	Koch	Ruppe
Corman	LaFalce	Sawyer
Derrick	Long, La.	Scheuer
Derwinski	McEwen	Seiberling
Devine	Mattox	Shipley
Diggs	Mikva	Sisk
Dodd	Milford	Teague
Eckhardt	Mineta	Tsongas
Fish	Moakley	Udall
Ford, Mich.	Moorhead, Pa.	Yatron
Forsythe	Myers, Ind.	Young, Alaska

The SPEAKER. On this rollcall 382 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

AD HOC COMMITTEE ON ENERGY

Mr. WRIGHT. Mr. Speaker, pursuant to clause 5 of rule X, I offer a privileged resolution and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 508

Resolved, (a) That pursuant to rule X, clause 5, the Speaker is authorized to establish an Ad Hoc Committee on Energy to consider and report to the House on the message of the President dated April 20, 1977 (H. Doc. 95–128), on other messages or communications related thereto, and on any bill or resolution which the Speaker may sequentially refer thereto which the Speaker determines relates to the substance of the President's message: *Provided, however*, That this paragraph shall not preclude initial reference to the ad hoc committee of a bill or resolution incorporating the recommendations of the committees with subject-matter jurisdiction over the substance of the President's message.

(b) The ad hoc committee shall be composed of thirty-seven Members of the House appointed by the Speaker from those committees of the House which he determines have subject-matter jurisdiction over the substance of the President's message, and from such other committees as the Speaker may determine so as to insure the expeditious consideration and reporting of appropriate legislation. The Speaker shall designate one of the Members as chairman.

SEC. 2. (a) The provisions of rule XI, clauses 1, 2, and 3 shall apply to the ad hoc committee in the same manner as to a standing committee.

(b) Any bill and accompanying report of the ad hoc committee shall be subject to the rules of the House in the same manner as though such bill and report had been reported from a standing committee.

SEC. 3. To enable the ad hoc committee to carry out the purposes of this resolution, such committee is authorized to utilize the services of the staffs of those committees of the House from which Members have been selected for membership on the ad hoc committee.

SEC. 4. The ad hoc committee shall expire upon completion of the legislative process, including final disposition of any veto message, with respect to all legislation referred to the ad hoc committee.

The SPEAKER. The Chair recognizes the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, I yield myself such time as I may consume. This resolution authorizes the Speaker to appoint an ad hoc committee to receive the messages and the recommendations of the President of the United States with respect to the energy problems of this country.

The precedent is clear. Essential parts of this resolution follow precisely the language that was utilized in House Resolution 97 creating the Ad Hoc Select Committee on the Outer Continental Shelf which was agreed to on January 11 of this year.

The purpose of the ad hoc energy committee would be to draw together an interdisciplinary group from various committees of regular jurisdiction in order to provide one general comprehensive overview. This device should facilitate an opportunity, heretofore lacking, for the House to work its will in achieving a comprehensive energy policy. It is not anticipated that the creation of this ad hoc committee would render any less effective any of those standing committees of the House which now possess jurisdiction over various facets of the energy problem.

It is anticipated that, upon receipt from the President of specific legislative recommendations to carry out his energy plan, this ad hoc committee to be appointed by the Speaker might hold hearings and might make recommendations, but that the several components of the recommended legislation would be referred to the standing committees of the House according to their respective jurisdictions under the Rules of the House. Those committees then would be charged by the Speaker with the responsibility of holding hearings, considering the legislation, marking up sections of a bill, and returning those respective sections to the ad hoc committee.

After these deliberations had been completed, it is expected that a rule would be sought under which the entire program might be considered by the House in a manner whereby each separate section of the bill could be managed on the floor by the appropriate spokesman from the committee which drafted that specific section of the bill. It would be further anticipated, however, that the first right of recognition to offer an amendment on the floor to any such section would repose with the ad hoc committee.

So this is an effort to permit the House to look at the energy problem as one composite problem and to treat it as one problem, but to do so without robbing or emasculating the jurisdiction of the Standing Committees of the House.

Mr. Speaker, I now yield 30 minutes to the distinguished minority leader, or such part of that time as he may consume, and reserve to myself the remainder of the time. I yield to the gentleman from Arizona for purposes of debate only.

Mr. RHODES. I thank my good friend, the majority leader.

Mr. Speaker, this is a very important piece of legislation.

It is a select committee which needs to be formed. I am glad that it is being formed. I for one have had a resolution in for quite some time to form a Select Committee on Energy. I must admit that I did not quite have in mind the format that this committee is taking, but nevertheless I am pleased at the progress which is being made today.

Actually what I had in mind was a select committee which would take one subject and one subject only, proceed to hold hearings and markup a bill and bring it to the floor. Of course, that one subject was to provide a national energy policy for this country. I think this country needs a national energy policy worse than it needs anything else today. I am of course hopeful that out of the work which will be performed we will have such a policy evolve.

I must admit I am not completely sure of the efficacy of the method which has been outlined—very ably, I might say—by the gentleman from Texas. I recognize the difficulties in overlapping jurisdictions of the various standing committees but there are times of course when the national interest must transcend our rather parochial feelings about the jurisdictions of our own committees, and to me this is such a time. This is a time in my opinion when the overriding interest of the country in having a national energy policy is so apparent that the parochial devotion which many have to committee jurisdiction should be put aside.

I intend to appoint Members to the committee from the Republican side who will want legislation, and not those who do not want it. Personally, I intend to do everything that I can to facilitate the work of this committee and the work of the other committees that are involved and to bring forth as rapidly as possible a workable, adequate national energy policy.

I must tell my good friend, the gentleman from Texas, and the Members of

the House, that I naturally reserve the right to "view with alarm" and possibly not to approve all of the workings of the committee, but I hope it will be done in such a bipartisan way that all of us can join in supporting the results of its work. That is my hope and my promise and it is the end toward which I will work.

I also hope it will be possible that we can receive some assurance that the rights of the minority as set forth in the rules of the House pertaining to the operation of the committees will be protected. Of course there are no clear provision of the rules so far as I know which pertain to select and joint committees, but I hope it will be the policy of whoever may be made chairman of this committee, and of the majority leadership, to make sure that the rights of the minority as set forth in the rules in other instances will also apply to this committee.

I congratulate the Speaker and the majority leader for providing that the staff will come from existing committees and that we will not have a large staff which will be put together for this purpose only, because too many times staffs like this have a tendency to prolong their lives beyond reason. In fact it has been said wisely that there is nothing so permanent as a temporary staff in the House of Representatives. I am pleased that there will not be such a staff.

Mr. Speaker, I assume the gentleman from Texas may want me to yield the rest of my time. Does the gentleman have any request for time?

Mr. WRIGHT. Mr. Speaker, yes, I have two requests on this side for time, but the gentleman from Arizona is perfectly free to yield such portions of his time as he wishes, either now or later.

Mr. RHODES. I suggest as a means of operation, if the majority leader will concur, that I yield time now. I have four requests and I suggest that I yield to three gentlemen who have made requests for time, and keep one additional member to speak just before the last speaker on the gentleman's side.

I yield now 5 minutes to the gentleman from Illinois (Mr. ANDERSON), who will be the designee on the minority side as the ranking minority member of this committee.

Mr. ANDERSON of Illinois. Mr. Speaker, I thank the distinguished minority leader for yielding me this time. I doubt that it will require the full 5 minutes for me to say what I have to say on this occasion. I certainly would not, however, want this moment to pass without making it clear that the resolution that is now before us covers a subject matter in which I have long been interested, not only as the former ranking member of the Joint Committee on Atomic Energy, but I think, more importantly, because of the effort that it represents to try to bring together the forces responsible in this Congress for fashioning various parts of an energy program, to bring them together in a coherent fashion that would enable us to act intelligently, expeditiously, yes, even with dispatch, on the very important questions that were laid before the Congress and the Nation in the President's address of last evening; so very early in this first session of the 95th Congress I did address letters, not only to the distinguished Speaker of the House, but to the majority leader, to the chairmen, and the ranking members of most of the committees that will have representation on this ad hoc committee, as well as the distinguished minority leader, in which I urged that we should have a select committee that would be prepared to deal with the energy problem.

As the minority leader has indicated, the legislation now before us represents a compromise among the divergent views that have been expressed by various Members on both sides of the aisle as to how we could best accomplish the rather sensitive, rather delicate job of alleviating the fears of some Members and some committees, that we were doing the unthinkable; that is, trespassing upon their original jurisdiction and competence to handle various parts of the energy problem.

Mr. Speaker, I think as we heard last evening, and as most of us would agree, the energy crisis involving the Nation today is one that is unique. We have seen Presidential initiative in sending to the Hill legislation that would create a Department of Energy and, incidentally, I joined as one of the coauthors of that legislation, because I think there is a need to pull together the disparate elements of the executive branch into a single department to work on this very important problem. Even so, I think it is necessary for the House of Representatives to do the same thing.

We had an opportunity in the 93d Congress, actually, two Congresses ago, when the Select Committee on Committee Reform presented its recommendations, I think, to do a better job, to create a permanent energy committee, a committee that would have gathered in the jurisdiction of a number of committees and in more permanent fashion enabled us to centralize the responsibility and the authority for energy legislation; but this House chose not to act favorably on that particular proposal.

So, therefore, the proposal that is before us today is, I think, the best that we could do at this time to see if we cannot overcome jurisdictional rivalries.

I heard the distinguished chairman of the Committee on Interior and Insular Affairs say recently that the time had come for committee chairmen to forget about going to war over their turf. I hope very much that will be the attitude of the committee chairmen here in the House.

We have some precedent in the Budget Committee which was created in a previous Congress to give us an overview of the Federal budget. Likewise, it seems to me that the role of this new Ad Hoc or Select Committee on Energy is to provide a much-needed overview of the energy problem.

The majority leader has explained that this will not in any way interfere with the original jurisdiction of standing committees of the House to consider initially and to make recommendations and to frame legislative proposals on how we should deal with energy, but I think that if the ad hoc committee is to serve a useful purpose at all, it must not only be a coordinating mechanism which will seek to put back together into a single resolution or bill or piece of legislation these various recommendations and proposals, but also have the authority to offer recommendations and proposals of its own as a substitute, if necessary.

So, Mr. Speaker, in conclusion, I welcome this proposal, limited as it is, and hope very much that we will have today an overwhelming approval of the resolution so that we can begin and put in motion the very important work of this Ad Hoc Committee on Energy.

Mr. RHODES. Mr. Speaker, I now yield 2 minutes to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, principally I wanted to take this time, because we are dealing in somewhat uncharted parliamentary areas, to pose a question perhaps in the form of a parliamentary inquiry to the Chair.

As the gentleman from Texas has pointed out, this particular ad hoc committee is being created under a relatively new power given to the Speaker of the House under rule X. It has been exercised before, but never quite in the same form as is proposed by this resolution.

The question I have deals with the possibility of a dispute in jurisdiction among committees. Quite obviously, the President's proposal deals with a number of different facets of the energy program that the Chair obviously will refer after consultation, I assume, with the appropriate committees. However, there is no appeal of the Chair's referral of these matters provided in rule X. If I recall properly, under the Bolling-Hansen proposals, there was proposed such an appeal procedure, but when finally adopted it was left out of the rule.

However, clause 4, rule XXII, of the House allows any committee on its own motion to come in and move that a matter be re-referred from another committee. The question I am really posing for the Chair is, in the unlikely event that any event that any committee of the House has a dispute about the reference of various parts of this legislative package, would in fact rule XXII apply so that an appeal would lie as to the reference?

The SPEAKER. With regard to the gentleman's parliamentary inquiry, the Chair could, of course, refer any bill jointly to two or more committees, as the gentleman from Maryland is well aware, or he could refer the bill sequentially from one committee to another after the first committee has completed the legislation.

But, in the final analysis, the Chair does feel that the provisions relating to re-referral in rule XXII would apply here as with any other committee provided for or established under rule X.

Mr. BAUMAN. I thank the Speaker for his answer.

Mr. RHODES. Mr. Speaker, I yield 2 minutes to the gentleman from Colorado (Mr. JOHNSON).

Mr. JOHNSON of Colorado. Mr. Speaker, I am advised by the minority leader that due to the constraints of this resolution, he is unable to appoint a Member from the oil shale areas to this committee. I would like to point out to the House that in the President's message, no mention was made of oil shale.

It seems to me to be a great inconsistency to talk about acquiring a billion barrels of oil at a cost of some $15 billion when we have 600 billion recoverable barrels of shale oil deposit in Colorado, Utah, and Wyoming, and we are doing nothing to develop those oil shale deposits. As a matter of fact, the Government is placing hindrances in the way of its development.

The $15 billion we are going to spend to acquire and store oil could be spent to develop oil shale production facilities that would have ongoing consequences well into the future. Given the nature of the emergency which we are facing, it seems inconceivable to me that we would ignore this process.

Obviously, it is going to be developed some day, and I am afraid it is going to happen, and it will be developed in a rush and emergency fashion that will do untold damage, with untold consequences to the environment and the areas where those of us live who represent those areas.

Mr. Speaker, I would ask the majority leader if it is possible to have somebody on his side, who comes from the oil shale areas, either from Colorado, Wyoming, or Utah, to be appointed to this committee; because it seems to me we are ignoring the great potential and that we are ignoring this critical resource if we do not have somebody on that committee. I do not know if it is possible, but I would urge the majority leader to do so.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of Colorado. I yield to the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. I thank the gentleman for yielding. The appointments to be made to the ad hoc committee will be made by the Speaker of the House. Appointments relating to Members of the minority party would be made on the recommendation of the minority leader.

I feel certain that the minority leader, as well as the Speaker, will be attempting by every means possible to get a broad, general cross section of the membership to serve on the committee.

I cannot make any commitment to the gentleman because I do not possess the power to make an appointment, nor has the Speaker confided in me as to whom he will appoint, nor have I asked the Speaker to confide in me as to whom he will appoint.

The SPEAKER. The time of the gentleman from Colorado (Mr. JOHNSON) has expired.

Mr. WRIGHT. Mr. Speaker, I yield 1 additional minute to the gentleman from Colorado (Mr. JOHNSON) in order that I might continue my answer to his question.

Mr. JOHNSON of Colorado. I yield further to the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. I earnestly believe that there is on the part of the Speaker and, additionally, on the part of the minority leader, a true desire to create, insofar as it is possible to do so, a committee that will be broad in its viewpoint. I sincerely trust that its membership will possess the capacity to elicit information from a variety of sources and evaluate that information in an atmosphere of open-minded inquiry. I hope it will be a committee that is not set in concrete for or against any particular mode of energy and a committee, I might say, whose members would live up to the prayer that was offered by our guest chaplain today when he prayed:

From the cowardice that shrinks from new truth,
From the laziness that is content with half-truth,
From the arrogance that thinks it knows all truth,
O God of Truth, deliver us.

Mr. JOHNSON of Colorado. I thank the gentleman.

Mr. RHODES. Mr. Speaker, I have only one speaker remaining, and I now suggest, if the majority leader desires to do so, that he yield some time.

Mr. WRIGHT. Mr. Speaker, I yield 1 minute to the gentleman from Michigan (Mr. DINGELL), the distinguished chairman of the subcommittee.

Mr. DINGELL. Mr. Speaker, I want to commend the Speaker of the House and I want to commend the majority leader for having brought before the House what I regard as a fair and effective proposal. I support it. I urge my colleagues to do likewise.

I pledge my best efforts for fair and expeditious consideration of the President's proposals on energy.

Mr. Speaker, I support this resolution to establish an Ad Hoc Committee on Energy, pursuant to rule X, clause 5, to expire at the end of this Congress. I also want to commend the Speaker for taking time to consult with Members, including myself, in the development of this resolution. I pledge my cooperation.

It is my understanding that the resolution does not deviate from rule X, clause 5, except that it provides for sequential referral of the President's energy proposal and the appointment of Members from other than the standing committee. Procedurally, I understand that the new committee will quickly organize and possibly hold general hearings on the President's energy message, but the legislation itself will be parceled out to the standing committees. When these committees complete their work and report the parcels out, they will be sequentially referred to the ad hoc committee. That committee will not, according to the Speaker's April 20, 1977, letter to Members, be authorized to change the bill as reported by the standing committees. But it can recommend amendments for consideration on the floor.

The Speaker's letter states his intention to recommend that the bill reported by the standing committees be considered as an original bill, with the ad hoc committee amendments, if any, made in order. This procedure should insure that all Members, not just those on the ad hoc committee, will have an opportunity to offer amendments.

Each standing committee will manage on the floor those parts or titles of the bill that fall within their jurisdiction. In conference, representatives of the standing committees, presumably including some not on the ad hoc committee, will have primary responsibility to settle differences relating to their portions of the bill.

I believe that this procedure is fair and wise. It should help to expedite matters and give all an opportunity to participate in the process.

There are, however, two matters that I want to discuss.

First, I note the Speaker plans to place a reporting deadline on the standing committees. I do not object to this, but I urge flexibility, it will be needed.

We all know that the President's proposal will be complex and controversial. It will require considerable hearings and probably extended markup. And, I pledge most expeditious processing of the legislation in the subcommittee I have the honor to chair. Each standing committee will seek to move expeditiously. But other matters are also pending and Members have duties on other committees. The Budget Act deadline of May 15 for authorization bills must be met. In addition, a considerable amount of legislative and appropriation bills will soon reach the floor. These matters will make it difficult to schedule meetings and obtain needed quorums. It can be done, but I caution that too hasty action may result in ill-conceived legislation that will be difficult to pass on the floor. Quality is as important, if not more so in the long run, as speed.

Second, I think it important to keep the staff level of the ad hoc committee low. We really do not have time to educate a large staff; nor do we need them. Each standing committee has the staff expertise it needs. I will urge that the ad hoc committee rely on that expertise to the greatest extent possible.

Again, I wish to commend the Speaker for his leadership on this resolution. I look forward to working with him on this energy legislation.

I insert at this point in the RECORD the Speaker's letter of April 20 supporting the creation of the Ad Hoc Committee on Energy, I urge my colleagues to join our Speaker in that endeavor.

The Speaker's letter follows:

U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., April 20, 1977.

DEAR COLLEAGUE: As you know, it is my intention to create a new ad hoc committee to facilitate consideration of the President's energy message. To this end, I have asked Jim Wright to call up a resolution tomorrow establishing the committee.

The committee will be created around the President's speech. This will afford the committee an early opportunity to organize and perhaps hold general hearings.

Sometime next week the President will send his actual legislative recommendations to the Congress. This legislation will first be parcelled out among the appropriate standing committees just as if no ad hoc committee existed. I will place a reporting deadline on consideration of the bill by the standing committees.

At the conclusion of this period, the legislation will be sequentially referred to the ad hoc committee. The committee will not have authority to change the recommendations reported by the standing committees. It will have authority to recommend amendments for consideration on the floor.

When this measure goes to the Rules Committee, I will recommend that the legislation reported by the standing committees be considered as an original bill, with the ad hoc committee amendments in order thereto. I will further recommend that on the Floor

each standing committee manage those portions of the bill that fall within its jurisdiction.

Of course, when the House finally goes to conference with the Senate on the energy legislation, primary responsibility will rest with representatives of each of the standing committees to settle differences relating to its portion of the bill. Throughout the process, it is my intention to protect the prerogatives of the standing committees, drawing on their experience and expertise.

What the ad hoc committee adds is an opportunity for comprehensive consideration of our national energy policy. It can function as a conference committee of the House to facilitate resolution of competing claims. This should help smooth matters on the floor.

The membership of the ad hoc committee will be proportionate to the standing committees' jurisdiction over the legislation. In addition, I will do my best to see that every interest and region is fairly represented.

I hope that you can join me in supporting this attempt to respond innovatively and responsibly to the President's recommendations. Dealing with them will be among the most difficult and important challenges facing the Congress in this generation.

With every good wish,

Sincerely,

THOMAS P. O'NEILL, Jr.

Mr. WRIGHT. Mr. Speaker, I yield 1 minute to the gentlewoman from New York (Ms. HOLTZMAN).

Ms. HOLTZMAN. Mr. Speaker, I want to compliment the leadership for this very innovative, ingenious and, I hope, very successful mechanism.

I wish to ask the gentleman from Texas about one matter which was not included in the President's energy message last night, and I wish to know whether it will be included in the scope of this new committee and this new plan; namely, mass transit. To what extent, if Congress determines that mass transit is an integral part in solving our energy problems—as I believe it clearly is—will this ad hoc committee and this new mechanism be able to deal with it?

Mr. WRIGHT. In response to the question posed by the gentlewoman from New York (Ms. HOLTZMAN), it is my understanding that the Speaker would intend to refer to this ad hoc committee only those specific legislative recommendations coming from the White House at anytime during the existence of the ad hoc committee pursuant to the President's requests with regard to this energy program.

Now, it is conceivable that the President may include in those specific legislative requests some matter relating to mass transit. The majority leader has no knowledge as to that. Beyond the fact that I have seen a list of somewhat generalized recommendations, I have no specific knowledge, but I must report to the gentlewoman that the recommendations, are indeed broader in their general scope and more numerous in their specificity than what was capable of being recited in summary form during the 30-minute address last evening.

In the event nothing should come from the President pursuant to this matter relating to the subject of mass transit, there is certainly nothing to prevent the committee of standing jurisdiction from taking action with respect to mass transit legislation.

The SPEAKER. The time of the gentlewoman from New York (Ms. HOLTZMAN) has expired.

Mr. WRIGHT. Mr. Speaker, I yield 1 additional minute to the gentlewoman from New York (Ms. HOLTZMAN) so that I may address that subject a bit further.

If the gentlewoman will yield further, there is absolutely nothing in this resolution which would prevent the committee with jurisdiction concerning mass transit—and in this instance I believe that to be the Committee on Public Works and Transportation—from taking action and bringing it as a separate matter to the House floor.

Ms. HOLTZMAN. Mr. Speaker, I thank the majority leader for his elucidation.

Mr. WRIGHT. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Speaker, I would like to determine the procedure that will be followed. Will the standing committees be hearing testimony and moving simultaneously with the ad hoc committee, or will they commence their work after the ad hoc committee finishes its deliberations?

I am very much concerned about the time factor. I think if we are going to pass an energy bill, the sooner we pass it the better. As we move closer to the end of the year and closer to November of next year, it will become increasingly difficult. I feel the success of our effort depends very, very much upon the speed with which we can move on the total package.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. VANIK. I yield to the majority leader.

Mr. WRIGHT. Mr. Speaker, in response to the gentleman's question, it is my understanding that the standing committees to which would be referred the various component parts of the energy program would act first, and that they would not only be free but would be encouraged to hold hearings, to perfect language, and to adopt markups, bringing back to the ad hoc committee such language as in their best judgment would carry out the intent of the President's requests. Thereupon the ad hoc committee would have the privilege of deliberating, consulting, and considering the issues. The ad hoc committee would then perfect at its option any amendments which its members might desire to offer on the floor of the House.

Mr. VANIK. Then, as I understand it, Mr. Speaker, the alternative would be to offer such an amendment on the floor on the recommendation of the committee? As to any alternatives that may have been developed by the ad hoc committee, the committee would have the privilege of introducing those alternatives?

Mr. WRIGHT. The gentleman is correct.

Mr. VANIK. Mr. Speaker, let me ask the gentleman one further question.

With respect to the appointment of conferees, will the conferees come from the basic committee, or will they be coming from the ad hoc committee? We have developed a relationship with our counterparts in the other body, and I think, for example, that on the Committee on Ways and Means we have a very creditable record in dealing with the other body.

Would that be affected in any way by the development of this ad hoc committee resolution? The Speaker, in his letter, I believe, addresses himself to this issue.

The SPEAKER. The time of the gentleman from Ohio (Mr. VANIK) has expired.

Mr. WRIGHT. Mr. Speaker, I yield 1 additional minute to the gentleman from Ohio (Mr. VANIK) in order that I may respond as best I can to his question.

When the House finally goes to conference with the other body on this energy legislation, as has been indicated by the Speaker, primary responsibility for settlement of matters in disagreement in connection with specific parts of the legislation would rest with representatives of each of the standing committees relating to their respective portions of the bill.

With regard to a creature as diverse as this ad hoc committee is bound to be, conceivably a situation may arise where it would not always be possible to yield in every instance to the wishes of one or two particular Members; but to the very best of that committee's ability, I am quite sure that a good faith effort will be made to protect the rank and privileges of those standing committees of jurisdiction, insofar as it is possible to protect them, given the very nature of the conference committee, whose fundamental purpose is to achieve compromise.

The SPEAKER. The time of the gentleman from Ohio (Mr. VANIK) has expired.

Mr. WRIGHT. Mr. Speaker, I yield 1 additional minute to the gentleman from Ohio.

Mr. VANIK. I thank the gentleman for yielding.

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield further, within that framework I have just described and within the limitations which necessarily must apply to any conference committee, I am sure that every effort will be made to protect the rights of the standing committees of the House and of their members, even through the conferring process.

Mr. VANIK. Mr. Speaker, I thank the gentleman.

Mr. MAHON. Mr. Speaker, will the gentleman yield for a question?

Mr. WRIGHT. I yield to the gentleman from Texas.

Mr. MAHON. Mr. Speaker, as I understand it, the various legislative committees of the House will be charged with working out the details that have been explained here today.

As I understand it, this would in no way be an appropriations bill; it would authorize appropriations, but it would not, in any sense, provide for an appropriation.

Mr. WRIGHT. Mr. Speaker, the gentleman is exactly correct. The jurisdiction of this ad hoc committee, as, indeed, the jurisdictions of those committees to whom these matters would be sequentially referred, is subject to authorization. There is no intent to confer upon this ad hoc committee, nor upon any of the other committees by means of this resolution, any of the powers that inure properly to the Committee on Appropriations.

Mr. MAHON. Mr. Speaker, I thank the gentleman.

Mr. WRIGHT. Mr. Speaker, I have no further requests for time at this moment.

Mr. RHODES. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Speaker, I rise in support of House Resolution 508 to create an Ad Hoc Committee on Energy.

I realize that the creation of this committee will result in a rather unusual procedure with respect to consideration of legislation.

Mr. Speaker, if I can have the attention of the majority leader, I understand the actual legislative recommendations, when they are received by the Congress over the next several weeks will be referred to the appropriate standing committees for hearings and markup. When the various standing committees have completed their deliberations, the different portions of the President's package will be referred to the ad hoc committee, which will not have the authority to change the standing committees' reported legislation, but will have authority to recommend amendments for consideration on the floor from the ad hoc committee. Is that correct?

Mr. WRIGHT. If the gentleman will yield, the gentleman is exactly correct.

Mr. BROWN of Ohio. Mr. Speaker, I fully approve retaining basic legislative authority in the standing committees since these committees, such as the Committee on Interstate and Foreign Commerce on which I serve, have years of experience in dealing with energy legislation, experience which should be drawn on in the consideration of the President's proposals, just as it was drawn on in the consideration of past Presidents' proposals.

Mr. Speaker, I will look with interest at the progress that the Congress, dominated as it is by members of the majority party, makes with energy programs proposed by a Democratic President compared to the progress that was made with the proposals presented by previous Presidents.

Mr. Speaker, slightly more than 2 years ago President Ford submitted to Congress the so-called Project Independence, which had virtually identical goals to the goals enunciated by President Carter Monday and Wednesday nights. In addition, Mr. Speaker, Project Independence and President Carter's so-called national energy plan have many substantive similarities, such as urging utilization of more of our coal resources, reform of our poorly structured energy pricing system, and heavy emphasis on the need for conservation.

If I might, Mr. Speaker, I would like to quote from the President's 1975 state of the Union message with respect to the economy and energy.

The national energy policy goals and principles announced by President Ford are as follows:

Near-Term (1975–1977): Reduce oil imports by 1 million barrels per day by the end of 1975 and 2 million barrels by the end of 1977, through immediate actions to reduce energy demand and increase domestic supply.

Second:

Mid-Term (1975–1985): Eliminate vulnerability by achieving the capacity for full energy independence by 1985. This means 1985 imports of no more than 3–5 million barrels of oil per day, all of which can be replaced immediately from a startegic storage system and managed with emergency measures.

Third:

Long-Term (Beyond 1985): Within this century, the U.S. should strive to develop technology and energy resources to enable it to supply a significant share of the Free World's energy needs.

Then principles or directions:

Provide energy to the American consumer at the lowest possible cost consistent with our need for secure energy supplies.

Make energy decisions consistent with our overall economic goals.

Balance environmental goals with energy requirements.

Rely upon the private sector and market forces as the most efficient means of achieving the Nation's goals, but act through the government where the private sector is unable to achieve our goals.

Seek equity among all our citizens in sharing of benefits and costs of our energy program.

Finally:

Coordinate our energy policies with these of other consuming nations to promote interdependence, as well as independence.

President Carter's proposal was not quite phrased in the same way, but it might well have been typed on the same typewriter as President Ford's.

But, Mr. Speaker, the basic differences between the plan submitted last night by President Carter and the plan submitted by former President Ford are that the Carter plan overemphasizes one side of the energy equation, that is, the demand side. It fails to address the supply or the production side. Also, the Ford plan was structured in separate pieces in such a fashion that failure to pass one or more of the blocks of his various legislative proposals did not make impossible the workability of the other parts. Congress did, in fact, enact in the Energy Policy and Conservation Act many of the suggestions of President Ford, including the strategic petroleum reserve and the international energy program, which President Carter, of course, endorsed last night.

The SPEAKER. The time of the gentleman has expired.

Mr. RHODES. Mr. Speaker, I yield 1 additional minute to the gentleman from Ohio.

Mr. BROWN of Ohio. The Carter program, on the other hand, seems to be so intertwined, so inextricably intricate, that it appears the various parts will only operate successfully if the package as a whole is enacted. This is particularly true because of the interrelationship of the various tax and rebate portions of the package—and the package is certainly heavy with taxes, on top of taxes, on top of taxes.

The estimate arrived at by my subcommittee staff was that the taxes run about $25 to $30 billion.

I went to the Joint Economic Committee yesterday and asked the same question of a member of the majority staff of that committee, and his response was that the cost that had been figured out was $45 billion in additional taxes.

Mr. Speaker, the Nation will be watching with interest to see whether this Congress, controlled as it is by the Democratic majority, can address itself successfully to the proposals of a Democratic President to solve our serious energy problems in the national interests, even in the world's interest. Let us hope for more success than in the past.

Mr. RHODES. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. WRIGHT. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon (Mr. ULLMAN) the distinguished chairman of the Committee on Ways and Means.

Mr. ULLMAN. I thank the gentleman for yielding.

Let me state the way I think this works, and I would like to have the chairman's comments. The bill will be drafted in such a way that those portions under the jurisdiction of the Committee on Ways and Means will be referred directly to the Committee on Ways and Means so that we can immediately proceed on hearings in the normal manner, and markup of the bill, and that at some point there will be an allocation of time made by the Speaker for the committee to act. I hope that we can do it as expeditiously as possible because I think time ultimately might destroy us. It does take some time to do it, and I think that should be a very judicious decision. The Committee on Ways and Means then—and I am using this only as an example because it relates to other committees that have jurisdiction as well—within that time frame will report the bill, having latitude to introduce a clean bill as we normally do if necessary in order to clean up the procedure, and then that will be referred to the ad hoc committee but not for amendment. There will be no authority in the ad hoc committee to amend the legislation as sent by us or other committees of jurisdiction. The committee, however, will look at the package, and if there are discrepancies in the way it operates, will attempt to correct those discrepancies in this manner by deciding on amendments that they will offer at the appropriate time when the matter is brought to the floor. I would understand that the Speaker also would set time limits on the ad hoc committee as to when that action would have to take place.

Then on the floor the appropriate committees would handle their own legislation just as they would their ordinary business. I do not know whether a rule would be requested but in our instance we would want amendments to be offered only by the Committee on Ways and Means and by the ad hoc committee. We are very jealous, obviously, of the taxing authority, but the authority of the ad hoc committee would be limited to making amendments on the floor, and hopefully those amendments could be as

much in the nature of making the program work rather than restructuring it. In other words, I would hope that the ad hoc committee would not begin going through the whole series of decisions made by the Committee on Ways and Means in arriving at a very tough complicated tax decision, but would limit themselves as much as possible to those matters that might create discrepancies in the way the package comes together procedurally.

Presumably there would be separate votes on the different bills as brought out by the different committees. Then when a bill comes back from conference, it is my understanding also that the committees of jurisdiction would have the primary conference responsibility—I would hope the exclusive conference responsibility—to provide the mechanism for the conferees to get together with the joint committee to see if there are discrepancies between them and, if need be, go back, but with the committee's jurisdiction having the basic conference responsibility.

Is that substantially in accordance with the understanding of the chairman?

Mr. WRIGHT. The gentleman's description of the process which this resolution contemplates is quite substantially in conformity with the way it is understood by the majority leader and the way in which I am cetrain it is intended by the Speaker. There are, of course, questions raised by the gentleman which neither the majority leader nor any other Member could hope to answer with absolute finality at this moment, such as the kind of rule that might be granted by the Committee on Rules. But within the framework of intent, I believe the gentleman has correctly stated the situation.

It would be the purpose of the leadership to see that this kind of workable system shall be pursued to the end that we may produce legislation that will be harmonious with the wishes of those who are the best authorities in the House on specific subject matter, but at the same time will preserve to this broad-based group the right to insure that, unlike the headless horseman, the House is not riding off in many diverse directions at once.

This, after all, is a fundamental function of the ad hoc committee—to achieve a consistency of policy. It certainly would seem useful, for example, to see that the House is not mandating greater fuel efficiency in automobiles at the very time that it mandates the accomplishment of things that make more difficult the achievement of efficiency in automobiles, or to see that the House is not mandating the increased production of a certain mineral at the same time it promulgates solecisms that would make more difficult the production of that mineral.

In other words, it is the intent by this device to provide a broad base of understanding in order that the well of knowledge and experience existing in each committee, as in the gentleman's committee with respect to tax legislation, might be tapped and utilized to the fullest. Then the broader group, the ad hoc committee, shall come together to reconcile and harmonize what has been done by the various committees to the end that they shall serve the same purpose and move in the same direction, the common goal being energy efficiency for the United States, including conservation of our dwindling reserves by discouraging wasteful consumption to purchase time during which we can bring on additional production of the types that will lead us to energy sufficiency in the future.

I cannot think of another challenge that faces the House or the Congress with a more stringent or more severe testing of its statesmanship and its wisdom. It tests and challenges our ability to submerge petty differences, to rise above sectionalism and balkanization, of which the President spoke last night. This is a test of our common ability to produce a program that will indeed serve the interests of the United States and result ultimately in national energy sufficiency.

Mr. ULLMAN. Mr. Speaker, will the gentleman yield further?

Mr. WRIGHT. I yield to the gentleman from Oregon.

Mr. ULLMAN. Mr. Speaker, then let me say to the gentleman within that frame of reference I will support the legislation, and the basic frame of reference is finding a method of coordination in the Congress while at the same time jealously guarding and protecting the prerogatives of the individual committees involved. I think what we do here may very well set the pattern for what might be done elsewhere, so I would hope that we will very jealously guard the prerogatives of the committees. This is a coordinating mechanism. We need to move forward together, and on that basis I support the gentleman.

Mr. WRIGHT. I thank the gentleman from Oregon for his comment.

Mr. STEIGER. Mr. Speaker, will the majority leader yield for a moment?

Mr. WRIGHT. Of course I yield to my friend, the gentleman from Wisconsin.

Mr. STEIGER. Mr. Speaker, I appreciate the gentleman's yielding.

I must say I commend the Speaker and the majority leader and the minority leader for this effort.

I am not as jealous as my chairman of the prerogatives of the standing committees, and if I had any disappointment at all it would be that in the mechanism being created by this resolution it was possible to go even further in order to create the ability of the House of Representatives to have a rational, cohesive, and comprehensive committee to deal with all aspects of energy policy.

I understand very well that it is not possible now, but may I ask the majority leader to clarify for me one aspect of the question asked by the chairman of the Ways and Means Committee. The ad hoc committee being created, as I understood the question asked of the gentleman, was to be limited to the amendments which were relatively minor, to correct imbalances or conflicts only, or does the select committee, or the ad hoc committee, whatever the title is, have an ability to focus in an amendment for the House the policy for energy in this country?

Mr. WRIGHT. The gentleman from Wisconsin (Mr. STEIGER) has asked the majority leader to respond to a question of opinion. I can only say to the gentleman that there is nowhere in this resolution a stricture, a hobble or a confinement, either explicit or implicit, upon the ad hoc committee which would prohibit it from offering any recommendations that it may deem desirable and necessary to make this whole package make sense. That is its purpose. Otherwise, there would be no need for an ad hoc committee. We want one energy policy. We want a comprehensive energy policy. We want an energy policy that moves consistently and purposefully in an orderly direction. That is the purpose of the ad hoc committee.

It is an innovative procedure. I should like to commend the Speaker for the innovation, the initiative, that brings forth this kind of procedure. We hope it will work. It will be an imperfect instrument, to be sure, because it will be composed of imperfect creatures. But to the extent of our abilities, I believe we can rise to the challenge that the American public expects of us and create an energy program that will conserve, that will produce and that will make this Nation energy sufficient. That is what the American public looks to us to do.

I should like to suggest to my colleagues that I believe the American public may be ahead of us. I think the American public is ready to do those things that are necessary, once it understands that it is being told the truth, the stark, harsh, total reality, and that those sacrifices that are requested of it are evenly and fairly distributed. I do not think we need to question the willingness of the American public or its patriotism to do those things. They look to us for the leadership that will call on them for those things.

Mr. WYDLER. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield 1 minute to the gentleman from New York for purposes of debate.

Mr. WYDLER. Mr. Speaker, I just want to get clear in my own mind. I understand that at the end of the normal legislative procedure the matters in this legislation will be referred to the select committee and the select committee will have the right to suggest amendments to the legislation. Does that imply that no other amendments are going to be allowed other than those allowed in the legislation, that a rule will be sought to limit the legislative amendments to those selected by the select committee?

Mr. WRIGHT. Mr. Speaker, may I reply to the gentleman this way. I cannot answer that question. The answer would depend entirely upon the kind of rule that is granted by the Committee on Rules. I would assume that the rule granted by the Committee on Rules will be governed by the circumstances that exist at the moment. I do not think I can answer that question at this point; I should not want to attempt to.

Mr. WYDLER. Mr. Speaker, if the gentleman will yield further, I under-

stood this would be one piece of legislation, finally, so that we know there is only going to be one decision to be made and that decision can be made now, as well as later. I just want to know if the Members are going to be allowed to offer amendments to the legislation when it comes to the floor of the House.

Mr. WRIGHT. Mr. Speaker, within the limited time remaining, I would say I am certain that the rights of the House will be protected. Surely, what the Committee on Rules would do under these circumstances we cannot know until we see the components and the complexities of the legislation. Nor can we know at this time what we shall ask the Committee on Rules to do, whether to grant an entirely open, a semiopen or semiclosed rule, a rule open to all amendments, or to certain specific amendments, or to amendments applicable only to certain sections or provisions of the bill.

Surely it would be premature to try to foreclose all the rights and options of judgment that might exist at that time. But I would suggest to the gentleman that it will be the purpose of the leadership to see to it that the rights of the majority shall be protected against the exclusive presumptions of any minority and the rights of all minorities against the intolerance of any majority and that the rights of the membership to work its will shall be protected to the maximum extent of our ability so to do. I hope that is a satisfactory answer.

Mr. GOLDWATER. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. If I have time remaining, I yield to the gentleman from California.

Mr. GOLDWATER. Mr. Speaker, in response to the gentleman's question, I was somewhat confused. If I could, I would like to give an example as to what I think the question was.

The question was, can the select committee make substitute amendments to the total package. For instance, if the Committee on Science and Technology decided in its final package as presented to the select committee, wanted to completely take all monies out of, say, nuclear research and development, and put those moneys into conservation, that would be a major change.

The SPEAKER. The time of the gentleman from Texas has expired.

Mr. RHODES. Mr. Speaker, if the gentleman desires to do so, I will yield whatever time I have remaining back to the gentleman from Texas for his disposition.

Mr. WRIGHT. I thank the gentleman.

Mr. GOLDWATER. Would the gentleman yield further?

Mr. WRIGHT. I yield.

Mr. GOLDWATER. Could the select committee therefore offer an amendment to reverse that action which the Science and Technology Committee took on the research and development aspects of the program?

Mr. WRIGHT. On the floor, if the amendment is germane under the rules of the House, and if the Rules Committee has offered to the House the kind of rule that makes the amendment in order, and if the Members of the House in their wisdom have adopted that rule, yes, that could be done.

Mr. GOLDWATER. So, in other words, the select committee could offer any amendment, regardless of how it may impact on the total package?

Mr. WRIGHT. The House will work its will in the adoption of the rule and in the adoption of amendments.

Mr. GOLDWATER. What the gentleman is saying is, he does not preclude that possibility from happening?

Mr. WRIGHT. I do not preclude that possibility. I do not.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield for a question?

Mr. WRIGHT. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, this question deals not with procedure, but with a very concrete aspect of the President's message of last night. The President called for an increase annually in the production of coal, as we return to that resource, of roughly 400 million tons per year.

In the Interior Committee, we have just come through 3 months of hearings. I serve on the Subcommittee on Energy and Environment, before which evidence was presented by the EPA to the effect that a report will be filed tomorrow which will result in the reduction of 100 million tons, over a period of time, of coal production. Would the gentleman from Texas support referral of this strip mining bill to the ad hoc committee so that we could have what he has so eloquently described as one energy policy, taking into account all the matters that should be considered?

Mr. WRIGHT. Not unless it were included in the President's message.

Mr. BAUMAN. He mentioned that specifically.

Mr. WRIGHT. The legislation to be referred to this ad hoc committee, I would say to my friend from Maryland, will be that legislation which is submitted to the House by the President pursuant to his message of last evening. I have no way of knowing the confines within which that description would limit, so I just have to answer the gentleman in that way.

Mr. BAUMAN. It appears to the gentleman from Maryland that one of the major elements of the President's program will be excluded from the jurisdiction of a committee that is charged with the comprehensive energy policy. To me, that works at cross purposes.

Mr. WRIGHT. It is my understanding that the President intends to include in his message a number of recommendations to increase the production of coal, and to make easier the production of coal, to facilitate conversions to coal, and to make more expeditious decisions with respect to the building of nuclear plants and other things of that type. But I should not presume to preempt the President's recommendations, nor to delineate by prophecy what specific provisions will be requested of us. Be it enough now to suggest that we are creating a mechanism by which the House, hopefully, can put into place a workable and effective energy program.

Mr. BAUMAN. I wonder if I could ask, within the program, is it possible later to consider delay by this House of the strip mining bill until such time as this ad hoc committee is given a chance to consider it? That is because this bill is completely contrary to what the President has recommended. That is the very least we ought to ask if we are sincere about our energy policy.

Mr. WRIGHT. The gentleman, of course, would have the privilege to present his views at any time with respect to the scheduling of that or any other legislation. All I am capable of dealing with right now, and all that we have before us right now, is this resolution creating an ad hoc committee. I believe it to be a good resolution and I believe it will move us in the right direction.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 4877, MAKING SUPPLEMENTAL APPROPRIATIONS FOR FISCAL YEAR ENDING SEPTEMBER 30, 1977

Mr. MAHON. Mr. Speaker, I call up the conference report on the bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. DANIELSON). Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House on April 6, 1977.)

Mr. MAHON (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. MAHON) is recognized for 30 minutes, and the gentleman from Michigan (Mr. CEDERBERG) is recognized for 30 minutes.

The Chair recognizes the gentleman from Texas (Mr. MAHON).

Mr. MAHON. Mr. Speaker, I will yield myself such time as I may consume.

Mr. Speaker, the $29 billion contained in the conference agreement on the supplemental appropriation bill, 1977 represents the largest supplemental appropriation bill to be passed by the Congress since the World War II period. Members were advised of this when the bill was considered by the House on March 16. The conference agreement which provides pay act costs, traditional supplementals, and regular fiscal 1977 appropriations, involves over 500 appropriation accounts and touches almost every department and agency of the Government.

The Senate amended the House bill in 237 instances, a large number by any yardstick.

Mr. Speaker, while it is not possible to address the action of the conferees on each item before the committee of conference, I do believe it appropriate to speak of the general parameters of the measure before us. This bill, as passed by the House on March 16, contained a grand total of some $27.9 billion. While there were certain amendments agreed to by the House this was the magnitude of the measure when it was sent to the other body.

The bill as passed by the other body totaled some $32.8 billion, an increase of about $5 billion over the House passed bill. The other body considered about $699 million in budget estimates which were transmitted by the President too late to be considered in connection with the House bill. A very large proportion of the net addition made by the other body can be accounted for by the $4 billion amendment for the waste treatment grant program administered by the Environmental Protection Agency. There were many increases and decreases of a relatively lesser magnitude throughout the bill. As I indicated, Mr. Speaker, there were 237 amendments to the bill.

The conference agreement aggregates some $29 billion which is about $1 billion over the House-passed bill and about $3.8 billion under the bill as passed by the other body. The conference agreement is some $4.7 billion in budget authority under the requests submitted by the President.

Included among the net increases of $1 billion over the House bill are amounts of $500 million for the EPA waste treatment facility program and $75 million for Indian health facilities.

The conference agreement also provides funds in addition to the House bill for emergency drought assistance. These items were transmitted to Congress too late for inclusion in the House bill. Included are $50 million for the Federal Crop Insurance Corporation; $75 million for rural water grants; an increase of $150 million in the amount available for water and sewer facility loans; $100 million for drought assistance under the Agricultural Stabilization and Conservation Service; and $100 million for drought assistance under the Bureau of Reclamation.

Mr. Speaker, the largest single item in this $29 billion bill is some $13 billion in budget authority which is actually long term contract authority for assisted housing. The next largest category is some $5.9 billion of programs in the Labor-HEW area. This includes certain health and education programs for which the authorization bills were not completed in time last year to permit inclusion of the applicable appropriations in the regular bill. The third largest item is some $2 billion for pay act costs for civilian and military personnel.

As I indicated there are hundreds of appropriation items in the pending measure. The bill involved all 13 of the Appropriations Subcommittees and all 13 subcommittees were represented on the committee of conference. The measure no doubt is not perfect from the standpoint of any of the 41 conferees or from the standpoint of an individual Member. It is certainly not satisfactory from my standpoint with respect to several matters but all legislation is a matter of compromise and we did the best we could under the circumstances.

I feel compelled to restate my special concern about the $200 million in the bill under the Community Services Administration to pay people's fuel bills. I think this is a very unfortunate and dangerous precedent. The program is not specifically authorized and it was not requested. In my judgment it is a program in which there are latent inequities and the program is clearly susceptible to gross abuses. It promises to cause divisiveness and animosity among people in our communities.

It is advertised as a temporary program but we have had ample lessons in temporary Government programs. And I submit that $200 million is but a drop in the bucket compared to the ultimate exposure of such a program. There is no question but that we are all sympathetic to what inflation and the energy crisis is doing to us but I just do not believe that undertaking to pay people's fuel bills under this program is a viable or prudent solution to this whole problem and I hope the matter can be sidetracked or reversed. It is just another case of throwing money willy-nilly at our problems. We spend a lot of time doing that.

Mr. Speaker, the conferees have reported 91 of 237 Senate amendments in disagreement. Ninety are in technical disagreement. The one item reported in true disagreement is an unauthorized unbudgeted Senate add-on for snow removal costs incurred by local governments last winter in parts of four States. This item is amendment numbered 35 in the HUD chapter of the bill which is handled by the able and distinguished gentleman from Massachusetts (Mr. BOLAND).

The House conferees just could not accept such a proposition and at the appropriate time, I shall offer a motion to insist on the disagreement of the House to this Senate amendment. There will be further discussion of the matter after the conference report is disposed of and when the items in disagreement are considered in sequence.

Mr. Speaker, I also wish to advise the House that at the appropriate time after the consideration of the conference report on this bill, I will present a concurrent resolution to correct a legislative citation in the original text of the bill. The improper citation is in the HEW sections under the heading "Assistant Secretary for Human Development." The concurrent resolution will simply direct the Clerk to change section "202" of the Rehabilitation Act to section "203". Section 202 relates to rehabilitation research and section 203 pertains to rehabilitation training. The citation error was not discovered until after both the House and Senate passed the bill and there was no way the conferees could handle the matter. The intent of the House and Senate is abundantly clear and well documented. The concurrent resolution is purely technical and I mention it at this time simply for the information of Members.

Mr. Speaker, we have talked recently about the necessity for restraint in dealing with our national resources, particularly our energy resources. Among our resources is our fiscal capability, and the bill does not reflect adequate restraint, in my opinion, in dealing with the fiscal matters which provide for funding the country at this time. However, it is too late for amendments to be considered in regard to that aspect of the matter.

Mr. Speaker, the conference report is available to Members. The record is there as to the action taken by the conferees.

I shall not take additional time at this moment. The members of the committee on both sides of the aisle who worked on this bill are here and we would be pleased to respond to any questions. Under leave to revise and extend, I offer a summary of the major items in the bill for insertion in the RECORD at this point:

Major items in the conference agreement on the supplemental appropriation bill, 1977, are:

Increased paycosts for military and civilian personnel	$2,045,676,530
Commodity Credit Corporation	710,000,000
Farmers Home Administration: Water and sewer facility loans	150,000,000
Agricultural Conservation Program: contract authority	100,000,000
Food Stamp Program	720,000,000
Inter-American Development Bank	316,000,000
Annual contributions for assisted housing (contract authority)	13,112,405,000
Housing for the elderly or handicapped (limitation on loans)	100,000,000
Housing payments (appropriation to liquidate contract authority)	411,500,000
Federal Housing Administration Fund	1,801,344,000
Environmental Protection Agency: Construction Grants	1,000,000,000
Veterans' Administration: Compensation and pensions (by transfer)	588,450,000
Bureau of Land Management: Payments in lieu of taxes	100,000,000
Land and Water Conservation Fund	140,743,000
Forest land management	233,005,000
Health Resources Administration	414,846,000
Occupational, vocational and adult education	221,855,000
Higher education	3,187,168,000
Public assistance	1,225,197,000
Community Services Administration	282,500,000
Military Construction	117,126,000
Bureau of Reclamation: Drought Emergency Assistance	100,000,000
Coastal energy impact fund	115,000,000
Payment to the Postal Service Fund	500,000,000
Payment to civil service retirement and disability fund	232,643,000
Federal Buildings Fund	125,000,000

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to insert at this point in the RECORD a table showing in detail the amounts in chapter VII of the bill, as agreed upon by the conferees.

The SPEAKER pro tempore (Mr. DANIELSON). Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

(The table referred to follows:)

H.R. 4877—CHAPTER VII

DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE, AND RELATED AGENCIES

[3] To be funded out of unobligated balances from the swine flu appropriation.

Mr. BRINKLEY. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Speaker, I would like to refer to the Subcommittee on Labor-Health, Education, and Welfare, chaired by the gentleman from Pennsylvania (Mr. FLOOD), and inquire of the full committee chairman, the gentleman from Texas (Mr. MAHON), as to whether it is the intention of the conferees that Mercer Medical School funds are to be used as provided in the Senate report.

As the chairman will recall, it is a moderate amount which triggers a great deal of money in State funds and in local bonds for the medical school in Macon, Ga.

Mr. MAHON. Mr. Speaker, I would say to the gentleman that I conferred with the gentleman from Pennsylvania (Mr. FLOOD), the chairman of the subcommittee. He is on the floor at this time, and it is the understanding of the committee that the Senate report would be controlling and that the funds would be available for this Mercer University project.

Mr. BRINKLEY. Mr. Speaker, I thank the chairman.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Speaker, I was one of the conferees, and I signed the report.

(Mr. YATES asked and was given permission to revise and extend his remarks.)

Mr. Speaker, I urge approval of the conference report before the House today. The bill includes $44,495,000 for management of lands and resources by the Bureau of Land Management; $800,000 for an urban recreation study by the Bureau of Outdoor Recreation, including a study of the proposed Bartram Trail; $140,743,000 for acquisition of lands to be included in the National Park System, the Fish and Wildlife System, and the Forest Service System. This $140,743,000 is the land acquisition portion of a total of $273,048,000 for the first increment of the Bicentennial land heritage program requested by President Ford and approved by President Carter.

For resource management of the Fish and Wildlife Service, the bill includes $15,475,000. The managers on the part of both the House and the Senate are in agreement that operations and maintenance of wildlife refuges should have higher priority than construction of new facilities.

For the National Park Service, $100,855,000 is provided. This includes $90,855,000 for renovation and construction of facilities in the parks. The managers on the part of both the House and the Senate are concerned with the emphasis being placed by the Park Service on the development of visitor orientation and interpretive services, rather than improvement of the resources itself.

The conferees agreed to provide $4,500,000 for roof repairs and reconstruc-

tion of the John F. Kennedy Center for the Performing Arts and urge immediate attention to this needed improvement. Because of the litigation which has been in process for some time, no repairs have been made. As a result the interior of the building has suffered damage from water leaking through the roof. It is important that repairs be made in a timely manner so that further deterioration and degradation of this facility does not occur.

The sum of $10 million was provided for coal mine subsidence control in Pennsylvania, Illinois, and West Virginia. In addition, funds are provided for construction of a metallurgy research center on the Ford Douglas Military Reservation in Salt Lake City, Utah.

The sum of $10,140,000 is provided for operations of Indian programs, and $34,200,000 for the Office of Territorial Affairs. For the Trust Territory of the Pacific, $22,460,000 is provided, including $10 million to offset losses of airport construction grants; $4 million is made available for resettlement on the Enewetak Atoll of the natives who were evacuated from these islands prior to the atomic and nuclear tests in order that they may safely return to their homeland.

The sum of $272,805,000 is provided for the Forest Service. This includes over $200 million for forest firefighting, over $33 million for recreation facilities in the national forests, and over $50 million to produce timber from the Forest Service lands which will be needed in order to attain the goal of additional housing starts for the Nation's people.

For the Federal Energy Administration, $58,301,000 was provided, including $27,500,000 for State grants for weatherization assistance to low-income homeowners.

The sum of $76 million is provided for Indian health services and Indian health facilities, and $18 million is provided for the challenge grant program to be divided evenly between the National Endowment for the Arts and the National Endowment for the Humanities.

Mr. Speaker, I rise in support of the conference agreement and I urge that the agreement be adopted by the House.

Mrs. SCHROEDER. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Speaker, this specific language of Senate amendment 187 grants a permanent special authority to the Director, OMB, to place five positions in grades 16 through 18 of the general schedule of title 5, United States Code. The establishment of these positions would be without regard to the provisions of existing law which place supervision and control over supergrade positions with the Civil Service Commission. The standards, controls, and limitations relating to these matters are spelled out very specifically in title 5.

I understand from the Senate committee's report that these positions are to be available only during the President's reorganization project. However, the language of the Senate amendment is open ended and does not limit the positions to that purpose.

Permanent special supergrade authority should be granted only in the most unusual circumstances and only when fully justified.

In the instant case, the need for this special supergrade authority is unclear. There is no evidence of record that the Civil Service Commission has denied or would deny a request from OMB for five supergrade positions from the Government-wide pool for the purpose of carrying out the President's reorganization project.

I see the distinguished gentleman from Oklahoma and would like to ask him what his understanding was about Senate amendment 187.

Mr. STEED. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Oklahoma.

Mr. STEED. Mr. Speaker, in response to the question, may I say that when the matter first came up on the House side, since it was not authorized, the House omitted it. It went to the other body, and the plea was made to put it back in. We agreed to it in conference on the assurance that these positions are temporary slots. They are to be paid out of a specified item in the OMB budget. They are to be used solely for the reorganization work which the President has set up, and the only reason we are going this way instead of letting them come through the regular legislation committee process is because of the urgency. They said they had to have them in order to get these people on board and working on the reorganization.

There will be absolutely no misunderstanding anywhere that I know of about these five slots terminating once the reorganization work is terminated.

Mr. MAHON. Mr. Speaker, I think it very wise that this question and answer be made a part of the legislative history of this bill, and I commend the gentlewoman from Colorado (Mrs. SCHROEDER) for raising this issue.

Mrs. SCHROEDER. Mr. Speaker, I thank the gentleman for yielding.

Mr. GEPHARDT. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Missouri.

Mr. GEPHARDT. Mr. Speaker, the section of the conference report dealing with funds for the National Railroad Passenger Corporation includes language stating that the "conferees are disturbed by the lackadaisical approach of Amtrak in its dealings with the Congress regarding its budget needs and in other matters."

My experience in dealing with Amtrak officials on choosing a site for a new St. Louis rail passenger terminal, for a time, bore this statement out. In recent weeks, however, Amtrak officials have demonstrated to me a growing recognition of the problems and a willingness to improve their relations with the Congress. At least in the St. Louis case, they are working hard to respond to the views of Members of Congress and, particularly, their constituents.

I am pleased at the progress made so far and hope it will continue so that Amtrak and the Congress can work together cooperatively to provide the best possible service to the Nation's railroad passengers.

Mr. MAHON. Mr. Speaker, I am pleased to have yielded to the gentleman from Missouri and his views will receive the attention of the Appropriation Committee.

Mr. CEDERBERG. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this conference report that we are considering would appropriate more than $29 billion in additional budget authority for fiscal year 1977. In addition, this bill contains $1.8 billion by transfers, increases in limitations, and contract authority. It is important to note the effect this bill will have on the impact on the Federal deficit in this and future fiscal years. The outlays figures, as provided by CBO, are estimated to be: $7.450 billion for fiscal year 1977; $4.268 billion for fiscal year 1978; $1.430 billion for fiscal year 1979; $.640 billion for fiscal year 1980; $.407 billion for fiscal year 1981; and in future years, $14.729 billion, most of which is for the assisted housing program.

This supplemental does show a decrease of $4.7 billion from the budget request, but I believe that is misleading. My colleagues will find the $5.9 billion was cut from two accounts, EPA construction grants—$3.5 billion and HUD assisted housing programs—$2.4 billion. Aside from these two programs, this bill is actually $1.2 billion over the budget.

In addition, there is the issue of what can be considered legitimate program reductions, as opposed to deferral of congressional action until a later time as would be the case of EPA construction grants, and the $275 million reduction for drought assistance which require authorizing legislation.

The major program increases over the President's budget estimates—items over $20 million in changes—in the conference report total $2 billion, and include increases of $710 million for Commodity Credit Corporation; $119 million, Forest Service; $75 million, Indian Health Facilities; $113 million, Health Resources Administration; $433 million, Office of Education; $228 million, Community Services Administration; $117 million, military construction; and $119 million, for the General Services Administration.

If this Congress wants to cut the administration's budget request, and thus assist Carter on the road to fulfilling his campaign promise of a balanced budget, let us make substantive program cuts instead of making cuts in one bill but restoring them in another. This will surely occur with the EPA, and disaster assistance programs.

This $29 billion bill, which far exceeds 10 of the 13 regular appropriations bills

for fiscal year 1977 in total figures, looks rather suspicious to me. I wonder if this administration wants to load fiscal 1977 so that fiscal year 1978 will not look so bad. Perhaps the administration has a new formula for creating balanced budgets within 4 years that I am not aware of.

I commend the President for withdrawing his request for an $11 billion rebate program which had, in my mind, very dubious merits.

However, I want to remind my colleagues that this is not a real savings that can be used for existing or new programs.

Former President Johnson was a past master at the art of making small initial budget requests and large supplemental requests when attention is then focused on the next fiscal year's budget.

But the executive branch is not the only culprit. For example, in the 1977 agriculture appropriation bill, $710 million was cut from the budget request. Now we find it in this supplemental.

Supplementals should not be used for funding new programs or expanding old ones, as in the case of the assisted housing program, and I would urge President Carter, in the spirit of "open and honest government," to make his requests in the regular bills and use the supplemental method for only those programs whose original budget estimates fell short. The supplemental route has gotten so out of hand that even the Washington Post noticed this bill with a front page story yesterday.

Another matter concerns me and that is the ever increasing number of authorized permanent positions.

Supplemental requests in the January budget would have funded 8,219 additional permanent positions. The Carter budget requests considered in this bill provide an additional 1,492 positions. This is in addition to the Carter increase of 1,007 permanent positions in the economic stimulus appropriations bill.

Before Carter was sworn in as President he gave orders to cut more than 70 positions from the White House staff. In a Washington Post article of January 30, Jody Powell cited Carter's repeated pledge to cut the size of the White House staff and said of those efforts:

> So the President can speak from a position of strength when he asks for sacrifices from others in government.

Yet the Carter White House, according to a March 31 news story in the Washington Post, now has 490 full-time employees, which is about 20 less than the end of President Ford's term. It further stated that 175 have been hired on detail from other Federal agencies making the Carter White House 30 percent larger than Ford's.

If this, and the additional request of 2,499 permanent positions, is a "position of strength," I shudder to think of what the Federal bureaucracy will look like by 1980.

I would urge my colleagues on the other side of the aisle, to join me in assisting our President fulfill his campaign promise of what he can do in arresting unrestrained growth in salaries and number of personnel.

Mr. Speaker, I would like to discuss briefly section 304 of H.R. 4877, which as passed the House provided that:

> None of the funds appropriated or otherwise made available in this act shall be obligated or expended for the termination or deferral of any project, activity, or weapons system approved by Congress, except specific projects, activities, or weapons systems for which, and to the extent, budget authority has been rescinded or deferred as provided by law.

Section 304 was stricken on the Senate floor on the motion of the chairman of the Senate Committee on Appropriations, who made it clear that he did not oppose the section, but wanted further study and discussion by the conference committee. The Senate conferees agreed to the House language, and the joint explanatory statement of the committee of conference says:

> The conferees agree that this provision does not in any way change current or future rescission and deferral procedures under the Impoundment Control Act of 1974 (Title X of Public Law 93-344). Preparation and submission of rescissions and deferrals by the Executive Branch, and consideration thereof by the Congress can continue under the Impoundment Control Act, that is, "as provided by law".
>
> Section 304 would require, and the conferees direct, that rescissions and deferrals be promptly submitted under the Impoundment Control Act when termination or deferral is proposed for any project, activity, or weapons system which involves funds appropriated in this Act. It is intended that the provision be applicable only to those projects, activities or weapons systems that are clearly approved by Congress. It is not intended that the provision modify or affect the application of the Impoundment Control Act in any way.

The language of section 304, and the joint explanatory statement, should be clear. However, as the sponsor of the amendment which was adopted by the House Committee and which added section 304, and as a House conferee, I would like to add some background and practical examples which should totally eliminate any doubt as to how the conferees intend this section to operate.

The Impoundment Control Act of 1974, title X of Public Law 93-344, established procedures and definitions for rescissions and deferrals. In defining a deferral, section 1011(1) of that act explicitly refers to "withholding or delaying the obligation or expenditure of budget authority (whether by establishing reserves or otherwise) provided for projects or activities." And in defining the contents of special messages proposing deferrals, section 1013(A)(2) of that act refers to "The specific projects * * * involved." Similarly, in defining a rescission, section 1012(A) of that act cites "the termination of authorized projects or activities", and in defining the contents of special messages proposing rescissions, Section 1012(A)(2) also refers to "the specific project * * * involved."

On at least eight occasions, the previous administration proposed rescissions or deferrals for individual projects, activities or weapons systems which had been approved by Congress, but not identified as individual items in appropriation bills. I will include these proposals at the conclusion of my remarks.

The current administration has changed this practice, taking the position in a number of instances that rescissions and deferrals do not need to be submitted unless projects, activities, or weapons systems are identified as specific items in an appropriation bill.

This practice is a departure from the letter, spirit, and application of the Impoundment Control Act. Section 304 is intended to require, as the Impoundment Control Act was intended to require, that a rescission or deferral be promptly submitted whenever it is determined that the obligation of budget authority is to be delayed, or budget authority will not be used, for projects, activities, or weapons systems for which the budget authority was approved by Congress, whether identified in a bill, committee or conference report, or by the committee in floor debate.

There is nothing new in this process. Executive agencies must now go to the reports and floor debate to determine which projects, activities, or weapons systems are approved by Congress, but not identified as specific items in appropriations bills.

The process does not apply to the many hundreds of activities which are identified in the agencies' budget justifications, and which are generally considered to be approved unless, and to the extent, it is specified to the contrary by committee or conference reports, or by the committee in floor debate.

The process does not prevent or preclude the study or reevaluation of projects, activities, or weapons systems, but does require that a deferral be submitted when it is determined that obligation of budget authority for a project, activity, or weapons system is to be delayed for any reason.

The process does not change reprograming procedures, but does require that a rescission or deferral be promptly submitted whenever it is determined that the obligation of budget authority is to be delayed, or that budget authority will not be used, for projects, activities, or weapons systems for which the budget authority was approved by Congress.

Section 304 is limited to funds in this supplemental. While many of the projects, activities, and weapons systems are themselves funded in other appropriation acts, this supplemental does include pay supplementals which will be directly applied to the administration of many of those projects, activities, and weapons systems, and would therefore apply to deferrals and terminations thereof.

Finally, Mr. Speaker, I want to say that section 304 should not lead to higher Federal spending. President Carter has promised to balance the Federal budget by the end of his first term. Surely his overwhelming majorities in the House and the Senate will support his proposals to restrain Federal spending. Surely we in the Congress would not want the President to restrain Federal spending through administrative terminations and deferrals.

That is not the American way.

Indeed, under section 304—and perhaps under similar sections in 1978 appropriation bills—I look forward to a constructive partnership between the President and his congressional majorities, to restrain Federal spending and balance the Federal budget, with full consultation, and within the letter and the spirit of the law.

That is the American way.

I include the following:

INSTANCES WHERE RESCISSIONS OR DEFERRALS WERE PROPOSED FOR PROJECTS, ACTIVITIES, OR WEAPONS SYSTEMS WHICH WERE NOT SPECIFICALLY IDENTIFIED IN APPROPRIATION BILLS

November 18, 1974, H. Doc. 93-385: Proposed deferral of $43,945,000 for 76 individual construction projects of the Corps of Engineers.

November 18, 1974, H. Doc. 93-385: Proposed deferral of $900,000 for 2 projects within the loan program of the Bureau of Reclamation.

November 18, 1974, H. Doc. 93-385: Proposed deferral of $17,955,000 for 12 construction and rehabilitation projects of the Bureau of Reclamation.

November 18, 1974, H. Doc. 93-385: Proposed deferral of $14,503,000 for 12 projects for flood control on the Mississippi River and tributaries.

November 26, 1974, H. Doc. 93-389: Proposed rescission of $13,500,000 for procurement of the UH-1H aircraft.

November 26, 1974, H. Doc. 93-389: Proposed rescission of $248,000,000 for procurement of 24 A-7D's, and 12 F-111's.

November 26, 1974, H. Doc. 93-389: Proposed deferral of $13,000,000 for acquisition of a new computer capability in the controlled thermonuclear research program.

May 13, 1976, H. Doc. 94-494: Proposed deferral of $688,430 for a replacement facility for the Salt Lake City Metallurgy Research Center.

I would also like to talk briefly about section 306 of H.R. 4877, which would deny use of funds in the bill for the administration of the President's program to pardon persons who evaded the draft during the period of the Vietnam war. Subsequent to House passage of section 306, the so-called Myers amendment, questions have been raised as to whether there are any funds in the bill for activities which would be involved in the pardon program, and therefore as to the effectiveness of the amendment.

My colleagues in the House should know that there are indeed funds in the bill for activities which would be involved in the administration of the pardon program, and that the amendment will have an effect on the pardon program, if the administration observes the law.

The Appropriations Subcommittees receive detailed justifications from the executive agencies. While much of this detail is not repeated in committee or conference reports, as a general rule the appropriations requested, and the justifications in explanation thereof, are considered approved unless and to the extent it is specified to the contrary by committee or conference reports, or by the committee in floor debate.

Based directly on the language of the President's Executive Order 11967, issued January 21, 1977, administration of the pardon program will clearly and directly involve the Attorney General and his offices, the Office of the Pardon Attorney, and the Immigration and Naturalization Service. Also necessarily involved, though not specified in the Executive order, would be the Executive Office of the President, particularly the White House Office and the Office of Management and Budget.

The Department of Justice requested, and the House and Senate approved, a pay supplemental of $900,000 for "general administration." Within this amount were $27,000 for the Offices of the Attorney General, and $9,000 for the Office of the Pardon Attorney.

The Department of Justice also requested a program supplemental of $1,595,000 for "general administration." Within this amount were $18,000 for the Offices of the Attorney General, and $6,000 for the Office of the Pardon Attorney. The House approved $1,435,000, and the Senate concurred. The reduction of $160,000 was not applied against any particular activity, and therefore the program supplemental approved by Congress would be available for those two activities involved in the administration of the pardon program.

For the Immigration and Naturalization Service, the Department requested, and the House and Senate approved, a program supplemental of $2,000,000, and a pay supplemental of $8,515,000. Pay supplementals were also approved for the White House Office, $632,000, and the Office of Management and Budget, $572,000.

I think that there cannot be any doubt as to the effect of the amendment, or of the intent of Congress. During House debate, prior to the adoption of the amendment which added this section, the gentleman from West Virginia (Mr. SLACK), the chairman of the subcommittee concerned, stated that—

> In my judgment . . . this amendment would make it impossible to administer the program. . .

The House then approved the amendment, and the Senate has concurred.

During the past few years we have heard a great deal of talk about respect for Congress. It will be very interesting to see what happens with this amendment.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. CEDERBERG. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate the gentleman's yielding.

As I understand, this so-called supplemental bill is $2 billion over what the House passed: is that correct?

Mr. CEDERBERG. $1,200,000,000.

Mr. ROUSSELOT. $1,200,000,000. Did we decide which taxpayers were going to sacrifice the most to support this add-on expenditure that we have here?

Mr. CEDERBERG. No, but we are going to assure the gentleman that his constituents from California will pay their fair share.

Mr. ROUSSELOT. I am sure they will. That is what is bothering me. I remember the time, as the gentleman does, when the so-called supplemental appropriation bill was usually only $2 or $3 billion. Can we be assured that this is the last supplemental bill we will have this year?

Mr. CEDERBERG. I would not bet on it. Under the new Budget Act we praised ourselves in the full Committee on Appropriations that we were not going to have any more supplementals. Now we wind up with the largest supplemental since World War II.

I do not think the press is very interested. Some of them are up there. But when we talk about an appropriations bill of $29 billion, it never gets anyone's attention.

Mr. ROUSSELOT. I appreciate the comments of my colleague, the gentleman from Michigan. I am sorry that we have not been able to trim more of this.

Mr. CEDERBERG. Just look at the speeches we have been hearing about reorganization. We are going to reduce the number of personnel in the Federal bureaucracy. There are 9,800 new people in this bill.

Mr. ROUSSELOT. I remember the White House was going to reduce their personnel by one-third, but they have already increased it by one-third.

Mr. SYMMS. Mr. Speaker, will the gentleman yield?

Mr. CEDERBERG. I yield to the gentleman from Idaho.

Mr. SYMMS. I thank the gentleman for yielding.

Would the gentleman want to venture an estimate of how big a supplemental appropriation bill it is going to take when we get this whole army of energy bureaucrats on the job that the President was calling for last night?

Mr. CEDERBERG. No, last night one commentator said this was a bureaucrats' dream, and I think this is what is going to happen. It will be a bureaucrats' dream.

Mr. ROUSSELOT. It will be a citizens' nightmare.

Mr. MAHON, Mr. Speaker, I yield to the gentleman from Texas (Mr. DE LA GARZA) such time as he may consume.

Mr. DE LA GARZA. I thank the gentleman.

I would like to ask a question if I might of the appropriate subcommittee. When the supplemental appropriation bill came before the House, the request had $1.3 million for the Federal law enforcement training center. This was cut out by the House committee and was not in the bill as it left the House. The Senate now recommends $1 million appropriation in this respect under amendment 180. I would like to find out if the House would insist or could insist on the retention of their deletion in not increasing this $1 million that was not approved by the House when the bill left the Chamber.

Mr. MAHON. Mr. Speaker, this matter was before the subcommittee headed by the gentleman from Oklahoma (Mr. STEED), and I yield to the gentleman for a response.

Mr. STEED. Mr. Speaker, when the matter was before the subcommittee originally, some question was raised by the gentleman from Texas. In order to

give ourselves an opportunity to learn more about it, we did eliminate it, and when it went to the Senate the need for the money was renewed and the Senate agreed to approve it. In conference it was pointed out that under the law the training center is obligated to contract with any agency that wants to use its facilities and in order to do that the school has to meet certain financial obligations. This is a matter of permitting the school to carry out its requirements under the law.

The decision as to whether or not the Immigration and Naturalization training personnel will be taken from existing schools and sent to this Federal school is not a matter that is under the jurisdiction of our subcommittee, but we did feel since the decision was being made for the INS to exercise its right to use this school, that it would be incumbent upon us to provide the school with the funds it has to have to comply with the law.

We were told in passing that the place to be vacated by the students in the gentleman's district is being retained and will be used by INS for other purposes and that the economic report of this change will be minimal. I am sure the gentleman knows more about that than I do. But the decision to make this change rests with the INS and that jurisdiction is in another subcommittee. I was unable to go into it any deeper than I am telling the gentleman here today.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield further?

Mr. MAHON. I yield further to the gentleman.

Mr. DE LA GARZA. Is it my understanding that no public hearings were held on this request?

Mr. STEED. The only hearings we have, of course, are with the Treasury Department people and they include all the officials representing the school itself. We had no contact with the Immigration and Naturalization Service. The school contracted with agencies of the Government and our job is to keep the school in a financial position to comply with its contracts under the law.

What the Senate did I do not know, but they seemed to have more information about what the intent of INS was than we did, and that was that they were going to retain the facilities in the district of the gentleman from Texas and that it would be increased and that the economic impact would be minimal. We have had no formal hearing on that point.

Mr. DE LA GARZA. If the gentleman will yield further just briefly, I appreciate the fact that the gentleman mentioned. The actual fact is that we have now a new Commissioner-designate for Immigration and we yet do not know what his intentions are or will be in respect to these funds. The matter is that if we appropriate the funds I feel that the school, which comes under the jurisdiction of the gentleman from Oklahoma, will utilize this and we may in effect be forcing something on the new Commissioner of Immigration that he might not be willing to go along with. So I would very respectfully recommend if possible under the rules that my colleagues here in the House agree with me and that we refrain from allowing this modest amount of funds, I must admit, in order to allow the new Commissioner of Education and the Appropriation Subcommittee of the Appropriations Committee to study this matter more than apparently it has been studied.

I might add, not because of the lack of action of the gentleman from Oklahoma, but the reluctance of the agency to come up with clear and appropriate statements of what their intentions are with regard to the Immigration Service to the INS.

Mr. STEED. Let me emphasize to the gentleman, we are not involved in the policy of the INS. This is just another agency that had the right under the law to use the facilities of this training center, if they so desire. If the new head of INS does not want to make this change, he is not required to under this law.

Mr. Speaker, I am in sympathy with the gentleman from Texas. I would think the gentleman's case has to be made with the new head of the INS and not with us. We have no choice but to make a school live up to the requirements of the law. If the INS decides to use it, it is their decision. So the whole decision that the gentleman is concerned about is with the INS and not with the center.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield further?

Mr. MAHON. I yield further to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Speaker, the gentleman from Oklahoma is very modest as far as the powers of the prestigious Committee on Appropriations. The gentleman and the gentlemen in this committee and eventually we, the House, can do and undo and we should not be subject to some center that says this is the amount and perfunctorily we should give it to them. I would hope that within the scope of the jurisdiction of the committee they would agree with me, if possible; if not, I apologize for taking the time, but this is the only forum I have at this time. Perhaps we should go to the appropriate subcommittee and later to the INS, but at this time I have to avail myself of the forum that is presented to me at this time.

Mr. STEED. Mr. Speaker, I hope the gentleman understands, we are talking about the responsibility of a school. If they refuse to seek the funds to carry out a deal with the INS, they would be in the embarrassing position of already having the money and carrying out the same kind of agreement with about 31 other Government agencies; so the decisionmaking process just did not come within our jurisdiction.

Mr. DE LA GARZA. Mr. Speaker, I appreciate the cooperation and the time of the gentleman.

Mr. CEDERBERG. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, the conference report contains $29.1 billion, which ostensibly puts the bill $4.6 billion under the Carter budget, $3.8 billion under the Senate, and $1.2 billion over the House version.

However, these figures need to be put in perspective in order to come up with a more accurate perspective of the actual spending involved. As I stated when the supplemental was originally considered on the floor, when you eliminate the 40-year contract authority for the section 8 housing program, where there is essentially a paper reduction, and the waste treatment construction grant program, where funding is simply delayed until after the authorizing legislation is enacted, we see that the conference report is actually some $1.2 billion above the Carter budget.

Moreover, when the waste treatment funds are excluded, the conference report is not $3.8 billion under the Senate, but only $300 million under, compared with the $1.2 billion by which it exceeds the House version.

The Labor-HEW chapter contains nearly $5.9 billion, which places it some $840 million over the Carter budget. This chapter is also $48 million over the House version and $50 million under the Senate.

Among the key items in the Labor-HEW chapter where changes have been made from the original House version, a total of $5.8 million was added for alcoholism, of which $4.5 million goes for special projects and $1.3 million for formula grants as a hold harmless payment to insure that no State loses money under the new formula adopted last year.

The sum of $1 million was added to expand the School of Veterinary Medicine at Tuskegee Institute. This brings up to four the total number of veterinary schools which have received special earmarked funding in this bill. This is clearly a bad example to set, because the more frequently you use a special earmark to please this Senator or that Congressman, the more of a pattern you will be establishing whereby everybody else will be expecting similar treatment, and rightly so. It is the old pork barrel approach being applied to health and education, but I submit that the potential dangers resulting from decisions based on political pull rather than merit are much more serious in the health and education fields than in the public works area.

The Senate added $35 million for emergency school aid, and we end up with $17.5 million. There was no budget request or funds included in the House version for this item. $7.5 million of this amount will be used for magnet schools, pairing of schools, and neutral site schools, and $10 million will go for so-called special desegregation assistance projects. None of these funds would be used for emergencies resulting from court orders.

For student assistance under higher education, the conference report contains a reduction of $40 million from the original House amount for the work study

program. This is due to a late discovery of unspent funds remaining from the 1976 appropriation. The direct loan program ends up at $310.5 million, a $10.5 million reduction from last year's amount. This represents the beginning of a gradual phaseout of new capital contributions for this program, timed to coincide with increases in the revolving fund. A total of $28 million in additional funds from the revolving fund will be available in the coming academic year compared to the present, so even with this reduction in new capital contributions, there will still be an increase in total funding for loans. Actually we should have made a greater reduction than we did in new capital contributions, but the Senate was reluctant. This was the program you will recall, where President Carter proposed no new capital contributions.

The $25 million over the House bill is included for the Railroad Retirement Board to fund benefit payments required by the Rail Reorganization Act of 1973. This will bring the total for the year to $65 million.

Before concluding my remarks, I want to mention two other items. First, the Senate accepted the $200 million added by the House to subsidize fuel bills, so this item did not go to conference. The Senate included some report language designed to provide guidance to the Community Services Administration for the administration of the program, but frankly, if I were CSA, the Senate language would not be all that helpful. The net result is that we still do not know for certain how this program will operate, nor whether the intent of the House language that people who have already paid their fuel bills also receive assistance will be carried out.

In view of the message we just heard on the part of the administration that says we will give serious thought in the future to people needing help because of increasing fuel bills, mark my word, this $200 million is a drop in the bucket. The food stamp program 6 years ago began at $200 million and has gone to $600 million. In a few years, I venture it will be at $2 or $4 or $6 billion.

Mr. MAHON. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Texas.

Mr. MAHON. Mr. Speaker, let us here and now solemnly agree that we have to do everything in our power to prevent this program from growing, as the gentleman has indicated. I have the same concern the gentleman does, and I hope we resolve that we will not permit this to happen.

Mr. MICHEL. Mr. Speaker, I would be happy to certainly join with the gentleman in that kind of resolve. As the gentleman knows, it was against our wishes that it was retained in the subcommittee and in the full committee the gentleman joined in defeating us by a two-vote margin. Unfortunatey, we lost again on the floor of the House.

We would remind everyone that we did not have 1 day of hearings on the justification for any appropriation and under what kind of rules and regulations we would have to administer such a program.

Then, during the amendment process in the House nobody could determine just who would be eligible and who would not. Conceivably, under one stretch of the imagination, 38 million people in this country currently would qualify for subsidization of their most recent winter fuel bills to some extent.

But, be that as it may, one other area troubles me. There are two amendments in the Labor-HEW chapter being reported in technical disagreement because the appropriations action contravenes the language of the authorizing legislation. The first has to do with the alcoholism formula grants to the States, where the formula is in effect being altered to insure that no State receives less than the amount they received last year. The second waives the requirement of the emergency school aid law that not more than 5 percent of the total appropriation be allocated for special projects.

I point this out because of the flack that has been raised on previous occasions when we have sought to overcome authorizing language in order to reduce funds. When there is increased spending, little is said, but when spending reductions are proposed, all sorts of pious protestations are made about the integrity of the authorizing language. I think the record ought to show that this action today represents an additional precedent which we ought to be able to rely upon for any future action we may wish to pursue. I would further suggest that the absence of opposition to these two amendments by the authorizing committees involved represents acceptance on their part of the action being undertaken.

Mr. CEDERBERG. Mr. Speaker, I yield back the balance of my time.

Mr. MAHON. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr BOLAND).

Mr. BOLAND. Mr. Speaker, chapter V of the conference report on the 1977 supplemental appropriations bill dealt with some very tough issues. I am happy to say that we were able to reach agreement with the Senate on all but one issue—disaster relief. I understand that at the proper time, the gentleman from Indiana (Mr. BRADEMAS) is going to offer a preferential motion to recede and concur in the amendment of the Senate numbered 35. I will address the issue and explain why the House should insist on its position at that time.

But let me take just a minute to touch on the major items that were in conference. The largest item, of course, was the Environmental Protection Agency's waste treatment facilities construction grants program. As the Members will recall, when this supplemental bill was first before the House Mr. TRAXLER offered an amendment reducing the amount for that activity from $1,000,000,000 to $500,000,000. That was done at the request of the Committee on Public Works and Transportation. The Senate increased the amount to $4,500,000,000. I spoke to the chairman of the Committee on Public Works and Transportation, Mr. JOHNSON, before we went to conference because I knew the Senate was firm in their position. He told me he understood the problems the House conferees would face and he hoped that we would not exceed $1,000,000,000. And that is exactly the figure the conferees came back with. I will include a table showing the distribution of the $1,000,000,000 by State at the end of my remarks.

We had to accept the Senate formula for distributing the funds provided in this bill but there really is not any significant difference from the House formula. I want to make one point here. Our accepting the Senate formula in no way should be considered an endorsement for their position. The Committee on Public Works and Transportation, in conference on the authorizing bill, will determine the distribution of funds subsequently provided.

The conference agreement does not provide funding for the National Commission on Neighborhoods or the National Institute of Building Sciences. The two items were both added by the Senate. When and if the National Commission on Neighborhoods is authorized, the committee will consider providing funds.

The House conferees did accept the Senate amendments adding $10,045,000 for the assistance for health manpower training institutions of the Veterans' Administration and $1,000,000 for the emergency homeowners' relief fund administered by HUD.

We have included $100,000,000 for the popular section 202 housing for the elderly or handicapped program. This is $50,000,000 below the amount recommended by the Senate.

The bill also includes $13,112,405,000 for the annual contributions for assisted housing program. This will provide for an additional 134,200 units of subsidized housing in fiscal year 1977. A total of 235,000 units were provided in the regular bill.

Thank you, Mr. Speaker.

The table referred to follows:

EPA construction grants, fiscal year 1977 supplemental distribution by State

Alabama	$10,906,000
Alaska	4,759,000
Arizona	6,345,000
Arkansas	10,807,000
California	82,391,000
Colorado	8,031,000
Connecticut	12,195,000
Delaware	3,966,000
District of Columbia	3,966,000
Florida	35,792,000
Georgia	19,929,000
Hawaii	6,940,000
Idaho	4,065,000
Illinois	52,151,000
Indiana	21,713,000
Iowa	11,005,000
Kansas	12,195,000
Kentucky	14,971,000
Louisiana	12,493,000
Maine	5,453,000

Maryland	37,874,000
Massachusetts	27,662,000
Michigan	46,897,000
Minnesota	15,070,000
Mississippi	7,535,000
Missouri	19,830,000
Montana	3,272,000
Nebraska	6,147,000
Nevada	3,272,000
New Hampshire	6,742,000
New Jersey	47,591,000
New Mexico	3,272,000
New York	105,294,000
North Carolina	20,722,000
North Dakota	3,272,000
Ohio	55,522,000
Oklahoma	13,484,000
Oregon	8,328,000
Pennsylvania	46,698,000
Rhode Island	3,966,000
South Carolina	13,088,000
South Dakota	3,272,000
Tennessee	14,872,000
Texas	43,030,000
Utah	5,057,000
Vermont	3,272,000
Virginia	22,011,000
Washington	15,368,000
West Virginia	21,614,000
Wisconsin	19,929,000
Wyoming	3,272,000
American Samoa	298,000
Guam	992,000
Puerto Rico	8,923,000
Pacific Trust Territories	1,983,000
Virgin Islands	496,000
Total	1,000,000,000

Mr. WEISS. Mr. Speaker, although I am voting for H.R. 4877 (Supplemental Appropriations Act) because of the many vital programs which it funds, I must express my strong opposition to the manner in which this measure comes to us from the conference committee.

When the House acted on H.R. 4877 on March 16, it appropriated approximately $28 million for many valuable programs such as those on food stamps, housing, refugee assistance, pollution control, and education. The conference committee version retains these programs, which is why I am voting for it. But so much of H.R. 4877 has been revised that it is difficult to recognize it as the legislation which I voted for only a month ago.

H.R. 4877 under this conference committee version contains over $800 million in funding which was never considered by the House. House language earmarking refugee assistance funds for use in aiding refugees from the Soviet Union and Eastern Europe has been deleted and $12.5 million for funding a military medical school of uncertain value—the Uniformed Services University—has been added. Also over $100 million has been added for the agricultural conservation program—another increase not considered by the House before. This revised version of H.R. 4877 adds over $1 billion more than the House originally appropriated.

It is apparent that H.R. 4877 as passed by the House on March 16 has been changed to an excessive degree. In my mind the conference committee version barely reflects the position the House adopted when it originally passed this legislation.

There is something amiss when the whole House must reconsider legislation which it authored in a form that makes that legislation totally different. It is not appropriate, in my judgment, for a handful of Members of Congress under the title of conferees to be able to redraft legislation in this manner.

I would hope that the House would be more jealous of its legislative prerogatives than to allow this kind of procedure to be repeated. If not, many of us will simply refuse to vote affirmatively for this kind of appropriation measure in the future.

Mr. PEPPER. Mr. Speaker, I strongly favor the Uniformed Services University. This university is now a going institution. A long way toward completion are all of its structures. It has an excellent faculty and a fine first year class. I believe that the medical personnel of the uniformed services should be trained, as are the officers of those services, in an institution of the uniformed services. It is so important that the spirit to be found in the leaders of the uniformed services, inculcated in their respective academies, also be in the medical personnel of the Armed Services, so essential to the welfare of the personnel of those services. Furthermore, of the greatest importance to the civilian population of the country is that we not impose upon the already overburdened medical schools, preparing physicians for civilian service, the training of the medical personnel in the Armed Services. Every Member of this House I am sure is constantly besieged by applicants to get in our ordinary medical schools who cannot get in, or have great difficulty being admitted, because those institutions can take only a very few of the hundreds or thousands of applicants who apply for admission. This uniformed services university will set apart a separate institution for the training of medical personnel for the Armed Services and leave the full capacity of our civilian medical schools to be devoted to medical personnel to serve our civilian population.

Mr. Speaker, I include a statement I made in favor of the Uniformed Services University before the Subcommittee on Defense and the Subcommittee on Military Construction of the Committee on Appropriations of the U.S. Senate on March 21, 1977, with these remarks in the body of the RECORD:

STATEMENT BY CONGRESSMAN CLAUDE PEPPER

Chairman McClellan, Chairman Johnston, I appreciate your allowing me to come before your Subcommittees on such short notice. I just want to speak briefly on the Administration's proposal to abolish the Uniformed Services University of the Health Sciences.

I appreciate the fact that this proposal was put forward in the spirit of fiscal responsibility, but I believe there is a strong case for keeping the university open.

We are told there will be savings on construction costs—perhaps as much as $100 million. But estimates of completing the buildings now stand at $72.6 million—$13.2 million under what Congress has appropriated. This may be one of the few cost *under*-runs experienced by the Defense Department in recent memory! Moreover, it is estimated that closing the school could cost between $40 million and $60 million.

We hear that the cost of graduating a medical student from the Uniformed Services University is much greater than through the Defense Department scholarship program. And, as you know, the General Accounting Office did a comparison of these costs based on years of expected service in the military, and found that the cost to the Defense Department is somewhat lower through the scholarship program. But what does not receive as much attention is the fact that other Federal programs—primarily through the Department of Health, Education, and Welfare, pick up the rest of the tab for these scholarship students, so there is not a saving to the Federal Treasury.

Moreover, it has been demonstrated that the *total* cost for graduating a civilian medical school student is somewhat higher than for a student at the military medical school.

As my colleagues are aware, the Administration indicates we will save $14 million in operating costs in fiscal year 1978, and as much as $28 million a year by fiscal 1982. Yet the GAO, in its report last May, indicated that some 379 scholarship graduates each year would be needed to replace 175 graduates yearly of the University, because of the difference in the length of time each is required to serve. The additional Defense Department scholarships needed would cost some $12 million annually. And it is possible that it would cost as much as $27.6 million with the additional Federal assistance that could be requested by civilian schools

Moreover, we are all aware that tuition at civilian medical schools is rising rapidly. The cost of these Defense Department scholarships will no doubt continue to rise.

The Administration believes it can make up its physician shortage through recruitment, with the use of scholarships, Variable Incentive Pay and other steps. But we have seen that the Department has not yet met its physician needs through recruitment. Moreover, we know that a substantial number of these recruits are graduates of foreign medical schools.

We have heard discussions about greatly reducing the number of foreign medical graduates who are allowed to practice medicine in this country. Should this happen, it stands to reason that DOD would have an even more difficult time recruiting physicians. And our civilian medical schools would be hard put to produce enough physicians to serve both the civilian and military populations.

We could argue the question of cost-savings for the rest of the week. Everybody has his own set of figures. The fact is, it is difficult to assess what the cost factors will be with any certainty. But there are other aspects that must be taken into account.

If we close down this school, we will have displaced 32 first-year medical students who have planned their careers around the University. They will, no doubt, have difficulty being accepted at civilian schools as second-year students. The staff and faculty of the University, many of whom gave up tenured positions elsewhere, will have their lives disrupted. The costs of settling the obligations can be expected to be substantial.

The school is operating. The curriculum has been established. The buildings will be finished soon. The students and faculty have made plans for their futures. Why disrupt them now—why, after the Congress has acted, change our minds now? It would be a sad state of affairs for Congress to take an about-face at this late date.

This University was created to produce a core of career-minded physicians—doctors trained in the tradition of the services, who understand the special needs of military personnel and their families, and who are trained to deal with war-time situations.

Finally—and this is an area of great concern to me—I believe this University is needed as much by civilians as the military. If we close down the school, there will be

that much more pressure on the civilian medical schools. I am constantly beset by people who want to go to medical school, but there simply aren't enough spaces.

For almost 30 years, I have fought in the Congress for Federal aid to medical education. We simply must do what we can to ensure that this Nation has enough trained doctors and health care personnel to meet the needs of all our citizens—those in the military and those in the cities and towns all around this country.

If we ask the civilian schools to give us their physicians for the military—and if, as I mentioned, foreign medical graduates are prevented from practicing here we will run the risk of having too few doctors to serve the rest of our population.

As Chairman of the Select Committee on Aging, I am determined to see that our older citizens have the benefit of medical care. It is they who most need the assurance that there are enough well-trained doctors to meet their needs. I believe that we should go ahead with our plans for this University, and I am hopeful that we will be able to accomplish this goal.

Thank you.

Mr. MAHON. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SYMMS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 264, nays 142, not voting 27, as follows:

[Roll No. 142]

NOT VOTING—27

Abdnor	Fish	Gammage
Dent	Florio	Hall
Derrick	Ford, Mich.	Kemp
Devine	Forsythe	McEwen
Mikva	Roe	Thompson
Milford	Ruppe	Tsongas
Mineta	Sawyer	Tucker
Myers, Ind.	Shipley	Yatron
Price	Teague	Young, Alaska

The Clerk announced the following pairs:

On this vote:

Mr. Dent for, with Mr. Teague against.

Mr. Florio for, with Mr. Milford against.

Mr. McEwen for, with Mr. Hall against.

Mr. Ford of Michigan for, with Mr. Devine against.

Mr. Price for, with Mr. Forsythe against.

Mr. Thompson for, with Mr. John T. Myers against.

Mr. Shipley for, with Mr. Ruppe against.

Until further notice:

Mr. Yatron with Mr. Young of Alaska.

Mr. Mineta with Mr. Tsongas.

Mr. Roe with Mr. Fish.

Mr. Mikva with Mr. Abdnor.

Mr. Gammage with Mr. Sawyer.

Messrs. HYDE, RUSSO, GLICKMAN, RISENHOOVER, HILLIS, WIRTH, WINN, LENT, GOODLING, HAMMERSCHMIDT, LUKEN, and ANDREWS of North Carolina changed their vote from "yea" to "nay."

Mr. PRESSLER changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore (Mr. BENNETT). The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 3: On page 4, line 20, strike $10,000,000 and insert $60,000,000.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 3 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 4: Page 4, line 21, insert: *"Provided*, That $50,000,000 shall be made available only upon enactment into law of authorizing legislation."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 4 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 7: Page 5, line 9, insert:

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

AGRICULTURAL CONSERVATION PROGRAM

For an additional amount to carry out the Agricultural Conservation Program, $100,-

000,000, to incur obligations for the period ending September 30, 1977, and to liquidate such obligations for soil and water conserving practices in major drought areas as designated by the President or the Secretary of Agriculture: *Provided*, That not to exceed 1 per centum of the amount herein may be withheld and allotted to the Soil Conservation Service for services for its technicians in the designated drought areas: *Provided further*, That emergency assistance herein authorized shall be made available in accordance with standards and criteria as developed and approved by the Secretary of Agriculture.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 7 and concur therein with an amendment, as follows:

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

AGRICULTURAL CONSERVATION PROGRAM

For an additional amount to carry out the Agricultural Conservation Program, $100,000,000, to incur obligations for the period ending September 30, 1977, and to liquidate such obligations for soil and water conserving practices in major drought or flood damaged areas as designated by the President or the Secretary of Agriculture: *Provided*, That not to exceed five per centum of the amount herein may be withheld with the approval of the State committee and allotted to the Soil Conservation Service for services of its technicians in the designated drought or flood damaged areas.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 8: Page 6, line 11, insert:

"MILITARY PERSONNEL"

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 8 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 9: Page 6, line 12, insert:

MILITARY PERSONNEL, ARMY

For an additional amount for "Military personnel, Army", $1,167,000, to remain available for obligation until September 30, 1978.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 9 and concur therein.

The SPEAKER pro tempore. The gentleman from Texas (Mr. MAHON) is recognized for 30 minutes, and the gentleman from Alabama (Mr. EDWARDS) is recognized for 30 minutes.

The Chair recognizes the gentleman from Alabama (Mr. EDWARDS).

Mr. EDWARDS of Alabama. Mr. Speaker, here we are, and I, frankly, did not expect to be here to talk about this again. This is the Military Medical University that we debated at some length in 1975. I am very much opposed to it, and I stated in 1975 that when we made the effort on two different occasions and did not prevail, that would be the last I would have to say about it. I intended to stay in that posture, but when the President in his budget amendments for fiscal year 1978 terminated the Military Medical University, that is to say, he knocked out the funds in the Ford budget of 1978. So while I have not raised the issue, he has, and I think that it should be debated. I think that the President should have his "day in court," so to speak, and so I find myself back up here before the House once again on this issue.

What has happened is that the Senate has put $12,465,000 into this bill, the supplemental bill, to cover expenses of military personnel, Army, Navy, Air Force, and civilian salaries in the operation and maintenance account defense agencies for 1978. According to our rules, it is not germane; it is legislation on an appropriation bill; it is not authorized; and in fact it is inconsistent with the Budget Control Act. Yet all we can do with it now is to debate it when it is brought back in technical disagreement.

I will ask for a vote when this debate is over, so once again, we can pass judgment on the President's judgment. It should not be in this bill in the first instance because it should come, if it is going to come, in the appropriation bill for fiscal year 1978, but the Senate felt very strongly that they wanted to say to the President now that this is going to continue and they felt very strongly, that this was necessary because of the unrest at the university due to the President's action, that some effort should be made now to pass judgment on it. So while I opposed it strenuously in conference, I felt that in the final analysis this was the place to make the pitch, and this was the place to have the vote, and this was the place to make the final determination.

There is one incomplete building out there that will be occupied in August. There is another building that is about 17 percent complete. Other uses can be made of these facilities. But the big argument will be and is the relative cost to graduate a medical student at the university out at Bethesda as opposed to the graduation of a medical student through the scholarship programs. There have been a number of studies made on this subject. The General Accounting Office, in May 1976, estimated that under the scholarship program, it would cost $36,784 in fiscal year 1984 to graduate one student. They estimated that to send a student through the Military Medical University would cost $189,980 in fiscal year 1984, a tremendous increase over the scholarship program.

We had our surveys investigations staff run a further study on this, and they reported to our committee in April of this year, just a few days ago. According to their figures and their estimates, in fiscal year 1982, the total cost per graduate in the scholarship program would be $67,237, and to graduate a student at the Military Medical University would cost $196,000 in fiscal year 1982.

Economically there is no way to justify the university.

It is going to be argued, and it has been argued, that this does not include all the costs as far as the scholarship program is concerned, and the answer to that is it does not. The General Accounting Office concluded in its May 1976 report that nondefense Federal subsidies to civilian medical schools were not included, and they were not included because the Federal assistance was provided before and has been provided since the establishment of the scholarship program, and because the Federal assistance would continue regardless of whether the scholarship program continues or is completely abandoned.

Looking at it strictly from the matter of dollars and cents, there simply is no way to justify this Military Medical University. It will be argued that it is now under construction, with one building now almost complete, and that it is too late to turn back now. Well, the President thinks it is not too late, and I am inclined to support the President on this issue.

Mr. Speaker, there is a lot more that I could say on it, but it is a very simple issue. It is one we all have had before us many times. I think anything I say now will have been heard before. I am sure there will be others that wish to talk about it, and if there is a need for colloquy, I will be glad to enter into it with anyone.

Mr. MAHON. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts (Mr. DRINAN).

Mr. DRINAN. Mr. Speaker, I am opposed to this expenditure for many reasons. First, the Defense Department does not want this military medical school to be continued. The basic question is this: Does this undertaking provide us with the most cost effective method of procuring military physicians? There is overwhelming evidence that it does not. There is no evidence that it does.

The Defense Manpower Commission, the General Accounting Office, the House Committee on Appropriations surveys and investigations staff and the Defense Department have all concluded that we should terminate this experiment.

The GAO report in May 1976, submitted a comprehensive cost effectiveness study of the university and the scholarship program. The GAO analysis showed that in 1984, which will be the first full year of simultaneous operation of both the scholarship program and the medical school, the differential will be $21,000 for a scholarship student, but $26,000 at least for the graduates of this military medical school. The GAO pointed to alternatives.

I think that the myths that have surrounded this can be easily refuted. Is the university a less expensive way of procuring physicians for the Armed Services, rather than a scholarship program? First of all, the university will produce at most only 9 percent of all the physicians that the military needs. If it is 9 percent of the total personnel, it is far easier and

far less expensive to place students under the military scholarship program in fully accredited medical schools.

The Committee on Armed Services has a 5-page letter under date of June 15, 1976, and there the GAO calculates the cost in a way differently from a previous study. But that study does not refute the fact that the school at Bethesda will increase the cost nor that it is not desired by the Defense Department.

There is a second myth. Can the medical schools across the country absorb those that are needed by the military? The answer is clearly yes.

Will the 34 students now in their first year at this unique medical military school be absorbed in other medical schools? The answer is clearly yes.

Is there a physician shortage right now in the Defense Department? The answer is no.

Will the Defense Department be unable to get sufficient physicians without this school? The answer is no.

The Defense Department has testified against this school. If we want to go along with President Carter and the OMB and DOD and all the authorities, we will vote to defund this school.

Mr. BEARD of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. DRINAN. I yield to the gentleman from Tennessee.

Mr. BEARD of Tennessee. Mr. Speaker, is the gentleman stating that there is no shortage at this particular time of physicians, or did I misunderstand?

Mr. DRINAN. No; the number of physicians is growing significantly. Furthermore, with the variable incentive pay now available in the military, the DOD has stated that there is a very convincing argument that physician retention rates will increase significantly over the next several years.

Mr. BEARD of Tennessee. I understand it a little better than when the gentleman said there were no shortages as far as physicians go, because the fact of the matter is that there is an absolute, critical shortage of physicians in the military, to the point it is beginning to become an acute problem; so I just do not want anyone in this body to have the wrong idea.

Mr. DRINAN. Mr. Speaker, if the gentleman will listen to the facts, I was just coming to it. As of January 1 this year, the Defense Department had filled 11,080 of the 11,648 authorized physician slots for fiscal year 1977.

So, there is no shortage. There are some 500 slots that are not filled out of almost 12,000.

Mr. BEARD of Tennessee. I can show the gentleman another set of figures, and will be glad to, that the Defense Department, on the different branches of service, shows a critical shortage.

The SPEAKER pro tempore (Mr. BENNETT). The time of the gentleman from Massachusetts has expired.

Mr. EDWARDS of Alabama. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, apropos to the colloquy that just took place, Admiral Finneran who is the chief recruiter for the military, testified before our committee on March of this year, that there is in fact a significant backlog of doctors waiting to come into the Armed Forces at this time. I think nobody argues that there is not going to be a shortfall in the future.

The problem is that the shortfall is estimated to be in the neighborhood of 500 to 700 physicians, and is not going to be significantly reduced by the few doctors that this university will turn out. In our committee investigation, the staff has suggested that the wise thing to do is to increase the scholarship program by about 200 or 250 students per year. That is the best way and the most sensible way, the most economical way, to find and keep the doctors that we need for the military.

Mr. Speaker, I yield 5 minutes to the gentleman from Maryland (Mr. STEERS).

Mr. STEERS. Mr. Speaker, I must state at the outset that I have a special interest. I am the only Congressman in whose district this medical school is. Notice that I do not say, "in whose district this medical school will be." It is there on the grounds of the Bethesda Naval Medical Center, and I have inspected it.

I want to emphasize why I am going to read some factual quotations, because I want to refute absolutely what the gentleman from Massachusetts (Mr. DRINAN) has said, and I want to make very clear that I am in no way impugning his honor or his veracity, but I am afraid that he is utterly mistaken, and I will show the Members why. On February 22, the Secretary of Defense, who is against this medical school, stated that the first building—and I quote—"is 75 percent completed."

That is February 22 of this year. On the 11th of April, also this year, I got an answer from the office of the Assistant Secretary of Defense. Maj. Gen. Benjamin Baker, the Deputy Assistant Secretary of Defense for Health Resources and Programs, as follows: "Your information regarding appropriations, obligations, and expenditures is correct."

I next quote verbatim from the letter I addressed to Secretary Brown, in which I brought out five reasons why I thought he had made an egregrious error in trying to stop this medical school. I realize, of course, it being in my district, that everything I say is suspect. That is why I want to emphasize that practically all of my remarks are quotations from other origins. I sincerely am strongly for this university, but I do not believe that is particularly relevant.

Mr. Speaker, in the letter to Secretary Brown, I said:

> Construction contracts have been let for a total of $72.6 million.

Incidentally, this letter was signed by the entire House Metro Caucus, which includes northern Virginia, and the District of Columbia, as well as the Maryland suburbs. It was also signed by the entire Maryland delegation, House and Senate.

I also said:

> It is our understanding that approximately $66 million is the figure for how much has been obligated.

Those two figures are $66 million and $72.6 million. If we divide the smaller by the larger, we get 91 percent. Those are the two figures which are verified in the letter I just quoted from the office of the Assistant Secretary of Defense.

The last thing I want to quote from is a letter dated April 19, 1977, from the gentleman from Massachusetts (Mr. DRINAN) and I repeat my admiration for the gentleman. I am looking directly at his Dear Colleague letter of that date. He says:

> The main building of the Bethesda Campus is 17 percent complete . . .

It has gone from either 75 percent complete, according to the Secretary of Defense, who was talking about the physical completion, and it has gone from the 91 percent obligated, which is what the relevant figure is, in terms of what it will cost the Federal Government. It has suddenly collapsed to 17 percent.

I submit to the Members that the gentleman from Massachusetts (Mr. DRINAN) has done one of two things. He has either been totally mistaken, or he is so careless as to have a typographical error. I suggest to the Members that he has not addressed himself carefully enough to this project or he would not be guilty of such an unbelievable error to say that the building went from 75 percent or 91 percent down to 17 percent. I think he will have to acknowledge that his figure of 17 percent is totally in error.

I would point out that this whole argument, to a degree, centers around whether or not those figures are credible.

The SPEAKER pro tempore. The time of the gentleman from Maryland (Mr. STEERS) has expired.

Mr. EDWARDS of Alabama. Mr. Speaker, I yield 1 additional minute to the gentleman from Maryland (Mr. STEERS).

Mr. STEERS. Mr. Speaker, this whole argument revolves around whether or not the figures we are discussing are credible. I submit to the Members that the figures of the gentleman from Massachusetts (Mr. DRINAN) simply are not credible and they are in line with the points of his argument.

Mr. DRINAN. Mr. Speaker, will the gentleman yield?

Mr. STEERS. I gladly yield to the gentleman from Massachusetts (Mr. DRINAN).

Mr. DRINAN. I thank the gentleman for yielding.

Mr. Speaker, I think what the gentleman is suggesting is a misconstruction of the letter.

The first building is scheduled for completion in the near future but the main building is only 17-percent complete.

However, I do think that is irrelevant, because the gentleman has not addressed the policy question. He has not answered Secretary Brown of the Defense Department, who is utterly opposed to this nonuniversity medical school.

Mr. STEERS. Mr. Speaker, I think I have shown the relevance of the figures. They show that the gentleman from Massachusetts (Mr. DRINAN) is in error.

Mr. MAHON. Mr. Speaker, I yield 5 minutes to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Speaker, I rise in support of the motion offered by the gentleman from Texas and in support of the House conferees.

I have been chairman of a subcommittee of the Committee on Armed Services which has been conducting extensive hearings, under oath, incidentally, in an effort to come to the relative facts with regard to this medical school. I would like to try to set those facts out now before Members.

But first of all, there are, I think, two basic questions involved here. The first question goes to the essential prerogatives of the Congress of the United States. This Congress has voted on 10 successive occasions to establish the Armed Forces Medical School.

The question is whether the Executive can simply by the stroke of a pen, in a budget recommendation, wipe out something formally decreed by Congress or whether some more extensive action is required. If he can wipe out the medical school of the Armed Forces which Congress has established because he thinks it is not cost effective, then tomorrow he can wipe out West Point, and the day after wipe out Annapolis, and after that even the National Institutes of Health.

I believe very strongly that Congress has more authority in matters of this sort than the Secretary of Defense has recognized. And I think we ought to let the Secretary know it in no uncertain terms.

Mr. Speaker, the second question is whether this body is concerned with quality medical care for the men and women who have decided to enlist in the Armed Forces of the United States.

Testimony given under oath before our committee was that when this issue was first brought up in the Department of Defense, the budget functionary who proposed this "massive" reduction of $14 million admitted that the only concern he had was the $14 million figure. He never considered the health of the men and women in the armed services; he never suggested that the matter ought to be discussed first with the Assistant Secretary for Health, or with the Surgeons General of the various services, who know something, after all, about what the medical services require and something about the status of doctors in the armed services at the present time. They were never consulted. It was purely a budget decision. Yet the Pentagon decision included the flat assertion that the needs of the armed services for doctors could be met through the scholarship program with a surplus of 20 percent, and at a lower cost.

The fact of the matter is that those figures simply were not borne out by the facts in the sworn testimony before our subcommittee. We have had a shortage of doctors in the armed services for some time, and the fact is we anticipate a larger shortage in the future because the draft of doctors has ended.

With this medical school or university of the health services, if you will, is designed to do is to provide a nucleus of career-oriented doctors for the armed services. Yes, we may be able to pick some doctors up off the streets and get them in the service for a couple of years. And with a scholarship we might be able to get them in and keep them in for 2 or 3 years. But the record shows that scholarship students, two-thirds of them are out of service the minute their obligation is ended.

Dr. Custis, the retired Surgeon General of the Navy, testified that only 2 percent of those scholarship doctors remain in the services permanently.

But to supply quality medicine we need to establish a career-oriented nucleus of doctors, and that is what this college will do.

Mr. ICHORD. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield briefly to the gentleman from Missouri.

Mr. ICHORD. Mr. Speaker, I just want to emphasize that the gentleman in the well has hit the central point, and that is to provide doctors oriented toward military medicine.

Mr. STRATTON. Mr. Speaker, I thank the gentleman from Missouri (Mr. ICHORD). He is absolutely right.

Mr. ANNUNZIO. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from Illinois.

Mr. ANNUNZIO. Mr. Speaker, I appreciate the gentleman's yielding.

The gentleman is making a very excellent point. But could the gentleman, for the benefit of the House, in view of the fact that he sat in on all the hearings, tell us of the experience that the committee has had at the school in recruiting the finest teachers and faculty from all over the United States?

The gentleman might point out that these people left their universities, their contracts have expired, and they are now at the school. I think the gentleman should touch on that subject. Perhaps he could get more time and give the House more information on that.

Mr. STRATTON. Mr. Speaker, the gentleman is correct, but unfortunately I do not have very much time remaining.

The SPEAKER pro tempore. The time of the gentleman from New York (Mr. STRATTON) has expired.

Mr. MAHON. Mr. Speaker, I yield 1 additional minute to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Speaker, I appreciate the gentleman's yielding me 1 additional minute.

Let us get to the bottom of this cost argument. We had the construction personnel up before us, and we found that no matter what we do with these medical school buildings, whether we complete them or tear them down or reconfigure them, the cost will run between $40 million and $60 million just for buildings alone.

Now when it comes to computing the cost of the scholarship student versus the medical school graduate—and the gentleman from Alabama (Mr. EDWARDS) has referred to this—they left out the fact that we are going to have to increase these medical scholarships not by 200 but 1,500 to get all the people we need. That will be an added cost. In addition they forgot that private school tuition costs are rising very, very sharply.

They also forget to add in the "capitation" grants that the Federal Government pays to the medical school every time a student goes to a private school. That is also a proper charge against the Government.

Taking those figures into account, as the chairman of our committee, the distinguished gentleman from Illinois (Mr. PRICE), who cannot be with us here today, got the GAO to admit, the total cost of a scholarship student in a private medical school ends up at the $32,000 a service year compared to $26,000 for the scholarship student.

Mr. Speaker, we simply cannot get the doctors we need for career positions in our armed services without the amendment of the gentleman from Texas (Mr. MAHON) which keeps the Armed Services Medical School in existence.

Mr. EDWARDS of Alabama. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, I rise in support of our chairman's motion to recede and concur in the Senate amendment to provide funding for the Uniformed Services University of the Health Sciences.

If many of the arguments for and against the school have a familiar ring, there is good reason. We have been here before. In 1972, in 1974, and most recently in 1975, the House specifically considered the establishment of this medical school.

Two years ago, when this matter was extensively debated, it was the consensus of proponent and opponent alike that the final decision on the school should be made then. The Congress voted to support the establishment of the school as it had on all previous occasions. Today, we are witnessing a replay of the 1975 debate. Those who oppose the school have no new facts or figures which support their position.

Why are we again debating the merits of this program?

Is the school having difficulty with its building program? No. In fact, the construction program is expected to be completed for $13 million under the $85.8 million which the Congress has previously funded for the planning, design, and construction of the total medical school. Construction time schedules are being met. The first building, which is 90 percent complete, will be ready for the incoming class this September. The second and final building, which is due to be finished in September 1978, is also proceeding on schedule.

We are not reconsidering this matter because of substantial construction overruns. To the contrary, there is actually a cost underrun.

Is the school having difficulty gaining academic accreditation or attracting faculty or students? No.

The school has been academically accredited by the Liaison Committee on Medical Education, the organization which accredits all civilian medical schools.

The establishment of the Uniformed Services University has attracted the attention of many teachers/scientists—some of whom are world renowned—who are interested in joining the school

as faculty members. Fifty-six full-time faculty appointments have been made. Virtually all department chairs are filled and the core faculty of the basic science departments onboard. Another 150 doctors from the three local military hospitals, the military research institutes, and the National Institutes of Health have volunteered their services to the school. They cost the university nothing. These volunteer teachers are willing to teach in addition to carrying out their regular workload.

Student interest in the school is nearly overwhelming. Last year, the first year the school considered students for admission, over 1,700 applications were received. Thirty-two fine, highly motivated young women and men were accepted and are right now in the midst of completing their first year of medical training at the school. This year 2,500 applications were received for an anticipated 68 vacancies in the incoming class.

Academically, the school is not experiencing a problem.

Is the school no longer needed? Does the military have all the physicians it requires? The answer to both these question is also no. As a matter of fact, there is a greater need for the school today than appeared to be the case 2 years ago.

In recent testimony before a House committee, the service surgeons general were in unanimous agreement that the school was needed and its establishment desirable. There is a shortage of physicians in the military. Without the school, and excluding a doctor draft, this trend can be expected to continue. The school will assist the military to cope with this chronic problem. The services can depend on the university to annually provide 175 career military medical officers.

These doctors will have received special training and formed special attitudes toward medicine as practiced in the military. While there is a commonality with civilian medicine, military medical is also unique. The establishment of the school will encourage those already on active duty to remain by offering them the opportunity to gain academic and professional recognition for their work and to pursue careers in academic medicine. One of the principal reasons the military loses many outstanding physicians is because they are not recognized within the medical profession for their accomplishments or because they want to teach.

The need for the school is evident. That is not the reason we are again considering the Uniformed Services University.

What is the reason, then?

Those who oppose the continuance of the school cite economic reasons. They say the school is not a cost effective method for the military to procure the services of a doctor when compared to the Armed Forces health professions scholarship program. One hundred million dollars will be saved if the school is not constructed. To this I say, only $85.8 million was involved in the total construction program and it appears the final figure will be substantially less. So there was not $100 million in the program to begin with.

And second, $57 million, or 77 percent, of the construction dollars is already sunk as of today. I have yet to find a way to save money that has been spent. The maximum amount that could be saved in this area if the program were stopped today is $15.5 million. What we would buy is one medical school building and a parking structure at a cost of $57 million. There is no $100 million savings.

We are told that $14 million will be saved during this fiscal year and eventually $30 milion a year when the school is in full operation. What we are not told is that the size of the scholarship program must be increased by 1,500 to replace the 700 university students. These additional scholarships will cost the Federal Government $27.6 million. Again, it appears there will be no savings.

Opponents of the school cite cost figures only as they relate to the Department of Defense. It is a specious argument to say other Federal costs should be excluded from the scholarship program because they will be present regardless of the existence of the university. We in the Congress are responsible for all Federal dollars, not just those spent by Defense. When looking at total Federal funds involved, the GAO has shown that the university costs less than the scholarship program.

It is understandable that the scholarship program is cheaper to the Defense Department than is the university. Defense pays the entire cost of the university and only a small portion of the cost to train a physician in a civilian medical school. State and local government, other Federal departments, and private contributions must make up the balance.

The scholarship program may be 22 percent more cost effective to the Department of Defense but the university is a more cost efficient use of the total Federal dollar.

Mr. Speaker, I have touched on but a few aspects of the Uniformed Services University. There are many, many other arguments that could be presented in support of the school. I have briefly mentioned some of the noncognitive benefits which will be derived from the establishment. To be sure, there are others. I have said nothing about the obligation which we have to the faculty and students presently at the school. Termination of faculty contracts and placement of students would run into millions of dollars. I have said nothing about the viability of the scholarship program and the fact that increases in costs can be anticipated. These, too, are important considerations, all which favor the continuation of the school.

I think it is obvious, however, that there is no basis on which to argue against the school on economic terms.

The reason for including $12.5 million of the university's total fiscal year 1978 request for $14 million is to say at an early date, yes, we continue to support you. Send out letters of acceptance to 68 young women and men and proceed to recruit faculty members. Hopefully, this will be the last time the school is placed in limbo.

Mr. Speaker, I have one final thought. If we close the school now and we find 2, 3, or 5 years hence that the scholarship program and voluntary enlistments cannot fulfill the military's physician needs, there is no chance that we can then resurrect the Uniformed Services University of the Health Sciences. Our credibility with teachers, students, and the like will be shot. The alternative is a doctor draft.

I strongly urge my colleagues, who have supported this program in the past, to continue to do so. Take the right course here, and support the motion of the gentleman from Texas (Mr. MAHON).

Mr. MAHON. Mr. Speaker, I yield 5 minutes to the gentleman from Connecticut (Mr. GIAIMO) a member of the committee.

Mr. GIAIMO. Mr. Speaker, I rise in support of the motion made by the gentleman from Texas (Mr. MAHON), the chairman, to recede and concur. I think we should have this medical school. I say this in spite of the fact that I stood in this well 2 years ago and opposed this school, and I joined my good friend, the gentleman from Alabama (Mr. EDWARDS), for what I thought were very real and cogent reasons. I have read the GAO report, and I have read the manpower reports and all of the figures and statistics, and one can make a good case that we may be paying more than one would pay in the private sector. But if we add some of the other costs, like the gentleman from Illinois (Mr. MICHEL) just mentioned, about what we pay through these other costs, there may not be that much disparity.

As has been mentioned, it is true that figures are cold and they are hard, but what we are talking about is the health care of our military, and particularly in our military medical center. That is what we have here in Washington with the Bethesda Medical Center and with Walter Reed Hospital.

I might mention that I was in Bethesda a year ago and had a very delicate eye operation. I was very fortunate to find a very capable and efficient young Naval doctor to operate.

Mr. Speaker, I want to make sure that these schools and these hospitals have outstanding young doctors in the military to take care of our young people in the military and also our not-so-young people in the military who are going to need them.

I come from New Haven, Conn. I am familiar with hospitals and with medical centers, and my investigation as a result of my experience is that there is something more than just dollars and cents involved in connection with our medical centers.

Of course, there is a shortage of medical schools, so much so that we are importing doctors from all over the world to work in the United States. Just go in any hospital and take a look. I found this to be so through investigation in my hometown, where we have the Yale-New Haven Medical Center, a great medical center and a great hospital also connected with a university medical school. That is how we get good doctors, because good doctors will not ordinarily stay in a hospital if they cannot be close to a

university medical school where they can continue their research work. That is how you attract great talent.

That is what we see in so many of our outstanding medical centers throughout the country; they are connected with universities.

So, Mr. Speaker, that is what this is all about. Sure, we can keep our doctors at Bethesda through the fellowship and the scholarship programs for 7 years, but, with this, we can keep them for 11 years, and perhaps more because once they get 11 years of service under their belts they are apt to stay even longer. Certainly they may stay for their entire career, if they can continue to work in a medical center that is connected with a hospital. And when you add in those costs and those factors, I think we make a very good case for providing for our military the best possible treatment we can find. I think that mandate necessitates the association with a teaching university-medical school. For that reason, Mr. Speaker, I have changed my mind, and I am going to support this hospital. I think it will contribute in many ways which we cannot measure in dollars and cents to the good health and well-being of a whole future generation of people in our military, because they will be getting the finest medical treatment, certainly much better than they would have if there were a constant turnover of doctors and personnel because they had no medical school connected with the center.

I think it is the best investment we can make, and I urge the adoption of the chairman's motion.

Mr. DRINAN. Mr. Speaker, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Massachusetts.

Mr. DRINAN. I thank the gentleman for yielding.

Two years ago I was very influenced by the gentleman's statement which I hold in my hand, and it states this:

> The costs per graduate from the University of Health Sciences will be about five times greater than the cost to obtain a medical doctor through the scholarship program.

I voted with the distinguished gentleman from Connecticut the last time. Has anything happened to change the facts which he cited and which I have quoted?

Mr. GIAIMO. Father, forgive me; I was wrong 2 years ago.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. EDWARDS of Alabama. Mr. Speaker, I yield 4 minutes to the gentleman from Louisiana (Mr. TREEN).

Mrs. BOGGS. Mr. Speaker, will the gentleman yield?

Mr. TREEN. I will be glad to yield to my colleague, the gentlewoman from Louisiana (Mrs. BOGGS).

Mrs. BOGGS. I thank my colleague, the gentleman from Louisiana, for yielding.

Mr. Speaker, I should like to point out, if I may, that there are 2,500 applications that have been received for the 68 places in the class to start this September at the university. Certainly that proves that if there are 40 applications for each position, there is a tremendous need for this university. I should also like to point out that when we have had to recruit the doctors off of the street in the last several years, of physicians recruited off of the street, 35 percent have been foreign medical graduates, of which 70 percent are non-American citizens; thus, 29 percent of all recruited doctors of the armed services were not citizens.

I should also like to point out that with the shortage of physicians that is existent today, we will, indeed, if we pull out this university be adding to that shortage, because if the university is to be disbanded, approximately 1,500 scholarships would be required to provide an equivalent number of physicians. So we would not only withdraw 700 new training spaces that are now being created, but we will also reduce the number of civilian medical training positions by 1,500.

Mr. TREEN. Mr. Speaker, there are just two points I want to make in the remaining time I have. One is to reiterate the point that has been made by others that what we have here is the administration, through the budget process, trying to reverse a decision that has been made 10 times on the House floor. To those Members who are concerned about many of the water projects that this Congress has mandated and funded over and over again, I suggest that this is the very same thing. This is not a deferral. This is not a spreading out of a program. If these funds are not appropriated annually, the university dies. It is as simple as that.

We had testimony before the Stratton subcommittee that many of the teachers who have been attracted to this university are not signing up. Many who were to come aboard are now having second thoughts about coming to the university because they cannot be sure of the funding.

The second point I want to make is to emphasize the kind of training that the students receive at this university. It is an 11-month program instead of a 9-month program. I just want to read to the Members from the testimony of Col. Robert Joy, chairman of the Department of Military Medicine at the university. He said:

> In the first year alone the students are getting every Friday afternoon lectures in military medicine that cover the organization, structure and function of the military departments and medical departments.

He goes on to say:

> I might say the lectures on organization of the department, of the medical departments are by the Surgeons General. They are getting exposure by present practitioners of military aviation and they talk about what it is a doctor does with his patient in the environment called a tent or on a deck of a destroyer. They get many hours of education in medical defense against special weapons of war, such chemical, biological and nuclear war. There is the Armed Services Biology Institute. It provides a ten-man faculty to give ten hours of instruction on mass casualties and about patients hit by the atomic weapons and the blast.
>
> They get lectures on combat psychiatry, on the physical standard system in the military. And that is one course.
>
> They will have over 30 hours of military applied physiology. That is a joint course my department teaches. No civilian school teaches the first course. (The course I am about to describe, no civilian school teaches)—we give them 30 hours, using military and civilian senior scientists from Department of Defense laboratories on heat exhaustion, frost bite, altitude sickness, decompression system, translocation—which means jet lag—if you are in the C–5A and you are on your way to wherever the President and the Congress decides to go, you have to do this, and you have seasickness, there are noise problems—which are pretty bad in the service—these are taught from the basic and applied levels.
>
> Now, Dr. Haddy and I lecture on the course. We are from that professional background. Most of the lectures, or the people doing this are leading the research efforts in the service.

Other subjects of military application that students would not get in any other university are taught at the military university.

I urge a favorable vote of the motion of the gentleman from Texas (Mr. MAHON.)

Mr. MAHON. Mr. Speaker, I yield 2 minutes to the gentlewoman from Maryland (Mrs. SPELLMAN).

Mrs. SPELLMAN. I thank the chairman.

Mr. Speaker, I rise in full support of this measure. I want to make it very clear this is not in my district, it is not in my county, I do not profit from it in any way except as everyone of us in the United States will profit from this.

I strongly support retaining the Armed Services Medical School. I simply do not understand the people who are saying we can substitute for it through a scholarship program. Scholarship program? Do the gentlemen realize how scarce are the seats in the medical schools? Do they realize that the seats they would be taking in scholarship programs are those we desperately need to train physicians who will be practicing medicine in the civilian sector? Do the Members realize, as I do, because for 8 years I headed a hospital, that we are today importing people in droves to provide medicine for our citizens in the United States?

What we ought to be doing here instead of arguing about whether we should be building this facility is planning to address ourselves to the need for far more facilities to provide physicians for the men, women and children in our Nation. The shortage of physicians is a national disgrace and we ought to be addressing ourselves to it. We are importing to our shores thousands of people who have backgrounds in medicine which are totally inferior to anything we would countenance in this country. We are bringing physicians who have standards that do not begin to compare with the standards we set for our medical school graduates.

Yet here we are listening to oratory imploring us to usurp some of the pitifully small number of seats we have in the present medical schools. Surely, we will reject that notion. Surely, we will recognize the needs of our armed forces. Surely, we will permit this medical school to be built.

Mr. Speaker, I ask everyone to strongly support the continuance of the Armed Services Medical School.

Mr. EDWARDS of Alabama. Mr.

Speaker, I yield 2 minutes to the gentleman from Tennessee (Mr. BEARD).

Mr. BEARD of Tennessee. Mr. Chairman, I will not take long but I would like to just relate a personal experience that hit me right in the face while I was on active duty at Cherry Point with the 2d Marine Air Wing. We talk about doctors. We hear bureaucrats with DOD state that we do not have a problem. Yet one can go down to the 2d Marine Air Wing and find their table of organization calls for 27 flight surgeons and find they have now only 7 on active duty. They have one orthopedic surgeon who is probably going to get out because he is meeting himself coming and going and working 7 days a week. We talk about bonuses and retention benefits. That is a bunch of malarky when these doctors are finding themselves aboard a ship and working 7 days a week. They are not going to put up with it.

I think the Department of Defense should mention to the people in this body how many aliens we have as doctors for our armed services, aliens who are prohibited by law from going aboard ship or overseas, so they sit back and have the nice active stateside duty whereas the American citizens trained in this country are going back and forth on ships on the unattractive duty.

I think it is time for the Department of Defense to start shooting straight. We have a critical problem. We have one person from the Department of Defense who testified before our Investigative Subcommittee who was for this hospital under the Ford administration but who came over and put another hat on and was against it under the Carter administration. They are playing political expediency and survival and threatening the medical efficiency of our own military.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. BEARD of Tennessee. I yield to the gentleman from New York.

Mr. STRATTON. The Speaker, the gentleman has referred to the number of alien doctors. The statistics our subcommittee got from the Department were that 47 percent of the doctors recruited from the streets, so to speak, are aliens. But under the Health Benefits Education Act of 1976 these alien doctors will no longer be able to be hired by the armed services after 1978. So we face an even greather shortage without the output of this armed services medical school.

Mr. BEARD of Tennessee. Mr. Speaker, I think it is time this body demands of the Department of Defense and the bureaucrats to start shooting straight.

Mr. MAHON. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Speaker, there is a shortage of doctors in the United States today and a serious shortage of doctors in the military. The military establishment should do its part to fill this shortage. The costs are about the same per doctor when the scholarship program is compared.

There are special values in having doctors trained in the military medical school. There is the special type of medical training referred to by the gentleman from Louisiana. He stated it very well.

I would like to say also there is a career aspect to this. There are people who want to join the military and to be military doctors; and to perform that special function. This establishment, this university, will bring that about.

Mr. Speaker, I urge very much retaining this university.

Mr. MAHON. Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin (Mr. ASPIN).

Mr. ASPIN. Mr. Speaker, I rise in support of the gentleman from Alabama (Mr. EDWARDS) on this position. I can detect a ground swell here, as well as the next fellow, so I am not under any illusion about what point of view is going to prevail; but I do want to say that I think all of this is crazy

This medical school, when it is completed, will not be producing doctors in great numbers for a number of years. The medical situation in the United States has changed drastically over the last few years. For example, since 1966, the number of medical schools has gone from 88 to 114. Enrollment in medical schools has gone from 33,000 to 51,000. Graduates rose from 7,600 to 11,600 in these 8 years.

In short the doctor shortage that everyone is talking about is a thing of the past. In the Health, Professional and Educational Assistance Act of 1976, the committee report says that "Congress further advises and declares that there is no longer an insufficient number of physicians and surgeons in the United States."

Mr. Speaker, we are talking about a situation which has passed. We are talking about a time which is not the time for when this medical school is going to be producing doctors.

I think the questions are, which is the cheapest way to produce doctors for the military and can that method produce doctors for the military in sufficient numbers? Every study which has been done by an independent agency, the GAO, the Defense Manpower Commission, the staff of the House Committee on Appropriations, have said that the scholarship program is cheaper. The numbers in each are different but the conclusion is the same: It is cheaper to do it by scholarship.

The question then is, can we get them into the service? Can we retain them? We passed the variable incentive bonus in the fall of 1974, which has had a great effect in the recruiting of doctors into the services. In 1975 the retention rate was 7.5 percent. In 1974 it was 7.8 percent. Then the following year 1975, a year after the variable enlistment bonus went into effect, it jumped to 17.3 percent.

We will have plenty of doctors to recruit. They are having problems with medical insurance and other kinds of things. Recruiting doctors for the military is not the problem it once was. It seems to me that the debate that we have had so far has been mainly talking about what was in existence 5 years ago, 4 years ago or 10 years ago. What we are facing today is not a shortage.

The SPEAKER pro tempore. The time of the gentleman from Wisconsin has expired.

Mr. EDWARDS of Alabama. Mr. Speaker, I yield 1 additional minute to the gentleman.

Mr. ASPIN. Mr. Speaker, in summary the Congress has passed a number of bills, a number of programs to produce more physicians and more doctors in this country. We have been doing that for a number of years and it is beginning to pay off. We are getting more doctors. The number of doctors in the United States has gone up. The number of physicians per 100,000 population in this country went from 139 per 100,000 in 1965 to 156 per 100,000 in 1972.

Many of these programs have not yet reached their full potential. We will not—by the time this medical school is built—we will not have a shortage of doctors in this country.

Mr. MAHON. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, I think we have already crossed the bridge on this medical school. I realize it is a controversial matter and that there is a basis for taking either a pro or con position. It can be argued that if the Federal Government is going into the business of establishing medical schools, we could establish Federal medical schools for a number of special purposes. For example, I know that there is a great shortage of doctors in the rural areas. So, we might establish a Federal medical school for the training of doctors for rural areas. It would make some sense. It could make some sense to establish a Federal medical school for the training of doctors for the elderly. So, this could go on quite extensively.

This matter troubles me somewhat, but I hope this will be the first and last Federal medical school. Of course, this school could later be transformed into a school with a broader scope.

I believe that this medical school will be helpful from a morale standpoint with the military, especially the military medical establishment. We started it, and let us go ahead with it and make it a great national asset.

Mr. EDWARDS of Alabama. Mr. Speaker, this matter is back on the floor for one simple reason; that is, because the President himself has made it an issue. I think the reason we are here today is to try to resolve the issue once and for all.

If we vote to continue this project, then I would not expect the President to come back and try to cut it out again, and certainly this Member will not. But, there are a couple of things, I think, need to be said about it. This is a bill for the military medical university.

The truth is, if one looks at the curriculum, that the emphasis is on family medicine. Only about 4 percent of the curriculum is set aside for military medicine. Of the 93 faculty members out there, only two are listed under the heading of military medicine. The Defense Department and HEW have studied the military health care system, and they found that approximately 9 million Department of Defense medical patients exist, but only 23 percent of these are ac-

tive duty personnel. The remainder are dependents, retirees, retirees' dependents and survivors, who are the focus of the concern with the need for family medicine.

This university is not going to be a military medical university. It will have some military medicine courses. But, it is not going to do what it has been billed as doing.

Finally, what we are talking about, under any of the studies that we have been reciting here, over the next 30 years is a saving of a billion dollars in taxpayers' money if we close the university now. I suggest to the Members that we could put a good part of this money into the private and State-supported medical schools of this country and do a far superior job in turning out doctors, and the military will have good doctors.

Mr. Speaker, I am going to ask for a vote on this issue, and I hope this is the end of it one way or the other.

Mr. MAHON. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. LEGGETT).

Mr. LEGGETT. Mr. Speaker, I thank the chairman for yielding to me. I am for economy in national defense, but very frankly, I think that we have reported on this issue. We had a vote in 1972, and we determined by a vote of 351 to 31 that we wanted to build the F. Edward Hébert School of Military Medicine.

I will tell the Members that we have a good school. This great, expensive institution cost 20 percent of what one nuclear submarine would cost.

Do we have enough doctors in the United States? The doctors say yes. But it still requires, in Fairfield, Calif., in my district, a special order from the Surgeon General to allow the military doctors to practice, to moonlight, in the domestic sector in the middle of town. The same is true in Sacramento. The Army today is 700 doctors short this year. They are getting one-half of their recruitment from foreign sources. If we can build medical schools in all of our individual districts, why cannot we build a national school for military purposes.

I think we can say that, because a lot of pain and suffering occurs through war and different kinds of activity in national defense, it is only fitting that we dedicate one of our medical schools to curing some of the problems in this area. We do not want the school to be a stepchild or a burden on the taxpayers. We want it to be one of the best medical schools in the world. Working with Walter Reed, working with Bethesda, I think we can do it. We have it built. I think we should pursue what we have started to do. To climb up the hill and then to climb down again, like we are doing on dams and other things, I think makes no sense whatsoever.

Mrs. HOLT. Mr. Speaker, I rise in strong support of the $12.5 million advanced funding for the Uniformed Services Health Sciences Academy contained in the conference report to H.R. 4877—the fiscal year 1977 supplemental appropriations bill.

I have been concerned about the quality of health care of the Armed Forces especially now that there is no longer a doctors' draft and when many of those serving in the military because of educational obligations are leaving the armed services for more lucrative practices on the outside.

From what my constituents tell me, many vital health care services are being drastically curtailed in just about every military hospital and clinic. For example, the Ireland Army Hospital at Fort Knox is about to lose all of its radiologists and I learned that the hospital had a backlog of 8,000-some X-rays awaiting to be read. Medical care for dependents and retirees are continually being eroded away.

During our consideration of the fiscal year 1978 defense authorizations bill in the House Armed Services Committee, we resoundingly refuted the proposal of President Carter to terminate the Armed Services Medical School. Facts and arguments presented before the Armed Services Committee showed that the rationale for termination simply has no substance.

I strongly urge my colleagues to fully support the advance funding contained in the conference report and also to support the medical school's continuation in the future.

Mr. MAHON. Mr. Speaker, I move the previous question on the motion.

The previous question was ordered.

The SPEAKER pro tempore (Mr. DANIELSON). The question is on the motion offered by the gentleman from Texas (Mr. MAHON).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. EDWARDS of Alabama. Mr. Speaker. I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 250, nays 162, not voting 21, as follows:

NOT VOTING—21

Beard, R.I.	Koch	Price
Derrick	Long, Md.	Roe
Devine	McEwen	Ruppe
Ford, Mich.	Mikva	Sawyer
Forsythe	Milford	Shipley
Gammage	Mineta	Teague
Hall	Myers, Ind.	Yatron

The Clerk announced the following pairs:

Mr. Teague with Mr. Forsythe.
Mr. Milford with Mr. Devine.
Mr. Hall with Mr. John T. Myers.
Mr. Mikva with Mr. Ruppe.
Mr. Ford of Michigan with Mr. Sawyer.
Mr. Shipley with Mr. Roe.
Mr. Price with Mr. Gammage.
Mr. Beard of Rhode Island with Mr. Derrick.
Mr. Mineta with Mr. Koch.
Mr. Yatron with Mr. Long of Maryland.

Messrs. MATTOX, MOAKLEY, and SCHEUER changed their vote from "yea" to "nay."

Messrs. COLLINS of Texas, McDONALD, ABDNOR, SATTERFIELD, EDWARDS of Oklahoma, and Mrs. SMITH of Nebraska changed their vote from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 10: Page 6, line 16, insert:

MILITARY PERSONNEL, NAVY

For an additional amount for "Military personnel, Navy", $888,000, to remain available for obligation until September 30, 1978.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 10 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 11: Page 6, line 20, insert:

MILITARY PERSONNEL, AIR FORCE

For an additional amount for "Military personnel, Air Force", $910,000, to remain available for obligation until September 30, 1978.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 11 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 12: Page 7, line 12, strike "$1,200,000" and insert "$10,700,000".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 12 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 13: Page 7, line 13, insert: "of which $9,500,000 shall be available only for the Uniformed Services University of the Health Sciences, this $9,500,000 to remain available for obligation until September 30, 1978."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 13 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 14: Page 8, line 1, insert:

ADMINISTRATIVE PROVISION

The limitation on the use of funds for legislative liaison activities of the Department of Defense for fiscal year 1977 contained in section 728 of the Department of Defense Appropriation Act, 1977, is hereby increased from $5,000,000 to $7,400,000.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 14 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 17: Page 8, line 23, insert: ": *Provided*, That all expenditures shall be approved by the Chairman of the Commission."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 17 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

Senate amendment No. 19: Page 9, line 15, insert:

TRANSPORTATION

For an additional amount to enable the District of Columbia to meet its share of any operating deficit incurred in connection with the operation of the Phase I segment of the Metrorail system covering the period January 1, 1977 to June 30, 1977, $846,000, except that no such amount, or part thereof, shall be obligated until commitments have been made for the total operating deficit associated with the Phase I segment.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 19 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 20: Page 10, line 19, insert:

ADMINISTRATIVE PROVISIONS

Authorization is hereby provided to the Government of the District of Columbia to make retroactive cost of living payments out of funds heretofore appropriated to such Government, to day care providers under contract to the city during the period July 1, 1975, to September 30, 1976, but not to exceed the amount of $855,000.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 20 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 21: Page 11, line 11, insert: ", and $28,000,000 shall be allocated for a contribution to the United Nations Relief and Works Agency."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 21 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 32: Page 14, line 19, insert:

OPERATING EXPENSES OF THE AGENCY FOR INTERNATIONAL DEVELOPMENT

None of the funds made available for Operating Expenses of the Agency for International Development in fiscal year 1977 shall be available for leasing, purchasing, renovating, or furnishing of housing or office space in Cairo, Egypt, except through the Foreign Building Operations of the Department of State.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 32 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 34: Page 16, line 15 insert:

EMERGENCY HOMEOWNERS' RELIEF FUND

For emergency mortgage relief payments and for other expenses authorized by title I of the Emergency Housing Act of 1975 (Public Law 94–50), $1,000,000.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 34 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 35; Page 16, line 19 insert:

FUNDS APPROPRIATED TO THE PRESIDENT

FEDERAL DISASTER ASSISTANCE ADMINISTRATION

DISASTER RELIEF

For an additional amount for "Disaster relief", $20,000,000: Provided, That the foregoing amount shall be used only for the reimbursement of State and local governments, notwithstanding any provision of law, in areas where an emergency has been declared by the President, for costs of snow removal incurred in such emergency.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House insist on its disagreement to the amendment of the Senate numbered 35.

PREFERENTIAL MOTION OFFERED BY MR. BRADEMAS

Mr. BRADEMAS. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. BRADEMAS moves that the House recede from its disagreement to the amendment of the Senate No. 35 and concur therein.

The SPEAKER pro tempore. The gentleman from Texas (Mr. MAHON) is recognized.

Mr. MAHON. Mr. Speaker. I yield 5 minutes to the gentleman from Indiana (Mr. BRADEMAS).

Mr. BRADEMAS. Mr. Speaker, I thank the chairman of the committee for yielding.

Mr. Speaker, I urge that the House take this action because I believe that the $20 million in aid which this amendment would provide to the four States of Indiana, Michigan, Ohio, and Pennsylvania is badly needed.

In late January, when the winter storms swept through the Midwest and East, the eventual severity was almost completely unanticipated.

But when temperatures dropped to record lows and the snow started to pile up to 10 feet, the wheels of government did begin to turn.

The Governors of the States affected submitted petitions to the President to declare their States emergency areas, and, later, when the full impact of the storms became clear, major disaster areas.

In the case of all four States, the President, working through the Federal Disaster Assistance Administration, examined the situation of each, and between January 29 and February 5, declared all four States emergency areas eligible for Federal assistance.

In the case of my own State of Indiana, for example, this declaration came 6 days after the first day of the storm. In his declaration, President Carter said:

I have determined that an abnormal accumulation of snow and ice resulting from a series of blizzards and snowstorms in the State of Indiana is of sufficient severity and magnitude to warrant a declaration of an emergency . . . I therefore declare that such an emergency exists in the State of Indiana.

The purpose of this declaration is to provide Federal aid for the opening of vital transportation arteries, the provision of public health services, the reopening of blocked supply routes to educational, governmental, commercial and industry establishments, and such other emergency assistance as may be required to protect the public health and safety.

Similar declarations were issued for Michigan, Ohio, and Pennsylvania.

The President's statement remains, I believe, an accurate assessment of the nature of the problem which existed for weeks in these four States. There was an emergency situation—the worst winter storm in Indiana's history—and an effective response was simply beyond the capability of the State and of local governments.

Mr. Speaker, some areas, like the counties surrounding Buffalo, N.Y., and some States, like Maryland, Virginia, and Florida, were declared major disaster areas and received extensive assistance.

In other areas of the country, drought became a particularly acute problem, as the winter rain upon which the agriculture of the West depended moved away to the Midwest and East to devastate these regions with ice and snow.

Congress and the President were quick to react to the drought by providing substantial aid and signaling their willingness to initiate additional assistance in the months ahead.

But in the four States in which a state of emergency was declared, substantial additional expenses incurred during the period of the emergency were not met by the Federal Disaster Administration.

In these counties in these four States where the President declared that an emergency existed, the Federal Disaster Assistance Administration recommended and spent a combined total of only $3 million to alleviate problems which have been estimated to cost millions of dollars beyond that figure.

To illustrate my own State of Indiana, Gov. Otis R. Bowen calculated that our State and local governments suffered a cost of $7.7 million for snow removal alone.

Gov. James A. Rhodes of Ohio has stated that all governmental units in Ohio spent more than $23 million over their normally anticipated snow removal budgets.

So in providing assistance totaling $500,000 in the entire State of Indiana and $1.2 million in Ohio, the FDAA provided only minimal assistance. Members of this body can therefore be assured that the $20 million provided by this amendment is certainly not a windfall for those areas which were designated by the FDAA as emergency areas and hence are now eligible for this aid.

Indiana's share of this aid would total, by my calculations, in the neighborhood of $3 million, about two-thirds of that for county and local government reimbursements and about one-third for the State to reimburse it for its efforts at snow removal in the areas designated by the FDAA as emergency areas. I would expect that a similar approach would be taken toward reimbursing the other three States.

I would further add, for the benefit of our colleagues, that it is the judgment of the author of the amendment, the distinguished senior Senator from Indiana, that if $20 million is insufficient to cover all the allowable snow removal costs in these four States, the eligible jurisdictions would receive a reduced pro-rated share in proportion to their snow removal expenditures. If the amount is less than the $20 million, the excess would return unexpended to the Treasury.

Mr. Speaker, here are some other reasons that I believe that this amendment is a sound investment by Congress.

First, estimates are that $20 million was spent for snow removal by the designated areas. I want to point out that this amount does not take into consideration, nor does it seek to reimburse local governments for, expenses incurred by areas within the States not designated as emergency areas, nor does it provide for road repairs, public building restoration, compensation for utility disruption or substantial agricultural losses. The amendment is restricted solely to removal of the snow, which was the basis for the emergency declarations.

Second, these funds will help replenish the budgets of the designated local governments for the unanticipated revenue losses of snow removal not underwritten by the Federal Government.

The principal reason, Mr. Speaker, that I rise to support the Senate amendment is the same reason that the President originally declared an emergency: This appropriation meets the intent of the law by helping overcome the effects of this rare winter calamity.

Third, local budgets, local highway departments, local manpower managers simply do not make provision for occurrences which are so unexpected or statistically improbable.

Finally, I would like to add what I consider an important point. The economic hard times of recent years have hit the budgets of local governments especially hard. Congress has recognized this fact of life and has designated specific programs to insulate local public services from these economic shockwaves. I believe that this amendment is consistent with that general policy.

The amendment provides funds from the date of the snowfall to the date the emergency declaration was withdrawn. The amendment covers only snow removal costs, keeping it consistent with President Carter's declaration.

This is, I believe, a just amendment and I hope my colleagues will support it.

Mr. COUGHLIN. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. LATTA).

Mr. LATTA. Mr. Speaker, I agree with the statements just made by the gentleman from Indiana (Mr. BRADEMAS). Since Ohio is one of those unfortunate States which suffered a disaster but did not obtain the benefits of a disaster declaration, I support this amendment to assist those public bodies which did the job on their own. The Governor of the State requested, on several occasions, that Ohio be declared a disaster area and I joined others in requesting such a declaration. With such a declaration of the President, all of our counties, cities and other public bodies would have automatically become eligible for assistance in clearing their roads and streets. None was forthcoming.

Several of our counties went out and depleted their road funds clearing the snow away hoping a disaster would be declared in their areas. Certainly, if we are going to have any road repair or bridge repair in these counties during this summer, which is sorely needed, we are going to have to replenish their funds. I think it was an omission on the part of the administration in not going ahead and declaring the State of Ohio a disaster area so that all of the affected areas that suffered from this past winter s storms would have benefited.

I support this amendment and hope it passes. I would like to ask the gentleman from Indiana (Mr. BRADEMAS) a question, if he would permit me to do so.

In looking over the amendment of the Senate No. 35, it merely says it is to reimburse certain States and local governments for snow removal costs incurred prior to a declaration of a disaster area. The Senate amendment provided $20 million. My question is, how would this $20 million be apportioned, if this amendment stays in this bill, among the four States?

The SPEAKER pro tempore (Mr. DANIELSON). The time of the gentleman from Ohio has expired.

Mr. COUGHLIN. Mr. Speaker, I yield 3 additional minutes to the gentleman from Ohio.

Mr. BRADEMAS. Will the gentleman yield?

Mr. LATTA. I will be happy to yield.

Mr. BRADEMAS. It is my understanding that it is the judgment of the author of the amendment in the other body, the senior Senator from Indiana, that if the amount of money were insufficient to cover all of the allowable snow removal costs in these four States, that the eligible jurisdictions would receive a reduced prorated share in proportion to their snow removal expenditures. If the amount were less than the $20 million, the excess would return unexpended to the Treasury.

My colleague from Massachusetts (Mr. BOLAND), who I know is on the other side of this issue, has been kind enough to give me an indication of how the expenditures would be allocated, and with the permission of the gentleman from Ohio I will cite these figures that have been given me by Mr. BOLAND. I have not myself before seen these specific figures.

For Pennsylvania, $4.8 million; for Ohio, $3.7 million; for Indiana, $12.9 million; for Michigan, $0.5 million; for a total of $21.9 million, a figure which was rounded to $20 million for the amendment.

Mr. LATTA. I note from the figures the gentleman has just cited that Indiana would get $12 million and Ohio would get $3 million. I know, as far as Ohio is concerned, we suffered a considerable amount of damage, and I was just wondering how they came up with those figures.

Mr. BRADEMAS. As I said, these figures are not my own, but those supplied by the gentleman from Massachusetts, which I think were prepared in response to a query by a Member of the other body to the Federal Disaster Administration. They were clearly related to the amount of money expended by local units of government and by the States for the purpose of snow removal.

Mr. LATTA. So, providing this amendment stays in the bill and becomes law, from what the gentleman from Indiana said previously, if a county, for example in my district, which suffered heavy losses could come up with the figures showing that they expended x number of dollars, notwithstanding the figures the gentleman just cited overall for the State of Ohio, they would still be reimbursed?

Mr. BRADEMAS. Yes, the gentleman is correct. I would reiterate, of course, that the administration makes possible funds for reimbursement for snow removal expenditures only in those areas that have been designated emergency areas by the President.

Mr. LATTA. I thank the gentleman for his response, and I certainly support the amendment.

Mr. MAHON. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. SHARP).

Mr. SHARP. Mr. Speaker, I urge that we accept the Senate amendment providing an additional $20 million for disaster relief. This would allow the Federal Disaster Assistance Administration to reimburse certain States and local governments for snow removal costs resulting from the winter storm for which the President issued an emergency declaration.

A major inequity occurred in the provision of assistance to the counties hardest hit by the storm in late January and early February. Although the emergency situation developed in Indiana on January 28 and 29, the emergency declaration was not issued until February 2 and assistance was not practically available until February 3. Many counties were not included in the first emergency declaration, and assistance was not available to them for an additional few days.

During this delay local officials concerned about the well-being of their constituents properly went ahead and began to clear the main roads so that emergency vehicles could move, food and fuel supplies could be replenished, and people could get back to work as soon as possible. But the costs incurred by these governments prior to the declaration of an emergency have not received any Federal reimbursement. Other counties, which were included in the first list of areas where an emergency was declared, or which were a little slower in beginning the snow removal process, received Federal assistance.

The amendment seeks to provide equal treatment for all counties which were covered by the emergency declaration. If we accept it, local governments which responded responsibly to the emergency situation will be reimbursed for snow removal expenses which in other places have already been paid by the Federal Government.

Mr. Speaker, it takes only a moment's reflection to realize what an unanticipated expense of $100,000 or more can do to the budget of a small county. In clearing the roads after the extreme January storm, many counties spent far more than they had budgeted for snow removal for the entire year. Additional funds had to be taken from highway maintenance and other budgeted items. Without the help that this amendment offers, these counties will have to forego many essential services.

Mr. Speaker, only four States and slightly over 100 counties are affected by this amendment. I am sure that other Representatives from the States of Indiana, Ohio, Michigan, and Pennsylvania have supported a national Federal disaster assistance program, as I have, although our States are not particularly vulnerable to droughts, hurricanes, and some other disasters. I hope that the Members of Congress from the States that do receive the major part of the Federal Disaster Assistance Administration funds will likewise recognize that this must be a national program if it is to receive continued support.

Mr. MAHON. Mr. Speaker, I yield 1 minute to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Speaker, this country has been devastated by acute inclement weather this past year. We believe, as already has been stated by my colleague from Ohio (Mr. LATTA), that Ohio should have been declared a major disaster area. Unfortunately, this did not happen. The cost of this past winter in Ohio was estimated by the State to be $1.2 billion. Federal assistance to Ohio has thus far totaled only $1.2 million, or one-tenth of 1 percent of the total damages. Clearly, this Federal response has been totally inadequate, especially in light of the generosity shown to the drought States in the West. I believe the States in the West need their Federal help, and I support that. But our need is equally as critical.

Mr. Speaker, I therefore urge my colleagues to support this amendment.

Mr. COUGHLIN. Mr. Speaker, I yield 2 minutes to the gentleman from Pennslyvania (Mr. MARKS.)

Mr. MARKS. Mr. Speaker, as a Congressman from northwestern Pennsylvania, an area devasted by the recent snow emergency, I rise in support of the $20 million supplemental appropriation for snow removal.

This past winter brought havoc to the communities of my district which had already been hit hard by economic hardships. The snow accumulated to such an extent that life and property were en-

dangered and extraordinary measures had to be taken to remove the snow.

Extraordinary measures, however, cost extraordinary dollars. The four largest cities in my district—Erie, Sharon, Farrell, and Meadville—spent over $150,000 in excess of budgeted costs. This money was expended for snow removal alone, and does not begin to cover the many other costs associated with the severe weather. These moneys had to be spent at a time when the communities in my district did not have the money because tax revenues were and are still low due to our high unemployment rate, which ranges well above the national average.

The Federal response to this emergency has so far been inadequate. Unless more money is appropriated, all the communities throughout the areas affected will have to eliminate essential community services, and this will, in turn, help to further worsen an already serious economic situation.

There is good reason to add this $20 million for snow removal assistance to the supplemental appropriations bill. We have responded to other extraordinary needs throughout the country, such as the $900 million already included in this conference report for drought-stricken areas. It is only fair that this figure of $20 million also be given to areas ravaged by extreme weather problems.

Therefore, my colleagues, I urge your support for this badly needed assistance.

Mr. MAHON. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. FITHIAN).

Mr. FITHIAN. Mr. Speaker, I thank the chairman of the committee for yielding this time to me.

As a Member whose district was hard hit in these storms, let me just underscore what my colleague, the gentleman from Indiana (Mr. BRADEMAS), has said and what my colleague, the gentleman from Ohio (Mr. LATTA), has said.

In one of our counties we have normal snow removal costs that have averaged in the last decade some $25,000 to $30,000. They are now faced with a cost of $203,000 in terms of snow removal bills resulting from work contracted to outside snow removal operations.

It has been said that this would be illegal and that the law does not provide for this. Let me assure the Members that we are now attempting to remedy what was a delay in the decision.

In the case of Buffalo, for example, the emergency struck on January 29, and it was declared a disaster on January 31. When the final settlement or final declaration was arrived at, the FDAA went back and, I think properly in the case of Buffalo, picked up those unexpected and unanticipated costs from January 16 to February 25.

What we are asking for, Mr. Speaker, is reimbursement for that cost which was incurred while the FDAA was making a decision and during the period of time before the declaration of the emergency that existed.

I would strongly urge the Members to recall that the same storm has caused us to put in the budget which we deal with today an additional $100 million—and I think properly so—for the Bureau of Reclamation to carry out emergency assistance, and we have indicated that we will proceed to do that. The same storm hit many States in the Midwest, as my colleague, the gentleman from Indiana (Mr. BRADEMAS), has indicated, and so I think this is an opportunity and a requirement for the Federal Government to respond in this case.

Mr. Speaker, I urge an aye vote on the Brademas amendment.

Mr. COUGHLIN. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. QUAYLE).

Mr. QUAYLE. Mr. Speaker, I take this time to respond to a request of my distinguished colleague, the gentleman from Indiana (Mr. BRADEMAS), who has asked for bipartisan support of his amendment. I assure him that he has my support. This appropriation of $20 million for snow removal is a very important item.

I can attest that in my own district there was some talk about the Department of Highways picking up some bills for LaGrange, Steuben, and Noble Counties. These counties have unpaid bills for snow removal costs. They are having a difficult time paying these bills.

Mr. Speaker, I think we all know that some States, particularly those in the Midwest, got hit especially hard with these storms. I think this appropriation does deserve bipartisan support, and I am willing to give it. I urge the adoption of the motion.

Mr. MAHON. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. FLOOD).

Mr. FLOOD. Mr. Speaker, I have been advised by the officials in the State of Pennsylvania that there are 21 counties in Pennsylvania that were covered by the emergency declaration and that are entitled to support under the amendment and under the proposed action of my friend, the gentleman from Indiana (Mr. BRADEMAS).

There is no doubt about the time that was involved. This lasted 24 hours a day for 2 or 3 days, and this work was being done before the Federal Government took any action whatsoever. These 21 counties were declared emergency disaster areas.

Mr. Speaker, there is no doubt about the merits of this proposal that has been made, and I support the motion of my friend, the gentleman from Indiana (Mr. BRADEMAS).

Mr. COUGHLIN. Mr. Speaker, I yield myself such time as I am consume.

Mr. Speaker, I deeply regret the need to disagree with the dean of my delegation.

I am certainly sympathetic with the plight of these many communities involved, but, Mr. Speaker, this is a little bit of a good old pork in the barrel. It is nice to have some pork in the barrel. It is nice to have some pork when it applies to Pennslyvania or Indiana or Michigan or Ohio, but, Mr. Speaker, pork is pork is pork.

This program is not authorized; it is not warranted; it is not approved and legalized under the Federal Disaster Assistance Administration Act. Many of these communities in many of these States did in fact receive money for snow removal during the declared emergency. This request is for snow removal that was done not during the declared emergency, and that is why it is pork.

I certainly support the needs of the local communities, and I support programs that accomplish things like this, but, Mr. Speaker, many States and many communities overspent their funds for snow removal this past winter, and they are not in here applying for part of this pork, although they could be.

In answer to the question raised by the gentleman from Ohio (Mr. LATTA), other States in fact could apply for this money, and many communities across the country could apply for this money which is coming from a separate new and unauthorized program.

Mr. Speaker, the problem is that the disaster relief agency is one that is highly susceptible to misuse. It is being regarded as a pork barrel into which communities can reach and apply for additional help, even in cases where it does not really fall in the area of disaster relief. It is terribly important, it seems to me, that we keep this agency and keep this program and make sure that it applies only during bona fide emergencies.

If we want to change the legislation, let us change the legislation, but let us not just make a pork barrel out of that agency.

Mr. FITHIAN. Mr. Speaker, will the gentleman yield for a question?

Mr. COUGHLIN. I yield to the gentleman from Indiana.

Mr. FITHIAN. Mr. Speaker, I thank the gentleman for yielding.

I wonder whether the distinguished gentleman is aware that in some areas after the appeal was made, it was 8 days before the Federal disaster team arrived on the scene.

How does the gentleman accommodate that?

I realize the delay here, but we are talking about days in which we are faced with the disaster; and it took 8 days for the team to arrive.

Mr. COUGHLIN. Mr. Speaker, to answer the gentleman, the President, in declaring the disaster, had the prerogative of deciding on what date the disaster would have commenced, so that the President could have put that period of time in the disaster proclamation.

Mr. MAHON. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. BENJAMIN).

Mr. BENJAMIN. Mr. Speaker, I rise in support of the preferential motion.

Mr. Speaker, I thank my distinguished colleague, the majority whip and my fellow colleagues and friends from Indiana, Ohio, Michigan, and Pennsylvania for their efforts in leading the effort to secure this House's approval for the Senate proposal to reimburse our States $20 million for snow removal under President Carter's emergency declarations.

Indiana's plight at the time of the emergency is significant for your consideration of this measure and indicative of her sister States' circumstances during the same period of time.

Prior to the snowstorm of January 28, Indiana experienced 32 days of subfreezing temperatures with snowfall substantially higher than normal. The Ohio River was closed, as were many streets,

roads, and highways. On January 26 a heavy ice storm compounded the area's problem. This storm ultimately reached its peak on January 28 as a blizzard whipped winds up to 50 knots an hour making the State's position untenable.

Only 1,000 miles of roads remained passable, citizens were trapped, schools closed, work and public centers shut and 22 people lost their lives as a direct result of the storm. Another 2,108 received cold related injuries.

The National Guard was mobilized. The Red Cross operated 18 shelters. Over 1,000 State troopers effected rescues and patrolled the roads which were still open. Local volunteers worked endless hours and State and local governmental spending for the emergency exceeded $18.9 million. Not included in this figure is agricultural damage of $16 million, additional agricultural feed costs of $80 million and damage to schools in 305 districts totaling over $17 million.

Finally, the President declared that "an emergency exists" in Indiana on February 2, 1977. As a result, the Corps of Engineers provided direct support to affected counties, contracts for snow removal were made and Small Business Administration and Farmers' Home Administration low cost disaster loans were provided. In total, the Federal Government provided approximately $409,000 in relief.

Unfortunately, the counties affected by the storm spent in excess of $3 million and incurred budget deficits of more than $5.4 million over and above the losses incurred by the State of Indiana itself. In many instances, entire street maintenance budgets for the calendar year were exhausted.

Indiana's constitution prohibits deficit spending and numerous local municipalities and county units are in severe financial condition. They have already expended sums far in excess of their capacity to spend and if reimbursement is not made many streets and bridges that should be repaired will not be, further endangering the lives of our citizens.

An emergency was declared, not a major disaster. The difference, in terms of relief is substantial. We must accept the hardship imposed. But we cannot, and the States affected should not be made to bear the reimbursable costs of emergency snow removal for the initial emergency period prior to the President's declaration.

Regrettably, some would argue against such warranted and proper reimbursement. Their arguments are two.

First, that no authority exists to reimburse costs incurred prior to the date of emergency declaration.

This argument is without merit. Although there is no case development of the controlling statute, it is clear from the regulations that a snowstorm is an occurrence subject to emergency treatment. Furthermore, there is nothing in the law or regulations which define parameters of time to which emergency funds are limited. Emergency aid is made available to alleviate the harsh impact of a particular catastrophe and cannot be construed to be dependent upon the time an emergency declaration is issued. To say that an emergency cannot exist before a declaration is issued is to ignore the obvious. To infer that an emergency did not exist on February 1, 1977, because the President declared one to exist on February 2, 1977 is also incorrect.

The second argument advanced by those opposed to this funding request is that it is not authorized by law. This too, is fallacious.

Volume 24 of the CFR, section 2205.27 (c) which deals with emergency declarations states:

> The type and extent of Federal assistance set forth in the Agreement, or supplement thereto, shall be the only assistance which is eligible for Federal reimbursement or funding under the Act.

I emphasize the word, "reimbursement."

Debris removal is also contemplated by section 2205.29 of the same volume. Although debris is not defined, I am confident in characterizing substantial snows and drifts blocking roads and highways as debris necessary to be removed for the performance of emergency tasks.

Since debris removal and reimbursement is contemplated by the statute and regulations and the President's declaration and the Federal-State agreement are broad enough to encompass them and I would strongly recommend to you that there is no legal impediment to the passage of this measure.

I have stressed Indiana's situation. It is indicative of our sister States' problems.

Our concern is not parochial. It is a concern for persons who have suffered much and for sorely strapped State and local units of governments who are in severe financial difficulties because of their concern and prompt action to mitigate their citizens' suffering.

This House has provided relief for other emergency victims. Those suffering from the western drought come immediately to mind. All we ask now is for the same consideration to be given to the peoples of our States who have suffered much.

Thank you for your consideration and more importantly, for your active support of this measure.

Mr. MAHON. Mr. Speaker, I yield myself such time as I may consume.

(Mr. MAHON asked and was given permission to revise and extend his remarks.)

Mr. MAHON. Mr. Speaker, disaster relief funds are handled by the subcommittee presided over by the distinguished gentleman from Massachusetts (Mr. BOLAND). He is well known to this House. He does his job faithfully and well. He heads a very fine subcommittee.

Mr. Speaker, I have in my hand a letter which the gentleman from Massachusetts (Mr. BOLAND) addressed to the Members of the House on April 19. He points out his opposition to the motion which has been offered by the gentleman from Indiana (Mr. BRADEMAS); and I shall read in part the letter which has been written:

> The FDAA has determined that such reimbursement—

And that is as proposed in this amendment—

> "is not legal, authorized, or warranted under current disaster law. The Federal Disaster Relief Act of 1974 authorizes Federal emergency relief efforts only during a Presidentially-declared emergency. There is no authority to reimburse States or local governments for costs incurred prior to an emergency declaration."

The gentleman from Massachusetts (Mr. BOLAND) goes on to say:

> This is a dangerous precedent which not only abrogates the latitude provided the President by current law, but also raises the specter of loss of control over funding levels for disaster relief.

The letter of the gentleman from Massachusetts continues as follows:

> In the future any State not satisfied with assistance received under the Disaster Relief Act would have a precedent for special interest legislation.
>
> Almost the entire Nation has felt some adverse effects of the recent winter. The President authorized what he determined to be an appropriate level of disaster or emergency assistance in those places where he found a threat to life, property, or public heath and safety. The Senate proposes to single out very specific areas for special assistance, above and beyond the $3,000,000 already provided those areas.

Mr. Speaker, it seems to me to be very unwise for us to tinker in this way with disaster relief legislation so as to favor certain areas of the country. It seems to me that we have gone as far as we can go under these circumstances.

Mr. BRADEMAS. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Indiana.

Mr. BRADEMAS. Mr. Speaker, I thank the distinguished chairman for yielding.

If the chairman would allow me, I would like to make a comment on each of the three points he was good enough to make.

I would respond to the first point raised that the assistance proposed is not legal.

Mr. MAHON. Mr. Speaker, may I say to the gentleman from Indiana that my time is limited. I hope the gentleman will be relatively brief.

Mr. BRADEMAS. Mr. Speaker, I will try to be brief.

I just wanted to articulate to the three objections that have been voiced here, that they are not, in fact, accurate, and that is the heart of the matter.

On the first point, as I indicated earlier, under section 306 of the Federal Disaster Assistance Act of 1974, it is clear that there is legal authority to provide assistance for clearance of roads and for making contributions, and I am quoting from the statute, to State and local governments for the purpose of carrying out the provisions of this paragraph.

In the second place, with respect to the objection that there is no authority to reimburse States or local governments for costs incurred prior to an emergency declaration, it would appear, as the gentleman from Indiana, Mr. FITHIAN indicated with respect to the Buffalo example for an emergency request, it is clear that the relief should date to the moment of the disaster. For instance, if there were an earthquake on Monday and there was a lot of loss of property

and life that occurred, surely we should not say that if the emergency declaration came on the next Wednesday that the assistance then should run only to Wednesday.

Then, Mr. Speaker, on the point that the situation sets a dangerous precedent and also raises the specter of the loss of control over funding levels for disaster relief, I would observe that until 1966 Congress passed a number of special laws providing for assistance by the Federal Government where there were disasters. And in providing the Disaster Relief Act of 1974, clearly that was intended to provide a more standardized response to national disasters. But there is certainly substantial precedent for providing relief or special emergency responses.

Finally, Mr. Speaker, with respect to the third objection that the Senate proposes to select very specific areas for special assistance above and beyond the $3 million already provided, it just is not accurate to say that the Senate singled out very specific areas for special assistance but rather it was the President of the United States and the Federal Disaster Administration that singled the areas out by declaring them to be in states of emergency.

So, Mr. Speaker, the whole point of the preferential motion I have offered is that we adhere to the intent of the law which is to provide relief to State and local governments for emergency expenses.

To conclude, Mr. Speaker, and I must add that I am very grateful to the chairman, the gentleman from Texas (Mr. MAHON), for allowing me to respond to the points the gentleman raised, the motion does not intend to provide assistance all over the country but only in those areas where the President of the United States has declared that the States and localities were in a state of emergency or an emergency existed, but which areas did not in fact receive the relief which the law provides, and that is exactly the relief that is provided in my motion.

Mr. MAHON. Mr. Speaker, I believe my time has about expired.

The SPEAKER pro tempore. Does the gentleman from Pennsylvania have further requests for time?

Mr. COUGHLIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Colorado (Mr. JOHNSON).

Mr. JOHNSON of Colorado. Mr. Speaker, I thank the gentleman from Pennsylvania for yielding to me. I will be as brief as possible.

Mr. Speaker, I would like to bring a situation to the attention of the Members of the House and to see what the response of the gentleman from Texas (Mr. MAHON) and the gentleman from Pennsylvania (Mr. COUGHLIN) might be to it. We had a storm in Colorado and Nebraska and Kansas early in March that was so severe that thousands of cattle were killed; homes in towns and cities and on farms were deprived of electricity for up to 10 days; 8,000 telephone poles in one small rural electric area were snapped off as a result of the tremendous wind that was blowing; and the President did not declare this to be a disaster area.

If the House passes this amendment which would provide for funds outside of the disaster declaration that the President has given, would not those States which have applied for disaster aid and have been turned down be justified in requesting the same kind of relief when we think that the President made a mistake and did not follow the law by not declaring a disaster?

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Massachusetts.

Mr. BOLAND. I thank the gentleman for yielding.

I think the gentleman makes a very significant point. I think the State of Colorado would certainly be in line asking for assistance if this $20 million is provided. There is no doubt about it. That point was made very vividly clear in the debate on the floor of the Senate between the junior Senator from West Virginia and the Senator from Wisconsin, the chairman of the Subcommittee on HUD-independent agencies over on the Senate side. Mr. BYRD asked Mr. PROXMIRE if the $20 million was intended only for the four States—Indiana, Michigan, Ohio, and Pennsylvania. Mr. PROXMIRE responded "No." He felt that it could be expanded beyond those four States. So the gentleman is absolutely right.

Mr. JOHNSON of Colorado. I thank the gentleman.

Mr. MAHON. Mr. Speaker, I yield 10 minutes to the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Speaker, I dislike very much to oppose the motion of my very distinguished and beloved friend, the gentleman from Indiana (Mr. BRADEMAS) and also some of the other members of the Indiana, Ohio, Michigan, and Pennsylvania delegations. But this, I think, simply stated, is the snow job amendment. This amendment was offered in the other body for the purpose of reimbursing communities in four States, the States of Pennsylvania, Michigan, Indiana, and Ohio, where the President had declared emergencies—not disasters. The gentleman from Indiana confuses the two terms, and they are different.

He also talks about the relief that is going to be given to those areas in the great West, in the Southwest, and the Midwest because of the drought. They are disasters, and we are going to take care of them, but the Congress has done that through the regular legislative process and not on an appropriations bill.

At first glance, what the gentleman seeks to do may seem like an attractive proposal, but when you look at the bottom line implications, it is very bad legislation. Now let me tell you why.

To begin with, the purposes for which these funds are intended is not authorized in current disaster assistance law. That fact is made abundantly clear when we look at the language of the Senate amendment. It states:

> For an additional amount for disaster relief, $20,000,000: *Provided*, That the foregoing amount shall be used only for the reimbursement of State and local governments—

And listen to this—

> notwithstanding any provision of the law.

The fact is that without the language "notwithstanding any provision of the law" there is no authority to reimburse States or local governments for costs incurred prior to an emergency declaration.

Now I am fully aware that a number of State and local governments incurred substantial costs this past winter because of heavy snowfall. But snow removal is basically a local responsibility. If the Congress wants to pay for snow removal costs over and above what can be provided under existing law, then that law should be amended. In fact, one of the Members here indicated that the President actually backdated the Emergency Declaration for the State of New York and particularly in the Buffalo area. What the President did was to immediately declare an emergency. He subsequently declared a disaster and that is why New York received assistance dating back to the beginning of the storm. I do not think anybody can quarrel with that decision. I know of no area in the United States that was harder hit by snowstorms than the city of Buffalo, and I am sure that the Members who represent that great city can vouch for that. But I do believe that we are setting a dangerous precedent here. Take my own city of 160,000 people which made provision for $200,000 in its budget to clear snow. We got a snowstorm that cost far and away beyond the $200,000. So my city now has to pay some $700,000 for the removal of snow, and I am sure that that has occurred in about every single city and town in the snow belt that extends from the great Northeast clear across the northern section of the United States and deep into the Midwest.

Finally, let me say a word about the concept of the existing disaster assistance law. Basically, it gives the President latitude to decide what actions and what level of assistance he deems is necessary where he finds a threat to life, property, or public health and safety. The President makes that determination, and that's exactly as it should be. It is clearly an executive branch responsibility. What this amendment seeks to do is to supplant the President's decision with that of the Congress. That is wrong. If we are going to second guess the President every time we may be a little unhappy with the manner or the timing of when he declares an emergency or a disaster—then I wonder if we would ever get an emergency or disaster declared. And above all, we should not be doing that in an appropriations bill outside of and separate from the regular legislative process.

The Federal Disaster Assistance Administration has provided over $3 million for snow removal in over 100 counties in these four states. To provide this additional $20 million is bad legislation and a bad precedent.

I urge that the Members vote "no" on the gentleman's motion.

Mr. MAHON. Mr. Speaker, I move the previous question on the preferential motion.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the preferential motion offered

by the gentleman from Indiana (Mr. BRADEMAS).

Mr. BRADEMAS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 124, nays 279, not voting 30, as follows:

[Roll No. 144]

YEAS—124

NOT VOTING—30

Breaux	Koch	Roncalio
Brown, Ohio	McEwen	Ruppe
Burton, John	McKay	Sawyer
Derrick	Mikva	Shipley
Devine	Milford	Stockman
Diggs	Mineta	Teague
Ford, Mich.	Myers, Ind.	Walgren
Forsythe	Price	Wampler
Gammage	Quillen	Yatron
Hall	Roe	Young, Alaska

The Clerk announced the following pairs:

Mr. Mikva with Mr. Teague.
Mr. Ford of Michigan with Mr. Milford.
Mr. Price with Mr. Roe.
Mr. Shipley with Mr. Derrick.
Mr. Yatron with Mr. Breaux.
Mr. Koch with Mr. Diggs.
Mr. Mineta with Mr. Hall.
Mr. John L. Burton with Mr. Roncalio.
Mr. McKay with Mr. Walgren.

Messrs. RANGEL, THOMPSON, and ASHBROOK changed their vote from "nay" to "yea."

Messrs. AMBRO, CONABLE, DOWNEY, GUDGER, and MOLLOHAN changed their vote from "yea" to "nay."

So the preferential motion was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. MAHON).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 37: Page 17, line 13, strike out "table I of Committee Print Number 94–39 of the Committee on Public Works and Transportation of the House of Representatives" and insert "the table on page 16 of Senate Report Number 95–38, adjusted proportionately in accordance with the above appropriation:".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 37 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 43: Page 19, line 20, insert:

CONSTRUCTION AND MAINTENANCE

For an additional amount for "Construction and maintenance", $900,000, to remain available until expended.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 43 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert:

CONSTRUCTION AND MAINTENANCE

For an additional amount for "Construction and maintenance", $600,000, to remain available until expended.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 44: Page 20, line 3, insert:

SERVICE CHARGES, DEPOSITS, AND FORFEITURES

For administrative expenses and other costs related to processing application documents and other authorizations for use and disposal of public lands and resources, for monitoring construction, operation, and termination of facilities in conjunction with use authorizations, and for rehabilitation of damaged property, such amounts as may be collected under sections 304(a), 304(b), 305(a), and 504(g) of the Act approved October 21, 1976, Public Law 94–579, to remain available until expended.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 44 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 45: Page 20, line 16, strike out "$1,000,000" and insert "$5,800,000."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 45 and concur therein with an amendment, as follows: In lieu of

the sum proposed by said amendment, insert: "$800,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 50: Page 21, line 9, insert: "of which $4,025,000 shall remain available until expended."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 50 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert: ", of which $4,025,000 shall remain available until September 30, 1978".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 52: Page 21, line 24, strike out "$92,263,000" and insert "$93,001,000".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 52 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$90,855,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 53: Page 22, line 4, insert:

JOHN F. KENNEDY CENTER FOR THE PERFORMING ARTS

For an additional amount for "John F. Kennedy Center for the Performing Arts", $4,500,000, to remain available until expended: *Provided*, That these funds shall be available only upon enactment of S. 521, Ninety-fifth Congress, or similar legislation.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 53 and concur therein, the sum proposed by said amendment, insert "$90,855,000".

The motion was agreed to.

Mr. GINN. Mr. Speaker, I rise in support of the amendment.

Mr. Speaker, I strongly support the appropriation provided for in the conference report amendment No. 53. The language provides an urgently needed $4.5 million for remedying severe water leak conditions which exist throughout the Kennedy Center building. I would like to point out on behalf of the Committee on Public Works and Transportation that S. 521, which authorizes the necessary funding, is still in conference. It is my understanding that the language that provides for the appropriation requires that the money can only be spent upon enactment and in accordance with the provisions contained in S. 521 as agreed upon by the House and Senate conferees. We are hopeful of resolving this matter in conference soon so that the funds can be spent expeditiously.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. MAHON).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 59: Page 23, line 18, strike out "$35,200,000" and insert "$19,200,000".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 59 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$34,200,000, of which $15,000,000 shall be available only upon enactment of authorizing legislation".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 60: Page 23, line 20, strike out "$26,700,000" and insert "$10,700,000".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 60 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$25,700,000, of which $15,000,000 shall be available only upon enactment of authorizing legislation".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 61: Page 23, line 24, strike out "$10,904,000" and insert "$22,132,000".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offered a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 61 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$22,460,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 63: Page 24, line 2, insert: "*Provided*, That $4,000,000 for grants for the rehabilitation of Enewetak Atoll in the Marshall Islands shall be available only upon enactment into law of authorizing legislation."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 63, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 72: Page 26, line 7, insert:

INDIAN HEALTH FACILITIES

For an additional amount for "Indian health facilities", $75,000,000, to remain available until expended.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 72, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 83: Page 31, line 15, strike out "$115,049,000" and insert "$133,022,000".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 83 and concur therein with an amendment, as follows: In lieu of the sum inserted by said amendment, insert the following: "$120,949,000, *Provided*, That allotments to each State under section 302 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act shall not be less than the allotments made to such States in fiscal year 1976".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 90: Page 32, line 20, insert:

EMERGENCY SCHOOL AID

For an additional amount for "Emergency School Aid", $35,000,000 of which $25,000,000 shall be for carrying out section 707(a)(13) through 707(a)(15) of the Emergency School Aid Act and $10,000,000 shall be for activities under section 708(a) of said Act, notwithstanding any other provision of said Act, to provide assistance to school districts for which section 706(a) funding is insufficient to meet their needs and which are implementing voluntary plans to eliminate or reduce minority group isolation.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 90 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

EMERGENCY SCHOOL AID

For an additional amount for "Emergency School Aid", $17,500,000 of which $7,500,000

shall be for carrying out section 707(a)(13) through 707(a)(15) of the Emergency School Aid Act and $10,000,000 shall be for activities under section 708(a) of said Act, notwithstanding any other provision of said Act, to provide assistance to school districts for which section 706(a) funding is insufficient to meet their needs and which are implementing voluntary plans to eliminate or reduce minority group isolation.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 91: Page 34, line 6, strike out "$3,206,418,000" and insert "$3,206,418,000".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 91 and concur therein with an amendment, as follows: In lieu of the sum inserted by said amendment, insert the following: "$3,187,168,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 93: Page 34, line 19, insert: *"Provided further*, That funds contained in Public Law 94-94 under this head for work study grants shall remain available through September 30, 1978."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 93 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 101: Page 38, line 6, insert:

RAILROAD RETIREMENT BOARD

REGIONAL RAIL TRANSPORTATION PROTECTIVE ACCOUNT

For an additional amount for payment of benefits under section 509 of the Regional Rail Reorganization Act of 1973, to remain available until expended, $25,000,000, including not to exceed $25,000 for payment to the Railroad Retirement Board for administrative expenses.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 101 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

Mr. MAHON. Mr. Speaker, inasmuch as amendments Nos. 102 through 134 relate solely to housekeeping operations of the other body in which, by practice, the House concurs without intervention, I ask unanimous consent that Senate amendments Nos. 102 through 134 be considered as read, printed in the RECORD and that they be considered en bloc.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Senate amendments are as follows:

(102) SENATE

(103) PAYMENTS TO WIDOWS AND HEIRS OF DECEASED MEMBERS OF CONGRESS

For payment to Jane B. Hart, widow of Philip A. Hart, late a Senator from the State of Michigan, $44,600.

(104) COMPENSATION AND MILEAGE OF THE VICE PRESIDENT AND SENATORS AND EXPENSE ALLOWANCES OF THE VICE PRESIDENT, THE LEADERS, AND WHIPS OF THE SENATE

(105) COMPENSATION AND MILEAGE OF THE VICE PRESIDENT AND SENATORS

For an additional amount for "Compensation and Mileage of the Vice President and Senators", $2,900: *Provided*, That, effective January 5, 1977, the compensation of a Deputy President pro tempore of the Senate shall be at a rate equal to the rate of annual compensation of the President pro tempore and the Majority and Minority Leaders of the Senate.

(106) EXPENSE ALLOWANCES OF THE VICE PRESIDENT, MAJORITY AND MINORITY LEADERS AND MAJORITY AND MINORITY WHIPS

For an additional amount for "Expense Allowances of the Vice President, Majority and Minority Leaders and Majority and Minority Whips", $6,500: *Provided*, That, effective with fiscal year 1977 and each fiscal year thereafter, the expense allowance of the Majority and Minority Leaders of the Senate shall not exceed $5,000 each fiscal year for each Leader: *Provided further*, That, effective April 1, 1977, there is hereby authorized an expense allowance for the Majority and Minority Whips of the Senate which shall not exceed $2,500 each fiscal year for each Whip: *Provided further*, That, during the period beginning on January 3, 1977, and ending September 30, 1977, and during each fiscal year thereafter, the Vice President, the Majority Leader, the Minority Leader, the Majority Whip, and the Minority Whip may receive the expense allowance (a) as reimbursement for actual expenses incurred upon certification and documentation of such expenses by the Vice President, the respective Leader or the respective Whip, or (b) in equal monthly payments.

(107) SALARIES, OFFICERS AND EMPLOYEES

(108) OFFICE OF THE PRESIDENT PRO TEMPORE

For Office of the President Pro Tempore, $51,400: *Provided*, That, effective April 1, 1977, the President pro tempore is authorized to appoint and fix the compensation of an Administrative Assistant at not to exceed $47,595 per annum; a Legislative Assistant at not to exceed $40,080 per annum, and an Executive Secretary at not to exceed $23,380 per annum.

(109) OFFICE OF THE DEPUTY PRESIDENT PRO TEMPORE

For Office of the Deputy President Pro Tempore, $51,400: *Provided*, That, effective April 1, 1977, the Deputy President Pro Tempore is authorized to appoint and fix the compensation of an Administrative Assistant at not to exceed $47,595 per annum; a Legislative Assistant at not to exceed $40,080 per annum, and an Executive Secretary at not to exceed $23,380 per annum.

(110) OFFICES OF THE MAJORITY AND MINORITY LEADERS

For an additional amount for 'Offices of the Majority and Minority Leaders', $45,900: *Provided*, That, effective April 1, 1977, the Majority Leader and the Minority Leader are each authorized to appoint and fix the compensation of such employees as they deem appropriate: *Provided further*, That the gross compensation paid to such employees shall not exceed $191,700 each fiscal year for each Leader: *Provided further*, That the positions established by the Legislative Branch Appropriation Act, 1970, for the Offices of the Majority and Minority Leaders are abolished effective April 1, 1977.

(111) FLOOR ASSISTANTS TO THE MAJORITY AND MINORITY LEADERS

For Floor Assistants to the Majority Leader and the Minority Leader, $42,600: *Provided*, That, effective April 1, 1977, the Majority Leader and the Minority Leader may appoint an Assistant to the Majority Leader for Floor Operations and an Assistant to the Minority Leader for Floor Operations, respectively, and fix the compensation of such assistants at a rate of compensation not to exceed the maximum annual rate of gross compensation of the Assistant Secretary of the Senate.

(112) OFFICES OF THE MAJORITY AND MINORITY WHIPS

Effective April 1, 1977, the Majority Whip and the Minority Whip are each authorized to appoint and fix the compensation of such employees as they deem appropriate: *Provided further*, That the gross compensation paid to such employees shall not exceed $111,100 each fiscal year for each Whip: *Provided further*, That the positions established by the Legislative Branch Appropriation Act, 1970 and the Legislative Branch Appropriation Act, 1976, for the Offices of the Majority and Minority Whips are abolished effective April 1, 1977.

(113) OFFICES OF THE SECRETARIES OF THE CONFERENCE OF THE MAJORITY AND THE CONFERENCE OF THE MINORITY

For Offices of the Secretary of the Conference of the Majority and the Secretary of the Conference of the Minority, $58,200: *Provided*, That, effective April 1, 1977, the Secretary of the Conference of the Majority and the Secretary of the Conference of the Minority may each appoint and fix the compensation of an Executive Assistant at not to exceed $45,758 per annum and a Secretary at not to exceed $17,869 per annum.

(114) OFFICE OF THE CHAPLAIN

For an additional amount for "Office of the Chaplain", $2,000: *Provided*, That, effective April 1, 1977, the compensation of the Chaplain shall be $22,044 per annum in lieu of $18,704 per annum.

(115) OFFICE OF THE SECRETARY

Effective April 1, 1977, the positions of Assistant to the Majority and Assistant to the Minority established by the Supplemental Appropriation Act, 1955 are hereby abolished.

(116) ADMINISTRATIVE AND CLERICAL ASSISTANTS TO SENATORS

For an additional amount for "Administrative and Clerical Assistants to Senators", $33,000: *Provided*, That, effective April 1, 1977, the clerk hire allowance of each Senator from the State of Virginia shall be increased to that allowed Senators from States having a population of five million but less than seven million, the population of said State having exceeded five million inhabitants.

(117) OFFICE OF SERGEANT AT ARMS AND DOORKEEPER

For an additional amount for "Office of Sergeant at Arms and Doorkeeper", $27,800: *Provided*, That, effective April 1, 1977, the Sergeant at Arms and Doorkeeper may appoint and fix the compensation of a Special Assistant at not to exceed $28,724 per annum in lieu of not to exceed $23,714 per annum; a Chief Clerk at not to exceed $26,219 per annum in lieu of a Clerk at not to exceed $23,714 per annum; an Executive Secretary to the Sergeant at Arms at not to exceed

$26,219 per annum in lieu of an Executive Secretary at not to exceed $23,714 per annum; a Secretary to the Sergeant at Arms at not to exceed $16,199 per annum and a Secretary at not to exceed $14,696 per annum in lieu of two Secretaries at not to exceed $14,699 per annum each; a Secretary for Personnel Administration at not to exceed $20,708 per annum in lieu of a Secretary to the Sergeant at Arms at not to exceed $18,704 per annum; a Secretary to the Administrative Assistant at not to exceed $15,531 per annum and two Assistant Chief Telephone Operators at not to exceed $14,028 per annum each in lieu of three Assistant Chief Telephone Operators at not to exceed $14,028 per annum each; a Secretary to the Special Assistant at not to exceed $12,191 per annum in lieu of a Secretary at not to exceed $11,022 per annum; a Receptionist at not to exceed $12,191 per annum and nineteen Telephone Operators at not to exceed $11,022 per annum each in lieu of twenty-one Telephone Operators at not to exceed $11,022 per annum each; thirteen Messengers at not to exceed $9,686 per annum each in lieu of fourteen Messengers at not to exceed $9,686 per annum each; a Laborer at not to exceed $9,018 per annum in lieu of two Laborers at not to exceed $9,018 per annum each; three Laborers at not to exceed $5,010 per annum each in lieu of five Laborers at not to exceed $5,010 per annum each; a Chief Barber at not to exceed $17,535 per annum in lieu of not to exceed $11,523 per annum; an Assistant Chief Barber at not to exceed $15,865 per annum in lieu of a Chief Barber at not to exceed $12,692 per annum; five Barbers at not to exceed $14,696 per annum each in lieu of two Barbers at not to exceed $11,690 per annum each and three Barbers at not to exceed $9,853 per annum each; two Barber Shop Attendants at not to exceed $10,855 per annum each in lieu of a Barber Shop Attendant at not to exceed $9,686 per annum and a Barber Shop Attendant at not to exceed $4,342 per annum; a Secretary to the Deputy Sergeant at Arms at not to exceed $22,044 per annum; a Driver-Messenger, Deputy President pro tempore, at not to exceed $15,364 per annum; and a Deputy Chief, Police Force, at not to exceed $33,901 per annum.

(118) AGENCY CONTRIBUTIONS AND LONGEVITY COMPENSATION

For an additional amount for "Agency Contributions and Longevity Compensation", $800,000.

(119) OFFICE OF THE LEGISLATIVE COUNSEL OF THE SENATE

For an additional amount for "Office of the Legislative Counsel of the Senate," $5,500.

(120) CONTINGENT EXPENSES OF THE SENATE

(121) SENATE POLICY COMMITTEES

For an additional amount for "Senate Policy Committees," $6,000.

(122) INQUIRIES AND INVESTIGATIONS

For an additional amount for "Inquiries and Investigations," fiscal year 1976, $375,000.

(123) MISCELLANEOUS ITEMS

For an additional amount for "Miscellaneous Items," fiscal year 1976, $650,000.

(124) ADMINISTRATIVE PROVISIONS

(125) SEC. 101. Effective April 1, 1977, the Majority Leader of the Senate and the Minority Leader of the Senate are each authorized to appoint and fix the compensation of not more than two individual consultants, on a temporary or intermittent basis, at a daily rate of compensation not in excess of the per diem equivalent of the highest gross rate of annual compensation which may be paid to employees of a standing committee of the Senate. The provisions of section 8344 of title 5, United States Code, shall not apply to any individual serving in a position under this authority. Expenditures under this authority shall be paid from the contingent fund of the Senate upon vouchers approved by the Majority Leader and the Minority Leader, respectively.

(126) SEC. 102. (a) Effective April 1, 1977, the second sentence of section 105 of the Legislative Branch Appropriations Act, 1976 (89 Stat. 275) is amended by striking out "July 1, 1975" and inserting in lieu thereof "April 1, 1977."

(b) The Majority Leader of the Senate is authorized to fix the compensation of the Secretary for the Majority so long as the position is held by the incumbent holding such position on April 1, 1977.

(127) SEC. 103. Effective on the date of the enactment of this Act, the proviso in the paragraph under the headings "CONTINGENT EXPENSES OF THE SENATE," "MISCELLANEOUS ITEMS" in the Second Supplemental Appropriations Act, 1975 (Public Law 94-32) is amended to read as follows: "Provided, That notwithstanding any other provision of law, the Sergeant at Arms, subject to the approval of the Committee on Rules and Administration, is hereafter authorized to enter into multi-year contracts for data processing equipment, software, and services."

(128) SEC. 104. The second paragraph under the heading "ADMINISTRATIVE PROVISIONS" in the Legislative Branch Appropriation Act, 1959 (72 Stat. 442; 2 U.S.C. 65b), is amended by striking out "during any fiscal year."

(129) SEC. 105. Effective April 1, 1977, section 3(f) under the heading "ADMINISTRATIVE PROVISIONS" in the appropriation for the Senate in the Legislative Branch Appropriation Act, 1975 (2 U.S.C. 59(e)), is amended by striking out "quarterly" in paragraph (5) and inserting in lieu thereof "monthly".

(130) SEC. 106. (a) In accordance with subsection (g) of section 705 of Senate Resolution 4, 95th Congress agreed to February 4 (legislative day, February 1), 1977, each Senator shall, except as otherwise provided in this section, receive each fiscal year an amount equal to three times the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified. Such amount may be used by a Senator only to employ individuals for the purpose of assisting him in connection with his membership on committees of the Senate. Each Senator shall designate the committee with respect to which any individual is so employed to assist him.

(b)(1) In the case of a Senator who is the chairman or ranking minority member of any committee, or of any subcommittee that receives funding to employ staff assistance separately from the funding authority for staff of the full committee, the amount referred to in subsection (a) shall be reduced by the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified, for each such committee or subcommittee.

(2) In the case of a Senator who is authorized by a committee, a subcommittee thereof, or the chairman of a committee or subcommittee, as appropriate, to recommend or approve the appointment to the staff of such committee or subcommittee of one or more individuals for the purpose of assisting such Senator in his duties as a member of such committee or subcommittee, the amount referred to in subsection (a) shall be reduced, for each such committee or subcommittee, by an amount equal to (A) the aggregate annual gross rates of compensation of all staff employees of that committee or subcommittee (i) whose appointment is made, approved, or recommended and (ii) whose continued employment is not disapproved by such Senator, if such employees are employed for the purpose of assisting such Senator in his duties as a member of such committee or subcommittee thereof as the case may be, or (B) the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified, whichever is less.

(3) In the case of a Senator who is serving on more than three committees, one of the committees on which he is serving, as selected by him, shall not be taken into account for purposes of paragraphs (1) and (2). Any such Senator shall notify the Secretary of the Senate of the committee selected by him under this paragraph.

(4) In the case of a Senator who is the chairman or ranking minority member of a subcommittee that receives funding to employ staff assistance separately from the funding authority for the full committee, if the amount of funds made available to him to employ staff assistance is less than the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified, then paragraph (1) shall not apply with respect to such subcommittee during the period March 1, 1977, through September 30, 1977.

(c)(1) An employee appointed under this section shall be designated as such and certified by the Senator who appoints him to the chairman and ranking minority member of the committee designated by such Senator and shall be accorded all privileges of a professional staff member (whether permanent or investigatory) of such committee including access to all committee sessions and files, except that any such committee may restrict access to its sessions to one staff member per Senator at a time and require, if classified material is being handled or discussed, that any staff member possess the appropriate security clearance before being allowed access to such material or to discussion of it.

(2) If (A) a Senator's service on a committee terminates (other than by reason of his ceasing to be a Member of the Senate) or a Senator's status on a committee as the chairman or ranking minority member of such committee or a subcommittee thereof changes, and (B) the appointment of an employee appointed under this section and designated to such committee by such Senator would (but for this paragraph) thereby terminate, such employee shall, subject to the provisions of subsection (e), be continued as an employee appointed by such Senator under this section until whichever of the following first occurs: (1) the close of the tenth day following the day on which such Senator's service on such committee terminates or his status on such committee changes or (2) the effective date on which such Senator notifies the Secretary of the Senate, in writing, that such employee is no longer to be continued as an employee appointed under this section. An employee whose appointment is continued under this paragraph shall perform such duties as the Senator who appointed him may assign.

(d) An employee appointed under this section shall not receive compensation in excess of that provided for an employee under section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified.

(e) The aggregate of payments of gross compensation made to employees under this section during each fiscal year shall not exceed at any time during such fiscal year one-twelfth of the total amount to which the Senator is entitled under this section (after application of the reductions required under subsection (b)) multiplied by the number of months (counting a fraction of a month as a month) elapsing from the first month in that fiscal year in which the Senator holds the office of Senator through the end of the current month for which the payment of gross compensation is to be made. In any fiscal year in which a Senator does not hold the office of Senator at least part of each month of that year, the aggregate amount

available for gross compensation of employees under this section shall be the total amount to which the Senator is entitled under this section (after application of the reductions required under subsection (b)) divided by twelve, and multiplied by the number of months the Senator holds such office during that fiscal year, counting any fraction of a month as a full month.

(f) Section 108 of the Legislative Branch Appropriation Act, 1976 (2 U.S.C. 72a-1c), is repealed.

(g)(1) This section shall take effect on March 1, 1977.

(2) Any designation, or change of designation, made by a Senator before the date of the enactment of this Act under section 705 of Senate Resolution 4, 95th Congress, agreed to February 4 (legislative day, February 1), 1977, shall be treated as a designation or change made under this section.

(3) The amount of any accrued surplus available to any Senator under section 108 of the Legislative Branch Appropriation Act, 1976, at the close of February 28, 1977, shall be available to that Senator during the period beginning on March 1, 1977, and ending on September 30, 1977, for the purpose of this section.

(4) The aggregate amount available to a Senator for gross compensation of employees appointed under this section during the period beginning on March 1, 1977, and ending on September 30, 1977 (other than any amount available under pargaraph (3)), shall be seven-twelfths of the total amount to which the Senator is entitled under this section (after application of the reductions required by subsection (b)) for the fiscal year ending on September 30, 1977.

(131 SEC. 107. (a) Section 106 of the Legislative Branch Appropriation Act, 1977, is amended to read as follows:

"SEC. 106. (a) There is hereby established in the Treasury of the United States a revolving fund within the contingent fund of the Senate to be known as the Senate Barber Shops Revolving Fund (hereafter in this section referred to as the 'revolving fund').

"(b) All moneys received by the Senate barber shops from fees for services or from any other source shall be deposited to the credit of the revolving fund. Moneys in the revolving fund shall be available without fiscal year limitation for disbursement by the Secretary of the Senate for necessary supplies and expenses of the Senate barber shops.

"(c) On or before December 31 of each year, the Secretary of the Senate shall withdraw from the revolving fund and deposit in the Treasury of the United States as miscellaneous receipts all moneys in excess of $10,000 in the revolving fund at the close of the preceding fiscal year.

"(d) Disbursements from the revolving fund shall be made upon vouchers signed by the Sergeant at Arms and Doorkeeper of the Senate.

"(e) The Sergeant at Arms and Doorkeeper of the Senate is authorized to prescribe such regulations as may be necessary to carry out the provisions of this section.".

(b) The amendment made by subsection (a) shall take effect on April 1, 1977.

(132) SEC. 108. Hereafter, the Secretary of the Senate is authorized to make such transfers between appropriations or funds available for disbursement by him for a fiscal year as may be approved by a resolution of the Senate (reported by the Committee on Appropriations of the Senate), and, to the extent necessary, to reimburse, out of funds thereafter made available for disbursement by him for such fiscal year, any appropriation or fund for any amount so transferred from it.

(133) SEC. 109. Any fund appropriated under the heading "Senate" in any appropriation Act for the fiscal year ending September 30, 1977, shall remain available for obligation through September 30, 1978, for the same purposes for which appropriated.

(134) SEC. 110. (a) Notwithstanding any other provision of law, but subject to the provisions of subsection (b), the Committee on Government Affairs is authorized, effective April 1, 1977, and during the remainder of the fiscal year ending September 30, 1977, to pay one additional staff member at a per annum rate not to exceed the rate provided for the two staff members referred to in section 105(e)(3)(A) of the Legislative Branch Appropriation Act, 1968, as amended and modified

(b) The provisions of subsection (a) shall cease to be effective when and if the individual who was transferred from the staff of the Committee on the District of Columbia to the staff of the Committee on Governmental Affairs under section 703 of Senate Resolution 4, 95th Congress, and who was paid by the Committee on the District of Columbia at the per annum rate referred to in subsection (a), ceases to be a member of the staff of the Committee on Governmental Affairs, or of a subcommittee thereof, and paid at such rate.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendments of the Senate numbered 102 through 134 inclusive and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 138: Page 57, line 8, insert: "including rental of space in the District of Columbia,".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 138 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 140: Page 57, line 11, insert:

ARCHITECT OF THE CAPITOL

OFFICE OF THE ARCHITECT OF THE CAPITOL

For an additional amount for "contingent expenses", $90,000.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 140 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 141: Page 57, line 16, insert: GENERAL PROVISIONS

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 141 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 142: Page 57, line 17, insert:

SEC. 111. Notwithstanding any other provision of law, the Secretary of the Senate is authorized to receive moneys from the Department of the Treasury as reimbursements for salaries paid by the United States Senate in connection with certain officers and members of the United States Capitol Police serving as instructors at the Federal Law Enforcement Training Center. Moneys so received shall be deposited in the Treasury of the United States as miscellaneous receipts.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 142 and concur therein.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 143: Page 58, line 4, insert:

SEC. 112. The provisions of section 1824 of the Record Statutes of the United States, as amended (40 U.S.C. 210), are amended by deleting "at a cost not to exceed twenty dollars per man,".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 143 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 144: Page 58, line 8, insert:

SEC. 113. The Chairman of the Capitol Police Board is authorized, subject to such conditions as he may impose, to authorize the assignment of a police motor vehicle for use by instructor personnel of the Capitol Police Force while assigned to the Federal Law Enforcement Training Center.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to amendment of the Senate numbered 144 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 151: Page 56, line 8, insert:

DROUGHT EMERGENCY ASSISTANCE

For necessary expenses for activities to mitigate the impact of the 1976-1977 drought $100,000,000: *Provided*, That this appropriation shall be available only upon enactment into law of authorizing legislation.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 151 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 154: Page 60, line 18, insert:

Appropriations made to the Bureau of Reclamation for fiscal year 1977 shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed $75,000.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 154 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 155: Page 60, line 22, insert:

Appropriations made to the Bureau of Reclamation, Southeastern Power Administration, Southwestern Power Administration, and Alaska Power Administration for fiscal year 1977 shall be available for hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone services in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 155 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 173: Page 68, line 1, insert:

OFFICE OF SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

SALARIES AND EXPENSES

For an additional amount for "Salaries and expenses," $413,500: *Provided*, That not to exceed $7,500 shall be available for official reception and representation expenses.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 173 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

OFFICE OF SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

SALARIES AND EXPENSES

For an additional amount for "Salaries and expenses," $266,000: *Provided*, That not to exceed $3,800 shall be available for official reception and representation expenses.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 176: Page 69, line 9, insert:

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

TRAFFIC AND HIGHWAY SAFETY

For an additional amount for "Traffic and Highway Safety", $3,000,000, to remain available until expended.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 176 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 184: Page 72, line 6, insert:

OFFICIAL RESIDENCE OF THE VICE PRESIDENT

OPERATING EXPENSES

For an additional amount for "Operating expenses", $30,000: Provided. That $30,000 shall be made available for official entertainment expenses of the Vice President, to be accounted for solely on his certificate.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 184 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 186: Page 72, line 19, strike out: "$100,000" and insert: "$241,000."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 186 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 187: Page 73, line 4, insert: "*Provided*, That the Director may place a total of five (5) positions, in GS–16, 17, and 18 and that such positions are in addition to total number of positions authorized to be placed in such grades by section 5108 of title 5."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 187 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 190: Page 76, line 19, insert:

NATIONAL COMMISSION ON ELECTRONIC FUND TRANSFERS

SALARIES AND EXPENSES

Of the amount provided under this head in the "Treasury, Postal Service, and General Government Appropriation Act, 1977", $135,000 shall be available for expenses of travel, notwithstanding the provisions of section 501 of the Act.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 190 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

Mr. MAHON. Mr. Speaker, inasmuch as amendments Nos. 196 through 202 relate solely to housekeeping operations of the other body in which, by practice, the House concurs without intervention, I ask unanimous consent that Senate amendments Nos. 196 through 202 be considered as read, printed in the RECORD, and that they be considered en bloc.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The amendments are as follows:

SENATE

"Salaries, officers and employees", $5,395,800;

"Office of the Legislative Counsel of the Senate", $30,600;

"Senate policy committees", $85,600;

"Inquiries and investigations", $924,300;

"Folding documents", $4,500;

"Miscellaneous items", $4,000;

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendments of the Senate numbered 196 through 202 inclusive and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 211: Page 90, line 17, strike out "$173,030,000" and insert "$174,430,000".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 211 and concur therein with an amendment, as follows: In

lieu of the sum proposed, insert "$167,680,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the last amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 216: Page 91, line 1, insert: "and, in addition, $15,000,000 of funds heretofore made available in fiscal year 1977 only for the Civilian Health and Medical Program of the Uniformed Services shall be available without regard to that limitation;".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 216 and concur therein.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and on the several motions was laid on the table.

DIRECTING CLERK TO MAKE CORRECTIONS IN ENROLLMENT OF H.R. 4877, MAKING SUPPLEMENTAL APPROPRIATIONS FOR FISCAL YEAR ENDING SEPTEMBER 30, 1977

Mr. MAHON. Mr. Speaker, I send to the desk a concurrent resolution (H. Con. Res. 198) providing that the Clerk of the House of Representatives be directed to make certain corrections in the enrollment of H.R. 4877, making supplemental appropriations for the fiscal year ending September 30, 1977, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 198

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H.R. 4877), making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes, the Clerk of the House of Representatives shall make the following corrections:

In Title I, Chapter VII, under the heading "Assistant Secretary for Human Development", strike out "202" and insert in lieu thereof "203".

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MAHON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the bill (H.R. 4877), and that I may include extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. RHODES asked and was given permission to address the House for 1 minute.)

Mr. RHODES. Mr. Speaker, the Speaker was correct in inquiring whether the gentleman from Arizona wished recognition.

Mr. Speaker, I have asked for this time for the purpose of requesting the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT) as to the program for the rest of the week and for next week, if the gentleman is prepared to give it.

Mr. WRIGHT. Mr. Speaker, will the distinguished minority leader yield?

Mr. RHODES. I yield to the distinguished majority leader, the gentleman from Texas.

Mr. WRIGHT. Mr. Speaker, the program for the remainder of this week is that for the rest of today the House would consider the rule and the general debate on the bill (H.R. 5970), the Department of Defense Authorization Act for the fiscal year 1978. At the conclusion of general debate, the House would adjourn.

Tomorrow, Friday, the House would come in at 11 o'clock and hope to conclude action on H.R. 5970 in time to adjourn by 3 p.m.

Mr. RHODES. Mr. Speaker, that was a rather tentative hope. Is the majority leader telling the House that we intend to finish the bill tomorrow, no matter how late we might be?

Mr. WRIGHT. Mr. Speaker, if the distinguished minority leader will yield further, it is planned to come in at 11 o'clock and to finish the bill by 3 o'clock and adjourn by 3 o'clock. That is the plan.

Mr. RHODES. Mr. Speaker, I wish the gentleman luck.

Mr. WRIGHT. Mr. Speaker, I thank the gentleman. Will the gentleman yield further?

Mr. RHODES. Yes. I yield.

Mr. WRIGHT. Mr. Speaker, while I am not prepared at the moment to give the gentleman a complete and final accounting of all those measures scheduled for next week, I should simply say that on Monday it is planned that we would meet at noon and that there would be a number of suspensions—I am not prepared at this time to say how many, but there should be at least three and quite possibly more—and that votes on those suspensions would be postponed until the end of all suspensions.

On Tuesday, the House would meet at noon and would take up House Concurrent Resolution 195, the first budget resolution for fiscal year 1978.

As the gentleman knows, the rules of the House permit a 10-hour debate, although it would not be expected that all of that time would be consumed. It would be expected, however, that the action could not be completed on that bill on Tuesday, and that it would go over until Wednesday, at which time the House would meet at 3 p.m. and hope to complete consideration of House Concurrent Resolution 195.

On Thursday and the balance of the week, the House would meet at 11 a.m. The business would consist of H.R. 2, Surface Mining Control and Reclamation Act, subject to a rule being granted.

Mr. RHODES. Will the majority leader clarify whether or not on Tuesday, if the general debate is completed early in the day, that we could proceed immediately to amendments, or will amendments be offered on Wednesday?

Mr. WRIGHT. The present plan is that upon completion of general debate on Tuesday, unless the hour of adjournment has been reached, the House would proceed to consideration of the bill under the 5-minute rule.

Mr. RHODES. So that there could be amendments offered and disposed of on Tuesday?

Mr. WRIGHT. That is correct. Of course, the House would adjourn by 3 p.m. on Friday and by 5:30 p.m. on all other days except Wednesday Conference reports could be brought up at any time, and any further program will be announced later.

I would suggest to the gentleman from Arizona that with respect to the plans heretofore discussed regarding Monday, at least three suspensions have been scheduled. One is H.R. 2210, to name a certain building the "Gerald R. Ford Building"; then, a joint resolution to designate "National Space Week"; followed by H.R. 5675, authorization for investment of public monies.

There may be additional bills scheduled for suspension.

Mr. RHODES. I thank the gentleman.

APPOINTMENT AS MEMBERS OF AD HOC COMMITTEE ON ENERGY

The SPEAKER. Pursuant to the provisions of House Resolution 508, 95th Congress, the Chair appoints as members of the Ad Hoc Committee on Energy the following Members of the House: the gentleman from Ohio (Mr. ASHLEY), chairman; the gentleman from Missouri (Mr. BOLLING); the gentleman from West Virginia (Mr. STAGGERS); the gentleman from California (Mr. MOSS); the gentleman from Wisconsin (Mr. REUSS); the gentleman from Ohio (Mr. VANIK); the gentleman from Florida (Mr. ROGERS); the gentleman from Michigan (Mr. DINGELL); the gentleman from Oregon (Mr. ULLMAN); the gentleman from Texas (Mr. YOUNG); the gentleman from Illinois (Mr. ROSTENKOWSKI); the gentleman from California (Mr. CORMAN); the gentleman from Arizona (Mr. UDALL); the gentleman from Louisiana (Mr. WAGGONNER); the gentleman from New York (Mr. BINGHAM); the gentleman from Washington (Mr. FOLEY); the gentleman from Texas (Mr. ECKHARDT); the gentleman from Washington (Mr. MCCORMACK); the gentleman from New York (Mr. RANGEL); the gentleman from Texas (Mr. CHARLES WILSON); the gentleman from Virginia (Mr. FISHER); the gentleman from Connecticut (Mr. MOFFETT); the gentleman from Indiana (Mr. SHARP); the gentleman from Massachusetts (Mr. TSONGAS); the gentlewoman

from Maryland (Ms. MIKULSKI); the gentleman from Illinois (Mr. ANDERSON); the gentleman from Ohio (Mr. BROWN); the gentleman from New York (Mr. HORTON); the gentleman from New York (Mr. WYDLER); the gentleman from Michigan (Mr. BROWN); the gentleman from Wisconsin (Mr. STEIGER); the gentleman from Texas (Mr. COLLINS); the gentleman from Texas (Mr. ARCHER); the gentleman from North Carolina (Mr. MARTIN); the gentleman from California (Mr. MOORHEAD); the gentleman from Oklahoma (Mr. EDWARDS); and the gentleman from Maryland (Mr. STEERS).

DEPARTMENT OF DEFENSE AUTHORIZATION FOR FISCAL YEAR 1978

Mr. PEPPER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 492 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 492

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5970) to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense and to authorize the military training student loads, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Forces, the bill shall be read for amendment under the five-minute rule by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Florida (Mr. PEPPER) is recognized for 1 hour.

Mr. PEPPER. Mr. Speaker, I yield 30 minutes to the able gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 492 provides for the consideration of H.R. 5970, Department of Defense authorization for fiscal year 1978. This is an open rule providing 2 hours of debate and providing that the bill shall be read for amendment by titles instead of by sections.

H.R. 5970 would authorize appropriations during fiscal year 1978 for major weapons-systems procurement, research and development, et cetera, and civil defense; it would authorize personnel strength for active-duty components and for the Selective Reserve components of the respective armed services for fiscal year 1978, as well as annual active-duty military training student loads for each of the active and Reserve components of the armed services for this fiscal year; it would authorize the personnel strengths for the Department of Defense for fiscal year 1978 and would impose certain other requirements and limitations with respect to procurement and personnel actions.

The total authorization in the bill is for $35.9 billion which is $60.70 million above the amount requested by the President. The legislation includes $24.8 billion for major weapons procurement, $10.9 billion for research and development, tests, and evaluation—R.D.T. & E.—and $134.8 million for civil defense.

The Committee on Armed Services' report on this bill clearly indicates that the authorizations provide the minimum the committee deems necessary to maintain the level of defense capability needed now and in the next decade. Comparative tables in the report show clearly that the Soviets have a substantial quantitative advantage over us in most key military systems and the trend indicates the Soviet advantage is increasing.

During consideration of the bill in the Committee on Rules, Members expressed grave concerns regarding the adequacy of the authorizations. This legislation is being considered at a time when the President's first initiatives for a follow-up SALT Agreement have been unsuccessful. The Interim Offensive Agreement, signed along with the ABM treaty of 1972, expires in October of this year. We all hope a new arms limitation agreement can be negotiated. But, in its absence, the Congress must assure that our national security is protected.

I understand some amendments will be offered to the bill pertaining to our priorities of U.S. defense spending. Since this is a 2-hour open rule, all germane amendments would be in order. Therefore, Mr. Speaker, I urge my colleagues to adopt House Resolution 492 so that we may proceed to the consideration of H.R. 5970.

Mr. Speaker, I ask unanimous consent to strike the word "Forces", on line 5, page 2 of the resolution and substitute therefor the word, "Services." That resulted simply from an error in the printing, and it should be corrected.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the terms of this 2-hour open rule have already been explained by the gentleman from Florida (Mr. PEPPER) permitting consideration of this bill, H.R. 5970, the Department of Defense authorization bill for fiscal year 1978. It is to be read by titles instead of by sections.

This legislation authorizes a total of $35,913,976,000 for the upcoming fiscal year for major weapons systems procurement; research, development, test and evaluation; and civil defense. This figure is approximately $2.5 billion less than the Ford administration request, which in my opinion was dangerously low and it is only $60.8 million above the Carter administration's revised request.

Mr. Speaker, I urge my colleagues in the House tonight, if they have not already done so, after they have listened to the general debate and before we get to the amending process, to take a look at the committee report on this bill.

When the bill was before the Committee on Rules, I took the time to start reading it, and I must say that I was horrified at the insufficiency of this defense authorization bill.

At a time when obviously the Soviet Union has hardened its position on SALT talks and at a time when we need to maintain a strong defense posture, this bill does not do the job. I urge the Members to look at the graph that shows the comparison between our military inventory and that of the U.S.S.R. In every area we are inferior to the Soviet Union, with the exception of numbers of helicopters and strategic bombers.

Mr. Speaker, we take great pride in saying that we maintain the number 1 military position in the world, but I think the truth of the matter is that we have slipped to No. 2. This bill will take us further down the road to having an inferior military position.

We cannot build a navy or an air force in 1 year, and this bill is insufficient. For instance, it calls only for 12 combatant ships. One of the Continental Congresses authorized 9 combatant ships. Two hundred years later we are not building a navy that would be as strong by comparison as the one they had at the beginning of this country.

Mr. Speaker, I will not prolong my statement about this particular bill, because I am going to listen to the debate and I am going to participate in it. But I am really worried that it is not adequate, and I fear that we have cut the military into the bone.

When we have a military force that has a naval fleet that has slipped from 1,000 ships in 1967 to only 470 now, with only 240 combatants, while the Russian navy has 485 combatant ships, it is obvious that our Navy is becoming an inferior navy.

Mr. Speaker, I certainly cannot object to the rule. I urge its adoption. I hope, however, that my colleagues here on the floor and those who will be here will listen to the general debate, will wake up, and will realize that we are entering into an extremely dangerous position as far as our military forces are concerned.

Mr. PEPPER. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. BENNETT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5970) to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe

the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Florida (Mr. BENNETT).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 5970, with Mr. ROSTENKOWSKI in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Florida (Mr. BENNETT) will be recognized for 1 hour, and the gentleman from California (Mr. BOB WILSON) will be recognized for 1 hour.

The Chair recognizes the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, by direction of the Committee on Armed Services, I bring to the House today H.R. 5970, the fiscal year 1978 Defense appropriation authorization bill. This bill provides $35.9 billion in authorization for procurement of major weapons systems, plus all military research, development, test and evaluation—R.D.T. & E.—and civil defense in the fiscal year which begins October 1, 1977. This is the first year that civil defense appropriations have been subject to prior authorization. The bill authorizes the active and reserve personnel strengths of the military services, as well as the civilian strength of the Department of Defense, and sets the level of student training for the active and reserve components for fiscal year 1978. Finally, in its general provisions, the bill carries a number of important requirements and limitations covering the operation of the Department of Defense.

The bill as approved by the committee is $60.8 million above the request submitted by President Carter in the revised budget of February 22 and $2.5 billion below the budget as originally submitted on January 17.

A year ago you approved a committee authorization bill that began reversing the downward trend of military purchasing power that had been going on for some years. We told you at the time that the effort would have to be sustained over a period of years if we are to halt the frightening trend toward military superiority for the Soviets a decade hence. We believe this year's bill will continue to provide for some growth beyond inflation in the investment areas of the defense budget. Personally, I would have liked to see a greater effort for our defense than the bill provides but the committee believed that this measure was all that could receive funding this year.

The committee approved the bill by a vote of 35 to 2.

Mr. Chairman, the committee report on this legislation is available to all Members of the House (House Report No. 95–194). Its 160 pages, I believe, represent one of the most comprehensive reports ever issued by the Armed Services Committee. I will not, therefore, take extensive time today to discuss all of the many programs approved by the committee. Let me just highlight some major differences between the committee bill, H.R. 5970, and the proposal submitted by the present administration in its budget amendments of February 22 in the four principal areas of procurement, R.D.T. & E., personnel and civil defense.

As to ship procurement the committee added $609.3 million in some areas of ship construction and reduced $654 million in other areas for a net reduction of $45.6 million in the authorization for shipbuilding. The additions were for combatant ships with the reductions directed to auxiliary craft.

In aircraft procurement the committee:

Added 20 C–12 aircraft for the Army in the amount of $17.2 million;

Reduced the Navy aircraft procurement by a net $3.8 million. This resulted from an addition of $24.4 million for 6 A–7E aircraft and a reduction of $28.2 million, deleting procurement of 22 CTX utility aircraft.

Added $672.4 million for Air Force aircraft. This included increases of $334 million for 30 F–15 aircraft, $276.6 million for 6 advanced tanker cargo aircraft—ATCA—and $124 million for 16 C–130H aircraft, and a reduction of $62.2 million in the F–16 program.

In the fields of research, development, test, and evaluation, the committee made various reductions totaling $1.154 billion but added $377 million for a special fund to be used by the Director of Defense Research and Engineering to support two joint-service programs. The net committee reduction in the administration's R.D.T. & E. request, therefore, was $776.7 million.

In the special fund we specifically directed the Director of Defense Research and Engineering to closely coordinate the cruise-missile programs of the Air Force and the Navy and the guided-projectile programs of the Navy and Army. The committee believes that through joint development the taxpayers will realize a significant savings without sacrificing weapon-system performance.

While the committee concurs with the Department of Defense on the need for most of the major weapons systems under development, we believe that the services and the Office of the Director of Defense Research and Engineering can do a better job of managing the R.D.T. & E. program. Our committee report highlights some areas where improvements can be made. The committee's emphasis was on increasing efficiency in R. & D. spending and getting earlier return in new weapon systems from our R. & D. effort.

Our distinguished colleague, the gentleman from Missouri (Mr. ICHORD) will discuss these R. & D. changes more fully. As to personnel, this committee has rejected a proposed reduction of 41,600 paid drill spaces in the Naval Reserve. A proposal for a similar reduction was rejected by the Congress last year as unwarranted.

It is still unwarranted.

Civilian personnel end-strengths were increased by 3,598 to provide the personnel to support the continuation of the Uniformed Services University of the Health Sciences; to support the current level of medical capability in the Army; and to provide added spaces for the naval air rework facilities—NARF's.

The personnel strengths recommended for the active forces differ only slightly from the new administration's recommendations. The differences result from the committee's rejection of the administration's proposal to close the Uniformed Services University of the Health Sciences; rejection of the aforementioned 41,600 cut in the Naval Reserve, requiring reallocation of 904 active-duty personnel to support reservists' training; and rejection of a proposed reduction of 425 Army medical personnel.

With the changes made by the committee, the authorized strength of the Department of Defense would be as follows:

Active-duty personnel: 2,090,425.

Reserve personnel: 875,500.

Civilian personnel: 1,034,328.

These strengths are about the same as authorized for fiscal year 1977.

The committee has also proposed new recruiting incentives for the Reserve Forces in the form of educational assistance and a reenlistment bonus.

To provide greater flexibility in the management of civilian personnel, the committee has recommended that the Secretary of Defense be authorized to exceed the civilian personnel end-strengths by up to 1½ percent if he finds it is in the national interest to do so. In prior years this authority has been limited to one-half of 1 percent. This additional flexibility was provided to avoid possible inefficiencies caused by manpower ceilings.

The distinguished chairman of the Personnel Subcommittee (Mr. WHITE) will provide more detailed discussion of the committee's action with regard to personnel programs.

In civil defense, the committee has for some time been concerned with the inadequacy of our planning for civil defense. Last year, to improve oversight in this area, the Congress extended the authorization requirement to civil defense. The committee has, following the recommendation of our Installations and Facilities Subcommittee, increased the authorization for civil defense by $44.8 million over the $90 million requested by the President. Much of the increase is designed to correct deficiencies uncovered by the General Accounting Office in the emergency operational center program. These centers are vital to an effective system of emergency activities during both military attacks or peacetime disasters, such as floods, storms, et cetera.

The bill provides authority for the initial fiscal year 1978 civil reserve air fleet—CRAF—program, as requested by the President and the Secretary of Defense. The committee expects to take early action on enabling legislation (H.R.

2637) which will provide effective guidelines for a comprehensive CRAF expansion program in the years ahead and will establish effective procedures for the annual review by the Congress.

Under the general provisions the committee has included an extension of the financial-assistance program for the Marine Corps platoon leaders officer candidates, has extended the authority for credit sales to Israel, and has asked for a comprehensive report on Defense Department criteria with regard to employment of private contractors. The bill language prevents expansion of contracting-out activities pending receipt of the report.

Our committee conducted unusually thorough hearings, commencing in January. After the new administration's budget amendments of February 22, we conducted further hearings, considering changes proposed by the President. In all, consideration included 28 full committee and 72 subcommittee meetings.

Our committee has considered carefully the demonstrated Soviet advances in strategic systems and naval power as well as modernization of conventional air and ground forces. We have considered the analysis of non-Defense Department experts who tell us the military balance is shifting steadily in favor of the Soviet Union.

I know of no responsible official who disagrees with the finding that there has been a massive buildup in Soviet nuclear and conventional armament. In our report you will find tables illustrating comparative inventories of major military equipment, the increases over a 10-year period, and the production ratios for the Soviet Union and the United States. These tables show clearly that the Soviets have a substantial quantitative advantage over us in most key military systems and that the trend is such that their advantage is increasing. I know of no informed defense observer who disputes those facts.

The President's first initiatives for a follow-on SALT agreement have been unsuccessful. The Interim offensive Agreement, signed along with the ABM treaty of 1972, expires in October of this year. We all hope a new arms-limitation agreement can be reached. But in its absence we have to assure that our national security is protected.

H.R. 5970 is based on actual requirements in the real world. It is not based on some arbitrary figure related to what we would like to spend in other budgetary areas. National defense is not in competition with social programs. The Constitution says we shall "promote the general welfare and provide for the common defense." It does not say we should do one or the other.

Our committee believes this bill is necessary to provide the minimum level of deterrence today and to start building the needed level of deterrence for the decade ahead.

I urge all Members of the House to support the bill.

If any amendments to this bill are offered, I hope they will be for needed items, not reductions because, frankly, I personally feel this bill does not provide all that it should. It is all we felt we could bring forth with the complexities of the budget situation we have today. But it was a grave distortion of reality, in my opinion, when the Congress struck the nuclear carrier and the *Long Beach* strike cruiser in their actions on Presidential rescissions. So we are not in as strong a position as I think we should be. But this bill will to a modest degree go forward to help us and to put us in the direction, at least, that we should be going. So let us pass it promptly.

Mr. BOB WILSON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, our distinguished acting chairman, has already explained the highlights of H.R. 5970—this year's Defense authorization bill. The chairmen and ranking minority members of the various subcommittees will go into specific aspects of the bill over which they have jurisdiction. For this reason, I will devote my time to other reasons why the bill should be supported.

Before the general debate on this bill begins, I believe these general observations are in order.

First, the purpose of H.R. 5970 is to authorize appropriations for the tools of defense—aircraft, tanks, ships, ammunition, and weapons. The bill also deals with research and development into technologies which will affect our military posture in the years ahead.

As an authorization bill, H.R. 5970 does not provide new budget authority. It provides no new obligational authority or spending authority. This bill does not, in any way, affect any budget target or budget resolution under the Congressional Budget Act of 1974. New budget authority and obligational authority will be provided in appropriations acts which may be amended, or voted up or down.

As an authorization bill, this legislation would merely set the upper limits for appropriations during fiscal year 1978.

Second, H.R. 5970 would authorize less than one-third of the national defense budget request for fiscal year 1978. The remaining two-thirds, except for $3.6 billion in military construction, is not subject to the authorization process.

The President's request for the items covered in this bill for fiscal year 1978 is 4½-percent larger than last year's request. General inflation has been running between 6 and 7 percent. So, as far as the current request is concerned, it represents a retrenchment in this area. The committee recommendation, as contained in the bill, is only 0.17 percent above the President's request. In view of the needs of the Armed Forces and the rate of inflation, the committee exercised exceptional restraint.

While I wish it were otherwise, neither this bill nor the appropriation act which will follow will provide an instant improvement in the capabilities of the Armed Forces. No funds will be available until October of this year and contracts will not be let until next year. Even then, we will not see the first major items enter the defense inventory before 1 to 5 years have passed. While the wheels of defense budgeting do not always grind "exceedingly fine," they nevertheless grind "exceedingly slow." This, of course, illustrates the long-term nature of defense programs.

Tanks and aircraft conceived and developed 10 years ago, and authorized this year, may well be in our inventory in the year 2000. Ships authorized this year may be in the Navy's inventory 30 years from now. So, in a very real sense, in passing this authorization bill we are making an investment in our future defense.

H.R. 5970 would provide for an increment of our future defense investment, but the changes made by the Armed Services Committee also provide for correcting some of the deficiencies and weaknesses which now exist in the Armed Forces. The committee's oversight activities have revealed several alarming areas which need to be strengthened in the near future.

For example, the Army is deficient in tanks and other armored vehicles, and is short of ammunition.

The Air Force is deficient in combat aircraft.

The Navy is deficient in combatant vessels, and the existing surface fleet urgently requires more effective weapons and sensors.

These glaring deficiencies must be remedied over a relatively short time if we are to prevent further deterioration in the capability and readiness of the Armed Forces. This was the basic reasoning behind the several changes which the committee made in the budget request. These changes boil down to the redirection of funds from R. & D. programs toward the procurement of aircraft, missiles, combat vehicles, and other items of higher priority. While it is true that R. & D. is essential to future capabilities, it is more important that our present forces be augmented and modernized.

The committee is mindful of the fact that any hostilities involving the ground, air, and naval forces of the United States must be met with the forces in being at the time. We will probably not again have the luxury of a long period of mobilization.

The bill as reported by the committee is more balanced and reflects future defense requirements more accurately than the program requested.

As the committee's report on H.R. 5970 points out, this year's shipbuilding request was particularly out of balance. The request was too heavy on the side of auxiliary ships, such as oilers and tug boats, and too light on the side of new combatant ships.

For example, only one attack submarine was proposed for authorization in fiscal years 1978 and 1979. This is a serious departure from the established building rate of five of these submarines every 2 years and is hardly enough to retain the interest of shipbuilders and their vendors. In addition to increasing costs, the construction of only one attack submarine a year can only aggravate the naval balance between the United States and Soviet Navies. The Soviets now have 254 attack submarines to our 75 and are turning them out at five per year. We received

no rationale for reducing the submarine building rate and, therefore, recommend authorization of two ships this year and long lead items for three next year.

Another instance of imbalance in the shipbuilding request this year was the absence of a request for a major nuclear-powered surface combatant. As Chairman BENNETT of the Seapower Subcommittee will explain, we are recommending long-leadtime funds to begin a nuclear-powered strike cruiser. This ship has been requested and approved by the House without serious opposition for the past 2 years. Although Admiral Holloway, the Chief of Naval Operations, requested the strike cruiser again this year and made a compelling case before our committee demonstrating the need for this ship, it was not included in the request. We understand that the ship was deleted from the revised budget only for fiscal reasons.

The committee bill would restore this highly capable ship while actually reducing the shipbuilding authorization by $45.6 million. The "fiscal reasons" no longer exist.

While I support H.R. 5970 and the committee's recommendations, I must also express my regret that this year's bill does not go far enough.

First, the number of combatant ships to be authorized by the bill will not replace those which must be retired due to old age. The number of ships is too small to reverse the Navy's downward trend.

Second, the bill contains no funds for conversion of the U.S.S. *Long Beach* to an Aegis fleet air defense ship. This omission guarantees that the *Long Beach* will fade away into obsolescence rather than becoming a highly effective unit within a nuclear-powered task force.

Third, the bill contains no funds for a follow-on *Nimitz* class aircraft carrier. The need for at least one additional *Nimitz* type carrier has been supported by:

A National Security Council study;

A recent GAO study;

A DOD study in 1975;

The Joint Chiefs of Staff; and by every military witness who appeared before the committee on the subject.

While I do not want to labor the point, I honesty believe that the Congress did itself and the country a great disservice when we scuttled the *Nimitz* carrier and *Long Beach* program earlier this year. In the case of the carrier, we gave up a proven weapon system of great capability in exchange for a mere promise of some future request for a ship which, as of this moment, is not even in the conceptual stage. We also gave up our superior sea-based air capability for the promise of an as yet unconceived V/STOL airplane.

The so-called oil-fired "mini carrier" and high performance V/STOL aircraft have been referred to as "a paper ship with paper airplanes." This is an overstatement—these systems and their tremendous costs are not even on paper and barely exist within the imaginations of the budgeteers and systems analysts. The Congress has made a bad bargain.

Each year, at this time, we hear arguments to the effect that we do not really need to spend so much for defense. There are always arguments that we can get as much or more defense "on the cheap" by building smaller, less capable and, in some cases, fewer aircraft, tanks, and ships. Some argue that the tremendous Soviet buildings of nuclear and conventional weapons of all types should cause us no concern.

I am in favor of optimism when there is some factual basis for it. But I see no such basis today. The news from around the world does not supply a basis for optimism. What I have been reading about the SALT talks, about Angola, Zaire, Ethiopia, Somalia, and our relations with Argentina, Brazil, Spain, West Germany, and the Philippines, gives me no reason for optimism. Neither does the most recent revelation that the world's oil is fast running out, and that the price of oil may well triple within the next 8 years, provide any basis for building additional oil-fired carriers and other major combatant ships. On the other hand, reason seems to be on the side of a more capable defense, including ships which are not dependent on oil.

Mr. Chairman, we sorely need a national defense policy. We have not had either a defense policy or a seapower policy for many years. Our national purpose is unclear—a fact which is reflected by annual defense budget requests which apparently bend with the winds of the times. If our policy is to be that we accept a military posture inferior to the Soviet Union, let us announce it. If it is the acceptance of a "rough equivalence" with the Soviets, and the acceptance of higher risks, then let us announce that. If the policy is to be U.S. military strength second to none, then let us get on with the job. The people are waiting for the answer, as are the governments of friendly and unfriendly nations throughout the world.

In conclusion, Mr. Chairman, I believe that H.R. 5970 is a sound bill which addresses priorities in their proper order. We have given the President practically everything he requested within a few one-hundredths of one percent. While I would have preferred a stronger naval shipbuilding program, I urge the adoption of the bill as reported.

Mr. BENNETT. Mr. Chairman. I yield such time as he may consume to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, I rise in support of H.R. 5970. Since various members of the committee have already addressed other areas of the bill in detail, I would like to direct my remarks to an overview of Army programs.

This bill authorizes $5.3 billion for procurement of Army weapons systems and for research and development of new weapons for the future. Now, to those who perceive the Army as an assortment of footsoldiers slogging around in the mud, I am sure that figure would appear to be more than adequate. But the truth of the matter is that it is dangerously close to being inadequate. In a mechanized war in the NATO environment, light infantry—that is, footsoldiers slogging around in the mud—will be only slightly more relevant than horse cavalry.

During the course of the committee hearings, as witness after witness testified about deficiencies in the Army's readiness posture, we became increasingly concerned about the adequacy of the Army request. The Army will receive less than 15 percent of the funds authorized in this bill, although it would be expected to bear the brunt of a Warsaw Pact attack on NATO. Next year we are going to have to take a hard look at that funding pattern in the light of changing realities because the Army has fallen into a dangerous habit of underselling its requirements and overselling its compliance.

There was a time in the not-too-distant past when the United States overwhelming nuclear superiority was a gilt-edged guarantee for NATO. We could afford to neglect our conventional land forces in Europe, because the Soviet Union could not dare to risk a nuclear exchange.

But in just a few short years our strategic superiority has deteriorated into something our Secretaries of Defense now call "rough equivalence." Translating that into plain English, it means that the Russians have caught up with us. Now, I know there are some who will argue that parity is a good thing because it will raise the nuclear threshold, but in the 30-odd years of American superiority, that threshold was not breached.

However, nuclear stalemate raises anew the threat of a conventional war in Europe. If neither side can risk using its nuclear arsenal except as a doomsday weapon, then the balance of power will shift decisively in favor of the side with the greater conventional war capability.

And it is precisely in this area—conventional warfare capability—that NATO is weakest. The fielded equipment of the Warsaw Pact nations is every bit as modern and lethal as that of the NATO countries. The only difference is that they have a lot more of it. And the gap is widening every day. At this very moment, the Russians are pouring new T–72 tanks into Eastern Europe at the rate of over a hundred a month, adding to an already massive imbalance of armored forces.

The sobering truth about the strategic parity, then, is that while it may have moved us further from the threshold of nuclear holocaust, it has actually brought us closer to war. The possibility of a land war in Europe is, today, greater than at any time since the end of World War II. The Soviets know this and it explains their unprecedented peacetime buildup in conventional force capabilities. And that leads toward a very obvious conclusion: If we think our Army is going to have to fight again, then anything we spend that does not give it the capability to win will be wasted money. Contrary to the view of some defense critics, we cannot counter Russian armor with a unilateral declaration that the tank is obsolete. That may be a clever parliamentary argument, but it is not going to be very convincing to an American soldier who sees a battalion of those obsolete tanks bearing down on his position.

The fiscal year 1978 authorization bill

is a step—albeit a small one—in the right direction. It restores some vital capability that was deleted in the February 22 budget revision. The committee endorsed the administration position on a number of program reductions where it was apparent that the reductions were sound. But where the cuts were ill-advised we recommended restoration of the programs. Two notable examples are the nonnuclear Lance and the improved Hawk requests.

Shortly after the new administration took office, the Army was informed that the nonnuclear Lance was on the casualty list. No reason was given. Nor was the Army consulted. The new team in the Defense Department simply decided after less than 2 weeks on the job that this proven weapons system should be scuttled in spite of the positive mandate given to the nonnuclear Lance by the Congress after several years of comprehensive study and debate.

The justification offered to the committee for the decision to kill the nonnuclear Lance was something less than persuasive. In fact, it was nothing more than a rehash of the same arguments considered and rejected by the Congress in prior years. Much the same was true of the rationale for the reduction in the Improved Hawk air defense missile system. The committee got the distinct impression that cuts in these two programs were based on a desire to fulfill a campaign pledge rather than on the merits of the systems themselves.

As I stated at the outset of my remarks, I think the Army programs authorized by this bill are barely adequate to keep us in a holding pattern. Over the course of the next year, however, the committee plans to conduct a comprehensive evaluation of the Army's conventional war capabilities to make an independent determination of what constitutes an adequate level of funding for Army weapons systems. It is too important an issue to entrust to a faceless group of program analysts in the catacombs of OMB.

Mr. Chairman, I yield to the gentleman from California (Mr. LLOYD).

Mr. LLOYD of California. Mr. Chairman, I rise in suport of H.R. 5970, the defense authorization bill. In line with the President's request to trim the defense budget, I believe the committee has more than adequately responded. Though we were not in complete step with the President and the Secretary of Defense on specific programs to be cut in all cases, substantial savings were made in areas which could stand some tightening up, but continued those programs which we determined are vital to our defense posture. To mention a few:

F–15 fighters—procurement of 30 additional A/C. A formidable fighter which I have flown and which will provide the Air Force the capability to meet any threat in the skies.

ATCA—procurement of six advanced tanker cargo aircraft. An off-the-shelf concept which will provide tactical deployment of fighter-attack and cargo aircraft anywhere in the world rapidly, efficiently, and economically.

F–18—continued R. & D. of a Navy fighter which is shaping up to be one of the finest tactical fighter aircraft the world has ever seen.

A–7—continued aircraft production by adding 6 A/C, which is still short of Navy's needs for light attack aircraft. Essential that A/C continue in production since it is mature combat proven system with state of the art avionics and above average reliability. About the same price as the unproven A–10 and has infinitely more capability in an all around attack role. It would be folly to consider closing down the line by allowing the President to cut it from the budget.

MX missile—complied with the President's request to study the concept further by keeping funds in to continue the program in advanced development.

This bill ends up about $16 million more—not counting Civil Defense—than the President's request, and that is coming pretty close. Some maintain that more cuts should be made, but I submit that the bill represents the intent of Congress to insure that our forces are equipped with the weapons systems needed to combat any threat to worldwide peace. Thank you.

Mr. BENNETT. Mr. Chairman, I yield 7 minutes to the gentleman from Missouri (Mr. ICHORD).

Mr. ICHORD. Mr. Chairman, I thank my distinguished colleague, the gentleman from Florida, for yielding.

Mr. Chairman, my purpose in rising is to ask for the support of the Members here today for the committee's action on title II, the research and development, test and evaluation section, of H.R. 5970.

This is my first year as chairman of the Research and Development Subcommittee. I have served as a member of that subcommittee for the past 12 years. In spite of my long association with the subcommittee, I still find research and development to be one of the most challenging and difficult areas to review. Membership on this subcommittee is not a glamorous political assignment. In fact, most of the work is done behind closed doors and is classified.

I did want to note, Mr. Chairman, that this House, this Congress, this Nation, owes a great debt of gratitude to the chairman of the full committee, the gentleman from Illinois (Mr. PRICE), who is unable to be with us today for what I understand is not too serious health problems. We do owe him a great debt of gratitude for the tremendous contribution he has made to this Nation, serving as chairman of the Research and Development Subcommittee and also as chairman of the Joint Committee on Atomic Energy. It is a debt, I say again, that I do not think we will ever be able to repay.

The research and development material and information provided by the Department of Defense for fiscal year 1978 includes nearly 3,000 projects and tasks. The projects and tasks represent just about every imaginable discipline of technology including medical research, computer sciences, infrared and radar theory, aircraft development, energy research, propulsion research, and all other areas with possible military application.

I am sure that each and every one of us here today recognize the importance of technology to our military posture and to the quality of our every day living. Technology has played a major role in shaping the America which we live in today. This has come about through the mutually supportive research efforts of the civil and defense sectors. The commercial world of electronics has given us the components for our most powerful weapon systems. The military world of aircraft has given us the wide body jumbo jets for commercial use. There are very few civilian aircraft in the air today that are not spinoffs from military technology. Military medical research in the 18th century gave us our first mass vaccination program in 1777. Military technology and manpower gave us the Panama Canal. Thanks to the combined efforts of technologists in industry, the academic community, and the Government laboratories, most Americans all over this country are kept warm, well-fed, healthy, and are able to enjoy the good life by having the necessary means of defense to allow them to enjoy it and be safe from the threat of aggression from our potential adversaries. Technology is vital to our military posture. It is the research and development of today that determines the capabilities of the weapons systems that this country will have through the year 2000 and beyond.

Our technological advances during the past three decades have taken greater strides than during any other period in the history of the world. Through advances in electronics, the peoples of this world have been brought closer together through the communications media. Through advances in propulsion and aerodynamics, technologists have made it possible to reach out and strike potential adversaries 5,000 and 6,000 miles away. But like most things in life, Mr. Chairman, technology is both good and evil. While it can defend freedom, it can also kill people—while it stimulates new careers, it also eliminates jobs through automation. But whether we like it or not, technology is here to stay and will continue to shape our lives in both the social and military arenas.

Important as technology may be to our military posture, Mr. Chairman, the Congress can ill-afford to provide the Department of Defense, or any other Government agency, with carte blanche authority in funding a research and development program. For fiscal year 1978 the Department of Defense requested $11.7 billion for research, development, test, and evaluation. The committee recommended a reduction of $776.7 million, better than three-quarters of a billion dollars, from this request, because in the judgment of the committee, the $10.9 billion recommended authorization will provide the same level of defense and advancement in technology that the $11.7 billion requested by the DOD would provide. I believe that the action of the committee will eliminate a lot of duplication of effort and will cause the Department of Defense to "tighten its belt." For example, I support—and I know the committee supports—one or two or perhaps even three studies that will enhance our military manpower effective-

ness. I do not support, however, the DOD's request for funds for a dozen programs to conduct these studies. The committee's recommended reduction in this area allows for the continuation of these studies at a reasonable level and cuts out the "frills."

Mr. Chairman, our defense dollars are rather scarce. Inflation has struck at our defense posture just as it has damaged the economic posture of every American. Our defense posture has been on the decline. It is important that we use every dollar wisely and effectively to insure that we get the most "bang for the buck." Obviously, just spending money on defense does not guarantee the taxpayers of this country that we will have a good defense. I am personally concerned over the fact that in spite of large expenditures by the United States in all areas of military spending, the Soviets have surpassed us in several areas of technology and military capability. They are quantatively ahead of us in tanks, tactical aircraft, artillery, major combatant ships, and are making qualitative advancement to complement their numerical superiority.

We need not panic, however, or give the Department of Defense every penny that they ask for in every area. There is no need to match the Soviets man for man, program for program, or weapon system for weapon system. It is important, however, that we reverse the trends that are currently in favor of the Soviet Union through improved management of the many resources that are available in our great Nation. We must start by making the research and development program more responsive to our near and intermediate term military problems and requirements. I find it appalling, Mr. Chairman, to think that the Soviets have deployed nine new surface-to-air missile systems since 1960 and during this same period of time, the United States with all of its technology has only been able to deploy one such system and this, the Chaparral, was an interim system that was deployed in response to an urgent requirement in Vietnam. The Army's SAM-D—which has been renamed Patriot—began in 1962. But it will be 1982 or later before the soldier in the field will get his hands on the Patriot weapon system.

I doubt if most of you are aware of the poor state of weapon control in our surface fleet. Most of you, I am sure, have heard of the Aegis weapon control system. Many of you, however, may not realize that this system was started in 1961 and will not reach the fleet until at least 1981.

Mr. Chairman, we cannot single out the DOD as the cause and culprit of our military decline. We are all at fault. The Congress—the DOD—the Office of Management and Budget—the White House and every other activity which has helped to create the management monster that exists today. In the fifties, we developed and deployed weapons systems in 2 to 5 years. They were good systems. The Manhattan project in the 1940's required only 5 years. The Nike-Ajax was developed in 2 years. The Polaris program was completed in 4 years. The Hawk program took a little under 5 years. And today, we are talking about 10-, 20-, and even 25-year cycles to get weapons systems into the hands of the operational users. We have created a management process that requires over 150 distinct steps to take a weapon system from concept through development. This process takes over 30 feet of paper to describe. By comparison, it took about 10 steps and a single sheet of 8½ by 11 paper to describe the weapon system development process in the fifties. It is about time to inject a little commonsense into the system and change the system. We can do it, because we are the system—the Congress, and its own GAO, the OMB, the DOD, and the Commander in Chief.

We must select out weapons systems that are too expensive for the performance they provide. We must take every conceivable action to avoid unnecessary duplication of effort. We must get the DOD to place more emphasis on product improvement and get away from the technological "hangup" that causes them to want to have the latest in gagetry and the absolute utmost in performance. We must initiate a program that calls for better—not more—test and evaluation. I am afraid that we created a debacle with our insistence on "fly-before-buy," because the DOD interpreted that guidance to mean more not better testing. We test and we test—we research our own established research. It is absolutely essential that we test our systems adequately before making a large-scale commitment to procurement but the process requires quality and not quantity test and evaluation.

Lastly, in our review of the fiscal year 1978 program, we found that practically no major weapon system is being procured at the minimum economic rate. I know that BILL DICKINSON, my distinguished colleague from Alabama—and ranking minority member of the Research and Development Subcommittee—has some very strong concerns in this area. The committee as a whole has been greatly concerned for many years about action usually taken by the OMB which is penny-wise and pound-foolish. They make you look good this year or perhaps, I should say they make the budget look better, but they cost more in the out years.

I believe it is imperative that we take the necessary steps to insure better management of our military program.

Mr. Chairman, the committee's recommended reduction of $776.7 million—or 7 percent—will, in the judgment of the committee, help to achieve the better management that we need and will still allow the DOD to provide this country with a sound R.D.T. & E. program. We closely scrutinized the entire DOD request for R. & D. funds. In some instances we terminated programs or made reductions—in some instances, we added funds to improve our military readiness and capability. We arrived at a good balance between the programs that offer promise for the future and programs that will solve the problems of today. We added funds to improve the survivability of our ships—to get an advanced helicopter into the Army's inventory—and for technology as well, such as $14 million to demonstrate the feasibility of submarine communications via a space based laser satellite. This involved the termination of the Seafarer system, formerly known as vanguard but it was necessary to do so and I might emphasize that we terminated the Seafarer system on the grounds of capability not because of health and environmental reasons.

There is a tremendous amount of good technology and military capability that will emanate from the $10.9 billion R.D.T. & E program recommended by the committee.

Mr. Chairman, I renew my request for the support of all my colleagues here today for title II of H.R. 5970.

Mr. SIKES. Mr. Chairman, will the gentleman yield?

Mr. ICHORD. I yield to the gentleman from Florida (Mr. SIKES).

The CHAIRMAN. The time of the gentleman from Missouri (Mr. ICHORD) has expired.

Mr. BENNETT. Mr. Chairman, I yield 2 additional minutes to the gentleman from Missouri (Mr. ICHORD).

Mr. SIKES. Mr. Chairman, I wish to commend the distinguished gentleman from Missouri (Mr. ICHORD) for sponsoring a proviso in this bill dealing with the contracting out services previously provided by civilian and military personnel of the Department of Defense. I fully support the objective of the gentleman to slow down the increasing practice of contracting out larger and larger percentages of work previously performed by DOD employees. I am, however, somewhat concerned that the wording in subsection (b) of section 809—page 27 of the bill—dealing with further conversion of commercial or industrial activities will be misinterpreted.

As my friend knows, the fiscal year 1978 budget provides for substantial increases in the amounts of funds provided for depot level maintenance activities to repair aircraft, ships, tracked vehicles, and missiles. If this work is going to be accomplished, much of it will have to be contracted out simply because the staffing levels at many of the depots, rework facilities, shipyards, et cetera are not high enough to handle the additional workload, or there must be increased funding for in-house overhaul and maintenance work.

Does this section permit increasing the percentage of this type of work that must be contracted out if it is to be accomplished now?

And is it your intention that this section will in no way interfere with the need to reduce the ever-increasing backlog of military equipment awaiting depot level maintenance?

Mr. ICHORD. Mr. Chairman, in reply to the gentleman from Florida (Mr. SIKES), I would state that I was prompted to offer this amendment in the full committee, because of the fact that the Army was trying to contract out firefighting at one of the military installations in my district, and I was horrified to think of what kind of fire protection we would have if we contracted out this kind of work.

I would say to the gentleman that it would probably apply.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. ICHORD) has again expired.

Mr. BENNETT. Mr. Chairman, I yield 1 additional minute to the gentleman from Missouri (Mr. ICHORD).

Mr. ICHORD. I would state to the gentleman that section 809 would probably apply to a depot, but it would permit increasing the percentage of the type of work which the gentleman describes. We are talking here about the conversion of existing functions under current workload conditions, as opposed to increased workloads. So it would permit the type of increased workload that the gentleman refers to.

Mr. SIKES. Mr. Chairman, I am glad to have that information.

Again, I concur fully in what the gentleman is trying to accomplish.

Mr. MITCHELL of New York. Mr. Chairman, will the gentleman yield?

Mr. ICHORD. I yield to the gentleman from New York (Mr. MITCHELL).

Mr. MITCHELL of New York. Mr. Chairman, I would like to offer my support for the Armed Services Committee amendment to H.R. 5970 that would curtail further contracting out of existing in-house laboratory functions until the Department of Defense can show that such action is in the best national interest of this country.

I would like to point out that during the past 4 years, the Department of Defense has attempted to draw down personnel in the in-house laboratory system to such an extent that it would seriously jeopardize the ability of the Government to be a prudent buyer. What is extremely bothersome is the fact that there is no rationale behind the planned reductions of the Department other than a preference to do more work in the private sector without regard to cost.

On March 28 of this year, the Research and Development Subcommittee held a hearing on the status of the in-house research and development laboratory program. During that hearing my distinguished colleague from California (Mr. BOB WILSON) asked the defense witness if the planned reduction of 277 people from the Naval Electronics Laboratory Center would save any money as a result of contracting out the R. & D. that these in-house personnel were performing. The Navy witness testified, and I quote—"I do not expect to" save any money in contracting out this work.

My distinguished colleague from Georgia (Mr. LARRY MCDONALD) asked the Navy witness—the Director of Navy Laboratories—and I quote:

Mr. Probus, do you personally agree with these reductions, speaking personally, are you in favor of them?

Mr. Probus' response was—

No, sir; I am not in favor of them. I am carrying out the decisions though.

It was very clear from that hearing, Mr. Chairman, that the Department of Defense has no sound rationale or good reason for reducing the level of effort that is presently being performed by people in the Government laboratories. I am a firm believer and supporter of our industrial complex. I am also a firm believer in the fact that the Government has to maintain a competent in-house staff of scientists and engineers to work hand in hand with industry to develop efficient and effective weapons systems.

While some in-house laboratories can be improved upon and without question there may be a few unproductive people in the system, the Government has received a tremendous return on the investment in these facilities. The special armor that will go into our tanks of the future was developed as a result of our in-house laboratory efforts. About 70 percent of the air-to-air missiles that we have in our inventory today were developed by the in-house laboratory system. As a result of this development, industry has realized a cash flow of over $40 billion in the last 3 decades.

There are many Government centers of excellence throughout the United States that are working hand in hand with industry to produce good systems. I oppose any arbitrary reduction to eliminate these centers of excellence simply because several people in the Defense Department prefer to have the work done in the private sector even though it will cost more in the long run. I support the committee's position to curtail any additional contracting out where this action would be detrimental to the interest of the Government and our national security. I could support a reduction to eliminate "dead wood" in the in-house system but overall, I sense the need to maintain the vitality and integrity of our Government research and development activities to keep the Government smart.

I hope that you will support section 809 of title VIII of H.R. 5970.

Mr. BOB WILSON. Mr. Chairman, I yield such time as he may consume to the gentleman from Virginia (Mr. WHITEHURST).

Mr. WHITEHURST. Mr. Chairman, I rise in support of H.R. 5970, the Department of Defense Appropriation Authorization Act for fiscal year 1978, and strongly urge my colleagues to give this bill a resounding expression of their support.

H.R. 5970 continues the course which we established last year when the dangerous trend of reducing our expenditures for defense was finally reversed. H.R. 5970 provides authority for continuing the modest start on rebuilding a structure of weapons systems needed in these troubled times to provide adequate defenses against present and potential threats to the security of the Nation and our allies.

The bill adopts a balanced approach. It is an approach which recognizes our potential adversaries and the various kinds of threats to our security. The bill does not attempt to authorize all of the weapons systems which might be desirable. Rather, it provides the authorizations considered to be the minimum necessary to our defense, recognizing that there are other competing and worthwhile demands on our resources. In considering this balanced approach, however, the committee was mindful that the Nation must first be able to insure its own survival in order to provide an environment in which the freedoms we cherish can be retained, and our economic and social goals can be attained.

In brief, the bill provides authority for procurement of the ships, planes, tanks, guns, and supporting materiel for the Army, Navy, Air Force, and Marine Corps which the committee believes essential. It authorizes the military personnel strengths required by our combat forces, and the personnel, both military and civilian, needed to man and maintain the weapons systems essential to the Nation's defense and to provide the support required for those systems and personnel.

I want to particularly emphasize what I believe is an important change made by the committee in regard to civil defense. The committee has recommended an authorization of $134.8 million for civil defense in fiscal year 1978. This is $44.8 million more than was submitted in the budget when transmitted to the Congress. That submission reflected a continuation of the past relative apathy with regard to civil defense. This attitude contrasts with the indication of a major and growing civil defense program by the Soviet Union. While I do not necessarily believe our course should be governed by the actions of our potential adversary, I am convinced that we must have a realistic civil defense program as an adjunct to our Nation's commitment to an adequate military defense program. The addition of $44.8 million to the proposed authorization submitted to the Congress will permit the corrections of deficiences noted by the General Accounting Office and more importantly, signal to the administration the congressional concern that our civil defense program needs and must have greater direction and clear-cut guidance to demonstrate for our citizens and to our potential adversaries that the Nation is serious about providing means of survival in the event the unthinkable happens.

Turning now to one of the specific items in the bill, I want to point out that the bill will authorize the Marine Corps to continue to pay the $100 monthly subsistence allowance to members of the platoon leaders class. Unless extended, the authority for that payment will expire on June 30, 1977. The platoon leaders class is a highly important source of young officers for the Marine Corps and the continued authority for payment of the subsistence allowance is critical to the continued success of that program.

The bill also provides two important incentive programs to assist the Reserve forces to recruit and retain a sufficient number of young people with the qualifications required by the Reserve components.

The two incentive programs are a reenlistment bonus and an educational assistance allowance. I will not go into detail in describing them, as my colleagues on the Personnel Subcommittee will describe them in some detail. However, I strongly support these programs. They are needed if our Reserve Forces are to be able to perfrom their mission in support of the Active Forces.

In conclusion, Mr. Chairman, I again urge favorable action by my colleagues on H.R. 5970.

Mr. BOB WILSON. Mr. Chairman, I

yield 6 minutes to the gentleman from Alabama (Mr. DICKINSON).

Mr. DICKINSON. Mr. Chairman, if we take the time to look at the charts that have been presented here today and the visual displays which reflect the enormous disparity between our efforts and those of the Soviet Union, I am sure we will find they cannot help but impact on each of us as to the seriousness of our plight and remind us of the tremendous importance of the bill before us today.

After looking about the floor at this time, 20 minutes after 5 on a Thursday afternoon, I cannot help but be struck by the enormous apathy of the Members of this House, because while we have 435 Members, I just counted and I do not see more than 12 Members present who are not members of this committee.

We are talking about a $120 billion bill here, one that impacts directly on our national security. Yet, looking behind me at the Press Gallery, I think I saw two reporters there when I last looked.

Mr. Chairman, we are faced with a very serious problem here when we consider that of this total defense authorization budget there is not much more than 25 percent that is manageable. The rest is already pledged; it is obligated. It goes to pay people, and it goes to pay for contracts for procurement that are already let and that are already in the pipeline. There is only 25 percent that is manageable. When we take $4 billion off of that, as the Budget Committee suggests we do, then we are cutting much more than just fat; we are cutting sinew and bone.

Everybody is interested in economy. I am interested in economy. But every time somebody comes along with the greatest of new social programs and is asked, "Where are we going to get the money?" they say, "We will take it out of defense, because they have such a large budget."

Let us just take a look at this and see where the economies are. Let me give one example as an instance. This is just one of many examples that can be offered. That is the false, spurious facade that is put forth when somebody says, "Well, we will stretch out the program, thereby saving the expenditure of x number of dollars this year, and thereby we have an economy." Let us talk just very briefly about the F–15 fighter aircraft.

The present F–15 program calls for a total program buy of 729 aircraft. The initial budget request for fiscal year 1978 proposed to buy 108 aircraft at a total cost of $1.707 billion. In the new administration's revised budget the F–15 was reduced to 78 in number, not the original 108, at a cost of $1.373 billion. Now, this looks good, because it results in an apparent savings of $334 million in 1978. That is fine, is it not?

But on closer examination we find that by reducing the buy from 9 to 6½ aircraft per month the cost of each aircraft goes up $1½ million. That is $1½ million per airplane, and we do not get a penny's worth of defense more than we would if we bought them on the original schedule.

Last year we had in our conference an item of $77 million for a long leadtime item for the B–1, and there was a hassle, because some Members did not want to commit us to procurement. At the time the Air Force gave us information that if we stretched out the B–1 program for 1 year, it would cost an additional $800 million. That is just to stretch it out for 1 additional year.

So when the administration wants to cut from 8 to 5 this year, we stretch the program out for a year and spend $1 billion unnecessarily.

Mr. Chairman, I would plead with the Members of the House, not just the committee members—because I think our committee is pretty well familiar with these matters—that if we want to save money, this is the way we should do it. We should arrive at a point where we make a go, no-go decision that we will buy or not buy. Once we make that decision, from that point on, we should decide which is the most economical way to buy, we should know what is the most economical production rate, and we should stop tampering with it after that, because after that it only wastes money.

Mr. Chairman, the point I wish to make is once we decide to develop and procure a weapons system, we should use a little commonsense and do so at a rate that is timely and economically sensible. I certainly realize that it is not practical to avoid inflationary effects by buying out a weapons system in 1 year. Likewise, however, to stretch out the buy just to give the appearance of saving money in a given year is false economy. By unnecessarily stretching out these programs, we end up spending millions of dollars that buy us not 1 penny's worth of defense.

In addition to the stretchout in procurement of the F–15, there were several program stretchouts in this year's research and development request that the committee questioned. The advanced attack helicopter, or AAH, is one of the Army's highest priority requirements. The new administration, however, directed the Army to reduce the fiscal year 1978 AAH funding request from $200 to $100 million. The reason given by Secretary Brown for this slowdown was ostensibly to allow time to conduct a new helicopter survivability study. I have had a longstanding interest in Army aviation and I can tell you that this helicopter survivability issue has been studied to death. The Army realizes that proper training and tactics such as the use of low-level contour flying, nap of the Earth, and popup firing tactics must be used if the helicopter is to survive. This is not unique to helicopters, however. Proper training and tactics must be employed with all weapon systems if they are to survive and operate effectively on the modern battlefield.

The committee has examined the helicopter issue very closely and has found no new data that obviate the need for an attack helicopter. Reducing the R. & D. funding for the AAH to $100 million in fiscal year 1978, will ultimately result in an overall increase of $115 million in required R. & D. funds and $113 million in procurement funds. The committee strongly supports the AAH program and in so doing, believes that it should be developed and procured at the optimum rate. With the quantitative advance in the Soviet deployment of tanks and helicopters, we believe that the United States must look for ways to accelerate rather than delay this much needed system. The committee recommends that $155 million should be authorized for the AAH program to place it as nearly as possible back on its original schedule.

The Air Force advanced medium short takeoff and landing transport aircraft, or AMST, is another R. & D. program that the committee considered during its deliberations this year. The AMST is an innovative cargo aircraft that will be capable of taking off and landing on semiprepared, short runways. While the committee supports the need for the AMST, we seriously questioned the developmental program proposed by the Air Force. The AMST prototype design and fabrication began in January 1973. Two competitive prototype aircraft will have completed flight testing by July of this year. Nevertheless, the Air Force plans to delay a production decision until January 1983. The committee believes this program is being unnecessarily delayed. The Air Force was not able to justify the need for an additional 5 years of development on the AMST. Accordingly the committee reduced the Air Force request from $25 to $5 million. We believe the Air Force can restructure this program so as to make a production decision no later than 1980.

There are approximately 150 programs that the committee took action on in this year's R. & D. request. During my 10-year tenure on the committee, I cannot recall examining the R.D.T. & E. program in as much detail. We are recommending a very sizable reduction, almost $800 million, to the administration's request. Our cuts go deep but we feel they are justified. We have considered each and every R. & D. program on its own merit. We have questioned the requirement for each program. We have carefully checked to insure that similar programs are not being duplicated from service to service. We have questioned whether the investment will ultimately result in an effective military capability. In many cases, the committee did not believe programs measured up to the required criteria. We terminated over 50 programs because we did not feel they were adequately justified.

Mr. Chairman, I believe the committee has thoroughly done its homework on this year's R. & D. request and I want to join my subcommittee chairman, DICK ICHORD, in urging our colleagues to fully support the $10.943 billion recommended for research, development, test, and evaluation.

Mr. BENNETT. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. WHITE).

Mr. WHITE. Mr. Chairman, titles III through VI of H.R. 5970 respectively, establish the active duty, Reserve, and civilian personnel strength in the Department of Defense, as well as the military training student loads for fiscal year 1978.

Overall, the strength levels contained in this bill are essentially stable with the strengths authorized by Congress last year. I think it is appropriate to mention

to the Members of the House that there are some substantial deficiencies now apparent in defense manpower. These deficiencies will require firm and immediate action by the Department of Defense, as well as the Congress, in order to prevent these existing deficiencies from reaching proportions requiring drastic action such as a possible reinstitution of some form of draft.

The problem in the Active Forces is primarily one of quality. There are enough individuals available to provide the necessary manpower, but one lesson of the All-Volunteer Force has been that personnel of certain quality levels must be sought since they are more likely to complete training successfully and perform well as soldiers. These quality personnel, essentially high school graduates, are the most difficult to obtain because of their restricted numbers and the competition for this group in the economy. The net result has been the necessity for substantially increased investments for recruiting with the situation still unstable. The committee is worried by this trend and intends to inquire more deeply into this situation during the year.

For the Reserves the outlook is worse. The Selected Reserve, which is that portion of each of the Reserve components which is organized into units made up of individuals in a paid-drill status, is now over 50,000 short of its authorized strength. A shortage of this type in the Selected Reserve is particularly a problem because it forces the units to divert their energies from necessary training in order to recruit. The committee was greatly concerned by this situation and, as a consequence, is recommending certain recruiting incentives which I will explain in more detail in a moment.

The other part of the Reserve problem is in the individual Ready Reserve which is the portion of the Reserves which is not organized into units and does not receive drill pay. These reservists are a vital pool of trained manpower needed very early during a mobilization. The individual Ready Reserve is today 320,000 personnel short of requirements specifically for the Ground Forces. This number is getting larger. This is a problem which demands early attention.

Although not a part of this bill specifically, the current condition of the Selective Service System deserves mention, as it is the critical and ultimate ingredient in the defense manpower equation. At present, the Selective Service System cannot produce one trained soldier until 7 months after the decision to mobilize. This situation is simply unacceptable given the circumstances in the world today.

The committee is seriously concerned about the existing problems in defense manpower and will be working this year to address these problems. The issues are of a magnitude that each Member of Congress should be made aware of them.

For fiscal year 1978 specifically, the committee is recommending strengths in the Active Forces only slightly different from those requested. The differences, which are minor numerically, result from the committee's rejection of the proposal to close the Uniformed Services University of the Health Sciences which adds 90 personnel; a rejection of the proposed reduction in Naval Reserve strength which requires the addition of 904 active duty personnel in the Navy to support these reservists; and a decision not to support a proposed reduction of Army medical personnel which adds 425 personnel.

With these changes, the strengths recommended by the committee are as follows: Army, 790,425; Navy, 536,000; Marine Corps, 192,000; Air Force 572,000.

This active force will be composed of a larger overall percentage of enlisted personnel as a result of increases in manning for the three new Army divisions, increased security personnel in the Air Force and decreased officer strength in the Air Force primarily from reductions in the crew for Minuteman missiles and inflight training personnel. This force will also be somewhat less expensive to maintain due to tighter controls on the number of permanent change of station moves.

Title IV authorizes average strength floors for the Selected Reserve of each of the Reserve components. The committee recommendations are: Army National Guard, 382,000; Army Reserve, 211,300; Naval Reserve, 93,600; Marine Corps Reserve, 32,400; Air National Guard, 92,500; Air Force Reserve, 52,000; and Coast Guard Reserve, 11,700. With two exceptions, these are the strengths requested.

The requested strength for the Naval Reserve was 52,000. That compares with the 96,500 strength authorized last year and the 93,600 requested originally this year. Again this year the committee examined in some depth the evidence for establishing a paid drill strength in the Naval Reserve, and is recommending a strength of 93,600. In the past 2 years, two major studies within the Department of Defense have clearly established the required level for mobilization at a level in excess of 90,000 billets. This requested reduction was not based on any study of requirements rather it rests on a judgment that these 40,000-plus personnel can maintain adequate proficiency without continuous training other than 2 weeks of active duty a year. The problem with this approach, in addition to its contradiction of recent analyses of requirements, is that past experience indicates that up to 90 percent of the personnel transferred from a paid-drill status to only 2 weeks of active duty a year will simply leave the program altogether. The personnel that will remain will be those close to retirement.

The rationale for this reduction is extremely weak.

The committee also increased the Air Force Reserve's strength by 900 to permit the retention of valuable and very highly skilled personnel in the mobilization augmentee program.

As mentioned earlier, the committee was very concerned by the significant shortages in strength now existing in the Reserve components primarily the Army National Guard and Army Reserve. Because of the size of this shortage and because the situation is unlikely to get better without some assistance, the committee is recommending language in title IV which will permit the granting of educational assistance to assist recruiting, and a reenlistment bonus to assist retention in high-priority units. The major features of these incentives are:

Educational assistance.—Only for high school graduates who enlist for an 8-year period of obligation; pays 50 percent of expenses up to $500 a year total, $2,000 total per individual; for both college level work, or vocational or trade schools; the authority is discretionary with the Secretary concerned to be utilized as he deems appropriate and necessary.

Reenlistment bonus.—For a serviceman who reenlists in the Selected Reserve who has less than 10 years of service at the time of reenlistment; a bonus of $300 a year for a 3-year reenlistment period to be paid $450 at the time of reenlistment, or $900 for a 6-year enlistment, and $150 a year for the rest of the period; the authority is discretionary with the Secretary concerned to be utilized as he deems appropriate and necessary. Title V establishes the end-strength for civilian personnel in the Department of Defense. The strength recommended by the committee—1,034,328—is a ceiling for Department of Defense personnel as a whole which allows the Secretary of Defense to allocate these numbers among the services. The committee-recommended strength is 3,598 above that requested. This difference results from an increase of 370 personnel for the Uniformed Services Health Sciences University; 228 for civilian support for the Army Medical Department to maintain its current capability; and 3,000 additional spaces for the naval air rework facilities, NARF'S. The additional spaces for the naval air rework facilities are to provide sufficient spaces for the increased workload and funds programed for the naval air rework facilities in fiscal year 1978.

The committee has been concerned by reports that the authorization ceiling on civilian personnel unnecessarily hampers the management of the civilian personnel force. In order to maintain our oversight responsibilities in a manner consistent with efficient management, the committee is recommending that the authority in the law for the Secretary of Defense to exceed this ceiling when it is in the national interest be increased from the current one-half of 1 percent, to 1½ percent. This additional leeway of approximately 10,000 spaces when necessary is intended to prevent the reported difficulties in administering the end-strength ceiling.

Title VI establishes the military training student loads for fiscal year 1978. The committee is recommending no changes in the requested levels. The military training student loads are as follows: Army, 77,711; Navy, 60,767; Marine Corps, 24,020; Air Force, 50,356; Army National Guard, 16,606; Army Reserve, 11,136; Naval Reserve, 1,065; Marine Corps Reserve, 3,449; Air National Guard, 2,598; and Air Force Reserve, 1,186.

Mr. Chairman, the committee is recommending three language additions in the general provisions which relate to the personnel area. The first of the these language additions would provide a 6-year statutory obligation for women as

is now the case for men. Generally, whatever additional commitment this obligation amounts to over the voluntary enlistment period is served in an inactive reserve status. The second statutory proposal would alter the current mandatory annual inspection requirement for all National Guard units. The statute will still impose the responsibility on the service secretary to inspect these units but at his discretion as is now the situation for the other Reserve components. This will save money and prevent duplicative inspections.

The last language additions would eliminate the current statutory requirement for quadrennial physical examinations for members of the Fleet Reserve and Fleet Marine Corps Reserve. This requirement is costly, and imposes a burden on existing Navy medical facilities and provides little useful information.

Each of these statutory changes was a Department of Defense legislative proposal in the last Congress and each is in the DOD legislative program currently awaiting clearance at OMB.

Mr. Chairman, in dollar terms, the changes in the requested strengths which have been recommended are $78.9 million over what the administration has requested for these accounts, but identical to what the committee made provisions for in its Budget Committee recommendations.

Mr. Chairman, this concludes the personnel matters.

Mr. TREEN. Mr. Chairman, will the gentleman yield?

Mr. WHITE. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Chairman, I rise in support of H.R. 5970.

I have the honor of being the ranking minority member of the Military Personnel Subcommittee which has jurisdiction for the manpower portion of the bill—titles III through VI.

The Military Personnel Subcommittee conducted a series of 11 hearings in its review of the Department of Defense's request for manpower. Many diverse viewpoints on the defense budget in general, and the manpower strengths in particular, were aired. The coverage of these hearings was broad, but it did provide an opportunity for the members to have access to all relevant viewpoints and to then, in turn, present their concerns to Department of Defense witnesses.

This effort was made by the committee so that we would be in a position to conduct a careful and detailed review of the fiscal year 1978 defense budget and its underling assumptions.

It is clear from our examination of the Defense Department proposals that, in the manpower area, the present force is the minimum size consistent with our national security interests. Barring a change of major proportions in our international relationships or a basic reassessment of our foreign policy commitments from within, the foreseeable future will demand a force structure of essentially the size existing today.

The manpower figures the committee is recommending are not absolutes. The 2,090,425 figure for the Active Force and the 875,500 figure for the Reserve Force can vary a few thousand either way; however, what is important is that the United States maintain a conventional military force that is credible. In the regular establishment, this force will provide 16 Army divisions, 3 Marine divisions, a naval fleet of 470 ships, and an Air Force of 26 tactical fighter wings and 20 strategic bomber wings. The Reserves are the only augmentation to this force structure.

These elements represent a minimum force structure necessary for conventional credibility. The cost of maintaining a military structure of this size is significant, and this is the aspect on which we all too often focus. However, it is more important that we recognize the real advantages which accrue to this Nation from the existence of this conventional force.

A force structure below that recommended in H.R. 5970 would only serve to invite adventurism by a potential adversary. On the other hand, it is quite clear that a visible military capability will tend to stifle that possibility of adventurism.

It will be argued by some of my distinguished colleagues that the costs of maintaining such a force are too high. My answer, simply, is that the sums involved are significant but if they are required to discourage adventurism on the part of a potential adversary, then we are better off to spend the sums than not to spend them and invite another war.

And now a few words about the Uniformed Services University of the Health Services.

Basic administrative and academic staff is already in place and the University has admitted its charter class.

It would indeed be a tragedy to cast aside such a good start in developing a Uniformed Services University of the Health Sciences for which the Congress has already appropriated $85.8 million in construction funds. The mission of the University is unique in many ways. The University is dedicated to training motivated young people who will serve global medicine in terms of cure and control. They will be able to mobilize and deploy rapidly to meet military and civilian crises. The University will provide opportunities for aspiring young military officers to attain academic recognition and support continuing education of health providers.

The Surgeons General of the services support the institution and forecast a bleak future for military medicine without it. The scholarship program is in trouble, particularly with competition from the Health Professions Educational Assistance Act of 1976.

The stark facts are that career military medicine will not attract sufficient physicians without the school. The prediction is that eventually the school will provide 25 percent of career doctors, and as time passes, a greater percentage.

The administration's decision not to fund the medical school was based, at best, on speculative arithmetic and a complete disregard for qualitative factors.

Thus, I urge support for the research and development and personnel authorizations in this bill, and urge my colleagues to join in that support.

Mr. Chairman, this is a good bill. I support it and I urge my colleagues to vote for its passage.

Mr. BOB WILSON. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Maryland (Mrs. HOLT).

Mrs. HOLT. Mr. Chairman, I strongly support this bill H.R. 5970 and urge its passage. There are three specific matters in this bill which I want to comment on specifically, because each is important and each represents an initiative by the Committee on Armed Services.

First, the committee rejected the administration's rationale for the proposed 50 percent reduction in the Naval Reserve. This proposal is exactly the same proposal which the Congress rejected last year. The committee examined this proposal in detail. The evidence before the committee was to the effect that two recent major studies conducted within the Department of Defense, one of which was directed by the Congress and only completed in February of this year, indicate a strength of over 90,000 is required in the Naval Reserve.

Administration witnesses specifically stated that no other study had been made of Naval Reserve requirements on which their recommended reduction was based.

I think the committee and the Congress are as interested as the executive branch in having the most efficient defense establishment possible, but proposals such as this which are not based on evidence, but rather on sheer unsubstantiated opinion are irresponsible.

The committee has also proposed two recruiting incentives for the reserves. These have already been explained in detail. The point that I want to make is that these incentives must be provided this year and not await further study.

The committee received testimony from each of the chiefs of the Reserve components concerning the severe difficulties they were experiencing in recruiting and the fact that the future trends indicated the situation will get worse. They unanimously supported recruiting incentives. The committee also requested that the Congressional Research Service analyze the current situation and the future trends. The conclusion of that study was that four of the six Reserve components could not maintain their required strength in the future.

The incentives are warranted now because as the shortages continue to grow, the deficiencies which exist will take much longer to resolve. This results from the fact that this country does not have sufficient training capacity to train in a short period of time the new personnel who will have to be recruited for these deficiencies. Another point which is not always appreciated is that these recruiting difficulties in the Reserves are a direct result of the termination of the draft which provided motivation for individuals to voluntarily join Reserve units. As these deficiencies increase, the pressures to reinstitute the draft will increase, and possibly this is the best approach, but I would consider the Congress irresponsible if we act to reinstitute the draft due to deficiencies which

we never really attempted to resolve through actions such as these incentives.

The last matter which bears comment is the committee's recommended increase in both active duty and civilian medical personnel in the Army. The fiscal year 1978 defense program proposed a reduction in Army medical personnel which the Secretary of the Army testified would have the effect of increasing waiting lines at medical facilities in peacetime, and degrading wartime medical capabilities according to the Vice Chief of Staff of the Army. The committee action restored the spaces for the doctors, dentists, nurses, and other professionals involved in this proposed reduction.

Mr. Chairman, the three matters I have highlighted are illustrative of the careful scrutiny the committee has given the proposed defense budget. The bill represents the responsible sort of oversight activities which the Congress is charged with in the Constitution. I urge the Members of the House to support this bill.

Mr. BOB WILSON. Mr. Chairman, I yield 6 minutes to the gentleman from New York (Mr. MITCHELL) who has some interesting exhibits for the Members.

Mr. MITCHELL of New York. Mr. Chairman, I rise in strong support of H.R. 5970 in its entirety. It is a good bill. It is a well-balanced approach to our minimum defense needs. But, because of the time constraints, I wish to use the 6 minutes allotted to me to explain the importance of the $134.8 million authorization for civil defense in title VII.

Mr. Chairman, one of the more interesting and frightening assignments I have had since being elected to Congress was that of evaluating our Nation's civil defense capability.

During our hearings, witness after witness pointed out the great disparity between our civil defense effort and that of the Soviet Union.

No evaluation of the adequacy of our civil defense program is meaningful without comparing it to the effort of our potential adversary, the Soviet Union.

As with nuclear and conventional weaponry, the U.S.S.R. has been making rapid progress through the past few years. We have not. We have cut back. But where with the weaponry, their progress has brought them to a stage of rough parity with the United States in 1977 in the civil defense field, according to the testimony we received, Russia vastly surpasses us.

We learned that for more than a decade the Soviets have been spending approximately $1 billion a year on civil defense. We have averaged around $100 million. They have an excellent program. Our program is in disarray.

Why have we not done more about it? Why are we not more concerned? Well, it is chiefly because far too many Americans are victims of three misconceptions about a nuclear attack.

The first is the overkill fallacy. The belief that there never will be a nuclear war because both the U.S.S.R. and the United States have enough kilotonnage to destroy each other's population several times over

The second is the danger of the release of radiation. People feel that all is hopeless because if the blast and the fire do not kill you, then the radiation surely will, and that much of the world's population will be destroyed by fallout.

The third misconception is the necessity for vast numbers of people to spend many weeks underground and that after these many weeks underground there would be nothing to come out for because the world would be destroyed.

To counter these myths, Mr. Chairman, I had the DCPA prepare two charts, maps of the Washington area, which point out what would happen if a 1-megaton bomb was exploded above our Nation's Capitol. I might mention that a 1-megaton bomb is approximately 60 times stronger than the bombs that were dropped on Hiroshima and Nagasaki.

I sent each Member of the Congress a copy of the thorough description that the DCPA put together of the resulting damages at varying distances from the Capitol.

Mr. Chairman, I would be the first to admit that a nuclear war would be a horrible disaster and that it would be catastrophic, but, according to our experts, with an adequate civil defense program, it would be possible for many Americans to survive. Many Americans do not realize this need. Much of the money in this bill will be used to tell Americans how it is possible to live through nuclear warfare.

Let me address the highlights and I will leave the charts in the Speaker's lobby so that the Members of the House or anyone else if they should be interested can inspect them more closely later on.

First of all, with a nuclear blast there are four dangers: The blast and concussion itself, the fire that results, the high winds that fill the vacuum, winds that can attain speeds of 400 to 600 miles an hour and then finally the radiation.

The first three, the blast, the fire, and the high winds are uniform in their effectiveness. The further one gets from the blast site, the safer it becomes and the more the effects are eroded.

The radiation is carried by the wind. This is depicted here on the chart.

Just to point out a very few of the highlights here, at 1½ miles from the site of the 1-megaton explosion, people could survive in home built shelters. That is described down here. That appears in the Soviet Union textbooks to its children. Only 1½ miles away they could survive.

Two miles away we find that people could survive, could have a 50–50 chance of surviving in substantial buildings and in basements.

At 3.2 miles away they would have a chance of surviving in the home basements.

Five miles out the danger of fire dissipates almost entirely, and 10 miles out all we are getting here primarily is glass breakage, so it certainly is not as disastrous as many people would feel.

This chart, Mr. Chairman, describes the effects of radiation, and radiation, of course, is dependent upon the wind. We had set up an average wind for this time of the year, which at varying altitudes would average out about 15 knots and would be in an easterly direction. In the most dangerous ellipse, which is 35 miles long and 8 miles wide and extends from the District of Columbia to the middle of Chesapeake Bay, people would have to remain for 2 weeks in a home basement to prevent a fatal dosage, which is 250 roentgens.

In the next ellipse, which is 90 miles long and 16 miles wide, they would only have to remain in a home basement for 2 days, and then they could resume normal living—only 2 days this close to the center of the blast—and the total dosage they would receive would be less than 50 roentgens.

The third ellipse, which is colored in blue, 120 miles long and 25 miles wide extends from the District of Columbia to Rehoboth Beach. People could live normally. They would not have to take any special cover. They could just live their normal existence, partly indoors and partly outdoors, and would receive less than 50 roentgens, and after 2 months pretty much all danger to radiation would have dissipated or would have expired.

Mr. Chairman, these charts demonstrate graphically that it is possible to survive a large-scale nuclear attack. A good civil defense program is important not only from a lifesaving point of view, but it also serves as a strong deterrent for nuclear attack. If we are prepared, we are less likely to be attacked.

I support our defense efforts strongly, but I should like to point out that most of the billions of dollars we spend for defense is geared toward new and better methods for killing people. Does it not make good sense to spend a few million dollars to save American lives? I think so. I think we are worth it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BOB WILSON. I yield 2 additional minutes to the gentleman from New York (Mr. MITCHELL).

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to the gentleman from New York.

Mr. STRATTON. I thank the gentleman for yielding.

Could the gentleman tell how an individual would determine, first of all, how far he was from the blast; and, second, how long he should stay under in order to be safe? Do we know what kind of provisions there are for this sort of thing?

Mr. MITCHELL of New York. Right now we do not have great preparation, but what we are going to rely heavily on is our mass media—the radio—for advice as to what to do.

Mr. STRATTON. One would have to have a radio in his shelter then, presumably?

Mr. MITCHELL of New York. That would be a great help if one had. The point I am trying to make with the whole presentation is that we do not have good plans at all. In spite of the dedication of a lot of sincere professionals, nobody is listening to them because of these three

myths. We are trying to dispel those myths and point out that it is possible to survive.

Mr. STRATTON. I thank the gentleman. I think he has done a very valuable job, and I want to commend him.

Mr. MITCHELL of New York. I thank the gentleman from New York for his comments.

Mr. BENNETT. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. LUKEN).

Mr. LUKEN. Mr. Chairman, I rise in support of the full production of the B–1 bomber and in opposition of any effort to eliminate or further delay appropriations for this purpose.

In the January 1977 budget submission, $1.5 billion was included for the procurement and production of 8 B–1 bombers. Those of us who support the B–1 were concerned that the new administration's position on the production of this vital aircraft would not be as supportive. Although I consider the President's decision to reduce production levels by three aircraft a setback, I also consider his decision an indication of the current administration's appreciation for the seriousness of our failing defense posture and the necessity of the B–1 for maintenance of a strong national defense.

The effectiveness of this Nation's Triad, consisting of the intercontinental ballistic missile, nuclear submarine fleets, and strategic bombers, is contingent on the procurement of the B–1. If one leg of the Triad is weak, our entire defense structure will fall. We know, as an undisputed fact, that the B–52 which comprises our current strategic bomber squad is a weakening link. Our current B–52 fleet is becoming increasingly antiquated. The B–52 is incapable of flying under hostile surface-to-air missile systems.

With the increasingly sophisticated Soviet systems, the B–52 is virtually a sitting duck under enemy fire. If we do not proceed with the B–1 now, our national security, which is so heavily dependent on a strong strategic bomber force, will be in severe jeopardy in 1990.

As President Carter expressed to us last night in reference to his energy plan, we must look to the future, our children's future. The President was correct in saying that without a predictable policy, formulated and enacted now, the future generation of this country will suffer. The same reasoning can be applied to the B–1 bomber. By not acting now, by further delay, we will strike a fatal blow to the security and well-being of future generations by creating a situation in which the United States will constantly be on guard, rather than on the offensive.

We cannot afford to let this happen and, therefore, I urge my colleagues to support the production levels authorized by H.R. 5970 and oppose any attempt to tamper with the committee's position on this matter.

Mr. BENNETT. Mr. Chairman, I yield such time as he may consume to the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Chairman, I do not think it will come as a great surprise to the Members of the House that I want to comment on several matters in this bill which affect this Nation's Reserve Forces.

There are real improvements apparent in the Reserve program this year. The extreme equipment deficiencies which exist are beginning to improve as the Active Forces have increased the amount of modern equipment being provided the Reserves.

Continued progress for the Reserves depends on their ability to maintain strength levels. The importance of manning levels in the Reserves is extremely significant for two reasons. First, reserve units are manned in peacetime at 90 percent or less of their required strength. Any further decrease in this manning seriously affects their readiness. The second problem, and one which is not always recognized, is that when a Reserve unit is short in manpower, the unit members then must divert their energy from training in order to assist recruiting. This is a result of the fact that the Reserves have relatively few full-time recruiters and the recruiting is done in the community by the unit members. With the limited amount of training time available to reservists, these diversions are magnified in impact.

As the chairman of the subcommittee has indicated, there are today major manpower deficiencies in the Reserves. In the Army National Guard and Army Reserve, we are short almost 45,000 personnel and the situation is getting worse.

The committee is attempting to assist in resolving this problem by proposing authority for two recruiting incentives for Guard and Reserve. The incentives are educational assistance for enlistments and a reenlistment bonus for retention as has been mentioned.

I have proposed incentives of this sort to assist the reserves for several years.

The incentives in this bill have been carefully thought out. They will not necessarily be available to everyone who enlists or reenlists. The authority is discretionary with the service concerned so that these inducements can be used in the units and for skills where they are needed the most. Because the authority is in the discretion of the Secretary, he could initially use it on a test basis if he chose; however, I personally think it must be utilized to the fullest extent to really assist the reserves. This selective aspect is patterned after the incentives which have worked effectively in the active force.

As you all know, educational incentives in the active force have been one of the major inducements for individuals to enlist, and while this reserve program is much less attractive than those, it should be a real benefit in attracting individuals who are motivated to improve themselves through further education.

The reenlistment bonus is to be used to induce key personnel to reenlist for a 3- or 6-year period at that point in their service when a decision to stay in the Reserves for a career is made. This bonus is limited specifically to only that class of personnel who originally joined the military through the reserve program because these are the personnel who are not reenlisting at an acceptable rate currently.

Both of these programs are designed to allow the application of resources at those points where they are needed the most.

The total cost of this legislation if it is used fully would be $31 million in fiscal year 1978 and $43 million by fiscal year 1982.

The committee has heard much of the criticism of certain Reserve units or aspects of the Reserve program which have been less effective than they should be. We are working to identify and get rid of these soft areas. Units of this sort damage the entire Reserve program.

The cure for these problems, however, is not to withdraw funds. The United States today is absolutely dependent on the Reserves for the defense of our Nation. That fact is not completely understood. Let me give you a couple of examples of the percentage of our current military capability provided by the Reserves: 54 percent of the deployable forces in the Army are in the Reserves; 52 percent of all infantry and armor battalions are in the Reserves; 61 percent of our tactical capabilities are in the Reserves; 60 percent of this Nation's air defense interceptors are in the Reserves; and 50 percent of all the mission of the Air Force and, as I said, these are only a few examples.

The Reserves are capable of these tasks, but to maintain the readiness which is necessary they need assistance. We have begun to recognize the equipment shortages and act on these, but assistance is required today in order to keep them manned with quality personnel.

I urge all of the Members of the House to support these Reserve incentives proposed by the committee in sections 402 and 403 of the bill.

Mr. HILLIS. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Indiana.

Mr. HILLIS. Mr. Chairman, the gentleman is making a very important statement about defense. I would like to ask the gentleman a question. Is it not a fact that if we try to build an active force from 16 divisions, some of those are constituted by Reserve brigades or battalion forces that work right with and train with the active forces? I am thinking of the 25th Division in Hawaii.

Mr. MONTGOMERY. The gentleman is correct. Several years ago we started integrating the Guard and Reserve into the regular forces. It is working well. We are going to have to keep these National Guard strengths up. If we call out the Regular Army divisions the Reserves will go with them, and we cannot do it if we do not keep up their strength and equipment.

Mr. HILLIS. What is the cost to the taxpayer of maintaining a good Reserve National Guard unit as compared with their active duty counterpart forces?

Mr. MONTGOMERY. To keep an Air Guard squadron to do the mission it has to do would cost half as much as to keep a Regular Air Force squadron on active

duty. It costs half as much to keep an Air Guard squadron. To keep a Regular infantry brigade as against a National Guard brigade, it costs 8 times as much to keep the Regular infantry brigade. I am saying it would cost one-eighth as much to the taxpayer to keep a National Guard as against the Regular infantry. It is much cheaper certainly.

Mr. HILLIS. Is it my recollection that the Air Guard participates in active maneuvers of the Air Force?

Mr. MONTGOMERY. The Air Guard won the William Tell competition this year against the Canadian Air Force and against the Regular Air Force.

Mr. HILLIS. I thank the gentleman.

Mr. BENNETT. Mr. Chairman, I yield 7 minutes to the gentleman from California (Mr. DELLUMS).

Mr. DELLUMS. Mr. Chairman, we all feel this is a time for choice. The Indochina war is over, and the immediate political battles surrounding it have ceased with the change of administration. No one is really sure exactly what the principles of American foreign policy will be in the next several years, and it is easy to sense a feeling of expectancy and desire for some explicitness and clarity. But the present authorization bill for the Defense Department does not contribute to either clarity or the process of making necessary choices.

I strongly believe that a new understanding of this Nation's role in the world is necessary and in fact inevitable. Both the intractability of the world situation and the costs of carrying out our declared aims are increasing at a tremendous rate. Even if we stick to status quo positions, choices must soon be made.

I realize the Carter administration needs some time to arrive at a definitive statement of where they wish our overall foreign and military policy to be headed. But there is still no excuse for just holding the line when the line is nonexistent, for we cannot afford the cost of continuing on our present course.

This may seem an unduly harsh dilemma, but let us look at some figures. By the Pentagon's own estimates the budget will be at least $200 billion by 1985, if not before. And this figure alone does not give an adequate idea of the real costs. In the first place, energy costs and the costs of other technological resources of innovative technical talent—our main weapon in the battle against inflation and for the achievement of productivity increase—will seem more and more of an unearned privilege for the Pentagon to soak up in the way it has done in the past.

And the Pentagon estimates relate to the cost of our foreign policy in a world much like today, but I believe it is clear that the international environment is going to deteriorate in terms of predictability, order, and general ability for one country to get its way. The cost of attaining any coherent goal in world politics is going to go way up. We will, therefore, see more and more of a squeeze between rising costs and more difficult tasks. It should be the job of statesmanship to foresee this squeeze and take appropriate measures ahead of time.

I have great disagreement with former Secretary of Defense James Schlesinger's definition of what our role in the world should be and what our choices should be. I believe, however, that Mr. Schlesinger acted in a statemanshiplike way when he warned the Nation that we could not continue the present foreign policy at no extra costs. His reward for presenting this issue in stark and rational terms was to be fired. Now he is back at work in the administration. Let us hope that the administration will not indefinately continue to fudge the issue, as symbolized by the "Don't rock the boat" bill we have reported in the House.

What the new administration and what President Carter will advocate, it is too early to say. But we cannot long evade a choice, the essence of which relates to a match between our world ambitions and the percentage of national resources we are prepared to sacrifice to these ambitions. I ask Congress to do its part to redefine our foreign and military policy in a way that makes sense in today's world, not the world of the 1950's.

The military budget of fiscal year 1978 has been determined by simply reacting to the perceived Soviet buildup in strategic and conventional armament, not by a judgment of whether it is relevant to the defense of our country or its people. It is my belief that there are several areas in which decisions to either eliminate or defer spending are indeed warranted.

Among these I would include:

First. The XM–1 tank, which hurts attempts at further cooperation with the NATO countries and the standardization that is absolutely necessary if NATO is to pull the weight that its numbers would indicate.

Second. The B–1 is an unnecessary luxury and an unwarranted waste of money. Given its high cost, the possibility of air launch cruise missiles as a more efficient and less costly alternative and the large number of late model B–52's available, we should cancel plans to produce the B–1.

Third. There is still much service left in the Polaris/Poseidon submarines, so we should ease off on Trident development.

Fourth. The money appropriated for civil defense is a complete waste.

I have mentioned briefly some of the areas where we are spending money needlessly and even dangerously. There are two others that I feel are even more important, in terms of their consequence. I will be offering amendments on these subjects later in the debate. I continue to believe that we should further cut our overseas troop commitment. I shall be offering an amendment on this subject, calling for a withdrawal of 7,000 overseas, land-based troops and an overall reduction in end strengths.

I will be offering a second amendment to end the MX missile development. This program is expensive, but more than that it is destabilizing and it threatens to destroy the possibility of meaningful arms control agreement. It will decrease, not increase, our real security.

There are costs to any course of action, but the greatest costs of all are associated with simply continuing the old routine, keeping the budget more or less in line, and hoping the world will take our increasingly hollow rhetoric seriously. I ask Congress not to fly from reality and not to mislead the people.

I will not say the course of global interventionism is impossible. We can do it, if we perceive it an appropriate role and we are willing to pay the price. Part of that price is the indefinite postponement of social reform by the Federal Government and the Carter administration.[1] But if the American people with their eyes open, make that choice, then we must defer to it.

What would be unacceptable on the part of Congress is to fuzz the hard necessities that force a choice. If we try both to maintain our commitment and to keep the cost of the budget within what most people would consider reasonable grounds, we will only end up earning contempt because we assuredly will fail to accomplish either objective. The present bill takes us further away from the time of choice.

Mr. BOB WILSON. Mr. Chairman, I yield such time as he may consume to the gentleman from South Carolina (Mr. SPENCE).

Mr. SPENCE. Mr. Chairman, I rise in support of H.R. 5970, although somewhat reluctantly, with respect to the naval ship construction provisions of the bill.

The Armed Services Committee has already expressed its displeasure over the ship construction program in its report to the Congress. The program is inadequate for several reasons:

The 11 naval combatant vessels requested falls far short of the number required to rebuild the Navy for the future.

The program lacks balance. Too much emphasis is placed on smaller, less capable ships.

The program does not adequately address the overall needs of the Navy to cope with the Soviet potential in air, surface, and undersea warfare.

The program does nothing to halt our decline in naval power toward a Navy second to none.

In total combatants the Soviets outnumber us 2 to 1. Our naval leaders tell us that despite this imbalance, our naval forces hold a marginal edge of superiority. I am not consoled by that evaluation. We are told that our carrier forces are the key element, the thread by which we hold superiority. Yet the shipbuilding program for fiscal year 1978 eliminated the additional carrier the Navy needed to balance its carrier forces in the 1980's.

The potential in the Soviet Fleet is toward larger numbers of modern and more capable ships. The Soviets added five nuclear attack vessels to their fleet last year. We added only one to ours. The Soviets have markedly increased construction of large, modern shipyards. There is strong evidence that the trend in the number of new Soviet surface combatants will be upward.

By comparison, U.S. naval shipbuilding trends have been downward. The current program does nothing to reverse that situation.

[1] I would add parenthetically—social reform that is desperately needed and growing more costly each day, they are not addressed.

The fiscal year 1978 budget contained a request for only one SSN–688 class attack submarine and for long-lead funding for only one submarine in fiscal year 1979. The committee recommends authorization for two nuclear-powered submarines and long lead for three additional submarines, most of which is related to nuclear components.

The committee action would maintain the established building program ratio at 3–2–3–2, or five attack submarines every 2 years in order to attain adequate submarine force levels.

The committee recommends authorization of $187 million for long lead nuclear propulsion items for a strike cruiser. The funds were requested by the Navy, but not included in the budget request. The strike cruiser fills a gap in the Navy's major combatant inventory. The strike cruiser provides the balance the Navy requires between large and smaller combatant surface vessels. The strike cruiser adds flexibility to the Navy's potential for independent worldwide fleet operations, whenever and wherever required. Frigates cannot be sent on independent worldwide missions. Without a strike cruiser class we will unwisely restrict the Navy's operational potential.

The committee concurred in the budget request for nine guided missile frigates, FFG–7's, and recommended authorization for them. These ships are designed to provide protection in low threat areas for convoys, replenishment groups, and amphibious task groups.

The committee did express concern over the FFG program in the following areas:

First. Cost escalation for a low mix ship;

Second. The large numbers proposed in the overall program for these relatively ineffective ships;

Third. The additional costs of modifications necessary to enable these ships to perform their mission; and

Fourth. The lack of space and weight reserved for future weapons system growth.

The committee recommends authorization for the DDG–2 destroyer modifications program. The first 6 of 23 ships in this class will have their weapons system upgraded with the addition of the standard ARM missile and Harpoon.

The committee reduced the number of auxiliary ships in the budget request. The committee recommended authorization for two fleet oilers instead of four and three fleet ocean tugs instead of five. This is in keeping with the committee position that more money is needed for procurement for combatant vessels over support ships.

Overall, the committee's recommendations total $5.7 billion for fiscal year 1978 shipbuilding and conversion, which is $45.6 million below the budget request.

As I remarked earlier, I personally am not happy with what I have to present to you today. I wish that the realities of our shipbui'ding predicament were different, but they are not. My hope is that the Congress will take the time to reflect more closely on what is happening to our Navy so that we may revise the uncertain course we have undertaken. Until such time as this can reasonably be done, I recommend support of H.R. 5970.

At this point I have some additional personal things to say. I would appreciate your attention while I talk for a few minutes about seapower and the U.S. Navy in somewhat philosophical terms.

I think it is necessary to do that to bring into focus how far we have come in this Congress and where we are heading.

The life's blood of this Nation's survival is its dependence upon control of the seas. I do not think anyone in this House would seriously challenge that premise.

Control of the sea. That has to be the bottom line. I am sure every Member is aware that over 98 percent of America's trade is carried by sea, and that among our imports are numerous strategic materials vital to the defense of this Nation.

Control of the seas. What does it mean?

The more I think about sea control, the more complex the idea becomes, and the more I appreciate how important it is that our naval forces be able to accomplish that control. In my mind, unobstructed use of the seas is absolutely essential to this country's best interests.

Whether the answer comes from the writings of Mahon, Gorshkov, or the Congressional Budget Office, the inevitable conclusions must be that control of the sea is measured by a nation's ability to, at all times, traverse the oceans freely, where needed, and if necessary, to deny its use to others.

There is no question in my mind that the United States must have a balanced fleet to control the sea. How we achieve a balanced fleet is a difficult and expensive proposition. As the saying goes, you get what you pay for.

Article I, section 8 of the Constitution of the United States contains the stipulation that the Congress shall "provide and maintain a Navy." Is the Congress adequately providing for a Navy? I do not think so.

I think the Congress has lost sight of what it costs to provide the kind of Navy America needs to insure control of the sea. The costs are high, but not in comparison to other costs for which the Congress is also responsible. I become very concerned when prominent Government officials, those in the executive branch as well as the Congress, tell me that because of budgetary constraints the Navy will have to do the best it can under the circumstances. I can buy that approach for a whole lot of programs funded by the Congress which are not as essential to our national security as control of the sea, but I cannot make myself buy a second-rate Navy.

Why play Russian roulette?

It takes time to build capital ships of the line. The ship that Congress authorizes this year may not be ready for sea for 5 to 7 years. Generally speaking, the bigger the ship, the longer it takes to build. Consequently, the rate at which ships can be built, becomes a very important consideration for a balanced shipbuilding program.

The program offered by the House Armed Services Committee took into consideration time and cost factors in terms of operational requirements. I do not think anyone in Congress would seriously question the Navy's need to rebuild its inventory of ships, combatants and noncombatants. The choice is one of priorities.

In the opinion of the Seapower Subcommittee, it is necessary to make certain that the Navy has a sufficient number of first-line capital ships in the years ahead to form the nucleus around which the other ships of the line will be complimentary. In simplest terms, we considered the time it takes to build ships, their cost, bounced that against the inventory required to achieve a balanced naval force, and came up with our recommendations.

We did not make extravagant recommendations. We were mindful of the fact that it would not be prudent to build all big ships and no little ones. That point did not elude us. However, it was evident that we must proceed with building certain large ships now in order to have achieved a balanced inventory in the future. In other words, the Seapower Subcommittee felt that the prudent risk was to opt for a few highly capable ships with the emphasis on quality, as well as the recommended number of less capable surface combatants.

That is why a few months ago we came to recommend proceeding with a fourth *Nimitz* class aircraft carrier, the strike cruiser and the Aegis conversion of the nuclear cruiser *Long Beach*. These were quality choices. They were cost-effective choices.

The record is clear on that point. Those military professionals who ought to know something about what makes a Navy tick, were unanimous in their opinion that it was the right way to go, the right program for the dollars available. Even the National Security Council study of November of last year provided support for our deliberations and final conclusions.

The *Nimitz* class carrier is at least 40 percent more capable than the smaller carrier that has been proposed. *Nimitz* can go into high threat areas, others cannot. Carriers not able to go into high threat areas automatically extend the high threat area without the enemy having to do a thing. The Navy vitally needs a carrier with the capabilities of a *Nimitz* to round out its carrier task forces in the 1990's. The fourth *Nimitz* would have replaced the *Midway*, which will then be over 45 years old.

The strike cruiser would provide the Navy with a powerful warship possessing a galaxy of modern weapons systems. Most importantly, it would be a warship capable of independent operations outside the umbrella of the carrier task force. We have no surface warships, other than the carrier, capable of independent operations today.

The *Long Beach* conversion would have introduced to the fleet the Navy's sophisticated anti-aircraft and anti-missile defense system, the Aegis system, on a nuclear-propelled hull that is scheduled for weapons system conversion anyway, sooner and cheaper than any other prospective Aegis platform.

These ships provide sound naval force

options for the United States. These are formidable ships. They are the kind of ships which bring credibility to the concept of control of the sea. We recommended that they be built.

Then, almost unbelievably, the executive branch announced that we could not afford another *Nimitz* carrier, or a strike cruiser, or conversion of the *Long Beach*. We learned that it was a budgetary decision. Almost simultaneously within the Congress there were rumblings about the cost of these ships. The logic of the arguments seemed to be based, less on the relative merits of the alternative costs of lesser ships, than they were in support of a budgetary decision. The Congress should provide the Navy with the kind of ships it ought to have. How ironical. The richest nation in the world cannot afford to build a quality Navy to insure protection of its lifeline; to control the seas.

I hope someone out there is listening. The kind of a Navy this country ought to have should not be obfuscated by the idea that there are different ways to skin a cat. There are. What is troublesome to me is this. During 14 days of testimony before the Seapower Subcommittee, no professional military person, no documentary evidence, nor studies of any kind, appeared to justify the executive branch action. Not even to this day has any credible justification been given to Congress for that action. The executive branch has merely said that that is the way we ought to go. The Congress seems to have made a decision based on faith devoid of substance.

I sincerely believe that the Congress acted hastily for whatever reasons. The Congress should have been suspect of the dramatic shift which occurred in so short a time between Congresses. I urge my colleagues to think about that very carefully. The media reported that the action of the Congress marked a turning point in the course of naval history. Maybe so. But if this is so, I for one, want to be very sure that we have done the right thing.

I personally feel we have made a mistake. I think we have acted hastily and prematurely. I do not think the Congress had sufficient evidence to vote as it did. I believe the vote was a budgetary vote rather than a vote for a better Navy.

The price tag on control of the sea will, in the final analysis, match the quality of control. We should ask, "What is the price Americans must pay to insure freedom of the seas?" That is the serious question Congress must address, deliberate on, seek the best answer to, and ultimately live with.

Mr. BOB WILSON. Mr. Chairman, I yield 5 minutes to the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. Mr. Chairman, I rise in very strong support of H.R. 5970, and I want to talk just very briefly about one of the many systems that is included in this bill.

First, we all know this is a very expensive bill. It represents about one-third of our total defense budget. It covers many systems. It covers personnel. I want to talk a little bit about the XM-1 tank, because of all of the figures shown before us perhaps the greatest disparity is shown in the figure of tanks built and manned by American forces and those by the U.S.S.R. We are outmanned almost 5 to 1. And this is another more alarming trend, that in current production figures we are being outproduced quite heavily. A great deal of the tank inventory, of course, of the T-52, both older tanks.

We know them pretty well, having had a chance to study them as a result of the Mideast war. But there is also a new tank known as the T-72, which we know very little about. The thing about the T-72 is that it is in production, it is in the hands of the Soviet troops, and it is deployed where it could be used quickly if war were to develop. It is imperative that we proceed with a new tank on our own part. We are heavily relying today on the M-60, which is roughly equivalent to the T-62 developed in the 1950's. I do not want to downgrade the M-60. It was a good tank in its day. But it is like comparing a race car of the 1950's when put into Indianapolis Speedway competition with a 1970's race car. There is no doubt about who is going to win. That is the case with the XM-1.

First of all, the quality of the tank is excellent. It is one of the best vehicles which has been developed, and Gen. Robert Baird deserves a great deal of credit for this, having put together a very good program. It was conducted with a runoff between the best that private industry could provide. General Motors and Chrysler Corp. had a very heated competition. The Chrysler XM-1 was selected. It was then placed against the German Leopard, and it survived that test very well. It is based upon what I think is important to the American fighting ability and the American fighting man, who deserves the best survivability.

But another area in which it could have run into trouble, in my opinion, and which is covered in the bill, has to do with the firepower of the tank and what type of gun will be deployed on it. There has been a lot appearing in the press, in the New York Times, in the Washington Post, throughout the press, about interchangeability, about commonality, and that we should select the 120-millimeter gun and place it on the tank. The committee's feeling was that we should have the best tank we can field, not only in the protection of the crew, but in the defensive capacity of the tank, and section 204 is aimed at that.

Mr. Chairman, I would like to ask my colleague, the gentleman from New York (Mr. STRATTON), who I think is a real expert in this field, if he would like to make a few comments about section 204 which appears in the bill, relating to the 120-millimeter gun.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, I appreciate the gentleman's remarks. Actually, the gentleman from Indiana (Mr. HILLIS), himself is an expert in this field. He and I had the opportunity last fall to conduct some hearings into the XM-1 and into the action which the Department of Defense took in making some adjustments and changes in the XM-1 contract.

This spring the Subcommittee on Investigations of which I am chairman has also been taking another look into the progress of the XM-1. The changes that Secretary Rumsfeld brought about last year were designed primarily to bring about standardization, as the gentleman recalls.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. HILLIS) has expired.

Mr. BOB WILSON. Mr. Chairman, I yield 3 additional minutes to the gentleman from Indiana (Mr. HILLIS).

Mr. STRATTON. Mr. Chairman, will the gentleman yield further?

Mr. HILLIS. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, if I may continue, the turbine engine was incorporated in the design which the Defense Department finally ordered. However, the question of the gun to be employed, whether it should be the 120 mm. or the 105 mm., was left to the future.

As a result of our committee's actions, the Defense Department got the Germans to agree that a decision would not be made on whether we would go to the 120 mm. until December, but there have been some reports in the press from Brussels and elsewhere that the Germans were putting a great deal of pressure on the United States to accept the 120-mm. gun right away in the interest of amity, in the interest of diplomatic unity, and in the interest of standardization. There would be a very serious danger, I think, if we accepted a gun without first having tested it.

So what we have done is to put into this section 204 of the bill, as the gentleman pointed out, the requirement that the committee itself agreed on last fall as a result of the Hillis resolution that we should not adopt the 120-mm. gun for the XM-1 unless it was adequately tested and unless those tests demonstrated that it was manifestly superior to the 105-mm. gun, which is really the NATO standard today, and also that we should not adopt it until Congress itself and the Committee on Armed Services had an opportunity to be apprised of this situation and make their own decision through a reprograming.

That essentially is what we have done there. We have incorporated, in other words, the Hillis resolution, which was a very valuable resolution that was adopted last fall and which the Defense Department has been taking note of. We put it in here as a part of the statutory law.

Mr. HILLIS. Mr. Chairman, I thank the gentleman for his contribution.

Also in the committee report I call the attention of the gentleman from New York (Mr. STRATTON) to the fact that the committee is recommending that as soon as practicable we phase out M60 production and go to all XM-1 production and shoot for a figure of 7,000 to 8,000 tanks.

Does the gentleman think this is a practical solution to help step up the quality of our weapons and make up for the deficiency in quantity?

Mr. STRATTON. Absolutely. Mr. Chairman, if the gentleman will yield further, there is no question about the fact that we need more tanks and we need them more rapidly.

Some people who are not knowledgeable about the situation have been quoted in the press as saying that antitank guns are all we need, and that tank guns are outmoded. That is manifestly untrue. We need more tanks and more guns, and that is what the committee indicated.

I might say further, if the gentleman will yield, that while the new tank, as the contract has been issued, would include a turbine engine, we discovered that the Army needs another test.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. HILLIS) has again expired.

Mr. BOB WILSON. Mr. Chairman, I yield 15 additional seconds to the gentleman from Indiana (Mr. HILLIS).

Mr. STRATTON. Mr. Chairman, if the gentleman will yield further and if I may take a long 15 seconds, the turbine is going to be tested at a cost of $30 million for 100 miles. I think that this is important if we are going to rely on a turbine engine, and I think we ought to have a standby diesel capacity. So that is what the committee has indicated should be added.

Mr. BENNETT. Mr. Chairman, I yield 5 minutes to the gentleman from Florida (Mr. SIKES).

Mr. SIKES. Mr. Chairman, first let me express my pleasure at the splendid manner in which our distinguished colleague Mr. BENNETT is presenting the important bill to the House. We in Florida are indeed proud of the contributions and the leadership in Congress demonstrated by this conscientious and dedicated public servant. His expertise in military matters is indeed impressive.

Mr. Chairman, there is genuine apprehension that much harm would be done to naval operations if the proposed withdrawal of the organic airlift capability of the Naval Reserve is carried out.

A decision has been made that the Air Force would assume strategic and tactical airlift missions for all services by the military airlift command by the end of fiscal year 1977. This would have meant the elimination of the Navy airlift forces. The rationale was that MAC programs were adequate to meet all Navy, Marine Corps, and Naval Reserve commitments.

It has subsequently been validated that MAC has little to no unsubscribed flying hours to devote to Department of the Navy—DON—commitments. Accordingly, the issue now is how to most responsively and cost-effectively meet Navy airlift requirements.

Navy has assigned the total CONUS airlift mission to the Naval Reserve. This is in consonance with the SASC direction regarding the transfer of this mission. Under this program, Reserve squadrons will be based at Atlanta, Norfolk, Glenview, Dallas, and Alameda. This program provides effective peacetime support while also providing worldwide mobilized airlift squadron manning of four crews per aircraft.

The Navy C–9B aircraft is a derivative of the commercial DC–9 airliner. Its cargo/passenger convertibility, extended range—compared to the DC–9—and very high reliability are ideally and uniquely suited to the DON mission. It is considerably more reliable and cost effective than the MAC C–130. Commercial DC–9's are not configured to meet the unique DON mission requirement.

DON modernization is inseparably related to a viable Naval Reserve program. The loss to the Reserve program will be severe if their airlift mission is deleted not only due to the airlift unit personnel directly affected, but also due to the essential, fully flexible and responsive airlift provided to both surface and aviation reservists to weekend drill and active duty training sites.

Approval of Navy modernization is considered an issue of vital importance to the assured capability and readiness of the Navy, Marine Corps, and Naval Reserve.

I note that the distinguished Committee on Armed Services has adopted language in the report which accompanies the bill now under consideration; language which is intended to insure the continuation of an organic airlift capability by the Naval Reserve until a detailed inquiry into the entire matter can be conducted by the Committee on Armed Services. I applaud this action by the committee. I strongly urge the retention of the capability of the Naval Reserve to carry on the required Navy airlift missions. I now quote from the Authorization Report:

> The Committee has been carefully monitoring the Department of Defense's efforts to withdraw the organic airlift capability of the Naval Reserve. The Committee is presently unconvinced concerning the efficacy of this proposal and will hold hearings on the subject this year. Until those hearings are held, no action should be taken to eliminate the personnel assigned to the airlift function in the Naval Reserve.

I now ask the distinguished chairman whether my interpretation of the intentions of the committee is correct.

Mr. BENNETT. Mr. Chairman, the answer to that is certainly yes.

I want to congratulate the gentleman from Florida (Mr. SIKES), who has for many, many years done so much for the national defense of our country. I appreciate his bringing up this important point at this late hour.

Mr. Chairman, if we read the language in this report, it does say that the "committee is presently unconvinced." That is pretty strong language. Then there is a pledge to hold hearings. With respect to that, the gentleman from Illinois (Mr. PRICE) talked to me earlier today about that matter. He assures me that they will hold hearings.

The report also says that no action should be taken to eliminate the personnel assigned to the airlift function in the Naval Reserve until those hearings are actually held.

Mr. SIKES. Mr. Chairman, I thank the gentleman from Florida (Mr. BENNETT).

Mr. BOB WILSON. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. BADHAM).

Mr. BADHAM. Mr. Chairman, this bill H.R. 5970 as you have been told is a necessary bill since it provides the authorization on which appropriations for the Department of Defense are based. I think if I had to characterize it further, I would call it the minimum-authorization bill.

We are essentially in a time of transition when a new administration is still determining its position on many defense policies. The bill provides the minimum investment required for national defense during that transition period.

It may even be too much to say the bill represents the minimum level of authorization required. The committee agreed to a total authorization which is consistent with the request of President Carter even though, in those items subject to authorization, President Carter's requests were more than $2 billion below President Ford's. I am frankly concerned that perhaps we have cut too deep.

I think it is very interesting that the committee bill is only $60.8 million above President Carter's request. By contrast, last year the authorization was a bill which was $698 million above the request of the President.

I also have to say, quite frankly, that this transition authorization leaves a lot of work unattended. It is past the time when we should get on with making some needed improvements in our defense establishment, and to my mind this bill does not provide all that is required to begin those improvements. I am deeply concerned about the inadequacy of the budget on ship construction and the uncertain nature of the naval policies presently being pursued in the Pentagon.

It has been explained to you that our bill provides a ship-construction authorization which is actually $45.6 million below President Carter's request. That is true. It is also true that we have deleted some auxiliary ships and put greater emphasis on combatants. The committee specifically added money for two attack submarines instead of the one requested and also included $192.3 million for advance procurement of long-lead items for three additional submarines. The committee also added $187 million for long-lead procurement for a nuclear strike cruiser. No funds have been requested for this ship, but I understand that the DOD now supports this add on.

While the committee's bill is an improvement over the administration's request, it is far from an adequate shipbuilding program. The committee did not provide funds for an aircraft carrier of the Nimitz class in the bill simply because the House action in support of the President's rescission of the money for the Nimitz-class carrier earlier in the year in favor of an unknown-class carrier 60 percent capable relative to Nimitz class. I am convinced that a majority of our committee members continue to support the need for a Nimitz-class carrier as I am sure the majority of the Members support getting the Aegis defense system on a nuclear-powered ship as rapidly as possible. These are the highest priority items in the opinion of the Chief of Naval Operations.

I am deeply disturbed by the delay in building the Nimitz and the delay in converting the nuclear cruiser Long Beach to an Aegis ship. I know that we will not change these matters in the debate on this bill. But I bring this point up to emphasize to you that the Congress must be a leader and not a follower in determining defense policy; and nowhere is congressional leadership more necessary than in the drifting nature of our policy regarding the future of the Navy.

I would remind you that if it had not been for the aggressive leadership of the Congress, we would not have had the Polaris submarine, or any nuclear submarines, nearly as early as we did. It was the Congress that had to push the Defense Department and the Navy into developing this program which became, and still is, the No. 1 deterrent in our defense arsenal. If we are going to have an adequate Navy in the future, the Congress is going to have to provide the leadership.

I would also have you understand that while the committee as a whole has acquiesced in some of the reductions made by the President, the committee continues to be deeply concerned about the readiness of our defense forces. The committee has made various reductions in the research-and-development title of the bill, but these changes were made with an eye to redirecting money to systems which bring hardware into being more rapidly and which will improve the near-term readiness of our forces.

The quantitative advantage in military hardware that the Soviets have today, together with the qualitative improvements that we see them making in their systems all the time, could lead to Soviet military superiority within the next decade if there is not a proper response by the United States to reverse the trend. Our committee's actions in the research-and-development area are designed to begin reversal of the trend.

But this effort must be coordinated with a willingness to provide support for needed growth in our defense establishment.

As we said in our report:

A sustained effort over an extended period is necessary to regain the competitive military posture needed. It cannot be just a 1-year effort.

So in summary I ask you to support the committee's bill. I am sorry it is not larger. I really think it should be higher.

We have heard many shades of opinion—from those who think our defense budget should be increased substantially to those who think it should be dramatically cut. What is significant to me is that no expert of any renown that I know of doubts the buildup in Soviet conventional or strategic forces. No evidence that we have been able to find suggests that our defenses should be reduced. The SALT initiatives appear to be going badly. The Soviets have shown very clearly that they are not interested in human rights and they do not like people questioning their denial of human rights. The daily headlines from Africa show that the Soviets are as aggressive as ever in attempting to spread their influence and in supporting those who threaten peace around the world. The evidence mounts steadily that the Soviet Navy has succeeded in building a worldwide naval force capable of challenging our own and, as our report points out, even the Chief of Naval Operations concedes there are situations where our naval forces would not be able to carry the day against the Soviets.

We need improvement in our defense programs, and we need congressional leadership in devising those improvements. As a beginning, this bill is the minimum consistent with the needs of our national security. I urge your support of it.

Mr. BOB WILSON. Mr. Chairman, I should like to take this opportunity to congratulate the acting chairman of our committee, the gentleman from Florida (Mr. BENNETT) who I think has done an admirable job in handling this bill. I know he joins me and the other members of our committee in wishing a speedy recovery to our chairman, the gentleman from Illinois (Mr. PRICE) who, as was mentioned earlier during the debate, is a temporary patient at the hospital. But I am sure he will be back with us within a matter of a few days, and we wish him well.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. BOB WILSON. I yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding.

I just wanted to add the thought of one Member who has sat here during the entire general debate today. Not as one who was familiar with this legislation, I certainly am greatly distressed by what I have heard as to estimates given by the members of the Committee on Armed Services. I think it is almost a national disgrace, that during the entire time of this debate there were no more than 30 Members on the floor, and most of those present were members of the Committee on Armed Services. I think this is a product of perhaps both the lack of attention of the Members of the House to important matters but also the new rules under which we labor. I am quite sure that tomorrow during the 5-minute rule when axes are to be ground, everyone will be here in great force but they will have missed the benefit of some very enlightening and distressing debate here this afternoon.

Mr. BOB WILSON. I thank the gentleman for his comments.

I must say I agree with him. I think our biggest enemy is apathy—our largest enemy in the world. We are too apathetic.

Mr. Chairman, I yield back the remainder of my time.

Mr. BENNETT. Mr. Chairman, first I want to say that I, like every Member of Congress, am distressed that there is any illness on the part of the chairman of our full committee, the gentleman from Illinois (Mr. PRICE) but as has been said, we wish him well and hope he will be back soon.

Mr. Chairman, I want to respond to the nice things that were said by the gentleman from California. Certainly I would not have been brazen enough to come here and handle this bill without his good assistance, because he has been a strong right arm to the national defense of our country, and everyone will agree that he has provided the guidance and given the attention to the work that it deserves. I am grateful, and I am certain our country is grateful, too.

Mr. Chairman, I yield 3 minutes to the gentleman from Alabama (Mr. NICHOLS).

Mr. NICHOLS. Mr. Chairman, I would like to rise in strong support of H.R. 5970, as reported by the House Armed Services Committee.

First, from an overall perspective, I believe that—as a result of the detailed hearings supporting the recommendations of the committee—the authorization bill will provide the defense resources required by the Nation to meet its needs at least cost. Judicious inspection of the overall procurement program, on the one hand, has resulted in a recommendation that will appropriately extend our defense posture in the near term. Careful review of the research, development, test, and evaluation programs, on the other hand, assures that our defense posture in the future will be properly coordinated and supported by present efforts. I think the programs authorized by this bill reflect an indepth understanding of requirements for defense and the most efficient means of meeting those requirements.

Second, more specifically, I would like to emphasize the importance of two general provisions of this bill that relate directly to the compensation of military personnel.

One of these provisions would establish permissive authority for financial incentives to assist in Reserve recruiting. Educational assistance for high school graduates who enlist for 8 years would not only provide an incentive for the type of individual we need in the reserves—one who seeks to improve himself or herself through education—but also, both the services and society receive a direct return on this type of investment in terms of a more highly educated individual. In addition, a reenlistment bonus for the service member with less than 10 years of service who reenlists in the Selected Reserve provides the mechanism to offer a lump sum and periodic payment as an incentive to personnel with needed skills.

The other of these general provisions affecting the compensation of our military personnel relates to the temporary extension of the authority to provide a subsistence allowance to Marine Corps officer candidates while they are pursuing their undergrauate training. This payment of $100 per month during each of the 9 months of the college year has proven to be an effective program for procuring Marine Corps officers. The extension is required in order to afford the Congress the opportunity to evaluate a proposal that would make this authority permanent and extend the payment to other similar officer procurement programs.

Mr. Chairman, I would like to conclude, reiterating again, my strong sup-

port for all provisions of H.R. 5970. A great deal of research and analysis was performed during the deliberations that resulted in this bill. I believe it reflects the best possible authorization program that could have been arrived at.

Mr. BENNETT. Mr. Chairman, I yield 3 minutes to the gentleman from Georgia (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Chairman, title VII of H.R. 5970 proposes $134.8 million for civil defense for fiscal year 1978. This authorization level is based upon a careful review and examination of the current status of the U.S. civil defense program. It is the committee's judgment that for the United States to have a viable program a major budget initiative of $134.8 million is appropriate at this time.

This recommended increase of $44.8 million above President Ford's and President Carter's budget request of $90 million is designed to provide a full-growth budget for civil defense. Such a budget will enable the Defense Civil Preparedness Agency—DCPA—to move ahead with deferred construction, remedial building and delayed procurement and personnel initiatives. It will strengthen the research and development base and the systems development effort, both of which have received minimal support for the past few years. These programs are essential for identifying long-range policy and program objectives and for measuring the effectiveness of current activities.

That a significant increase is recommended at this time underscores the committee's concern that civil defense preparedness has not received the necessary attention it requires. The committee intends to utilize the annual authorization process as provided for in last year's defense authorization procurement bill as a means of making certain that the U.S. civil defense program does not wither away from neglect as long as a legitimate requirement for it exists. As its first authorization recommendation, the $134.8 million recommendation signifies that the committee is not satisfied with the current pace and direction of the program and believes that it is essential to move ahead decisively at this time—both budgetarily and programmatically.

The posture of the United States' civil preparedness program does not match its responsibilities. Serious concern exists over the program's efficacy. The General Accounting Office, in a forthcoming report to the Congress, identifies a number of deficiencies with the civil defense system in the United States. Unless corrective action is taken, the program will continue to flounder. This budget recommendation of $134.8 million will not solve all of the problems but it will provide a solid start. If the United States is serious about its civil defense program it will take a budget effort of this level to make the necessary improvements.

Specifically, and most importantly, the $134.8 million authorization will enable the DCPA to complete its construction of hardened regional emergency operating centers. Six of eight centers are fully protected; the remaining two in California and Illinois are at this time vulnerable and unprotected. These centers are essential for providing for continuity of Government and emergency functions during times of disaster—both natural and nuclear attack related.

Also, of particular interest, is further emphasis on crisis relocation. And on education of the populace as to survivability.

Additionally, DCPA will be able to meet $9 million of the $13 million requested by the States and local governments for their emergency centers. These will complement the national effort and enhance the warning and communications upgrade programs contained in this budget.

Mr. Chairman, these are a few of the highlights associated with this program. The committee believes that it deserves the support of the Members. By doing so, the Congress will serve notice that it is time to rescue the civil defense program from its present doldrums and to move ahead with a civil defense preparedness system that is capable of meeting its responsibilities.

Mr. BENNETT. Mr. Chairman, I yield 2 minutes to the gentleman from Virginia (Mr. DAN DANIEL).

Mr. DAN DANIEL. Mr. Chairman, while this Member intends to vote for the bill before the Committee, he is gravely concerned and disturbed. Nikolai Lenin said to be generous to one's enemy is to be cruel to one's self. The deficiencies in this bill represent generosity beyond any reasonable level.

Mr. Chairman, I yield back the remainder of my time.

Mr. BENNETT. Mr. Chairman, I yield 2 minutes to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. Mr. Chairman, I want to bear the word of my constituents to the Congress in opposition to the B–1 bomber. My constituents believe that this money in this bill could much better be expended on strengthening our economy here at home and creating jobs in more peaceful areas. I note in this inventory before us that the Russians have one-third the strategic bombers we have, and much has been made of the fact that they have more of many other things than we have.

But I hear nothing about how we do not need to build more strategic bombers because we have a 3-to-1 lead over the Soviets.

Secondly I would like to say that several months ago the president of the corporation which builds the B–1 was quoted in the Wall Street Journal as saying that the payment for building the B–1 bomber provided the capital for the equipment that makes the B–1 bomber. I think this is a serious charge, that we are paying not only for the B–1 bomber but providing the capital for the equipment to make the B–1 bomber, and I think this should be investigated.

Mr. BADILLO. Mr. Chairman, I rise in opposition to H.R. 5970, the military procurement and research and development authorization. I always vote against military authorization and appropriation bills, and I am proud of that. But today I am filled with an even greater sense of outrage than usual at the waste of money this bill contains. It is a matter of very serious concern when the Congress of the United States is willing to acquiesce in such gross misappropriation of funds.

Having taken on the administration myself recently to assure the strong human rights language in the multilateral lending institutions authorization, I am not going to stand here and say that we should approve the cuts the administration has asked for just because the President said we should. But I can certainly state that the cuts should be made because they are right, and because they make a start on cutting back our grossly inflated military budget in order to start meeting the human needs of the people. This was one of the foundations of the President's campaign, and it is one that bears our attention.

The administration has not gone nearly far enough in the cuts it proposes, but it does make a start, it has been willing to talk openly about waste—about obsolete weapons systems and needless troop strength. And the administration is beginning to create an awareness that we can cut programs without cutting our security.

An amendment offered by my fellow New Yorker, TOM DOWNEY, provides adequate proof of the administration's intent. Representative DOWNEY's amendment would change the procurement authorizations to those requested by the administration. It proposed cutting $422.3 million for increased funding from a program that the Pentagon cannot contract for this year.

Another amendment being offered by TOM DOWNEY expresses the administration's intent to cut the size of the Naval Reserve. By cutting down to a reasonable size, and providing an end to unnecessary and ill-used incentives, the administration is beginning to make judgments of the needed strengths of our Armed Forces.

Last year, on the floor of the House, we lost a battle to eliminate funds for an unneeded Uniformed Services University of the Health Sciences. This year the administration has taken up the struggle as well. Civilian medical schools can do the same job—and at a much cheaper price.

It seems to me, that at a minimum, these amendments must be approved. But we should be doing more than the minimum, and that is why I strongly support many of the other amendments being offered this afternoon.

The amount of money we have spent on unnecessary weapons systems is staggering. Representative BOB CARR will offer an amendment to strike $5 million for an aircraft that performs more poorly than an existing cheaper plan; Representative DELLUMS will offer an amendment to strike $134 million for a new missile that could destroy the efforts we are making at real strategic arms limitation; and Representative SCHROEDER will offer an amendment that will prohibit money from being authorized for an aircraft that we already have enough of, and have not received assurances that we can sell. Millions of dollars are being spent on things we do not need to spend them on.

Representative DELLUMS will offer two

amendments that suggest a realistic approach to our troop levels abroad—one to cut only 60,000—out of an authorization of 2,090,425—from our troop deployments—at no sacrifice to our NATO commitment. The other, which I feel very strongly about, would remove all our troops from support of the dictatorial and repressive regime in South Korea over the next 5 years.

When you look at the size of the total authorization—$35.91 billion—and then look at the cuts that have been requested, they seem quite reasonable. When all these cuts have been made, when we have a military budget as lean as the ones we write to serve the human needs of our citizens—then, but not until then, will I vote for military authorizations. I am not against having a secure nation, I do not vote no because I feel we should have no defense. But I do believe there are limits to what we need, and we have exceeded them for far too long.

Mr. GONZALEZ. Mr. Chairman, I want to commend the committee for its determination to strengthen the defenses of our country. Those of us who have been concerned about the relative decline in our strength during the past several years cannot help but be heartened and encouraged by the recommendations of the committee.

I take this time also to express my support for section 809 of this bill, which places a freeze on further contracting out of certain kinds of defense work, pending completion of a study on this critical problem.

There are a number of military installations in and near my district, and there is hardly a week that passes without my hearing about a new proposal to contract out one kind of work or another. Whenever contracting out takes place, faithful and loyal Government employees lose everything that they hoped for, worked for, and have a right to expect.

More often than not, when defense work is contracted out, the same employees wind up doing the same work, in the same place—but at lower wages, with vastly reduced benefits, with loss of any kind of job security, and with loss of any hope for a decent retirement income. Moreover, they are subject to having a new contractor come in every 2 or 3 years—they never know what will hit them next. Morale drops, efficiency drops, and the quality of work drops.

The typical defense contract, in a contracting-out case, is simply a labor contract. The Government furnishes the building, the utilities, the tools and everything else; the contractor furnishes the bodies. To win a contract, you simply offer your bodies for less than anybody else. In short, the typical contract is designed to exploit workers—typically people of little skill, but sometimes people of great skill. Regardless of which, employees who find their jobs put on contract suddenly lose their pension benefits, lose anything like a decent health plan, lose leave rights, lose job security, seniority, and usually a great deal of pay as well. The job does not change; the paymaster does, and with that change goes everything the employee worked for.

In one case I know of, food services at a base were contracted for, and hundreds of Government employees either had to find other jobs or go to work for the contractor at a loss of 30 percent of their old wage. Three years later a new contractor came in. In this case, and just about every one that I have seen, contractor employees who have developed any seniority, or who organized to win enhanced wages, soon find a new and lower paying contractor on the job. The employees wind up on a minimum wage treadmill, with no hope whatever of improving their circumstances.

This kind of situation is not only demeaning to workers; it probably results in higher costs to the Government, over the longer run, because exploited workers will soon become demoralized, and demoralized workers become careless or inefficient or ineffective, or all three.

Beyond the need to do something about the exploitive nature of these contracts, I believe that we ought to consider what is appropriate for Government employees to do, and what is appropriate for contract employees to do. I believe that maintenance of Government facilities and operation of those facilities, and operation and maintenance of Government equipment, is a job for Government employees. On the other hand, the supply of goods and equipment—procurement—is a job for contractors to do. That has been the general delineation in the past, and it makes sense today. It simply creates chaos and demoralization for us to allow the continued development of a contracting phenomenon that strikes at random and whom among people whose only sin is to work for the Federal Government. Both they and the public deserve better, and section 809 of this bill hopefully will allow for development of a better, more sensible, more equitable and more humane system than we now have.

Mrs. SCHROEDER. Mr. Chairman, I come here today in substantial agreement with much of what is in the authorization bill. There is one issue, however, that has been of recurring concern to me and that is the airborne warning and control system—AWACS. AWACS is, very simply put, a Boeing 707 aircraft filled with radar equipment which would allow us to overcome the two major weaknesses of ground-based radar, its inability to look over the horizon or to track low flying aircraft. The "look down" capability of this airborne radar is what gives it its unique status.

The House Armed Services Committee has recommended the authorization of $207.2 million for the procurement of three AWACS aircraft and $41.3 million for the advanced procurement of three others. The amendment I am proposing would not delete these funds from the budget, rather it would put the funds in escrow until such time as our NATO allies appropriate funds toward the purchase of these aircraft to be used in a tactical role in Europe. This amendment contains essentially the same wording included in the authorization bill passed by the House last year. For whatever reasons, the Armed Services Committee decided not to include such language this year. However, I welcome the opportunity this action has given me to bring this issue to the floor for a discussion and a vote. The acquiescence of the full House to the committee's language last year without an expression of the extent of the body's support in the form of a rollcall vote may have made it easier for the conferees to bargain away the language in conference with the Senate, which was its fate last year.

The history of AWACS before the House Armed Services Committee and the House is a long one which has gone through several chapters. Our first problem was with deciphering exactly what the role of AWACS was to be. The Air Force originally proposed a strategic role in continental air defense. Realizing that this was unlikely to be sold to the Congress given the low priority we have given to this mission, the Air Force then proposed that AWACS had a tactical air role in Europe guiding attack aircraft in sorties over enemy territory. When this role was suggested, serious questions arose over the vulnerability of the aircraft to enemy fighters and its radar to electrical countermeasures. When these issues were raised, the Air Force once again changed its mission to a more passive role in tactical air—directing air defense. In this role AWACS could remain over friendly air space where it would be less vulnerable.

Although questions remain in my mind about roles and capabilities, we have now moved into a third issue—that of the numbers of AWACS this country should procure. The Air Force originally requested approval of 34 AWACS E–3A aircraft. Of these 34 the Air Force identified a need for 20 AWACS for NATO defense and 10 to be used in defense of the continental United States—Conus. As of fiscal year 1977, the Congress has already authorized and appropriated funds to procure 19 AWACS aircraft: Three research and development aircraft, six procured in fiscal year 1975, four procured in fiscal year 1976, and six in fiscal year 1977. The current version of the committee's bill would bring that total to 22. If we add to this the long lead funds provided for three AWACS which will not be fully funded this year in any event, plus the long lead funds provided in this year's bill for 6 additional aircraft, we find that we would have an implicit commitment to possibly 31 AWACS through fiscal year 1979.

With an established Conus requirement as low as 10, it is clear that we have already begun to procure AWACS aircraft for NATO tactical air use, and that the proposed fiscal year 1978 buy will move us further in that direction. The Air Force may now tell you that the number 10, was in the logic of the total buy the number to be bought against air defense, not the requirement, and that it depends on how extensive one wants the defense and assumptions you make as to how many things you want to do simultaneously. That may be fine, but we should decide what we want to do first, before we buy the planes, not after.

We have in fact, already decided how extensive we want our CONUS defense. And if we measure the number of AWACS against the priority we have given to this mission a buy of even 10 AWACS may seem illogical. A number of

years ago a policy decision was made that in the absence of a ballistic missile defense the United States would not provide a comprehensive air defense. The theory was that if we could not defend against all types of nuclear attack on the United States it made little sense to try and stop one. This made even more sense in bomber defense since they are much slower than ballistic missiles in reaching their target. Presumably if we could not stop the Soviet's missiles there would be nothing left to defend anyway by the time the bombers got here.

Continental air defense has thus held an extremely low priority among our defense missions, and reasonably so. What we have with AWACS in a CONUS defense role will be the most costly plane the United States has ever built directing F–106 fighters that are 20 years old and underequipped against Soviet bombers. The cost of AWACS is totally out of proportion to the priority we place on air defense. At any rate, the Air Force says we can get by with 10. We now have 19.

Given the limited requirement for AWACS in a continental defense role it is clear that the bulk of the 34 requested AWACS are for the tactical air role in NATO. The cost of AWACS to be used for NATO defense should be shared by the NATO members. Secretary Brown seems to agree to this concept. In testimony to the House Armed Services Committee and elsewhere he has said that we are not going to buy NATO's AWACS for them nor are we going to provide the aircraft to them.

Despite continually expressed optimism, we seem even further away from a NATO sale now than last year. At this point, the Council of Ministers has endorsed the need for a plane of the AWACS concept and last December approved a study of potential costing arrangements. What had appeared to be substantial progress last fall turned into illusion this spring. On March 25, at a meeting of the defense ministers of the 12 NATO nations, West Germany asked for more data on the allocation of costs, arguing that they desired a reduction in the 25-percent share allotted to Bonn by alliance financial experts earlier in the year. On March 31, frustrated by West German footdragging, the British Defense Secretary, Fred Mulley, announced that Britain had decided to go ahead with its own smaller version of the AWACS, the Nimrod, rather than wait for a NATO decision on our version. In making the announcement he said Britain would not pay its share of AWACS even if NATO later chose to buy it. The British decision may have, in effect, killed any possibility of a NATO sale.

Unless the NATO nations commit themselves to financial participation in this purchase, the United States will find itself in a position of having to accept whatever price they choose to offer us for planes already produced that have no justifiable, cost-effective use for U.S. needs. The cost to the American taxpayer for such surplus would be high. If we stopped building AWACS with the 19 we have already appropriated funds for, the cost per copy will be $138 million, according to figures provided to the committee this year by the Air Force. Even if we build the full 34 the Air Force has requested and can spread the R. & D. cost over a greater number of planes, the acquisition cost would still be $109 million per copy. This desire to lower the unit cost is certainly one of the dynamics behind the drive to build more AWACS, but it is a poor rationale. The per unit cost will come down, but the cost to the treasury will greatly increase. Proponents will argue that we must keep the line warm, that to delay will only eventually drive up the cost. I can only say that at between $109 and $138 million a copy the cost will be far greater if we produce unnecessary surplus planes.

Congressional acquiescence in this buy can only serve to decrease any sense of urgency within NATO to commit themselves to purchasing AWACS themselves. Budget constraints, fiscal responsibility, and prudent business practice all suggest a deferral of this buy.

Mr. BENNETT. Mr. Chairman, I have no further requests for time.

I yield back the balance of my time.

Mr. BOB WILSON. I yield back the balance of my time.

The CHAIRMAN. All time has expired.

Under the rule, the Clerk will read the bill by titles.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of American in Congress assembled,

TITLE I—PROCUREMENT

SEC. 101. Funds are hereby authorized to be appropriated during the fiscal year 1978 for the use of the Armed Forces of the United States for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, as authorized by law, in amounts as follows:

AIRCRAFT

For aircraft: for the Army, $682,500,000; for the Navy and the Marine Corps, $3,595,800,000; for the Air Force, $8,214,800,000.

MISSILES

For missiles: for the Army, $564,600,000; for the Navy, $1,888,400,000; for the Marine Corps, $110,600,000; for the Air Force, $1,874,700,000.

NAVAL VESSELS

For naval vessels: for the Navy, for the Trident submarine program, $1,703,200,000; for the SSN–688 nuclear attack submarine program, $700,800,000; for the CSGN nuclear-powered strike cruiser program, $187,000,000; for the DDG–47 guided missile destroyer program, $930,000,000; for the FFG–7 guided missile frigate program, $1,319,000,000; for the AO fleet oiler program, $322,700,000; for the fleet tug program, $52,700,000; for craft, $42,800,000; for outfitting and postdelivery items, $89,800,000; for the aircraft carrier srevice life extension program, $30,000,000; for the guided missile destroyer modernization program, $94,500,000; for cost growth, $233,100,000; in all, $5,705,600,000. None of the funds authorized to be appropriated under this title for the DDG–47 guided missile destroyer program shall be obligated for material or components not suitable for use in a nuclear-powered strike cruiser until the President has fully advised the Congress as to the impact the decision not to provide nuclear propulsion in the program for the DDG–47 destroyer, a major combatant vessel as defined in title VIII of Public Law 93–365, will have on the ability of the Navy to take advantage of nuclear propulsion in aircraft carriers, the long-term effects such decision will have on the ability of the Navy to counter the projected threat in the 1980's and 1990's, and the effect of such decision on the industrial base for nuclear warships. The President shall fully advise the Congress how in reaching such decision he evaluated the military advantages of the reduced logistic requirements of nuclear-powered strike forces in a time of continuing reduction of overseas bases and secure sources of propulsion fuel; the differences in effectiveness and lifetime costs of nuclear and nonnuclear Aegis-equipped ships, including differences in their military characteristics; the cost and difficulty of providing propulsion fuel to nonnuclear Aegis-equipped ships in high-threat areas in wartime; and the military priority of providing Aegis-equipped ships to accompany nuclear-powered aircraft carriers and for independent missions relative to the other military needs for Aegis-equipped ships. The funds authorized to be appropriated under this title for the CSGN nuclear-powered strike cruiser program may, if the President determines it to be in the national interest, be used to procure long-lead items for an additional "Virginia" class nuclear-powered cruiser as a platform for the Aegis Air Defense System.

TRACKED COMBAT VEHICLES

For tracked combat vehicles: for the Army, $1,544,300,000; for the Marine Corps, $74,800,000.

TORPEDOES

For torpedoes and related support equipment: for the Navy, $332,400,000.

OTHER WEAPONS

For other purposes: for the Army, $114,100,000; for the Navy, $131,400,000; for the Marine Corps, $2,400,000.

Mr. BENNETT (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. BENNETT. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. ROSTENKOWSKI, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5970) to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads, and for other purposes had come to no resolution thereon.

GENERAL LEAVE

Mr. BENNETT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill H.R. 5970.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDING HOUSE RESOLUTION 508, INCREASING MEMBERSHIP ON AD HOC COMMITTEE ON ENERGY

Mr. WRIGHT. Mr. Speaker, I send to the desk a resolution (H. Res. 509) and ask unanimous consent for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 509

Resolved, That subsection 1(b) of H. Res. 508 is amended by striking out "thirty-seven Members of the House" and inserting in lieu thereof "forty Members of the House".

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. BAUMAN. Mr. Speaker, reserving the right to object I understand this resolution expands the Ad Hoc Committee on Energy, which was passed only a few hours ago, from 37 to 40 members. Can the gentleman tell us what has transpired within the last hours to cause the need for this expansion?

Mr. Speaker, I yield to the gentleman from Texas for that purpose.

Mr. WRIGHT. It was the thought of the Speaker and of the leadership on both sides that by expanding the number by three we would facilitate the broadening of the base of the committee in order that certain Members from a State that needs rightly to be represented on this committee might be represented.

Mr. BAUMAN. Mr. Speaker, I would ask the gentleman also, will these new appointees be from the standing committees that have original jurisdiction over the energy legislation that will be involved?

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield further, the Speaker, of course, under the original resolution has the power granted to him by that resolution to make choices from among committees that have jurisdiction and otherwise, as the Speaker sees fit.

The majority leader is not prepared by knowledge to elucidate to the gentleman the identity of those who would be appointed. That power reposes rightly with the Speaker. I am certain that to the extent it would apply to a minority Member, the recommendation of the minority leader would be considered.

Mr. BAUMAN. Mr. Speaker, we may just as well open this up all the way. In fact it might be easier if we just appointed the entire Membership of this House to the committee and have it propped up. I leave that to the judgment of the Speaker.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

RESIGNATION FROM AND APPOINTMENT AS MEMBER OF SELECT COMMITTEE ON ASSASSINATIONS

The SPEAKER laid before the House the following resignation from the Select Committee on Assassinations:

WASHINGTON, D.C., *April 21, 1977.*

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Due to my appointment to the Ad Hoc Select Committee on Energy and the additional responsibilities that will entail, I hereby submit my resignation as a member of the Select Committee on Assassinations.

Very truly yours,

JOHN B. ANDERSON,
Member of Congress.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

The SPEAKER. Pursuant to the provisions of House Resolution 222 and House Resolution 433, 95th Congress, the Chair appoints the gentleman from Michigan (Mr. SAWYER) as a member of the Select Committee on Assassinations to fill the vacancy thereon.

PRESIDENT'S PROPOSALS ON FUEL ARE NECESSARY

(Mr. VANIK asked and was given permission to address the House for 1 minute).

Mr. VANIK. Mr. Speaker, last evening, President Carter, in this Chamber, called for sacrifice on the part of the American people. He also called for courage on the part of the Congress. Knowledgeable experts and the best wisdom of the land agree that the President's proposals or something like them are necessary. We should be concerned that those proposals are sufficient.

We must not increase our dependence on foreign oil. We cannot impoverish our Nation at the rate of $32 billion this year and at a rate which will increase to $40 billion and $50 billion in the years ahead. We cannot continue to pay this dreadful homage to an alien country or to an alien organization. We cannot permit our Nation to enter upon the dangerous dependence which we can foresee.

We do not ask our people to suffer frostbite in their homes. We do not ask them to walk in the driving wind and snow. We simply ask them to waste less and ask our Nation to be provident today to prevent serfdom in its future.

The President's proposal will come at a considerable cost. The excise tax on old oil will increase gasoline by as much as 7 cents per gallon in 1978. The excise tax on the differential between domestic oil and the world price will increase gasoline costs by as much as 3 cents per gallon in 1979. If imports continue to inordinately rise, the President asks for the right to impose higher gasoline taxes at the pump. While I can foresee considerable legislative restraint on shifting so large a tax authority to the President—the largest grant of authority to a President in peacetime, I believe that the Congress will deliver much of what the President seeks. The proposal is worthy and well-developed, it deserves profound and careful consideration.

There will be an alternative proposal submitted principally by the other political party and the energy industries. It will oppose taxes of any kind on gasoline and oil. It will propose the immediate decontrol of oil and gas so that these scarce commodities could rise in price to a "free market" level dictated by those who control the source of supply. Our domestic industry could then engage in a fierce competition race with OPEC to determine which could move energy prices to ever-escalating levels.

The difference in the proposals are that President Carter's plan would tax the difference between price levels and redistribute the tax receipts to the people. The other alternative would permit the price difference to flow in lush profits to the energy companies which up to the present have skillfully managed to escape an effective "bite" from the tax collector. The alternative will provide no rebate—no credit to the taxpayer.

President Carter's proposal is far more equitable—much less inflationary—and much more likely to succeed. We should compliment the President's courage with a little of our own.

We in the Congress serve only at the pleasure of our constituents. Our political survival is much more secure if we adopt a policy of inertia. We can vote against tax restraints on energy waste. We can be acclaimed in our districts by developing a cosmetic blindfold, ignoring the problem. We can proclaim a defense of our present pattern of waste and energy indulgence. We can find a hundred reasons for opposing the conservation plan—and we can survive.

However, whether we survive as politically elected representatives is not so important as whether the Nation survives. That is the bottom line on which we must make our commitment.

Some of my contemporaries in this Congress predict that support for the Carter energy proposals will insure a new congressional replacement next year. I refuse to believe that the American people will reward indifference to the most critical domestic problem of our time. We should be willing to trust the basic good sense of our people. Good and courageous judgment might yet prove to be the best politics.

PRESIDENT'S UNJUSTIFIED RECOMMENDATION TO TERMINATE FUNDING FOR HILLSDALE LAKE PROJECT IN KANSAS

(Mr. WINN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WINN. Mr. Speaker, I would like to address the President's ill-considered and unjustified recommendation to terminate funding for the Hillsdale Lake project in Kansas. I am particularly concerned because of the very critical water shortage which my constituents in southern Johnson County are facing.

This area of Johnson County is experiencing rapid growth. It is my under-

standing that a demand for construction exists and plans have been developed for approximately $80 million in new home construction in the area. For a number of years, local residents have been led to rely on the expectation of adequate water supply from the proposed Hillsdale project. More than $17.1 million has been spent on Hillsdale already, and phase I of the dam construction is underway. The Carter administration's abrupt about-face on Hillsdale from the Federal Government position of the past 20 some years now threatens Johnson County citizens' reasonable expectation of the water supply necessary not just for continued orderly community growth, but, in many cases, for the survival of these communities.

I have with me today an article from the Kansas City Star which provides an eloquent example of the critical need for continuation of the Hillsdale project. The article describes the extreme water shortage situation facing the community of Spring Hill in Johnson County. The city has been forced to clamp a number of restrictions on water use subject to $100 per day fines for noncompliance. Standby plans exist to close a number of businesses to further curtail water use. At this time of year, normally considered the "rainy season," the intake valve at the Spring Hill City Lake is 28 feet under water. Now, however, a mere 29 inches of water covers the intake. Even under the existing use restrictions, the city estimates that its local lake, its only water source, has only a 30 to 50 day supply of water. Unless significant rain is received in that period, the community faces the prospect of having to truck water in. Since neighboring water districts have no water to spare, hauling it from more distant sources could prove extremely costly.

Another Johnson County community, Edgerton, had to turn out most of its population to lay plastic pipe to a point where they could make an emergency tie-in to a neighboring city's water lines. During the last hours of this pipe-laying effort, only mud was being pumped from Edgerton's own exhausted city lakes.

Unfortunately, these hardship conditions have apparently had little effect on the White House bureaucrats and the myopic pencilpushers at OMB. The administration's decision to delete funding for the Hillsdale Lake project has been accompanied by cavalier pronouncements that projected benefit-to-cost ratios do not adequately offset environmental damage to wildlife habitat. The environmental justifications, if indeed they can be so named with a straight face, put forth by the administration are offered with rather vague and tenuous documentation.

Moreover, these claims of environmental damage have already been presented in prior litigation and soundly rebuffed by the Federal courts. I would like to note at this point, by the way, that there are no federally listed endangered species involved. And furthermore, I am in favor of protecting the environment as much as anyone else, but it should not be a catchall justification for allowing the Federal Government to back out of long standing commitments.

I am also skeptical of the persuasiveness of the administration's latest benefit-cost evaluation. Every time one turns around, some agency changes one or more significant assumptions on which such calculations are based. One is left with the impression quite often that the White House or OMB makes their decisions and then works backward, selecting the assumptions and data which will support the desired result. The population figures for the communities involved, for example, used in the administration's review of Hillsdale Lake appear to be 17-year-old estimates. By even the most conservative estimates, the population of the communities who need Hillsdale as a water supply source has more than doubled.

In conclusion, let me say that the greatest weakness of President Carter's recommendation against further funding of the Hillsdale project is that he never seriously addresses himself to the most fundamental question. The citizens of the areas involved were led to rely on this project for water. Where are they going to get the water to meet existing serious needs which grow more critical each year? Perhaps Johnson County citizens should appeal to the White House that they have been invaded by factions supported by Cuban advisers. Then, the President might at least give them a plane load of Coca-Cola if they cannot have water. The obvious answer is funding for Hillsdale should be continued.

PASSING OF HERMAN W. XANDER, DEPUTY CHIEF OF THE CAPITOL POLICE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. BAUMAN) is recognized for 5 minutes.

Mr. BAUMAN. Mr. Speaker, at approximately 3:40 p.m. on April 19, 1977, Deputy Chief Herman W. Xander was pronounced dead at the Washington Hospital Center in Washington, D.C. From May of 1964 until last Friday, April 16 when he was admitted to the hospital, Deputy Xander was assigned from the Metropolitan Police to the U.S. Capitol Police in the capacity of assistant to the Chief of the Capitol Police, in charge of the police that protect the House of Representatives. I was honored to have him as my constituent. All of us knew that we were able to perform our legislative responsibilities without fear of harassment or terroristic activities, because he and his police were on the job. We knew that his veil of security protected us from the intimidation of those hostile to our American heritage. On April 19, the Congress and the District of Columbia lost a servant of the people, one who was born to police service. His father, Frederick Warren Xander, was appointed to the Metropolitan Police in 1918 and retired in 1938 as one of the last of the horse mounted police in the District of Columbia. His brother, Bernard, retired from the Metropolitan Police. His sister's husband, Elmer Leukhardt, retired from the Metropolitan Police. His wife's brother, Richard Cranford, also retired from the Metropolitan Police. His wife's brother, Charles, left the Metropolitan Police to become a deputy U.S. Marshall and retired as a deputy U.S. Marshall for the District of Columbia. Two of his nephews, Lawrence and Ronald Leukhardt, are policemen in Prince Georges County, Md. His nephew, Charles Cranford, is a Metropolitan policeman and his only son, Richard, is a Metropolitan Police Lieutenant.

Mr. Speaker, Deputy Chief Herman W. Xander was born on February 13, 1915, in Washington, D.C. He was raised and attended the public schools in the District of Columbia. He worked for the Federal Bureau of Investigation from January 1934 until October 1939, attending night classes at Strayer College during this period. On November 1, 1939, he was appointed to the Metropolitan Police Department and assigned to the Patrol Division as a foot patrolman. On August 10, 1940, he married the former Mary Elizabeth Cranford. In 1941, he was transferred from the Patrol Division to the special investigations squad of the Detective Bureau. He was promoted to precinct detective in May of 1945 and then to detective sergeant of the robbery squad in May 1946. He was promoted to Detective Lieutenant in October 1958 and assigned as supervisor of the Third Detective District. In May of 1964, he was detailed to the U.S. Capitol Police and assigned as supervisor of the security detail for the House of Representatives. He was promoted to captain in 1966, inspector in 1968, and to the rank of Deputy Chief in 1973. He was also a graduate of the 65th session of the Federal Bureau of Investigation's National Academy.

Mr. Speaker, during Herman Xander's 37-year career he received many commendations ranging from displaying courtesy to victims of crimes to capturing numerous murderers and robbers. He had the unique ability to solve the most serious and perplexing crimes thus bringing the perpetrator to justice. Yet he will be remembered more as the dedicated and compassionate man that he was. We extend our condolences to his wife, Mary Elizabeth; his mother, Mae; his son, Richard; and to all of the family. We all share in their grief at losing such an admirable man.

Mr. ANNUNZIO. Mr. Speaker, Assistant Chief Herman W. Xander after having served almost 25 years with the Metropolitan Police Department, was detailed to the Capitol Police in May 1964, where he was placed in charge of the plainclothes detail for the House of Representatives.

Since July of 1968, he has served as Assistant Chief of the Capitol Police for House Personnel.

Assistant Chief Xander contributed much to the professionalization of the Capitol Police force and was respected and loved by all of those who knew him.

As chairman of the Personnel and Police Subcommittee of the House Administration Committee, I extend my pro-

foundest sympathy to his family on their bereavement.

GENERAL LEAVE

Mr. BAUMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the topic of my special order today.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

THE EPA SHOULD GET OUT OF THE GRAIN ELEVATOR BUSINESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. GRASSLEY) is recognized for 15 minutes.

Mr. GRASSLEY. Mr. Speaker, last Friday, three Environmental Protection Agency officials who drafted the grain dust standards for grain elevators met with Iowa country elevator managers and operators in Des Moines. One of my staff assistants was present just to keep abreast of what the EPA was up to.

During that session, the Director of the Office of Air Quality Planning and Standards, Walt Barber, agreed that the proposed grain dust regulations are vague and unwieldy. He told my assistant that the EPA was really after "Pillsbury and Cargill," the two largest grain elevators. This is just one more example of how the Federal bureaucracy, in trying to place some restraints on the big violators, steps all over the little guys. Installing vacuum systems in Iowa elevators would cost one small grain firm $1 million. That cost would be passed on to the producer through lower prices for his grain, about 4 cents a bushel lower.

Although the EPA officials tried to assure the grain dealers that the standards would not be imposed on existing small elevators, no one believed them. Why should they? They have been getting the same song-and-dance routine from other bureaucrats for years.

Besides, it is extremely difficult to attach credence to men who were never west of Ohio before they started drafting grain dust standards. How many large grain elevators are there on the east coast?

I question how much the regulation writers learned after supposedly inspecting grain elevators. For example, during Friday's session, they constantly referred to farmers bringing their grain to elevators in their "carts." Now, Webster's dictionary defines a cart as "a heavy vehicle for rough work, usually two-wheeled and fitted for one horse." When someone does not know the difference between a two-wheeled, horse-drawn object and a four-wheeled, 350-bushel-capacity farm wagon, pulled by a tractor, I seriously wonder if he knows what he is talking about at all.

Having been a farmer for 16 years, and hauling my grain to an elevator year after year, I know firsthand that some dust does exist in country elevators. But I also have observed far more serious environmental problems which need solving first. It seems to me that bureaucrats in Washington who do not know a thing about farming have better things to do than to try to draw up regulations on agriculture.

The EPA grain dust standards prove once again that Congress gives too much leeway to the regulators, and maybe too much free time, so they can sit around thinking of ways to solve problems that do not exist or are inconsequential.

In my estimation, Congress ought to tighten up its control over regulatory agencies such as the EPA. And it should look into the problem of the grain dust standards, with the possibility of amending the Clean Air Act to exempt all but the largest terminal elevators from dust standards. That may be the only way we can be sure we keep the Government off the backs of the little businessmen.

Today is Food Day in the United States, and I believe it is a day on which all Americans should give thanks for living in a nation which is the world's most successful food producer. It is most unfortunate, however, that many people and groups do not recognize how lucky they are. Last month, an article was placed in the Des Moines Register on a proposal to redesign the food system in the United States. This is printed below:

REDESIGN OF U.S. FOOD SYSTEM URGED—EYE SUBSIDIES TO FARMERS, CURBS ON AGRIBUSINESS

WASHINGTON, D.C.—A drastic restructuring of the American food-production system was advocated in a study released Sunday. The restructuring would subsidize farmers to keep down prices and curb agribusiness growth.

The study is the first in a series of a dozen reports by the Exploratory Project for Economic Alternatives, a Washington-based research group funded by 25 foundations and indivduals to stimulate debate on new economic approaches.

"In the coming era of intensified food inflation, resource shortages and pollution, the United States can no longer afford a narrowly-based policy geared to supporting agribusiness at the expense of family farmers, the environment and consumers," the report said. The report recommended:

The government's supply-management system be expanded and used to keep prices affordable for low and middle-income families.

Small to medium-size family farmers be guaranteed a stable, decent income by direct government payments to supplement their income.

In releasing the report, the project's co-directors Gar Alperovitz and Jeff Faux said that "if we are ever going to make progress in reducing unemployment, it is necessary to make a direct attack on the sources of inflation, and food inflation is one of the major sources of the problem."

The report said, "Low, stable food prices, a secure income for family farmers and a shift away from agribusiness must be the heart of a new American food policy for the coming decades." As part of an overall plan to keep down food prices while protecting the incomes of family farmers, the study proposed establishment of food reserves, government control over farm imports and exports, break-up of agribusiness monopolies and direct government payments to compensate farmers for what they would have gotten from higher prices.

The subsidy program, which harks back to the Brannan Plan for direct payments to farmers that was proposed—but never implemented—during the Truman administration, would cost from $12 billion to $15 billion a year.

The payments would be financed by a "steeply progressive" income tax weighted toward upper-income taxpayers, it added, contending this would be "more equitable and less inflationary" than paying for cost increases with higher food prices.

Clearly, the organization mentioned in the article has a minimal understanding of why the United States is such a great food producer, and how important our production is not only domestically, but to millions abroad, including those who live in industrialized nations and those in the less developed countries. Clearly, if the goals of the "Right to Food" resolution passed last year are to be met; that is, if everyone in the world is to receive a nutritionally adequate diet, then the U.S. food system cannot be "restructured." A constituent from my district makes this point quite eloquently in a letter to the editor of the Register, which is printed below.

To Editor, Des Moines Register Tribune:

I read the attached article on the front page of the Des Moines Register this past Monday morning and I almost blew my top. This is a study by a Washington based research group and someone just doesn't have the facts. How the leading paper in the greatest agriculture state in the nation can put an article like this on the front page of their paper is beyond me.

First, we need to understand what causes inflation and it only takes a short course in basic economics to understand that the cause of inflation is simply spending money that has not been earned yet and this we have done at the federal level and in seventeen of the past 18 years.

This article suggests it is necessary to make a direct attack on the sources of inflation, and food inflation is one of the major sources of inflation and this is just not true. Deficit spending is the cause of inflation and it has had its effect on everything we buy, including food.

Also, food is only a part of what we spend our disposable dollars for—18% and compared to 20 years ago, a real bargain. We spend less of our disposable dollars for food today than at any time in our history and have, at the same time, built into those food prices many "built-in maid services" such as TV dinners, cake mixes, and other easy-to-prepare foods. In addition to these, there are now many non-food items in their carts that are not part of the food bill—but often are included in the minds of the cost-conscious shopper.

Instead of attacking food prices, we should be spreading the word of the tremendous advances we have made in food merchandising at no additional cost, in percent of disposable income, to the consumer.

Today, the farmer produces enough food to feed himself and 51 other people in this country plus he provides some food for an additional 100 starving people around the world. The performance of American agriculture transcends that of any major industry in this country and the Iowa farmers deserves the praise of all of us for his tremendous progress and his efficiency.

Take away the incentive to improve efficiency in farming, as this article suggests, and it won't take us long then to realize what a good thing we had going for us. Do as these research study suggests and we had better gear us to subsidize every retailer and small business up and down Main Street.

I fail to see why some people will not recognize that, if left alone, our free enterprise system that made this country great, can and will still work. Granted, some people will grow and prosper and a few will grow rich, but is that all bad. These people have money, and because they dared to adventure daringly, are rewarded.

Agriculture and food is the largest, by far, industry in this country. Legislate and control this industry and we will destroy our single largest asset this country has.

I can and am ready to supplement my thoughts in this letter with facts if you would be interested in having them.

Sincerely,

DONALD D. RIX.

Finally, I would like to note with dismay the President's plan to hold a meatless buffet today, in honor of Food Day. This is clearly a slap in the face of our livestock and poultry producers, and says to these producers that their Government does not care what happens to them. At a time when losses are mounting due to high imports and extremely high feed costs due to adverse weather conditions, this kind of cold treatment seems hardly to be deserved. My colleagues ought to be aware that when I asked the White House why no meat was being served, an aide remarked:

Meat is bad for your health, you can take my word for it.

I certainly hope this is not information the aide gained firsthand from the FDA.

In any case, I have asked the President to hold a Livestock, Dairy, and Poultry Day later this spring, in order to demonstrate that these foods are, in fact, very important to maintaining good health.

PRESIDENTIAL LINE ITEM VETO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. HYDE) is recognized for 2 minutes.

Mr. HYDE. Mr. Speaker, I am reintroducing with cosponsors, House Joint Resolution 323, a proposed amendment to the Constitution of the United States allowing an item veto in appropriations, on behalf of the gentleman from Virginia (Mr. BUTLER) and the gentleman from Florida (Mr. BENNETT).

I urge my colleagues to join us in making the appropriation process more effectice and responsible.

Under present law, the President may either sign or veto a bill, but he cannot pick and choose the good parts from the bad. He must take the whole thing or leave it. With the item veto, the President could eliminate wasteful and low-priority programs without totally sacrificing vital legislation.

It is time for the Congress to take action. Since we always retain the power to override an item veto, we are not adding to the "Imperial Presidency," but permitting a process of legislative fine-tuning that can only better serve the taxpayers. In addition, it imposes one more important measure of responsibility on the entire appropriations process.

The list of cosponsors follows:

COSPONSORS OF HOUSE JOINT RESOLUTION 323

L. A Bafalis, Garry Brown, Max Baucus, James C. Cleveland, James M. Collins, John J. Duncan, Mickey Edwards, Marjorie S. Holt, Richard Kelly, William M. Ketchum, Robert J. Lagomarsino, Norman F. Lent, James R. Mann, James Martin, Clarence E. Miller, Richard Ottinger, Matthew J. Rinaldo, Harold S. Sawyer, Keith Sebelius, Paul Simon, William A. Steiger, David Treen, Bruce F. Vento, Robert S. Walker, Larry Winn, Jr.

JOURNALIST JEFFREY HART RAISES SOME QUESTIONS ABOUT THE 1980 OLYMPICS IN MOSCOW WHICH MUST BE ANSWERED TO INSURE THE NONPOLITICIZATION OF "THE GAMES"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 15 minutes.

Mr. KEMP. Mr. Speaker, the 1980 Moscow Olympics are shaping up as a gigantic bonanza for the Soviet Union and a real threat to the human rights issue behind the Iron Curtain.

I am not aware that any Member of Congress has been briefed fully on what the National Broadcasting Co.—NBC—had to guarantee the Soviets. But enough of the agreement reached between them has surfaced in various news and trade publications to cause great concern on the part of those who have concern over the tragic status of human rights in the Soviet Union and equal concern over the implications of the transfer of highly sophisticated communications technology to the Soviets which may result.

NBC is not the target of my remarks. I can only imagine they did the best they could but had little choice but to agree to the Soviet demands, if they were to guarantee to the American sports audiences an opportunity to see the Olympic games on television. Our target here ought to be the Soviet Union, for if what we hear is true, and I have no reason to believe otherwise, their demands fly in the face of everything détente was supposed to assure us.

What specifics are surfacing about the agreement?

An $80 million payment by NBC to the Soviets has been reported. But questions are now surfacing as to what additional, unreported sums may have been offered or paid to the Soviets.

NBC has apparently agreed to leave all of its sophisticated electronics equipment in the Soviet Union. This includes some equipment which the Soviets have not been able to get U.S. export licenses for, licenses denied because the equipment presumably has possible military uses. It also means the Soviets will have prototypes with which to manufacture equipment to compete with free world manufacturers.

The word is also being passed that the Soviets are compelling NBC both to show Soviet-produced film excerpts during the course of the telecasts and to refuse to cover any dissident, human rights oriented episodes, should they occur, during the Olympics. As a matter of fact, I understand the Soviets intend to take all potential human rights activists out of the Moscow region for the entire duration of the Olympics and the period leading up to it.

This last point, propaganda and showing the Soviet Union for something it really is not, bothers me greatly. Hitler turned the 1936 Berlin Olympics into nazism's greatest propaganda success. Helped unwittingly by the global media, Hitler put across a strong, positive image of a "new Germany." He hid nazism's viciousness, crimes, and war preparations. He used the 1936 Olympics to blind the Western democracies to the urgency of the Nazi threat, and he used it as a mask over the rising anti-Semitism of the Third Reich.

The Soviet leaders appear to be planning the 1980 Olympics on the 1936 Berlin model. They rate the award of the games to Moscow as their biggest propaganda victory. They are already busily preparing to use the games for the glorification of the Soviet Union and communism—and more importantly, to cover their failures, crimes, violations of human rights, massive weapons program, and aggressive international policy.

According to the news reports and the informative article published by Sports Illustrated, February 21 issue, a Bavarian named Lothar Bock acted as intermediary between Moscow and the U.S. networks in negotiating the Olympics contract. Sports Illustrated states that when NBC got the contracts with the Soviet Government and the U.S.S.R. Olympics Organizing Committee, NBC also signed a contract with Lothar Bock. NBC undertook not merely to pay Bock a million dollars but "to buy 15 programs he would produce and to retain him as a special consultant for 4 years." Sports Illustrated comments: "It was a dazzling package."

Who and what is this mystery man to merit such rich prizes? What kind of programs is he going to supply for presentation by NBC? Bock has distributed programs in Western Europe in the past. Most of them seem to have been routine Soviet propaganda handouts: saber dancers from Soviet Georgia, the Osip Balalaika Orchestra, Mongolian tumblers. In 1968—at the time of the Soviet invasion of Czechoslovakia—Bock "imported a troupe of Russian singers for a tour of West Germany." A few years ago, according to Sports Illustrated, he arranged "to have a memorial plaque placed on the house in Munich where Lenin did some of his most important writing." The New York Times, February 13, reported that Bock, when asked how he had got into the Olympic act, commented:

The Russians have tremendous respect for loyalty.

It is doubtful that he meant loyalty to NBC.

The troubles of the Munich 1972 and the Montreal 1976 games showed that the Olympic tradition is in danger of destruction from intense politicizing, gross professionalism, and outright cheating. If the 1980 games are turned into a Soviet-Communist propaganda spectacle, it will probably mean the end of the Olympics.

These and other points are brought out exceptionally well in three recent columns, the first two by Jeffrey Hart of Dartmouth College, the nationally syndicated columnist through King Features Syndicate, and the third by Jim Murray, the nationally respected sports columnist for the Los Angeles Times.

I wish to include these columns at this point in the RECORD, and I urge consideration of these questions.

[Dec. 5, 1976]

U.S. TV AS SOVIET PROPAGANDA CONDUIT

(By Jeffrey Hart)

Don't be at all surprised if some TV programs very favorable to the Soviet Union begin turning up on your screen. The Kremlin is currently using the frantic competition among CBS, ABC, and NBC over coverage of the 1980 Moscow Olympic Games to bargain for direct influence over U.S. television content.

We hear a lot from U.S. television spokesmen about freedom of the press, the First Amendment, and all the rest of it—but the networks show every sign of being willing to allow Soviet government officials to dictate the content of U.S. television.

We got a mini foretaste of this during ABC's coverage of the Montreal Olympic Games last summer. Already eager for the Moscow contract, Jim McKay and his ABC colleagues were not about to give offense to the Kremlin. We therefore got a lot of canned footage showing life in the Soviet Union, East Germany, Rumania, and other such resorts to be pleasant indeed: smiling athletes, wonderful facilities, happy Siberian villagers, grinning school children.

On this sunlit TV version of the Communist world not a shadow fell from the Gulag, the Lubianka, the "insane asylums," or the colossal military buildup. Naturally, while ABC was treating us to these propaganda clips, several Communist athletes took the opportunity afforded by the Games to defect to the West.

Where the Moscow Olympics are concerned, the Federal Communications Commission should definitely attempt to ensure that some sort of balance is maintained in the TV coverage. Otherwise, the Moscow Games are going to be a much bigger propaganda bonanza than Montreal.

For the Montreal contract, ABC is reported to have paid $25 million, but the Moscow price tag will be $80 million—and that is only the beginning. The surrounding concessions will be more important. The Soviets, it is clear, view the entire operation as a tremendous opportunity to pump favorable coverage of Soviet life into every American home from coast to coast.

Most of the athletic events will take place in the huge Lenin Hills Stadium in Moscow. No doubt this will require much favorable commentary on Lenin himself, commentary that will not be provided by Solzhenitsyn, for example.

Nor will you have to wait until 1980 for the propaganda to begin to flow. Last month CBS signed an agreement with the Soviets providing for exchanges of film, and also recorded some scenes from the Moscow circus for later U.S. viewing. If you believe that this has nothing to do with the Olympic contract negotiations, well, you probably believe in the Tooth Fairy, too.

Top U.S. TV executives have practically been commuting to Moscow in their eagerness to get the Olympic contract. Recently CBS chairman William Paley made the trip in his private jet for talks with Sergei Lapin, chairman of the Soviet TV committee, and with Ignaty Novikov, in charge of organizing the Games.

From the standpoint of the U.S. networks, the Olympics are very big business indeed. Not only do the Games themselves command a huge TV audience, but they tend to have a spill-over effect on programs coming earlier and later. Audiences turn the set on early, and tend to leave it on after the Olympic program ends, thus driving up the surrounding ratings, and, of course, advertising receipts.

To get the Soviet Olympic contract, the winning U.S. network will have to offer itself as a conduit for Soviet propaganda. No matter. You can bet that Sergei Lapin is not hearing many lectures on freedom of speech from U.S. TV executives, or about objectivity, or about balanced coverage.

To nail down a contract like that, any of the networks would be willing to show the Volga flowing north.

[Mar. 8, 1977]

OLYMPIC RIPOFF

(By Jeffrey Hart)

According to Lenin, the capitalists would sell to the Revolution the rope to hang them with. NBC has now rendered Lenin obsolete. By paying Moscow a reported $80 million plus other rewards for the 1980 Olympic TV contract, NBC has provided a nice piece of rope and paid Moscow for accepting it.

The old "Robber Baron" capitalists must be spinning in their graves like so many tops.

Suppose, for example, that NBC, ABC and CBS had got together informally and agreed not to pay Moscow a cent for the Olympic contract. Without global TV coverage, the Moscow games would lose most of their intended propaganda value. Only the U.S. networks possess the expertise and the equipment necessary for global impact. The Soviets would have beat a quick path to the networks' doors, begging for the coverage, maybe even paying for it.

But instead of driving a tough bargain, the networks fell all over themselves bidding up the price. Now NBC has won the prize, at a cost of $80 million, plus an agreement to leave in Russia all the sophisticated television equipment used there—equipment the Soviets themselves cannot begin to produce.

The 1980 Olympics in Moscow will be the biggest totalitarian propaganda bonanza since the 1936 Olympics in Berlin—architectural setting by Albert Speer, special effects and cinema by Leni Riefenstahl, stirring tunes by Richard Strauss.

Not surprisingly, the 1936 Olympics made quite an impression on the outside world. Despite the heroics of Jesse Owens and the University of Washington crew, the Nazis clobbered us, winning the most gold, silver, and bronze medals, and finishing 57 points ahead of the second-place Americans. The message was clear. The German "New Order" had definitely arrived.

But with the aid of TV, the Moscow show will make all that seem pale by comparison.

And do not expect NBC, with its $80 million investment, involved, to give us any embarrassing shots of shabby-looking Russians lined up to buy a turnip or a bag of cement. Don't expect to see any interviews with dissidents, Jews who want to get out, or Baptists who want to practice their religion. After all, NBC would doubtless explain, this is a "sporting" event and not a "political" one.

The Soviets will not have to threaten or suggest censorship. NBC will censor itself, knowing perfectly well that in case anything embarrassing to the regime got on the tube, certain "technical difficulties" would doubtless arise and wreck the broadcast and the investment.

It would even be surprising if anything particularly objectionable to the Soviets appeared on NBC between now and 1980. With the implicit threat hanging in the background, the Kremlin has the network just about in its back pocket.

Of course, the Communists will sweep the medals. The USSR, East Germany, Cuba and other delightful places feature vast state-run athletic programs which select and train masses of athletes practically from the cradle onward. Kornelia Ender, Nadia Comaneci, and Alberto Juantorena are just a sample of what lies in store. The "progressive forces" are going to smash the forces of decadent Western imperialism. You are going to hear the Soviet national anthem played so often you will probably end up whistling it.

Notice that NBC will be providing ideal respectable "cover" for this propaganda spectacle. Even if Soviet TV could somehow manage the technical end of the job, Soviet TV would be automatically suspect. NBC, serving as a propaganda conduit, will provide the credibility. Nothing quite like this has ever happened: a Soviet propaganda extravaganza midwifed by an American TV network that is paying for the privilege of being so used.

Suckers! Maybe you really do deserve to be consigned to what Karl Marx referred to as "the dust-bin of history."

I suggest that a massive and determined protest be mounted against this entire outrage. Anyone concerned about freedom, about dissidents, Baptists, Jews—all such people have a stake in this issue. Corporations advertising on NBC should think again. The Carter Administration has to consider the implications of Soviet leverage over U.S. network programming.

Finally, a strong moral and political case can be made for U.S. and other athletes boycotting the Moscow show. If enough athletes did just that, NBC's $80 million would not be worth a plugged ruble.

[From the Los Angeles Times, Mar. 18, 1977]

THE REALLY ODD COUPLE

(By Jim Murray)

If you knew of an organization that was preparing to advance $80 million to Soviet Russia, plus carloads of precious television equipment for it to beam a message of Communist solidarity and prosperity to the world, would you call the CIA? The FBI? The Marines?

You might expect such an organization would be called, like, "The Committee To Free The Harvard Eight With Cox" or some such, or by an alphabetical designation. And it is. NBC.

You would never believe an American television network would become a partner of the Soviet Union. I mean, Archie Bunker is bound to misunderstand. But, I guess, that's show biz.

It's a good thing for NBC Joe McCarthy is dead. Even without him, the attack has begun. I have at hand a column by a journalist named Jeffrey Hart, and he has NBC well within his coordinates and is hauling the railway guns up.

The notion that NBC has bought the rights to the Olympic Games in Moscow in 1980 for 12 times the cost of Alaska has driven Mr. Hart into a frenzy. I suspect he is not alone.

He suggests that, without U.S. television and know-how, the Soviet Olympics would be an embarrassing flop internationally, that, in point of fact, they would probably come begging for coverage from us by opening day. Instead, we are subsidizing this showcase for Communism. We should be registered with the State Department as licensed propagandists for a foreign power.

Lenin, he suggests, must be holding his sides some place today. "According to Lenin," he writes, "the capitalists would sell the Revolution the rope to hang them with." NBC has gone this one better, he says. It has given Moscow the rope, and is paying for the hanging.

Hart calls for a boycott of NBC and the Olympics. Without the American presence, NBC's $80 million show would be just another canceled series.

It is a dilemma the U.S. Olympic Committee has faced before—but not since 1936. Those Games had been awarded to Germany before Hitler came to power, but the Nazis inherited them when they came around and they made the most of them.

The ascendancy of the Nazis posed a moral problem for the U.S. Olympic Committee. First of all, the Hitlerites had removed the venerable Dr. Theodor Lewald as president of the German Olympic Committee because he was part Jewish. Since Jews were also barred from German sporting clubs, practice fields and swimming pools, they were effec-

tively barred from the German Olympic teams.

The U.S. Amateur Athletic Union, in 1933, took note of all this and voted for a boycott of the German Games. Avery Brundage of the USOC enthusiastically supported the boycott but it was largely a campaign of the AAU president, Judge Jeremiah Mahoney, who hated Hitler as a "pagan." The judge formed a "Committee On Fair Play" to ensure no American athlete took part in Hitler's Olympics.

The Germans, for their part, didn't want to lose the propaganda value of the 1936 Olympics which Dr. Goebbels estimated as worth 20 divisions; so they did some fast window dressing. They announced that 21 Jews had been named to the German team (none of them made it). They took down the "Jews Not Wanted" signs outside Garmisch before the Winter Olympics and tried to house their guests where they wouldn't hear the screams in the night.

They wooed Avery Brundage on his investigative trip to the Fatherland in 1934 to the extent that he reversed his position on the boycott and, in a historic meeting of the AAU in New York in 1935, Brundage not only beat back Mahoney but got himself elected president of the AAU in Mahoney's place.

Not even the fact that Hitler published his infamous "Nurnberg Laws" two months before could save the good judge. As president of both the USOC and the AAU, Brundage was as firmly in charge as Hitler, and Dr. Goebbels had his showcase.

Judge Mahoney had his bonfire (with his million or so signatures protesting participation), Hitler had his parade, Brundage had his Games.

It is not likely NBC will have its Brundage. It is likely it will have its Judge Mahoneys. Also its Sakharovs, Jeffrey Harts and Solzhenitsyns. It'll be a TV first. The first time a TV show got panned before it got filmed.

It is argued that it is different now from what it was in 1936. And so it is. Hitler didn't make you bring the rope.

THE B–1 BOMBER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. McKINNEY) is recognized for 5 minutes.

Mr. McKINNEY. Mr. Speaker, perhaps no other weapons system in our Nation's history has generated more controversy over a longer period of time than the B–1 bomber. The arguments against this program I hear today are even more indicting than in past years when I have also spoken against this travesty. The B–1 is an unnecessary luxury; its costs have skyrocketed while its performance has plunged; it duplicates protection provided by land- and sea-based nuclear missiles; it costs too much money for at best marginal improvement over the B–52; it is less effective and more costly than air-launched cruise missiles; it will be obsolete by the time of final production.

Each year when this questionable project is debated by the House, it becomes increasingly evident that neither the Department of Defense, nor the Congress, can put a final price tag on the cost of the B–1. Each year it becomes increasingly apparent that the B–1 will provide but a negligible addition to our defense posture while having an adverse effect on our future economic strength. We cannot continue to drain valuable resources from our ailing economy to build gold-pleated weapons systems which will have an insignificant impact on our national security.

I oppose inclusion in the Defense Authorization of $1.2 billion to build five B–1 bombers. Aside from my basic objections to this aircraft, it is patently ludicrous to provide funding for five bombers. The only purpose I can see in this effort is to get the foot in the door, so to speak, and attempt to force President Carter to approve the B–1 when his decision comes due next month. Is inclusion of this funding based on the foolish premise that once begun, a program cannot be stopped before completion? That we have sunk so much into this program we cannot afford not to go ahead? Is it fiscal sanity to continue to pour money after a loser?

In these days of sluggish economy and high unemployment, the specter of job loss provides one of the strongest pressures for continuing with the B–1 program—and, believe me, I have received my share of mail from constituents employed in the defense industries. Yet studies have shown that defense spending does not contribute as many jobs per dollar as nondefense spending does. Therefore, if longer term job stability is the goal, people working on defense-related projects would be better served through conversion programs designed to shift their skills and facilities to areas of critical civilian need such as mass transportation or energy-efficient housing. Moreover, diverting these B–1 bomber funds to nondefense areas would aid in a much-needed stimulation to the economy without simultaneously spurring the inflation defense spending does or heightening inflationary pressures by increasing incomes without providing an added supply of consumer goods.

Mr. Speaker, our Nation has vital social and national defense needs. To continue to rip off our economy, to rip off our taxpayers, to add to the Federal deficit, by wasting money on this flying brontosaurus is unwarranted and unconscionable.

THE STATE OF OUR ECONOMIC RECOVERY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. LATTA) is recognized for 10 minutes.

Mr. LATTA. Mr. Speaker, only 2 days ago I stood before this Chamber to bring you up to date on the state of our economic recovery. You will recall that recently released indicators were describing an economy expanding at a rate well ahead of that predicted by knowledgeable economists. But I also cautioned you that there were dark clouds on the horizon: Inflation was showing signs of intensifying, while investment in new factories and productive machinery was disappointingly below the rate needed to create all the new, well-paying jobs we need so much.

During the 48 hours since I made those remarks, new evidence has become available which makes the good news even better, but the bad news even more ominous.

In March, we got more good news from our Nation's homebuilders who reported that new housing starts reached an annual rate of more than 2.1 million homes and apartments. Especially gratifying was the strong showing of new single family homes, indicating that the dream of millions of Americans to own their own homes was very much alive, and the market was responding to meet those dreams.

At mid-week we also learned that personal income for all Americans had increased in March by the second highest amount ever, and now stood at an all time high. Figures indicated that, on average, this amounted to more than $5,760 in spendable income for every man, woman and child.

We were also told that the value of those goods and services which our working men and women produce—the gross national product—had grown at a rate of 5.2 percent during the first 3 months of 1977, and probably would have approached 7 percent were it not for the vagaries of the weather during January and February. Note that this growth rate is measured in real dollars, not inflated ones. Now I may not be an economist, but I know enough to say that an increase in GNP of this magnitude is nothing but good news for all those people seeking jobs in the private sector as well as for all consumers.

It is interesting to note, however, that the Carter White House was telling us all along that the only way we could get such a good performance out of the private sector of the economy was for the Government to go out and borrow an additional $30 billion over the next 2 years from the taxpayers in order to give it back to them in the form of rebates, make-work jobs, and public works pork barrels. In Washington these days they call such fancy footwork "economic stimulus," but where I come from it is called a "con game."

As I said at the outset, however, some of the dark clouds on the horizon have gotten darker. While we were delighted to see capital markets respond favorably when the President followed the advice of the Republican Members of the Congress and dropped the rebate portion of his so-called stimulus package, we are deeply concerned that this advance may be more than off-set by the very bad news we have been getting of late on the inflation front.

Specifically, I was distressed to hear this morning that the Consumer Price Index had continued to rise above the level we had maintained during President Ford's last year in office, and for the first 3 months of 1977, was now running at the double-digit rate of 10 percent. If you recall the 1.1-percent monthly increase in the wholesale price index for March, which translates into an annual inflation rate of 13.2 percent, you can see that it is unlikely that we can expect better news on the inflation front for the near future. When we now consider the probable impact of the President's newly unveiled energy program, that pessimism

regarding the future course of prices is likely to continue for a long time.

So what can we conclude from all of this?

First, I think we can safely say that the economy is moving along at a brisk and healthy rate: Production is way up, personal income is looking great, and more than a million more Americans found jobs during the past several months alone. And remember that all of this was accomplished without any of the President's so-called stimulus measures which, he told us, were absolutely essential to avoid a new recession.

Second, we must conclude that inflation is now the greatest problem standing in the way of a prolonged and prosperous economic recovery. If the developments of the past several months are repeated too many more times in the upcoming period, our economic recovery is in real trouble. One does not have to search too far into history to recall the tragic consequences of allowing the inflation rate to take control of the economy. The price we paid—especially in terms of unemployment—the last time we fell victim to prolonged double-digit inflation just 3 years ago was too severe to chance a repeat of that again. It ought to be abundantly clear to all of us by now that those economists who claim we can continue to stimulate the economy without a serious risk of reigniting inflation are dead wrong.

It is indeed a narrow path we must tread to keep our economy moving ahead and creating jobs while not being thrown off course by a renewal of the inflationary pressures which ravaged the economy in the recent past. One thing ought to be evident to all of us when we take up the first concurrent budget resolution for fiscal year 1978 next week: we do not need, nor can we afford the risk of, any new Government programs to stimulate the economy. Most of all, we must avoid those stimulative programs which, once passed, commit the Government to pay out billions of dollars over the next 1, 2, or 3 years when such stimulation may be the very last thing which the economy needs at that time. In other words, we must not put ourselves in a position where we cannot turn off the spigot when the water is overflowing the banks.

As I said, we have a delicate balance which must be struck and maintained, and for our part we plan to be discussing over the next 2 weeks how the Federal Government can best contribute to this balance. We want to urge our colleagues on the other side of the aisle to join us in making this a bipartisan effort. And perhaps the best place to start this joint effort would be if all of us start telling the American people the truth about what good shape this economy of ours is in, and about what we can and cannot do to keep it in this condition.

HEARINGS OF THE SUBCOMMITTEE ON IMMIGRATION, CITIZENSHIP, AND INTERNATIONAL LAW, ON H.R. 94, GRAND JURY REFORM ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. EILBERG) is recognized for 5 minutes.

Mr. EILBERG. Mr. Speaker, the Subcommittee on Immigration, Citizenship, and International Law will continue hearings on H.R. 94, and other bills, proposing reforms of the Federal grand jury system. Witnesses will be former grand jurors, former and present prosecutors, and a trial judge, who will analyze the proposed reforms in light of present practices.

This bill would establish certain rules with respect to the appearance of witnesses before grand juries in order to better protect the rights and liberties of such witnesses, to require notice to a grand jury of its rights and duties, to provide for independent inquiries by grand juries, to require periodic reports to Congress, and for other purposes.

Testimony will be received from Sheldon Ashley, chairman, Federation of Grand Jurors Association of New York State; William P. Gloege, vice president, Association for Effective Grand Juries, California; John J. Lyons, chairman, Bronx County Grand Jurors Association; Edwin L. Miller, district attorney, San Diego, Calif., representing National District Attorneys Association; Hon. Frederick B. Lacey, district judge, New Jersey, representing Judicial Conference of the United States, to be accompanied by Carl Imlay, General Counsel to Judicial Conference; Charles S. Ruff, Watergate Special Prosecutor; Paul J. Curran, private attorney, former U.S. attorney, New York City; and Robert J. Del Tufo, first assistant attorney general and director of the division of criminal justice, State of New Jersey.

The hearing will be held on April 27, 1977, and will commence promptly at 10 a.m. in room 2226, Rayburn House Office Building.

U.S. CANAL ZONE SOVEREIGNTY: TRANSCENDENT ISSUE FOR PANAMA CANAL SECURITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

Mr. FLOOD. Mr. Speaker, in the 1976 Presidential campaign, the question of the sovereign control over the U.S. Canal Zone and Panama Canal became a subject of national discussion, with the people of the United States overwhelmingly supporting the retention of undiluted U.S. sovereignty over both the territory and the canal.

In spite of this fact, the Department of State has continued to press for a new canal treaty with the declared purpose of surrendering the sovereign control over the U.S. owned Canal Zone to Panama, a small, weak country of endemic revolution and endless political intrigue. Moreover, the State Department has sent its representatives on speaking tours in various parts of the Nation in support of its surrender campaign and has financed emissaries from Panama to do likewise, and all this at the expense of the U.S. taxpayer and against strong congressional opinion in opposition, well known to State Department officials.

Of the crucial canal issues now before the Congress and the Nation, the one of transcendent importance is that of retention of U.S. sovereignty over the zone. The surrender of this power to Panama would place that country in a position to nationalize the Panama Canal as was done by Egypt in 1956 in the case of the Suez Canal.

The situation presented by the actions of the State Department is an open challenge to the constitutional powers of the Congress, which has not authorized any negotiations to bring about the projected surrender.

In order to protect the United States against the possible loss of the Isthmian Canal and its protective frame of the zone territory, other Members of the Congress and I are introducing identical resolutions expressing the sense of the House of Representatives in the premises.

The question involved is not a mere local matter between the United States and Panama but one of global significance, for it involves the security not only of the United States but as well of the entire Western Hemisphere. All Members of the Congress interested in these vital matters are urged to cosponsor an identical resolution, which can be done by calling my office, or by introducing individually an identical measure.

The indicated Canal Zone sovereignty resolution follows:

H. RES. 92

Whereas United States diplomatic representatives are presently engaged in negotiations with representatives of the de facto Revolutionary Government of Panama, under the declared purpose to surrender to Panama, at an early date, United States sovereign rights and to abandon its treaty obligations, as defined below, to maintain, operate, protect, and otherwise govern the United States-owned canal and its protective frame of the Canal Zone, herein designated as the "canal" and the "zone", respectively, situated within the Isthmus of Panama; and

Whereas the United States is obligated by international agreement to regulate, manage, and protect a ship canal, guaranteeing its neutrality to the shipping of all nations at equal toll rates, to wit:

The Hay-Pauncefote Treaty of 1901 between the United States and Great Britain, under which the United States adopted the principles of the Convention of Constantinople of 1888 as the rules for operation, regulation, and management of the canal; and

Whereas title to and ownership of the zone, under the right "in perpetuity" to exercise sovereign control thereof, were vested entirely and absolutely in the United States and recognized to have been so vested in certain solemnly ratified treaties by the United States with Panama and Colombia, to wit:

(1) The Hay-Bunau-Varilla Treaty of 1903 between the Republic of Panama and the United States, by the terms of which the Republic of Panama granted to the United States in perpetuity the use, occupation, and control of the zone with full sovereign rights, power, and authority over the zone for the construction, maintenance, operation, sanitation, and protection of the canal to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power, or authority; and

(2) The Thomson-Urrutia Treaty of April 6, 1914, proclaimed March 30, 1922, between the Republic of Colombia and the United States, and under which the Republic of Colombia recognized that the title to the canal and the Panama Railroad is vested "entirely and absolutely" in the United

States, which treaty granted important rights in the use of the canal and railroad to Colombia; and

Whereas the United States, in addition to having so acquired title to and ownership of the zone by constitutional means pursuant to congressional authorization, purchased all privately owned land and property in the zone, making it the most costly United States territorial possession; and

Whereas the United States since 1904 has continuously occupied and exercised sovereign control over the zone, constructed the canal, and since 1914, for a period of more than sixty years, operated the canal in a highly efficient manner of reasonble toll rates to the vessels of all nations without discrimination under the terms of the above-mentioned treaties, thereby honoring its obligations; and

Whereas from 1904 through June 30, 1974, the United States made a total investment in the canal, including defense, at a cost to the taxpayers of the United States of over $6,880,370,000; and

Whereas the investment of the United States in the canal includes the sacrifices of many thousands of United States citizens who have worked to construct the canal, to keep it operating smoothly and efficiently, and to protect it; and

Whereas the canal is of vital and imperative importance to hemispheric defense and to the security of the United States and Panama; and

Whereas approximately 70 per centum of canal traffic either originates or terminates in United States ports, making the continued operation of the canal by the United States vital to its economy; and

Whereas the people of the United States have exhibited strong support for retention of full and undiluted jurisdiction over the canal and zone, and the Constitution insures the supremacy of the people; and

Where as Panama has, under the terms of the 1903 treaty and the 1936 and 1955 revisions thereof, been well compensated for the sovereign rights, power, and authority it granted to the United States, in such significantly beneficial manner that said compensation and correlated benefits have constituted a major portion of the economy of Panama, giving it the highest per capita income in all of Central America; and

Whereas the long established friendly and cooperative relations between the United States and the Republic of Panama as a consequence of the benefits flowing from the present treaty structure are prone to deterioration by the dilution of any United States sovereignty or jurisdiction in the canal an zone; and

Whereas the present negotiations pursuant to the February 7, 1974, "Agreement on Principles" signed without congressional authorization by United States Secretary of State Henry A. Kissinger, and by Panamanian Foreign Minister Juan A. Tack, constitute a clear and present danger to the hemispheric security and the successful operation of the canal by the United States under its treaty obligations; and

Whereas the present treaty negotiations are being conducted under a cloak of unwarranted secrecy, thus withholding from our people and their representatives in Congress information vital to the commerce and security of the United States; and

Whereas the United States House of Representatives, on February 2, 1960, adopted House Concurrent Resolution 459, Eighty-sixth Congress, reaffirming the sovereignty of the United States over the zone territory by the overwhelming vote of three hundred and eighty-two to twelve, thus demonstrating the firm determination of the people that the United States should maintain its indispensable sovereignty and jurisdiction over the canal and the zone; and

Whereas under article IV, section 3, clause 2, of the United States Constitution, the power to dispose of territory or other property of the United States is specifically vested in the Congress, which includes the House of Representatives; and

Whereas the Communist regime in Cuba has made that country a satellite of the Union of Soviet Socialist Republics in violation of the Monroe Doctrine; and

Whereas the proposed surrender of United States sovereign control over the zone and canal to Panama, which is unable to defend them, would invite the Union of Soviet Socialist Republics to establish its power still more firmly in the strategic center of the Americas and threaten the operations and projected modernization of the canal; and

Whereas such a takeover would transform the Caribbean-Gulf of Mexico into a strategic Soviet stronghold; and

Whereas the Congress of the United States is invested with constitutional responsibilities to provide for the common defense and general welfare of the United States, to regulate commerce with foreign nations, to raise and support armies and provide and maintain a Navy, to make all needful rules and regulations respecting the territory of the United States, and to make all laws necessary and proper for carrying into execution these and other powers, all of which denote that it is the solemn duty of Congress to safeguard the interests of the people of the United States in the canal and zone: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives of the United States of America that—

(1) the Government of the United States should retain unimpaired and protect its sovereign rights, power and authority, and jurisdiction over the Panama Canal and the entire Canal Zone, and should in no way cede, dilute, forfeit, negotiate, or transfer any such sovereign rights, power, authority, jurisdiction, territory, or property, all of which are indispensably necessary for the maintenance, operation, sanitation and protection, and for the proposed major modernization of the Panama Canal, as well as the security of the United States and the entire Western Hemisphere; and

(2) there be no replenishment or surrender of any presently vested United States sovereign right, power, or authority in the Canal Zone without prior authorization by the Congress; and

(3) there be no rescission or cession or other divestiture of any United States territory or property in the Canal Zone, tangible or intangible, to Panama or any other entity, country or international organization, without prior authorization by the Congress (House and Senate), as provided in article IV, section 3, clause 2, of the United States Constitution.

CLAYTON KIRKPATRICK OF THE CHICAGO TRIBUNE RECEIVES 1977 DANTE AWARD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, I would like to call to the attention of my colleagues that Clayton Kirkpatrick, distinguished editor of the Chicago Tribune, will receive the Sixth Annual Dante Award of the Joint Civic Committee of Italian Americans on May 19 at a luncheon in his honor at the Como Inn of Chicago.

Mr. Kirkpatrick has maintained the highest ethical standards during his 39-year newspaper career and he has become an admired leader in our Chicago community because of his splendid record of achievement.

The Dante Award was established by the Joint Civic Committee, an umbrella organization comprised of more than 40 civic organizations in the Chicago area, to extend recognition annually to an individual in the mass media communications field who has made a positive contribution toward fostering good human relations.

Clayton Kirkpatrick has spent most of his life in Chicago and he has earned the respect of Chicagoans, not only for the improvements he has made in the Chicago Tribune, but also for his determined hard work and creative ability. Typical of his attitude were his words to an Iowa college graduating class:

> Of this I am sure: Your prospects are as good as or better than those earlier generations faced when they stepped out to take possession of their futures. I am also certain that you can achieve a good life in this troubled world if you go about it with good will, determination, and intelligence.

He has made significant and innovative changes in the newspaper, and Time magazine has called the Chicago Tribune one of the 10 best newspapers in the country. It is for these reasons that he so richly deserves the Dante Award, because it was Dante Alighieri, in his "Divine Comedy," who said: "Men should never be timid about the truth."

Clayton Kirkpatrick began his career with the Chicago Tribune as a reporter in 1938 and was appointed editor on January 1, 1969. He was born on January 8, 1915, in Waterman, Ill., and was educated in the Waterman public schools and at the University of Illinois, where he graduated with honors in 3½ years.

In January 1938, Kirkpatrick joined the staff of the City News Bureau of Chicago. He covered police and court news until he joined the news staff of the Tribune in October 1938. He had various assignments as a reporter until he enlisted in the Army in March 1942. He spent 2 years in the intelligence section of the 100th Bombardment Group of the 8th Air Force based in England, and was discharged in November 1945, after 3½ years of service, during which he received the Bronze Star Medal. After the war, Kirkpatrick returned to the Tribune as a general assignment reporter.

In 1950, he won the Edward Scott Beck Award for distinguished journalism for a series of seven articles on trade unions. In 1954, he left the job of a reporter to gain experience in copy editing and newspaper makeup. Kirkpatrick was appointed day city editor in 1958 where he directed assignments of the city staff and in 1961, he became city editor.

The job of city editor was the start of a rapid pace of increasing responsibilities, and in 1963, he was appointed assistant managing editor in charge of local news, becoming managing editor of the Tribune on February 27, 1965. Mr. Kirkpatrick was promoted to executive editor and elected a vice president of the

Chicago Tribune Co. in 1967 and 2 years later he assumed his present office. In 1972, he was elected a director of the Chicago Tribune Co.

Clayton Kirkpatrick is a member of the American Society of Newspaper Editors and the Society of Professional Journalists. He was honored in 1973 as Journalist of the Year by Northern Illinois University, was selected 1974 Press Veteran of the Year by the Chicago Press Veterans Association, and in 1977 received the National Award for Journalistic Merit, sponsored by the William Allen White Foundation. He was elected a trustee of the Robert P. McCormack Charitable Trusts in 1976, and in the fall of last year, he also served as a delegate to the 19th General Conference of UNESCO held in Nairobi, Kenya.

Kirkpatrick married Thelma De Mott of Chicago on February 13, 1943, and they have four children: Pamela, born in 1946; Bruce, born in 1948; Eileen, born in 1952; and James, born in 1954.

Mr. Speaker, it is most appropriate that this outstanding Chicago citizen should receive the Dante Award. I extend sincerest congratulations to Clayton Kirkpatrick on meriting this recognition and honor, and my best wishes for abundant good health and continuing success in his endeavors in the years ahead.

THE SHOE IMPORT DECISION AND TRADE ADJUSTMENT ASSISTANCE: THE NEED TO MAKE IT WORK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, in announcing his decision to negotiate orderly marketing agreements on the importation of shoes, the President also indicated that he was ordering the executive branch to provide new and better forms of adjustment assistance to the shoe industry and to the shoe-producing communities adversely impacted by shoe imports. The President stated:

> The American shoe industry needs an expanded and more effective program of assistance to help it meet foreign competition. I have directed the Secretary of Commerce to work directly with the Secretary of Labor and Ambassador Strauss in developing such a program. Toward this end, these officials will see that existing assistance programs work better.
>
> In addition, I will recommend to Congress within 90 days any legislation which may be needed to provide:
>
> Technological aid to increase production efficiency and develop new production methods.
>
> Data and market research to pinpoint new marketing opportunities.
>
> Assistance for affected communities and workers.
>
> Help with promotion and marketing services.
>
> Financial assistance to support these initiatives.

It is worth noting that in 1970, another President rejected shoe industry pleas for import relief and instead announced a comprehensive program of adjustment assistance for the shoe industry. Unfortunately, the grandiose plans of 1970 were never implemented, and the shoe industry in America has, on the whole, been in decline since then.

Unlike the 1970 promises, I trust that President Carter's commitment for an effective program of adjustment assistance will in fact be carried out.

The best form of trade adjustment assistance is a full employment economy—one in which there is low unemployment and a high demand for workers and for capital goods.

It appears to be some time, however, before we expect to achieve such an economy. Therefore, in the meantime, how can we make trade adjustment assistance work?

First of all, we must admit that the present adjustment assistance programs do not work. For workers, the programs are simply additional unemployment compensation. Few are retrained or seek relocation to areas with jobs. For firms, it is a program of high interest loans to those who can somehow simultaneously prove that they have been badly hurt by imports but can pay the loan back. For communities—well, it has simply never been applied or used.

Second, while many strongly want to reject the adjustment assistance announced by the President in favor of the relatively high tariff-quotas proposed by the U.S. International Trade Commission, the fact is that both the relief proposed by the ITC and by the President's orderly marketing agreements are very short-term—and that massive adjustments are required by the shoe industry. The authority to negotiate orderly marketing agreements and the authority to impose tariff-quotas are limited to 5 years—with one possible 3-year extension. The shoe industry, its workers, and the communities in which shoe industries are located must begin to answer the question now about how they expect to compete without relief 5 or 8 years from today.

In short, it is clear that we need adjustment assistance programs which work.

The Ways and Means Trade Subcommittee is currently reviewing the operation—or nonoperation—of the adjustment assistance programs provided by the Trade Act of 1974. We held hearings on March 31 and April 1 and will hold additional hearings on May 17 to hear administration plans to make the adjustment assistance program operate effectively overall as well as for the shoe industry.

But while amendments to the current programs are essential, even more important will be the total commitment of the administration to new ideas for providing jobs in trade impacted areas.

First, I believe that the Federal scientific agencies must be used to help find improved technologies which can help make American firms more competitive. While millions have been loaned to companies for working capital assistance, only about a half a million dollars in assistance has been provided to a footwear association to: First, provide a system for warning its members of changes in shoe styles and consumer preferences; and second, a study of ways to improve the productivity of shoe machinery. Much more needs to be done in these technological areas. For example, the European Community has a scientific group which assists on trade adjustment assistance problems. A recent article in the European Report described the type of technological research being conducted in Europe to save their ailing shoe industry:

> The Commission budget will pay 235,000 u.a. of an estimated total cost of 505,000 u.a. for two research projects. A third 850,000 u.a. project will be undertaken subsequently if the first two are a success, but for the moment there is no question of provision of Community funding for this one. The footwear programme is guided by the same principles as the existing programme of technological research in the textile sector. In fact, CREST, the scientific committee which sets research projects, has recommended that the Commission adopt a global strategy for programmes of this nature in future.
>
> SAVINGS VIA RATIONALIZATION
>
> Projects I and II, which will begin this year, deal with rationalized use of materials for uppers and rationalization of upper making. Project I is a four-year programme costing 255,000 u.a. in all (85,000 u.a. this year, 80,000 u.a. next, 70,000 u.a. in 1979 and 20,000 u.a. in 1980); project II is a two-year programme costing 150,000 u.a. this year, 100,000 u.a. next. The difference between the 235,000 u.a. being put up by the Community and the 505,000 u.a. total will be contributed by Community industry. The third project, if it gets off the ground, will deal with the correlation between footwear technology and consumer goods.
>
> The justification for the first project is that the manufacturer of uppers always involves relatively serious waste of materials. It is estimated that wastage could be halved and that even a 2% improvement in materials utilization would produce annual savings of about 13 million u.a. In the second project a 20% reduction in the operation involved in stitching a shoe could lead to an estimated annual saving of 40 million u.a. At present there are 18 steps—varying in extent according to the type of shoe—that have to be rationalized and harmonized both to simplify the production process and to increase job satisfaction. The research will require quite complex systems analysis which takes account of the actual situation in and diversity of the European footwear industry and collaboration between a large number of firms throughout the Community is regarded as essential.

While shoes are manufactured in 42 States, there are 11 "main" shoe producing States where the impact of shoe imports has been particularly serious. The administration's trade adjustment assistance program should concentrate on those general areas where there is a noticeable amount of unemployment due to foreign imports.

I realize that there are many geographical areas of our country with pressing needs—Appalachia, Indian reservations, central cities, and areas already designated as Economic Development Administration areas. There is an urgent need to make all of these regional programs work better, and I hope that the administration will be more creative in the use of programs to help these areas.

One of our witnesses at the April 1 hearing noted that Trade Adjustment Assistance could be made more effective:

Generalized statistical data should be used in lieu of individual firm data to qualify regions and communities, long

injured by import competition, for the full range of assistance available under the Trade Act of 1974 and Public Works and Economic Development Act of 1965, as amended.

Once an area's employment is identified as adversely impacted by imports, the Federal Government should commit itself to using its full resources to help that area. In addition to the established programs such as EDA, community development, water and sewer projects, highways and other forms of transportation development, the Federal Government should use other forms of job creation. For example:

A recent study by the Northeast-Midwest Economic Coalition in Congress shows the failure of a 1952 Defense Department policy to direct purchases toward areas of highest unemployment. In the past 25 years less than one-fifth of 1 percent of the hundreds of billions of dollars in military purchases has been spent to relieve acute unemployment. This policy should be revived and made effective to help trade impacted areas.

The Federal Government remains largely centralized in Washington. At a time of reorganization, it is time to ask whether all of these facilities, bureaus and agencies need to remain in the highest per capita income metropolitan area in the Nation. With today's telecommunications techniques, dispersion of facilities is possible without loss of management control. Yet, a single small Federal facility—such as an agency's forms distribution center—would be the center of economic life in most small towns in America. The situation is ripe for "space reorganization" away from Washington into areas with high unemployment. According to the latest GSA data, there are 20 buildings in the Washington area which house five or more Federal agencies. There are Defense Department workers in the Pentagon and 123 other buildings, not counting military installations. Treasury employees are in 39 different locations and Commerce Department workers occupy space in 37 buildings. The space situation in the high priced Washington area is chaotic and wasteful. Literally dozens of these agencies could be moved out of Washington and into depressed and high unemployment areas.

The energy crisis is a national emergency which will require the commitment of hundreds of billions of dollars for the purchase of insulation and energy saving devices. Much of this effort will be paid for by the Federal Government—and the Government should sit down with the industries involved and direct that plant expansion in energy conservation industries be located in areas of high unemployment. It is probable that solar energy already has a favorable cost-benefit ratio. Yet the industry is hampered by the failure to mass-produce solar energy devices. We are in an energy emergency. The Federal Government should contract for solar energy cells and equipment—just as it would for munitions during a war—and if necessary assist in the construction of physical plants to begin the production on a massive scale of solar energy devices. Such plants should be operated in trade adjustment assistance areas and other areas of high unemployment.

One of the areas hardest hit by high levels of imports is New England, an area already in trouble because of the extraordinary high costs of energy in the region. The trade adjustment assistance program should provide legislatively or through administrative action, for community and areawide solar energy experiments, pilot projects on the transmission of energy with a minimum of energy loss, et cetera. An area with high unemployment should be able to attract private investment and new industries if it is the site of a successful experiment in low-cost, domestic energy. The TVA was a successful economic program for a region. Today we need solar energy administrations on a regional basis to provide cheap forms of energy for areas adversely impacted by the high cost of energy and a high level of imports.

There are many who say that trade adjustment assistance does not work. I agree. But, I believe that we can make the program work, so that communities adversely affected by imports can free themselves from reliance on industries which have traditionally been among the lowest wage and least mobile in our society. A creative approach to trade adjustment assistance will enable us to retain the benefits of relatively open world trade while improving the quality of jobs and life in many of our Nation's communities.

ADOPTION OF FOREIGN CHILDREN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. HARRIS) is recognized for 5 minutes.

Mr. HARRIS. Mr. Speaker, I am today introducing legislation to facilitate the admission and naturalization of adopted foreign orphans.

The Immigration and Nationality Act effectively prevents most individuals from adopting more than two foreign children irrespective of the ability of the prospective parent to care for additional children. The act also requires adopted children to reside with their parents for 2 years subsequent to completion of the legal adoption process before an application for naturalization can be considered.

These two requirements are unnecessary. If the prospective parent is able to care for more than two children, there is no reason to automatically limit the number of foreign children which that person can adopt. Other safeguards exist to assure that a prospective parent can provide proper care for adopted children.

Similarly, upon completion of the adoption process, there is no reason to require the adopted child to reside with his parents for 2 years before the child can file for naturalization. A parent who legally adopts a child is responsible for that child; and, the immigration status of the child has no bearing upon the legal responsibility of the parent. Furthermore, I sincerely doubt that a child is going "to do anything" in the 2 subsequent years that might prejudice his petition for naturalization.

I have been advised by the Migration and Refugee Service of the U.S. Catholic Conference that the conference supports the elimination of these requirements. I understand that in the past, the Immigration and Naturalization Service has not opposed similar proposals to eliminate these unnecessary requirements.

The issues which my bill addresses are of concern to the adoptive parents of foreign children. This is certainly not a controversial bill. I hope the Subcommittee on Immigration, Citizenship, and International Law will schedule early consideration of my bill.

ADVISORY OPINIONS ISSUED BY THE SELECT COMMITTEE ON ETHICS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. PREYER) is recognized for 5 minutes.

Mr. PREYER. Mr. Speaker, the Select Committee on Ethics, which I am privileged to chair, has issued four formal advisory opinions which have general applicability to all Members of the House. In summary, these advisory opinions provide as follows:

First. The prohibition on use of private funds to print mass mailings shall take effect January 1, 1978.

Second. Necessary expenses provided in connection with an event in which a Member or employee substantially participates are not considered to be a gift.

Third. Members and employees are prohibited from acceptig free transportation provided by commercial airlines on inaugural flights.

Fourth. Direct mail solicitation by a Member or his spouse constitutes a fundraising event, and therefore the proceeds from such mailings must be treated as campaign contributions and cannot be converted to personal use.

Mr. Speaker, for the information of the Members, I insert in the RECORD at this point the text of these four advisory opinions, pursuant to the procedures adopted by the Select Committee.

The material follows:

ADVISORY OPINION NO. 1

ISSUED BY THE COMMITTEE ON MARCH 22, 1977

Subject: Effective date of House Rule XLVI, clause 4, prohibiting use of private funds to pay for the cost of preparing and printing mass mailings.

Background: House Rule XLVI, clause 4, as adopted by the House on March 2, 1977, provides as follows:

Any mass mailing which otherwise is frankable by a Member under the provisions of section 3210(e) of Title 39, U.S. Code, shall not be frankable unless the cost of preparing and printing such mass mailing is defrayed exclusively from funds made available in any appropriations Act.

The Commission on Administrative Review, in its report on Financial Ethics (H. Doc. 95–73, February 14, 1977, p. 19) recommended that this restriction on mass mailings take effect January 1, 1978. However, the provision as contained in Title IV of H. Res. 287, inadvertently omitted reference to an effective date. Consequently, during House consideration of H. Res. 287 on March 2, 1977, a colloquy between Mr. Obey and Mr. Frenzel affirmed that the Commission on Administrative Review had intended that clause 4 of Rule XLVI take effect on January 1, 1978 (see

Congressional Record, March 2, 1977, p. 5941), and that this was the intent of H. Res. 287.

Reason for issuance:

Clause 4 of House Rule XLVI is silent as to an effective date, and thus may be deemed to have taken effect upon adoption, notwithstanding legislative history to the contrary. In order to clarify the situation and to assure Members that they may continue to use private funds to prepare and print mass mailings sent under the frank until January 1, 1978, the Select Committee issues this advisory opinion.

Opinion: Members may continue to use private funds to prepare and print mass mailings sent under the frank until January 1, 1978.

ADVISORY OPINION NO. 2

ISSUED BY THE COMMITTEE ON APRIL 6, 1977

Subject: Applicability of House Rule XLIII, clause 4, to reimbursement or payment of necessary expenses associated with a conference, meeting, or other similar event in which a Member, officer, or employee of the House participates.

Reason for issuance:

Members have raised a number of questions concerning the definition and application of the gifts provisions as set forth in House Rule XLIII, clause 4. An advisory opinion has been requested as to whether the reimbursement or receipt of expenses connected with events in which a Member, officer, or employee participates constitutes a gift.

Background:

House Rule XLIII, clause 4, establishes, in effect, that Members, officers, or employees of the House shall not accept gifts in any calendar year aggregating $100 or more in value, directly or indirectly, from any individual, organization, or corporation with a direct interest in legislation before the Congress, or from a foreign national.

In most cases, an individual's expenses for a meeting or conference, including transportation, food, and lodging, would exceed the aggregate figure of $100. Additionally, many sponsoring organizations, domestic or foreign, would have an interest in legislation before the Congress. However, necessary expenses should not be considered to be a "gift" to a participating individual who renders personal services sufficient to constitute "equal consideration" for the expenses provided by the sponsoring organization. Conversely, it should be noted that the services rendered must be more than perfunctory in nature to constitute equal consideration for the expenses involved. For example, addressing an audience at an event or engaging in discussion seminars would be considered substantial participation sufficient to constitute "equal consideration," while simply visiting a specific site or location as part of a "fact-finding tour" would probably not be viewed as "equal consideration" for expenses paid by a sponsoring organization.

A similar philosophy of exempting expenses for participation in an event is recognized in clause 3 of House Rule XLVII, which excludes travel, lodging, and meals from calculation of the honorarium paid for a speech or appearance.

A separate question surrounds the reimbursement or payment of similar expenses for the spouse of a Member, officer, or employee. If a sponsoring organization pays the spouse's expenses to attend an event in which the Member participates, would those expenses constitute a gift to the Member under clause 4 of Rule XLIII? Rule XLIII does not specifically address this question. But as a matter of precedent, Federal Election Commission regulations exclude payment of expenses for a spouse as a portion of the honorarium received by a Member, officer, or employee. As a matter of policy, the ability of the spouse to accompany a Member to such events has many positive benefits. If House Rules are interpreted so as to prevent reimbursement of a spouse's travel, food, and lodging expenses, the incentive for Members to participate in meaningful programs will be diminished.

Summary opinion:

A Member, officer, or employee of the House (and their spouses) may be paid or reimbursed for transportation, food, and lodging expenses when such expenses are directly associated with a conference, meeting, or similar event in which the Member, officer, or employee substantially participates. Such reimbursements or payments aggregating $250 or more would be disclosed in accordance with the provisions of Part B, clause 1 of Rule XLIV, as provided by H. Res. 287.

ADVISORY OPINION NO. 3

ISSUED BY THE COMMITTEE ON APRIL 6, 1977

Subject: Applicability of House Rule XLIII, clause 4, to acceptance of free transportation provided by air carriers on inaugural flights.

Reason for issuance: The Select Committee has been requested to issue an advisory opinion on the propriety of Members, officers, or employees of the House of Representatives accepting free transportation provided by air carriers on inaugural flights.

Background: Commercial air carriers are authorized, under federal regulations (18 CFR 223.8 and 399.38) and with the approval of the Civil Aeronautics Board, to provide free transportation on "inaugural flights" to invited guests when a new route or new equipment is introduced. Traditionally, the air carriers invite Members and employees of the House of Representatives, as well as officials of the Executive Branch, on such inaugural flights.

The applicable House Rule in this situation is Rule XLIII, clause 4, which provides, in effect, that a Member, officer, or employee of the House of Representatives shall not accept gifts in any calendar year aggregating $100 or more in value, directly or indirectly, from any party with a direct interest in legislation before the Congress, or from a foreign national.

The air carriers are subject to federal regulation, and thus are deemed to have a direct interest in legislation before the Congress. The question to be determined is whether an inaugural flight constitutes a gift.

In the case of inaugural flights, the Member, officer, or employee of the House does not appear to render any services of equal consideration to the value of the flight, and therefore an inaugural flight would appear to constitute a gift to the Member, officer, or employee. If the value of the transportation provided on an inaugural flight exceeds $100, and the Commitee assumes that such would be the case in every instance, acceptance of such a gift would be prohibited under Rule XLIII, clause 4.

The Committee recognizes that the definition of the term "gift" for purposes of Rule XLIII, clause 4, might not include some situation where a trip or event is primarily intended for educational purposes and is directly related to a Member's or officer's or employee's official duties. However, the Committee finds that inaugural flights, as traditionally defined, do not have sufficient educational value to exclude them from the definition of a gift for purposes of the intent of Rule XLIII, clause 4.

Summary opinion: Acceptance of free transportation provided by air carriers on inaugural flights is prohibited under House Rule XLIII, clause 4.

ADVISORY OPINION NO. 4

ISSUED BY THE COMMITTEE ON APRIL 6, 1977

Subject: Under House Rules, may a Member of the House or the spouse of a Member solicit cash gifts of less than $100 for personal use through a direct mass mailing?

Reason for issuance:

A member of the House has requested an advisory opinion as to whether his proposal to solicit gifts of less than $100 for personal use would be in violation of House Rule XLIII.

Background:

Rule XLIII, clause 4, prohibits acceptance of gifts aggregating over $100 from "persons" having a direct interest in legislation before the Congress. Since the proposal would solicit only gifts of less than $100, it would not be in violation of clause 4.

However, Rule XLIII, clause 7, appears to have direct application to the proposed plan to solicit gifts. Before March 3, 1977, Rule XLIII, clause 7, read as follows:

A Member of the House of Representatives shall treat as campaign contributions all proceeds from testimonial dinners or other fund-raising events if the sponsors of such affairs do not give clear notice in advance to the donors or participants that the proceeds are intended for other purposes.

This provision was designed to deal with situations in which donations were given to Members under the mistaken notion that they were to be used for campaign purposes when, in fact, they were treated as personal gifts. Hence, language was adopted which specified that unless advance notice was given, proceeds from fund-raising events could not be converted to personal use.

The House Commission on Administrative Review recommended that proceeds from testimonial dinners and other fund-raising events should not be allowed to be converted to personal use under any circumstances. Effective March 3, 1977, H. Res. 287 amended clause 7 to read simply:

A Member of the House of Representatives shall treat as campaign contributions all proceeds from testimonial dinners or other fund-raising events.

In a technical sense, then, the propriety of the proposal turns on the interpretation of a "fund-raising event." There was no legislative history defining the term fund-raising event when Rule XLIII was adopted in 1968.

But in view of the widespread use of mass mailings to raise funds (direct mail solicitation has become a principal fund-raising technique since 1968), it would appear that the proposal under consideration constitutes a fund-raising event. In the age of computerized mass mailings, it is unnecessary for people to gather together in a common place on a particular date to constitute a "fund-raising event."

Additionally, Rule XLIII, clause 2, would appear to have applicability in this case. The provision states:

A Member, officer, or employee of the House of Representatives shall adhere to the spirit and letter of the Rules of the House of Representatives and to the rules of duly constituted committees thereof.

A major thrust of the provisions contained in the new House Rules adopted March 2, 1977, was to severely limit the potential for Members to "cash in" on their positions of influence for personal gain. Therefore, a limitation on outside earned income was proposed and adopted. A proposal to abolish unofficial office accounts was offered and adopted. A proposal to prohibit the conversion of political funds to personal use was adopted. And the proposal discussed above to treat all proceeds from fund-raising events as campaign contributions was also adopted. Therefore, it would appear that a proposal to solicit funds for personal use would be contrary to the "spirit" of the House Rules adopted pursuant to H. Res. 287.

The final question concerns the propriety of a spouse raising funds through mass mail solicitation for the benefit of the Member. While the Select Committee recognizes the basic independence of the spouse, the spouse under these circumstances would be acting essentially on behalf of the Member. Thus, the Member would be conducting indirectly the very activities he would be prohibited from engaging in directly.

Consequently, the mass mail solicitation of funds by a spouse for a Member's use also appears to violate the "spirit" of House Rules.

A direct mail solicitation by a Member of the House or the spouse of a Member constitutes a "fund-raising event" for purposes of House Rule XLIII, clause 7. Proceeds from a "fund-raising event" for a Member of the House must be treated as "campaign contributions" and cannot be converted to personal use by the Member. Therefore, any such attempt to raise funds for personal use through a mass mailing would be in violation of House Rule XLIII, clause 7. Additionally, any such activity would appear to be contrary to the spirit of House Rules and, therefore, in violation of House Rule XLIII, clause 2.

This Advisory Opinion concerns application of House Rule XLIII to a specific factual situation presented to the Select Committee on Ethics for consideration, and its coverage is limited to that particular factual situation.

FOSTER CARE AND ADOPTION IMPROVEMENT ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. MILLER) is recognized for 5 minutes.

Mr. MILLER of California. Mr. Speaker, I am introducing today, along with the chairman of the Subcommittee on Select Education, Mr. BRADEMAS, the Foster Care and Adoption Improvement Act. This comprehensive reform legislation is the outgrowth of two sets of hearings in 1975 and 1976 which were called by Chairman BRADEMAS and which detailed the shortcomings in the present foster care system and suggested the kinds of reforms which are embodied in this legislation.

This bill will establish protections for foster children, their parents, and their foster parents, and will expand the possibilities for the adoption of many of the 120,000 foster children who could, according to a leading adoption expert, be adopted immediately. By emphasizing alternatives to foster placement, and directing more energies toward dealing with problems in the family before fragmentation becomes the only alternatives, this legislation will have the effect of strengthening the family, long an objective of mine and of Mr. BRADEMAS.

When a child enters foster care, research has clearly indicated that present guidelines and procedures do not adequately protect his rights or interests. Current legal requirements concerning case plans, periodic review, and other safeguards are widely ignored, with the result that tens of thousands of children remain in long term, indeterminate care far longer than actually is necessary, often with sad results for themselves and their families.

In 1975, Mr. BRADEMAS and then Senator MONDALE conducted a day of joint hearings which pointed out the shortcomings of the Federal role in foster care. Last September, Mr. BRADEMAS and I held another day of hearings during which alternatives to the present foster care crisis were thoroughly discussed and shown, where operating in select areas of the country, to be highly successful and cost-effective. This legislation, which I am introducing today, will establish those types of accountability processes as standard features of Federal law.

This legislation has been developed from the record of those hearings by the Select Education Subcommittee, and with the assistance of many concerned and interested parties from the child welfare and child advocacy communities. I believe that this legislation will receive unusually strong support from a wide spectrum of concerned individuals and organizations, and I urge my colleagues to join me in supporting it.

VIETNAM VETERANS

(Mr. HANLEY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HANLEY. Mr. Speaker, our Nation is slowly, but surely, recovering from the wounds of the Vietnam war. Through the amnesty programs of the Ford and Carter administrations, many of those young people who left their homes to seek refuge in other countries, rather than fight in a war which they believed to be wrong, have made their ways back to the families and country which they love. Through the special discharge review program, those individuals who received less than honorable discharges, often because of their open opposition to the Vietnam war, will be eligible to have their military discharges upgraded. There are, however, a certain group of Vietnam veterans who are still suffering from the effects of their service in Vietnam and whose problem, to date, has been largely ignored.

These are individuals who, for the most part, served honorably in Vietnam, some of whom were wounded during their military service, and who were discharged under honorable conditions. Yet, these veterans, discharge form in hand, have been repeatedly denied employment. They are often preplexed as to the reason for their continual problems in securing employment, and wonder why their prospects of being hired look good until the prospective employer reviews their DD Form 214. One particular veteran who has been in contact with my office has even been passed over on several occasions for individuals who had less education and work experience, and who scored lower than he did on aptitude tests. What these veterans do not realize is that they have been assigned a cryptic SPN code which, in some way, brands them as a less than desirable individual.

The SPN code, which was allegedly designed for use only by the Department of Defense in determining an individual's desirability for reenlistment, has been roundly criticized. The assignment of an SPN code was discretionary, and seemed to be based on no standard criteria. Most veterans do not even know of the existence of these codes on their DD Form 214, and very few veterans actually know what the code means. Yet, through some mysterious means, lists of the code interpretations have been widely made available to large corporations, colleges, and private employers, who can easily look at the veteran's discharge papers and interpret the meaning of the SPN code.

Through use of the SPN code veterans have been unknowingly branded as having character and behavior disorders, as being unfit for multiple but unstated reasons, of having unsanitary habits, of immorality, of being financially irresponsible, of having an antisocial personality, of apathy, of having venereal disease—on and on to about 300 various items. Many, but not all SPN codes are derogatory in nature. From what I have been able to ascertain, SPN codes were assigned on the basis of comments entered by various officers. The basis for such comments could be as arbitrary as a personality conflict between an officer and a serviceman. In the majority of cases there is no concrete evidence to support the remarks—remarks which are merely personal feelings and personal observations. The serviceman is given no opportunity to refute the assignment of an SNP code, and most veterans are completely unaware of the code's existence or meaning.

When certain Members of Congress began questioning the use of SPN codes, the Department of Defense undertook administrative action to eliminate the use of the codes rather than face a congressional investigation and possible legislative action. Veterans were instructed to contact the Department of Defense to obtain a revised copy of their DD Form 214, on which the SPN code would be eliminated. This, however, has proven to be a token gesture on the part of the Department of Defense, and has not solved the problem. The SPN code is still contained on the file copies of a serviceman's records maintained by the Department of Defense. Schools and private employers seem to have an uncanny knack for obtaining a veteran's SPN code, even after the veteran has presented them with a revised copy of his DD Form 214 on which the SPN code has been eliminated. In some cases, private employers even refuse to accept the revised DD Form 214, insisting that the veteran furnish them with the original form containing the code and refusing to consider the veteran if he does not do so.

To further illustrate the problems which the elusive SPN code has caused veterans, I would like to share with you the case of a veteran from upstate New York who served honorably and had a tour of duty in Vietnam. This veteran's mistake was not in evading his duties, as he personally witnessed the horrors of the Vietnam war. He was appalled by what he saw, and was concerned by the opposition to the war at home. His mistake was that he exercised his constitutional right to freedom of speech and openly voiced his opposition to the war and what he saw—something which an

enlisted man apparently could not do without incurring the wrath of his superiors.

Several years later, after a series of temporary jobs and numerous employment denials, this veteran learned that his SPN code indicated that he did not handle his personal affairs in a satisfactory manner. He has stated that he is at a loss in explaining why this code was assigned to him, other than through his vocal opposition to the military's involvement and actions in Vietnam. In reliance on the SPN code, prospective employers have decided that a veteran who cannot handle his own personal affairs in a satisfactory manner could not be trusted to handle his duties on the job in a satisfactory manner. One can only imagine the difficulties which a veteran whose SPN code indicates that he is immoral, or financially irresponsible, or a trouble maker would have in obtaining employment.

Again, it is important to keep in mind that these veterans never faced formal charges for their alleged offenses. They have been given no opportunity to refute the assignment of a derogatory SPN code, and there are no administrative procedures available to these veterans to have the code changed.

While SPN codes are no longer used by the Armed Forces, those veterans discharged prior to May 1974 still have SPN codes on their military records, even though the code may have been eliminated from the copy of the DD Form 214 which they have in their possession. As previously pointed out, the SPN code of a veteran and its meaning seem to be readily available to anyone who is interested in obtaining it.

It is my belief that these veterans have been done a great injustice by the Armed Forces and by society. The voluntary action of the Department of Defense to expunge the SPN code from the veteran's copy of his DD Form 214 has proven to be a farce, and the code must be removed from all copies of the veterans records if justice is to be done. These individuals deserve as much, if not more, consideration than draft evaders and individuals who received less than honorable discharges.

These veterans have suffered far too long, but it is not too late for the Congress to take affirmative action in insisting that any reference to the arbitrary SPN code be eliminated from all records maintained by the U.S. Government, and that the Veterans' Administration deny GI bill approval for any employer or educational institution known to use the SPN code as a criteria for the hiring or selection of veterans. Most important, I urge all of my colleagues in the House to join me in contacting the Secretary of Defense to let him know of our concern in this matter, and to ask that he take administrative action to eliminate all reference to a SPN code from all copies of a serviceman's records. If our unified actions are unsuccessful, it may prove necessary to enact legislation in order to correct this gross injustice to Vietnam veterans.

PERSONAL STATEMENT

(Mr. BRADEMAS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BRADEMAS. Mr. Speaker, I insert in the RECORD at this point a statement regarding a recorded vote I missed on Monday, April 18, 1977, and an indication of how I would have voted had I been present.

The vote was on rollcall No. 135, on a motion to suspend the rules and pass H.R. 3340, Business Use of Residences for Day Care Service. The motion was agreed to by a vote of 320 to 1. I was paired for this motion, and had I been present, would have voted in favor of it.

THE 64TH INTERPARLIAMENTARY UNION CONFERENCE

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, at the recent conference of the Interparliamentary Union in Canberra, Australia, in which 61 nations with parliamentary bodies participated, I had the honor to be one of the delegates from the United States and to be a member of the Economic and Social Committee at the conference. In the course of the deliberations of that Committee, I had the privilege of speaking for the United States upon the matter which was one of the subjects on the agenda at the conference on the contribution of the developed countries to the establishment of mechanisms of cooperation among the developing countries. I ask unanimous consent, Mr. Speaker, that my remarks to the Economic and Social Committee at this conference, which were approved in advance by the State Department, be incorporated in the body of the RECORD following these remarks.

64TH INTERPARLIAMENTARY UNION CONFERENCE, CANBERRA

Subject: The Contribution of the developed countries to the establishment of mechanisms of cooperation among the developing countries

The United States delegation is pleased to join in discussing the highly important topic of cooperation among developing countries and wishes to treat both its major components, namely, economic cooperation and technical cooperation. The general concept, of course, has a long history and is firmly based in the current Decade of Development, under which the United States and other developed countries agreed (in paragraph 40 of the International Development Strategy) to support regional cooperation among developing countries through financial and technical assistance as well as commercial policy.

Subsequent resolutions of various international forums have sought to assure concrete application of this principle. Within the last year alone it may be recalled that UNCTAD IV combined a number of specific proposals into that conference's Resolution 92 on economic cooperation among developing countries, and the subsequent meeting of the Trade and Development Board in October went on to establish a special committee for further consideration of the matter.

The 31st General Assembly also adopted a resolution on December 13, 1976, reviewing past action in this field and welcoming formation of the special committee. The United States intends to cooperate fully in the work of that body when it meets in Geneva next month (May 2-6).

Reference to previous resolutions, however, should not be interpreted as meaning unqualified U.S. support for all of the many detailed recommendations which have been made in this field. In this respect even the stated topic of "establishment of mechanisms of cooperation" may be misleading, for this conference (and other for considering this issue) should examine the more effective use of existing mechanisms as well as creation of new ones. In addition, consideration of the "contribution of the developed countries" should not obscure the fact that cooperation among the developing countries must originate with them and that support from others can prove effective only to the degree that a program is well conceived and fully agreed among the nations immediately involved.

With these qualifications it should be emphasized that the U.S. Government already extends extensive support to regional cooperation and economic integration in two forms, (1) direct bilateral technical and capital assistance to regional projects and/or institutions, and (2) support of regional financial institutions which in turn fund integration projects or activities (e.g., the IDB, ADB, etc.). The United Nations regional economic commissions, particularly those for Latin America (ECLA), for Asia and the Pacific (ESCAP), for Africa (ECA), and for Western Asia (ECWA), have been active for many years in the promotion of economic cooperation among the developing nations. The United States is a charter member of both ECLA and ASCAP and hence has been actively involved in these efforts for almost 20 years. It participates also in ECA and ECWA in an observer capacity.

An important new concept in the field of cooperation among developing countries is that of technical cooperation. While this idea in various guises has been practiced for a long time, the concept is being given new emphasis as the needs of the developing world grow, the resources of the industrialized nations become limited and the capabilities of some advanced LDC's improve.

Technical cooperation among developing countries or "TCDC", as this approach is labeled, is seen as an additional means of mobilizing untapped and appropriate resources and capabilities—those within developing countries themselves—for the benefit of the Third World in general. Rather than a separate program, it is to be viewed as a dynamic process of development through mutual sharing which should permeate all multilateral activity, especially as carried out in the United Nations system. This recourse to indigenous skills and production should at one and the same time enlarge the world reservoir of resources for development assistance, refine and expand the human and material resources within the developing world and encourage that self-reliance which promotes independence and human dignity.

The principal catalytic element in the realization of TCDC is the United Nations Development Program. Acting upon resolutions passed in the UN General Assembly and by its Governing Council, UNDP has cosponsored meetings on TCDC in each of the four regional economic commissions and has developed an information referral system as a catalogue of skills and products available in the developing world. A year from now, UNDP will co-sponsor with the United Nations a world conference on technical cooperation among developing countries.

The United States has been involved with

development of the concept of TCDC from its inception. It was largely at our urging that the Information Referral System was set up. We have participated actively in each of the regional meetings on TCDC and are assuming an appropriate role in the preparations for the world conference. In short, the United States is committed to this additional means of involving the developing countries in all aspects of developmental assistance.

In forthcoming meetings of UN organizations as well as in the present conference the U.S. representatives will be ready to review existing mechanisms of cooperation and to explore new means of assisting the developing nations in their mutual efforts to achieve progress. We look forward to useful discussions on practical issues and to the formulation of rational programs of action through which the concepts of economic and technical cooperation can contribute to enlarging and improving delivery of development aid in the Third World.

We in the United States know that the cooperation which shall exist in the future between the developed and the developing nations will affect the health and happiness of a large part of the human race found in the developing nations and will not only give a deep and justified sense of satisfaction and justice to the developed Countries but in the long run will make them stronger and more secure as well. Hence the United States is pleased to continue to cooperate in such a program.

WORLD PEACE TAX FUND ACT

(Mr. DELLUMS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DELLUMS. Mr. Speaker, last Friday was the deadline for the filing of income tax returns in the United States. I, along with 23 of our colleagues, am taking this opportunity to introduce legislation which we believe is essential to the integrity of this Nation's tax system.

The World Peace Tax Fund Act, as our bill is called, would amend the Internal Revenue Code to establish conscientious objector status for taxpayers identical to that established presently under our selective service laws. Under this act, any man or woman in the country who felt he or she could not, in good conscience, contribute to military expenditures would have the option of having their tax dollars routed, instead to peace-related activities.

It has long been recognized in this body and throughout the Nation that thousands, perhaps millions, of our citizens are so strongly compelled to resist violence that participation in wars in any form is morally and religiously intolerable. What our laws have not yet recognized is that many of these citizens are equally opposed to see their tax dollars spent on implements of death and destruction.

The World Peace Tax Fund Act recognizes this moral conviction and, without lowering anyone's total tax bill, removes the great dilemma now facing conscientious objectors—to disobey their own beliefs or to disobey the laws of their country?

At this time I would like to insert into the RECORD a summary of the legislation followed by other related material:

SUMMARY

The World Peace Tax Fund Act proposes that the Internal Revenue Code of 1954 contribution to military spending for Federal taxpayers who are conscientiously opposed to participation in war, and that a Fund be established to receive and distribute to qualified peace-related activities the portion of such individuals' tax payments that would otherwise go to military spending. The remainder of qualifying individuals' income, estate, and gift taxes would be transferred to the general fund of the U.S. Treasury, to be spent only for non-military purposes.

The Act gives relief to those citizens conscientiously opposed to participation in war, who are presently forced to violate their beliefs by participating in war through tax payments. There is considerable precedent for such relief. The Selective Service System has long recognized and accommodated the beliefs of conscientious objectors. Tax exemptions have been provided for certain religious groups to avoid violation of their religious and conscientious beliefs.

The requested tax relief for conscientious objectors will not open the "floodgates" to similar relief for other groups. The conscientious objector's request for tax relief is exceptionally compelling because it is motivated by the widely-held and long-established fundamental religious and moral mandate—"Thou shalt not kill."

The Act provides taxpayers, who are conscientiously opposed to war and who might otherwise feel compelled to undertake illegal tax resistance, with a means of making a meaningful contribution to world peace consistent with their obligations of citizenship. It is particularly important that the Act extends the opportunity for conscientious objection to women and to men not eligible for conscientious objector status under the Selective Service System.

The amendments to the Internal Revenue Code of 1954 provide that a qualified taxpayer may elect to have his or her Federal income, estate, or gift tax payment transferred to a special trust fund, the World Peace Tax Fund. The amendments also explain how a taxpayer qualifies to have his or her tax paid to the Fund. Other sections of the Act provide for the creation of the World Peace Tax Fund, and for the appointment of a Board of eleven Trustees to administer the Fund. The Fund is modeled after the National Highway Trust Fund and the National Airport and Airway Trust Fund. The act provides that the General Accounting Office shall annually determine and publish the percentage of the Budget of the United States which was spent for military purposes in the fiscal year just ended. This percentage will be used to determine the portion of the qualifying taxpayer's tax which shall be received by the Board shall submit a budget to Congress for approval and appropriation, providing for channeling of these monies to specified peace-related activities. Monies not appropriated from the Fund for expenditures budgeted by the Board shall remain available for use in subsequent years by the Board, subject to Congressional appropriation.

MEMORANDUM IN SUPPORT OF THE WORLD PEACE TAX FUND ACT

INTRODUCTION

Many persons in this country are conscientiously opposed to participation of any kind or nature in war. For some religious denominations this is a fundamental part of the religious beliefs of the members. For example, the Handbook of the Pacific Yearly Meeting of the Religious Society of Friends urges its members:

"To recognize that the military system is not consistent with Christ's example of redemptive love . . . (and) to consider carefully the implication of paying those taxes, a major portion of which goes for military purposes."—page 28 of 1962 Rev. Ed.

The World Peace Tax Fund Act is designed to relieve individuals conscientiously opposed to participation in war from the obligation to participate in war through the payment of taxes for military spending. Also it frees them from the weight of conscience which comes from breaking the law, when they hold law and society important.

Freedom of conscience, whatever that might be, is an integral part of our scheme of government. The Supreme Court of the United States, in March of 1965, quoted a statement made in 1919 by Harlan Fiske Stone, who later became Chief Justice of the Court:

"Both morals and sound policy require that the state should not violate the conscience of the individual. All our history gives confirmation to the view that liberty of conscience has a moral and social value which makes it worthy of preservation at the hands of the state. So deep is its significance and vital, indeed, is it to the integrity of man's moral and spiritual nature that nothing short of the self-preservation of the state should warrant its violation; and it may well be questioned whether the state which preserves its life by a settled policy of violation of the conscience of the individual will not in fact ultimately lose it by the process,"—Stone, The Conscientious Objector, 21 Col. U.Q. 253, 269 (1919).

Although not all persons who are conscientiously opposed to participation of any kind in war base their convictions on religious training and belief, conscientious objection to war appears to be well recognized as an integral part of the religious beliefs of many people. Speaking of the struggle for religious liberty in this country, Chief Justice Hughes referred to:

"The large number of citizens of our country, from the very beginning, who have been unwilling to sacrifice their religious convictions, and in particular, those who have been unwilling to sacrifice their religious convictions, and in particular, those who have been conscientiously opposed to war and who would not yield what they sincerely believed to be their allegiance to the will of God . . ." *United States* v. *Macintosh*, 283 U.S. 605, 631 (1931).

Certainly to require significant participation in war, against the religious conscience of these people, would violate the spirit of the first amendment protection for the free exercise of religion. (See *West Virginia State Board of Education* v. *Barnett*, 319 U.S. 624 (1943); *School District of Abington Township* v. *Schempp*, 374 U.S. 203 (1963); *Contran, Tyrrell* v. *United States*, 200 F. 2d 8 (9th Cir. 1953), *cert. denied* 345 U.S. 910.

Conscientious objection to war and military training is deeply imbedded in the traditions of this country. For example, the ratifying conventions of each of the six states that recommended the adoption of a Bill of Rights in ratifying the new Constitution approved specific amendments as a part of their recommendation; Virginia, North Carolina, and Rhode Island included a provision guaranteeing the right of conscientious objection. (See Elliot, *Debates on the Adoption of the Federal Constitution*, Vol. 3, p. 659, Vol. 4, p. 244 Vol. 1, p. 314–336 (reprint of 2nd ed. 1937).

A similar provision was suggested and rejected by the Maryland convention. (See Elliot at 553.) It is not surprising, therefore, that one of James Madison's proposed amendments presented to the first session of the first Congress included the following language: "but no person religiously scrupulous of bearing arms shall be compelled to render military service in person." *Annals of*

the Congress of the United States, 434 (Gales and Seaton, 1934).

During the debates on the proposed amendment, it was suggested that the right be conditioned "upon paying an equivalent." To this suggestion Mr. Sherman of Connecticut remarked:

"It is well known that those who are religiously scrupulous of bearing arms are equally scrupulous of getting substitutes or paying an equivalent. Many of them would rather die than do either one or the other." *Annals* at 750.

A motion was then made to drop this clause altogether; the motion failed and the clause was included in the list of proposed amendments sent to the Senate for approval. The Senate omitted this provision and it never became a part of our Bill of Rights. Although no record of the Senate debates was taken at the time, the opposition to the proposal in the House would indicate that the Senate preferred to leave the matter to legislation instead of a Constitutional Amendment. *Annals* at 751.

Although Congress has recognized the right of conscientious objectors to refrain from participation in war and has enacted legislation to protect that right, conscientious objectors are still forced to participate in war through the payment of taxes, a substantial portion of which goes to military spending. Every person in this country who pays Federal income, estate, or gift taxes is forced to participate in war in this manner. They are forced to aid in the equipping and training of armies and in the purchase of bombs, ammunition, missiles, napalm and other instruments of destruction. This is a significant form of participation in war.

Tax refusal—refusal to pay taxes because the money was to be spent for things to which the taxpayers were conscientiously opposed—has a long history. Early Christians refused to pay taxes to Caesar's pagan temple in Rome. Quakers and Mennonites refused to pay taxes to pay for the war effort during the French and Indian Wars, the Revolutionary War, and the Civil War. Under Gandhi's influence, strugglers for independence in India refused to pay taxes to the British Empire. In many ways the Boston Tea Party and other attempts of the colonists to prevent the British from collecting taxes to pay for the French and Indian War and for the stationing of British troops in the colonies represent similar protests. (See 1 Malone & Rauch, *Empire for Liberty* 126–36 (1960)). Just as pacifists are opposed as a matter of conscience to paying taxes that are used for military purposes, so were the colonists opposed as a matter of conscience to paying taxes without representation.

At the present time those who are conscientiously opposed to any form of participation in war can avoid violating their conscience in the matter of federal income taxation in only two ways. First, they can carefully avoid earning more than the minimum income required by federal law upon which income taxes must be paid. Second, they can simply refuse to pay the taxes due, or a certain percentage of them; this amounts to a criminal offense which could result in a maximum sentence of $10,000 fine and one year in prison. See Internal Revenue Code, Section 6502. Such a penalty could conceivably be imposed every year if the individual refused to pay the taxes due every year. In spite of the possibility of these extreme consequences, many people take this route because they feel it is a lesser evil than to violate their conscience.

To most American citizens who wish to make substantial contribution to the life of their community and who want to be law-abiding citizens these are not feasible alternatives. The liberty of conscience that Chief Justice Stone spoke about is not being preserved in the area of conscientious opposition to participation in war. In order to preserve this liberty of conscience and to preserve both the dignity and the fairness of law—to preserve it in a spirit intended by the founding fathers and the drafters of the Bill of Rights—legislation should be enacted to provide a legal and realistic alternative to participation in war through the payment of federal income, estate, and gift taxes.

PRECEDENT

There is sound precedent for such legislation giving tax relief to protect religious and conscientious beliefs. Section 1402(e) of the Internal Revenue Code provides an exemption from payment of self-employment taxes for duly ordained, licensed or commissioned ministers and members of religious orders, or for Christian Science Practitioners upon their filing an application for exemption together with a statement that they are conscientiously opposed to, or because of religious principles, they are opposed to participation in an insurance plan like that provided by the Social Security Act. Section 1402(h) of the Internal Revenue Code similarly relieves members of qualified religious faiths, primarily the Amish, of the duty to pay the Social Security tax. By this Code provision, enacted in 1965, Congress acknowledged and accommodated the conscientious objection of the Amish to participation in insurance plans. The tax exemptions provided by sections 1402(e) and 1402(h) of the Internal Revenue Code were modeled after the exemption of conscientious objectors from the draft.

By exempting individuals conscientiously opposed to participation in insurance plans from payment of Social Security taxes, Congress clearly extended the principle of Congressional accommodation of conscientious beliefs from the area of the draft to the area of taxation. Thus Congressional precedent for tax relief to accommodate the beliefs of conscientious objectors to war is firmly established. Congress has recognized both the right not to participate in war and the right of a tax exemption to avoid participation in a program to which the tax-payer is conscientiously opposed.

The proposed tax accommodation for conscientious objectors to war recognizes the unique and long-acknowledged right of an individual to refrain from participation in war. It reflects an honest acknowledgement that payment of taxes for military spending is a significant and, for conscientious objectors, intolerable form of participation in war. The proposed special tax status for conscientious objectors is a necessary device to avoid forcing their participation in war.

The tax treatment asked for conscientious objectors is less exceptional than that presently granted by sections 1402(e) and 1402(h) of the Internal Revenue Code. Those sections allow individuals "conscientiously opposed" to Social Security insurance to be entirely exempted from payment of a portion of their tax. In contrast, the World Peace Tax Fund Act does not propose exemptions from payment of a portion of the conscientious objector's tax. Under the Act, a conscientious objector is still required to pay his entire tax. The Act merely provides that an appropriate portion of the tax may be diverted from military spending to nonmilitary peace-related activities.

Like the exemption from payment of the Social Security tax, the proposed tax accommodation for conscientious objectors is based on religious and conscientious belief. The conscientious objector to war has a compelling justification for the special tax status he seeks. His concern is fundamental. He asks not to be forced to join in the deliberate killing of his fellow men. His desire not to participate in war and killing through any means, including taxation, is based upon a widely acknowledged religious and moral principle. Observance of the principle is essential to the integrity of the individual. By forcing the conscientious objector to war to contribute to military spending, Congress presently forces him to violate his conscience and severely denies his right of religious freedom.

The tax accommodation of conscientious objectors would be an affirmative gesture which would benefit society as well as the individual taxpayer. Especially today, when a faint hope of world peace precariously counterbalances the threat of unspeakable destructive war, it is important to society that the moral principle, "Thou shalt not kill," which underlies the conscientious objector's attitude towards war, be firmly and repeatedly asserted.

Fundamental fairness requires that the opportunity for making this affirmative gesture for world peace and against killing be extended to all people—not just those draft-age males who qualify for conscientious objector status under the Selective Service laws. Therefore another important aspect of this act is that it offers women and children an opportunity constructively to demonstrate their opposition to war through formal conscientious objection—an opportunity which at present is open only to draft-age men.

The proposed tax accommodation for conscientious objectors is required by uniquely compelling justifications. Granting this special tax status to conscientious objectors will not open the floodgates to other groups who claim to be "conscientiously opposed" to various uses of their tax dollars, because the concern of the conscientious objector is so fundamental, so widely acknowledged, and so essential to the integrity of individuals and our society.

The contemplated tax treatment of conscientious objectors does not establish a precedent for individual earmarking of tax dollars. Trustees appointed by the President with the advice and consent of the Senate will receive, for subsequent channeling to appropriate peace-related activities, a portion of the Fund's monies. This portion represents a sum of all qualifying individuals' income, estate, or gift tax payments, multiplied by the percentage of last year's Federal budget devoted to military spending. The spending decisions of the Trustees require Congressional approval and appropriation. Congress retains power over spending of the conscientious objector's taxes. The taxpayer who qualifies as a conscientious objector can only decide that his tax dollars will not be spent for one specific purpose—military spending. Distribution of monies by the Board to qualified peace-related organizations finds precedent in the qualified distribution requirements for private foundations under Section 4942 of the Code.

In summary, the conscientious objector's uniqueness rests first, in the long tradition of Congressional respect for and accommodation of conscientious objectors to war. Second, the standards for determination of conscientious objector status have been tried, proven, and refined by the Selective Service System and conveniently provide stringent and reliable requirements for determining conscientious objector status for tax purposes. Third, the conscientious objector to war bases his request for special tax treatment on a widely-held long-established fundamental religious and moral belief. Fourth, the declaration of conscientious objection for tax purposes is an affirmative and constructive act which could make a substantial contribution to world peace.

The great interest of individuals in the free exercise of their fundamental religious beliefs should weigh most heavily against the public interest in minimizing exceptions to the general tax laws. If the interest of the

Amish in not participating in Social Security insurance was sufficient to outweigh this public interest, the compelling interest of the conscientious objector to war should also outweigh it.

EFFECTIVENESS

Individuals conscientiously opposed to war will be excused from tax contribution to military spending and thereby from a significant form of participation in war. The tax dollars diverted from military spending will be used to promote world peace. It is recognized that because of the nation's tax collection and budgeting process, the creation of the World Peace Tax Fund may not markedly reduce the money available for military spending. A serious curtailment of military spending would result only if a great many taxpayers participated in the Fund, thereby calling for a major shift in national priorities. The military will get the funding it requests until the success of the Fund helps persuade taxpayers and Congress to reduce the priority of military spending.

At present, many conscientious objectors are so determined to change this country's priorities that they have refused to pay their taxes. As an alternative to forcing conscientious objectors to pursue this difficult and unpopular course, this bill offers the conscientious objector a way of making a positive contribution to world peace in place of contributing to military spending. The Fund will provide a constructive means of citizen's protest for its contributors. The Fund will draw the attention of every taxpayer to the percentage of American tax dollars going to military spending It will encourage Congress to recognize this percentage by publication of the Fund's annual reports. At present, for the most part, no effort is being made by the government to separate military spending from other spending. Individual taxpayers, in making out their annual returns, will be forced to decide whether or not they can conscientiously contribute to military spending Those who become conscientious objectors for tax purposes will be voicing a significant vote against military policy. The bill provides that the number of contributors to the Fund, the amount of money contributed, and the expenditures of the Fund shall be published and reported to Congress each year

Many conscientious objectors would like to take a firmer stand than that provided by this Act in opposition to their country's military operations, but in view of the political constraints, imposed on them as a minority, they support the Fund as a meaningful, though not entirely satisfactory means of working for world peace.

The Internal Revenue Code amendments and the organization of the Fund are designed to accomplish their goals with a minimum of administrative effort. The individual taxpayer is given the initial responsibility for determining whether he or she is eligible for conscientious objector status. A taxpayer who is already classified as a conscientious objector for Selective Service or Immigration purposes is automatically eligible. A taxpayer, regardless of age or sex, who files a declaration of conscientious opposition to war, is eligible False statements knowingly made in declaring conscientious objector status are grounds for prosecution for perjury Willfull abuse of this claim of eligibility will therefore be discouraged. The Internal Revenue Service may conduct an examination, "For the purpose of ascertaining the correctness of any return," according to Section 7602 of the Code. Language in that section is broad enough to allow review of a declaration of conscientious objection to war In formulating requirements for conscientious objector status and in reviewing returns of conscientious objectors, it is expected that the Secretary or his delegate will rely primarily on 50 U.S.C. App. 456(j), which exempts conscientious objectors from military service, and judicial interpretations thereof. Final rulings by the IRS against the taxpayer's status as a conscientious objector are appealable to the United States District Court.

The Fund itself will be self-sufficient. It is expected that the commitment of the Fund's Trustees to world peace and their appointment by the President with the advice and consent of the Senate will make the Fund self-policing so that contributors and other taxpayers and Congress will have faith in it, and it will accomplish the goals set for it. The operating expenses of the Fund will be paid out of the money the Fund receives from taxpayers Because the Fund will encourage people who presently refuse to pay their taxes, to pay these taxes, the administrative costs of the Fund will be offset by the additional tax payments which the Fund is expected to generate.

A final point is that legislative relief is the only legal avenue available for resolving the conscientious objector's dilemma between his beliefs and his obligations of citizenship. Conscientious objectors have repeatedly lost their battle against war taxes in the courts. Despite the strong constitutional arguments which can be made in their defense, in deference to Congress the courts have repeatedly held against conscientious objectors who have refused to pay their taxes to military spending.

CONSTITUTIONALITY

(1) *Uniformity.* The proposed legislation conforms with the requirement of Article I, Section 8, Clause 1 of the Constitution which provides "All duties, imports and excises shall be uniform throughout the United States." The requirement of uniformity has been read to require geographical uniformity, *Knowlton* v. *Moore,* 178 U.S. 41 (1900); *Brushaber* v. *Union P. R. Co.,*—U.S. 1 (1916); *Fernandez* v. *Wiener,* 326 U.S. 340 (1945).

(2) *First Amendment.* The first amendment provides "Congress shall make no law respecting the establishment of religion, or prohibiting the free exercise thereof." The proposed tax payment accommodation of the religious beliefs of conscientious objectors is a mitigation of a general requirement for the purpose of allowing the free exercise of religion. This is not an establishment of religion.

According to the General Counsel of the Treasury, "The classic example of the application of the free exercise clause is the series of cases which have upheld Congressional exemption of conscientious objectors from military service. The validity of this exemption was first established by the *Selective Draft Law Cases,* 245 U.S. 366 (1918), upholding the exemption in the draft law of members of religious sects whose tenets prohibited the man's right to engage in war." The Solicitor General had argued (p. 374) that the exemption did not establish such religions but simply aided their free exercise. The court considered that the Congressional authority to provide such exemption was so obvious that it need not argue the point (pp. 389—390).

The present Universal Military Training and Service Act (50 U.S.C. app. 456(j)) provides, "(j) Nothing contained in this title (sections 451, 453, 454, 455, 456 and 458–471 of this Appendix) shall be construed to require any person to be subject to combatant training and service in the Armed Forces of the United States who, by reason of religious training and belief, is conscientiously opposed to participation in war in any form " "Participation in war in any form" has been read by the courts to mean "participation in any form in war." *Taffs v. U.S.,* 208 F. 2d 329 (CA 8 (1953)), *cert. denied* 347 U.S. 928 (1954)). In *U.S. v. Seeger,* 380 U.S. 163, 13 L. Ed. 2d 733 (1965) the court broadly interpreted "by reason of religious training and belief" to require no formal religious training, and suggested that a personal moral code would be sufficient grounds for conscientious objection if there were some other basis for the registrant's believe. The *Seeger* case did not reach the constitutional question of whether the state might require a belief in God as a condition for exemption. *Torcaso v. Walkins,* 367 U.S. 488 (1961) did hold that Maryland could not require an oath attesting to a belief in God as a requirement for becoming a notary public, because such a requirement would constitute an establishment of religion.

Another example of the use of Congressional authority to make exemptions from general laws to permit the free exercise of religion is the exemption from taxation of religious organizations, property and activities. These exemptions continue to be upheld against claims that they have the effect of establishing the religions benefited. *Swallow v. U.S.,* 325 F. 2d 97 (10th Cir. 1963).

Zorach v. Clauson, 343 U.S. 306 (1952) is another case affirming the validity of accommodations made by the state to allow the free exercise of religion. There the Court upheld New York legislation authorizing public schools to release children one hour early every week for religious instruction off school grounds.

That allowing conscientious objectors to pay a portion of their taxes into a non-military tax fund is an accommodation for the free exercise and not an establishment of religion is made clear by *Sherbert* v. *Verner,* 374 U.S. 398 (1963). The Court held there that Maryland could not deny unemployment benefits to a Seventh-Day Adventist who refused to take a job requiring work on Saturday, the Adventists' Sabbath. The Court held this conditioning of welfare benefits on compromise of individuals' religious beliefs was an unconstitutional restriction on the free exercise of religion. Therefore, the court ordered Maryland to make accommodation within its general unemployment law. A conscientious objector who is forced to pay taxes which help finance military spending, is being denied the right of free exercise of his religious beliefs. The conscientious objector's plight is worse than the Adventist's in *Sherbert* who paid a lesser price for free exercise of religion. In *Sherbert* the price exacted by the state for religious freedom was loss of unemployment benefits. The conscientious objector who refuses to pay taxes is not only fined but is forced to break the law and is liable to criminal prosecution. Contribution to military spending is a significant form of participation in war. It may be as offensive to religious beliefs as service in the Armed Forces. Congress has accommodated religious beliefs by exempting from military service those conscientiously opposed to participation in war. It is a small step for Congress to allow the conscientious objector not to participate in war through taxes. Clearly, such an accommodation is to aid the free exercise of religion and is permitted, if not required, by the first amendment.

The effect of the proposed accommodation for conscientious objectors would not be discrimination in favor of some religions at the expense of others. Rather, the present discrimination against those who are forced to pay taxes, (a portion of which goes to military spending in violation of their religious beliefs), would be removed. See *Sherbert,* p. 406. Nor are the problems of admin-

istration and the possibility of spurious claims under the proposed accommodation justification for continuing the present burdens or the free exercise of religion. See *Sherbert*, p. 407.

Despite the constitutionality of the proposed amendments, it might be argued there is an overriding public interest which forbids accommodation. But in *In Re Jenison*, 375 U.S. 14(1963) the Court relying on *Sherbert* v. *Verner* vacated a ruling of the Minnesota Supreme Court, which held that jury duty, a primary duty of all citizens, was superior to a religious belief which forbade judging others and therefore forbade jury duty. After *Jenison* it is possible to argue that it is unnecessary to balance the public interest against the individuals' interest to determine whether an exception to the general law should be made to accommodate the free exercise of religion. Rather Congress or the courts could simply determine if an accommodation is necessary to allow free exercise of religion and if so, grant it.

(3) *The due process clause.* The due process clause of the fifth amendment requires that tax statutes be reasonable and apply to a reasonable class. However, the standards of reasonableness applied to tax statutes are more lenient than those applied generally; only clearly arbitrary tax classifications will be struck down. *Flemming* v. *Nestor*, 363 U.S. 603(1960); *Smart* v. *U.S.*, 222 F. Supp. 65 (1963); *Leeson* v. *Celebrezze*, 225 F. Supp. 527 (1963). Therefore it is unlikely that the classification proposed by these amendments would be found unreasonable, especially since the classification is the same which has long been accepted as reasonable for draft exemption purposes.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. CORMAN (at the request of Mr. WRIGHT), after 4:15 p.m., today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BAUMAN, for 5 minutes, today, and to revise and extend his remarks and include extraneous matter.

(The following Members (at the request of Mr. PURSELL) to review and extend their remarks and include extraneous material:)

Mr. DUNCAN of Tennessee, for 15 minutes, today.

Mr. GRASSLEY, for 15 minutes, today.

Mr. HYDE, for 2 minutes, today.

Mr. KEMP, for 15 minutes, today.

Mr. MCKINNEY, for 5 minutes, today.

Mr. LATTA, for 10 minutes, today.

(The following Members (at the request of Mr. WATKINS) to revise and extend their remarks and include extraneous material:)

Mr. EILBERG, for 5 minutes, today.

Mr. FLOOD, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. VANIK, for 5 minutes, today.

Mr. DRINAN, for 20 minutes, today.

Mr. KOCH, for 10 minutes, today.

Mr. HARRIS, for 5 minutes, today.

Mr. PREYER, for 5 minutes, today.

Mr. MILLER of California, for 5 minutes, today.

Mr. PEPPER, for 5 minutes, today.

Mr. ROSTENKOWSKI, for 60 minutes, April 25, 1977.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DELLUMS and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,047.

Mr. PEPPER, immediately prior to the vote on Senate amendment No. 9, Uniformed Services University of the Health Sciences, on the conference report on H.R. 4877.

Mr. SIKES, in colloquy with Mr. ICHORD on H.R. 5970 in the Committee of the Whole today.

(The following Members (at the request of Mr. PURSELL) and to include extraneous material:)

Mr. SHUSTER.

Mr. HANSEN.

Mr. GRASSLEY.

Mr. LENT.

Mr. MADIGAN.

Mr. KEMP.

Mr. CRANE in two instances.

Mr. PURSELL.

Mr. JOHNSON of Colorado.

Mr. ABDNOR in four instances.

Mr. RUDD.

Mr. HAGEDORN.

Mr. DERWINSKI in two instances.

Mr. BADHAM.

Mr. COLLINS of Texas in three instances.

Mr. ASHBROOK in four instances.

Mr. SYMMS in two instances.

(The following Members (at the request of Mr. WATKINS) and to include extraneous matter:)

Mr. FORD of Tennessee.

Mr. AUCOIN.

Mr. GONZALEZ in three instances.

Mr. ANDERSON of California in three instances.

Mr. MCDONALD in five instances.

Mr. MATHIS.

Ms. MIKULSKI.

Mr. MOORHEAD of Pennsylvania in 10 instances.

Mr. JACOBS in two instances.

Mr. CARNEY in three instances.

Mr. ROSENTHAL in three instances.

Mr. BOWEN.

Mr. FARY in two instances.

Mr. MURTHA.

Mr. HARRINGTON in two instances.

Mr. KILDEE.

Mr. YOUNG of Missouri.

Mr. STUMP.

Mr. DRINAN in two instances.

Mr. RYAN.

Mr. CHARLES H. WILSON of California in three instances.

Mr. THOMPSON.

Mr. MITCHELL of Maryland in two instances.

Mr. STUDDS.

Mr. STARK in two instances.

Mrs. SCHROEDER.

Mr. RANGEL.

Mr. BALDUS.

Mr. MANN.

Mr. DENT.

Mr. MILLER of California.

Mr. FRASER in five instances.

Ms. JORDAN.

Mr. RONCALIO.

Mr. DODD.

ADJOURNMENT

Mr. WATKINS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 32 minutes p.m.) the House adjourned until tomorrow, Friday, April 22, 1977, at 11 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1318. A letter from the Deputy Director, Office of Management and Budget, Executive Office of the President transmitting a report on actions taken on recommendations contained in the Eighth Annual Report of the National Advisory Council on Economic Opportunity, dated June 30, 1975, pursuant to section 6(b) of the Federal Advisory Committee Act; to the Committee on Government Operations.

1319. A letter from the Secretary of the Interior, transmitting a report on receipts and expenditures of the Department in connection with the administration of the Outer Continental Shelf Lands Act of 1953 during the transition quarter, pursuant to section 15 of the act; to the Committee on Interior and Insular Affairs.

1320. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of major military equipment sold commercially to Iran (Transmittal No. MC-36-77), pursuant to section 36 (c) of the Arms Export Control Act; to the Committee on International Relations.

1321. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of a proposed manufacturing licensing agreement for the production of certain military equipment in Thailand (Transmittal No. MC-37-77), pursuant to section 36(d) of the Arms Export Control Act; to the Committee on International Relations.

1322. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting a report covering the month of February 1977, on the average number of passengers per day on board each train operated, and the on-time performance at the final destination of each train operated, by route and by railroad, pursuant to section 308(a)(2) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Interstate and Foreign Commerce.

1323. A letter from the Deputy Director, Administrative Office of the United States, transmitting a draft of proposed legislation to amend chapter 313 of title 18 of the United States Code; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk

for printing and reference to the proper calendar, as follows:

Mr. DANIELSON: Committee on the Judiciary H.R. 1445. A bill for the relief of Comdr Edward White Rawlins, U.S. Navy (retired); with amendment (Rept. No. 95–216). Referred to the Committee of the Whole House.

Mr ULLMAN: Committee on Ways and Means. H.R. 6370. A bill to authorize appropriations to the International Trade Commission for fiscal year 1978, to provide for the Presidential appointment of the Chairman and Vice Chairman of the Commission, to provide for greater efficiency in the administration of the Commission, and for other purposes (Rept. No. 95–217). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ABDNOR (for himself, Mr. MOFFETT, Mr. MOORHEAD of California, Mr. NOLAN, Mr. PATTERSON of California, Mr. RICHMOND, Mr. SEBELIUS, Mr. SIMON, Mrs. SMITH of Nebraska, Mr. STANGELAND, Mr. STEERS, and Mr. TAYLOR):

H.R. 6464. A bill to amend the Internal Revenue Code of 1954 to deny tax exemption to any otherwise tax-exempt organization which invests in farm real property; to the Committee on Ways and Means.

By Mr. AMBRO:

H.R. 6465. A bill to amend title 28 of the United States Code to establish a separate judicial district for the counties of Nassau and Suffolk, N.Y.; to the Committee on the Judiciary.

By Mr. ASHBROOK (for himself, Mr. GOODLING, Mr. KINDNESS, Mr. MILFORD, Mr. LOTT, Mr. WINN, Mr. MURPHY of Pennsylvania, Mr. WHITEHURST, Mr. JENRETTE, Mr. HYDE, Mr. CHARLES WILSON of Texas, Mr. CAPUTO, Mr. MCDONALD, Mr. DERWINSKI, Mr. BAUMAN, and Mr. SIKES):

H.R. 6466. A bill to amend the Internal Security Act of 1950 to control and penalize terrorists, and for other purposes; to the Committee on the Judiciary.

By Mr. BEARD of Tennessee:

H.R. 6467. A bill to amend title 18 of the United States Code to increase certain penalties for gun control offenses and to allow the United States to obtain appellate review of certain sentences relating to gun control offenses; to the Committee on the Judiciary.

By Mr. BEDELL (for himself, Mr. CARNEY, Mrs. FENWICK, and Mr. MCHUGH):

H.R. 6468. A bill to amend the Small Business Act and the Federal Nonnuclear Energy Research and Development Act of 1974 to provide certain assistance to individuals and small business concerns in the areas of solar energy equipment and energy-related inventions; jointly, to the Committees on Science and Technology, and Small Business.

By Mr. BLANCHARD (for himself, Mr. MINETA, Mr. EVANS of Delaware, Mr. LAGOMARSINO, Mr. BAUCUS, and Mr. BARNARD):

H.R. 6469. A bill to require authorizations of new budget authority for Government programs at least every 5 years, to establish a procedure for zero-base review of Government programs every 5 years, and for other purposes; to the Committee on Rules.

By Mr. BLOUIN (for himself and Mr. BALDUS):

H.R. 6470. A bill to amend title 23 to provide a comprehensive bridge replacement and rehabilitation program; to the Committee on Public Works and Transportation.

By Mr. BROWN of Ohio (for himself, Mr. KRUEGER, Mr. SEBELIUS, Mr. FRENZEL, and Mr. BURGENER):

H.R. 6471. A bill to assure the availability of adequate supplies of natural gas at reasonable prices for consumers, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BROWN of Ohio (for himself, Mr. PATTERSON of California, and Mr. BENJAMIN):

H.R. 6472. A bill to amend the Federal Food, Drug, and Cosmetic Act with respect to food additives; to the Committee on Interstate and Foreign Commerce.

By Mr CARTER (for himself, Mr. PERKINS, Mr. NATCHER, Mr. SNYDER, Mr. MAZZOLI, Mr. BRECKINRIDGE, and Mr. HUBBARD):

H.R. 6473. A bill to provide that the lake referred to as the Laurel River Lake on the Laurel River, Ky., shall hereafter be known as the John Sherman Cooper Lake and that the dam forming such lake shall hereafter be referred to as the John Sherman Cooper Dam; to the Committee on Public Works and Transportation.

By Mr. CONYERS:

H.R. 6474. A bill to make clarifying and technical amendments to title 1 (relating to law enforcement assistance) of the Omnibus Crime Control and Safe Streets Act of 1968; to the Committee on the Judiciary.

By Mr. DERRICK (for himself, Mr. BURGENER, Mr. MANN, Mr. SIMON, Mr. JENRETTE, Mr. PURSELL, Mr. SCHULZE, Mr. REGULA, Mr. WALGREN, Mr. GEPHARDT, Mr. HUGHES, Mrs. MEYNER, Mr. PANETTA, Mr. MINETA, Mr. O'BRIEN, Mrs. CHISHOLM, Mr. BEDELL, Mr. WEISS, Mr. ARCHER, Mr. NOLAN, Mr. PATTERSON of California, Mr. ASHLEY, and Ms. MIKULSKI):

H.R. 6475. A bill to prohibit the appropriation and expenditure of unvouched funds (except in the case of intelligence agencies) unless specifically authorized by law, and to provide for reports on the audits of authorized expenditures of unvouched funds; jointly, to the Committees on Government Operations, and Rules.

By Mr. DERRICK (for himself, Mrs. FENWICK, Mr. JACOBS, Mr. MOAKLEY, Mr. BLANCHARD, Mr. EDGAR, Mr. GIAIMO, Mr. OTTINGER, Mr. FISH, Mr. MATHIS, Mr. DRINAN, Mr. WHITEHURST, Mr. MAZZOLI, Mr. ROYBAL, Mr. ECKHARDT, Mr. ERTEL, Mr. STUDDS, Mr. MURPHY of Pennsylvania, Mr. COUGHLIN, Mr. BLOUIN, Mr. MIKVA, Mr. LEHMAN, Mr. VENTO, Mr. NEAL, and Mr. MCHUGH):

H.R. 6476. A bill to prohibit the appropriation and expenditure of unvouched funds (except in the case of intelligence agencies) unless specifically authorized by law, and to provide for reports on and audits of authorized expenditures of unvouched funds; jointly, to the Committees on Government Operations, and Rules.

By Mr. DRINAN (for himself and Mr CARR):

H.R. 6477. A bill to repeal the Military Selective Service Act; to the Committee on Armed Services.

By Mr. DRINAN (for himself and Mr. TONRY):

H.R. 6478. A bill to establish an independent agency to administer the internal revenue laws; to the Committee on Ways and Means.

By Mr. DUNCAN of Tennessee.

H.R. 6479. A bill to amend section 3104 of title 38, United States Code, to permit certain service-connected disabled veterans who are retired members of the uniformed services to receive compensation concurrently with retired pay, without deduction from either; to the Committee on Veterans' Affairs.

H.R. 6480. A bill to reduce by 50 percent the premiums for U.S. Government Life Insurance or National Service Life Insurance charged to persons who have attained age 65 and whose annual incomes do not exceed $10,000; to the Committee on Veterans' Affairs.

By Mr. FORD of Tennessee (for himself, Mr. PHILLIP BURTON, Mr. CARR, Mr. CORNWELL, Mr. FARY, Mrs. FENWICK, Mr. GILMAN, Mr. HOWARD, Mrs. KEYS, Mr. KOSTMAYER, Mr. LENT, Mr. LONG of Maryland, Mr. MINETA, Mr MOTTL, Mr. MURPHY of Pennsylvania, Ms. OAKAR, Mr. RICHMOND, Mr. SANTINI, Mr. SIMON, and Mr. VENTO):

H.R. 6481. A bill to amend the Fair Packaging and Labeling Act to require that packaged consumer commodities be labeled to show their selling price; to the Committee on Interstate and Foreign Commerce.

By Mr. FREY:

H.R. 6482. A bill to amend title 18 of the United States Code to provide for the mandatory sentencing of certain offenders whose offenses involve narcotic drugs, and for other purposes; jointly, to the Committees on the Judiciary and Interstate and Foreign Commerce.

By Mr. FREY (for himself, Mr. BADHAM, Mr. BRECKINRIDGE, Mr. BURGENER, Mr. COLLINS of Texas, Mr. COUGHLIN, Mr. DAN DANIEL, Mr. ROBERT W. DANIEL, Jr., Mr. DAVIS, Mr. DERWINSKI, Mr. DUNCAN of Tennessee, Mr. EDWARDS of Oklahoma, Mr. FITHIAN, Mr. GEPHARDT, Mr. GILMAN, Mr. GUYER, Mr. HYDE, Mr. KEMP, Mr LAGOMARSINO, Mr. LOTT, Mr. MAZZOLI, Mr. MITCHELL of New York, Mr. MOLLOHAN, Mr. QUAYLE, and Mr. QUIE):

H.R. 6483. A bill to amend title 18 of the United States Code to provide for the mandatory sentencing of certain offenders whose offenses involve narcotic drugs, and for other purposes; jointly, to the Committees on the Judiciary, and Interstate and Foreign Commerce.

By FREY (for himself, Mr. RANGEL, Mr. ROBINSON, Mr. RYAN, Mr. STOCKMAN, Mr. TREEN, Mr. WALKER, Mr. WHITEHURST, Mr. BOB WILSON, Mr. CHARLES WILSON of Texas, Mr. WINN, and Mr. WON PAT):

H.R. 6484. A bill to amend title 18 of the United States Code to provide for the mandatory sentencing of certain offenders whose offenses involve narcotic drugs, and for other purposes; jointly, to the Committees on the Judiciary, and Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. BREAUX introduced a bill (H.R. 6548) for the relief of Dorethea Margaret Hernandez Boquer, which was referred to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 5970

By Mr. QUAYLE:

Page 5, line 24, insert "(a)" after "Sec. 808".

Page 26, after line 15, insert the following new subsection:

(b)(1) The Secretary of Defense may not conduct any test or experiment involving the use of any chemical or biological agent on civilian populations unless local civilian officials in the areas in which the test or experiment is to be conducted are notified in advance of such test or experiment, and such test or experiment may then be conducted only after the expiration of the 30-day period beginning on the date of such notification.

"(2) Paragraph (1) shall apply to tests or experiments conducted by Department of Defense personnel and tests or experiments conducted on behalf of the Department of Defense by contractors."

SENATE—*Thursday, April 21, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 12:30 p.m., on the expiration of the recess, and was called to order by Hon. WILLIAM PROXMIRE, a Senator from the State of Wisconsin.

PRAYER

Mr. William P. Thompson, stated clerk, the United Presbyterian Church in the U.S.A., and president, National Council of the Churches of Christ in the U.S.A., New York, N.Y., offered the following prayer:

Eternal God, before You nations rise and fall; they grow strong or wither by Your design.

Grant us vision to see Your purpose hidden in our Nation's history, and courage to seek it in our own day. Take away our petty pride and bring to mind Your goodness, so that, living together in this land, we may enjoy Your gifts and be thankful.

Your justice is like rock and Your mercy like pure flowing water. If we have

turned from You, return us to Your way; for without You we are lost people. Judge us and forgive us.

Draw us together as one people who do Your will so that our land may be a light to nations, leading the way to Your promised kingdom, which is coming among us. Show us there is no law or liberty apart from You and let us serve You modestly, as devoted people.

You have led us in the past, forgiven our waywardness, and will lead us in time to come. Give us voice to praise Your goodness in this land of the living, and the will to serve You, now and always. Amen.

(Adapted from the Worshipbook of the Presbyterian Church.)

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., April 21, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. WILLIAM PROXMIRE, a Senator from the State of Wisconsin, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. PROXMIRE thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Wednesday, April 20, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE RESOLUTION 139—RESTATEMENT OF PLACEMENT ON THE UNANIMOUS CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, yesterday by unanimous consent the Senate cleared for placement on the Unanimous Consent Calendar Senate Resolution 139, Calendar Order No. 75, a resolution authorizing the Committee on Human Resources to inspect and receive tax returns, and tax-related matters of the Central States, Southeast, and Southwest areas pension fund under sections 6103 and 6104 of the Internal Revenue Code of 1954.

Because of a mistake or an oversight by the Government Printing Office, this measure was left off the Unanimous Consent Calendar It could have been passed today by unanimous consent.

Mr. President, I ask that the measure be transferred to the Unanimous Consent Calendar so that Senators may be aware of its presence on that calendar. It could have been passed today. But, Mr. President, I am not going to call it up because the mere fact that I know about the mistake does not alert all Members of the Senate to the fact that Calendar Order No. 75, Senate Resolution 139, has been cleared for action by unanimous consent. Therefore, it will go over another day. I would hope the Government Printing Office would take notice.

The ACTING PRESIDENT pro tempore. The resolution was so transferred.

Mr. ROBERT C. BYRD. The resolution has already been transferred, Mr. President, or should have been.

The Chair is correct, but it is not on the Unanimous Consent Calendar.

The ACTING PRESIDENT pro tempore. It was transferred yesterday.

Mr. ROBERT C. BYRD. It was transferred yesterday. It should have been printed on the Unanimous Consent Calendar.

The ACTING PRESIDENT pro tempore. The majority leader is absolutely correct.

Mr. ROBERT C. BYRD. The Government Printing Office committed the oversight. I will not call it up today, but I think Members should be aware that it is on the Unanimous Consent Calendar.

It is a good example of the legislative delay that is brought about by oversight and carelessness. Perhaps the carelessness can be averted. I assume it can be.

Mr. ROBERT C. BYRD subsequently said: Mr. President, I want to congratulate the Government Printing Office. Its error, to which I alluded today, has been discovered by it and they have already sent to the Senate a star print of the calendar on which now appears Calendar Order No. 75 (S. Res. 139) to which I referred earlier.

I will not call it up at this time, however. I will wait until later in the day to give Members a chance to note it is on the Unanimous Consent Calendar.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. The Senator from Tennessee is recognized.

Mr. BAKER. Mr. President, I yield my time under the standing order to the distinguished Senator from Nebraska.

The ACTING PRESIDENT pro tempore. The Senator from Nebraska is recognized.

Mr. CURTIS. Mr. President, I thank my distinguished minority leader.

THE ADMINISTRATION ENERGY PROGRAM

Mr. CURTIS. Mr. President, the Carter administration energy program is a distinct disappointment. It is a blueprint for unemployment and a regimented economy. America's main thrust in the consideration of our energy needs should be based upon greater production of all types of energy and total self-sufficiency in the near future.

Conservation has its place. We should save energy and prevent waste for the same reasons that we should prevent waste in all other areas of life. Conservation is not enough upon which to build a program for a growing America, a strong economy, and expanding jobs.

We can save energy by cutting down activity, but when we do we cut down on employment. We could save energy by closing all of our factories and returning to a way of life of hermits and nomads, but that is unthinkable. A police state can compel everyone to ride a bicycle or to drive only the smallest of compact cars. But what happens to the jobs involved? What happens to the economy of the most powerful industrial Nation on Earth? It is not only the automotive industry that would suffer. How are you going to pull a boat behind a bicycle or a compact?

There are many industries in addition to the boat industry that will suffer when we place all of our emphasis on conservation. It takes energy to run a factory or a farm or a mine. The more energy that is expended, the more jobs there are provided, and the more products there are produced at lower cost for ours and the markets of the world.

Do we have an energy crisis? Of course we have. It is not even a debatable question. Any time that a power outside the United States can shut down our industry, bring our transportation to a halt, cause farmers' tractors to be idle, ground our Air Force, and force our Navy to be tied up at the pier, we are in a crisis situation. That is true because more than half of our energy comes from outside the United States.

One of the reasons many people are not sure that we have an energy crisis or are confused about it is that some politicians have not told them the truth. There has been too much demagoguery about oil companies and the oil industry. We need to face the facts and call a spade a spade.

What should be our energy program? First of all, we should proceed full speed ahead in the search and discovery of oil in the United States. Too many would-be experts proceed to give us exact figures on the amount of our oil reserves. It is impossible for them to know until our country has gone full speed ahead in the search for oil in every place and at every depth.

What has the Democrat-controlled Congress done in the last few years to encourage the search for oil and gas? The answer is nothing. In fact, it has been worse than nothing. The Democrat-controlled Congress has placed every impediment imaginable in the way of oil production. As stated by Mr. A. V. Jones, Jr., who testified in behalf of the Independent Petroleum Association of America before the Senate Finance Committee on March 9, 1977:

> Instead of being encouraged by sound consistent policies, oil and gas producers have been confronted with the following:
>
> 1. Marc' 29, 1975—enactment by Congress of Tax Reduction Act of 1975, substantially repealing percentage depletion for about 85 percent of domestic oil and gas. This long-standing tax policy has been left intact for some 100 other extractive industries.
>
> 2. February 1, 1976—rollback of approximately $1.50 per barrel for new crude oil,
>
> 3. September 16, 1976—Enactment by Congress of Tax Reform Act of 1970, retroactively imposing punitive tax on expenditures—not

on income—of independent oil and gas producers;

4. July 1, 1976—Imposition of a price freeze on all domestic crude oil;

5. December 31, 1976—A rollback of 20 cents per barrel for new domestic crude oil and continuation of existing price freeze on crude oil;

6. February 1, 1977—A retroactive doubling of rental fees on most oil and gas leases on Federal onshore lands;

7. March 1, 1977—A rollback on U.S. crude oil prices of 45 cents per barrel on new oil.

The combined impact of these actions on domestic oil and gas producers is to remove roughly $5 billion annually which otherwise would be available for additional exploration and drilling. This listing should dispel any doubt as to why our domestic oil and gas production is declining and why we grow ever more dependent on insecure foreign oil. The 10,000 independent producers and explorers who drill most of the wells should be making a maximum effort in developing new supplies. But they are not because of the counterproductive effect of adverse government policy. During 1975 and 1976 active rotary rigs were at a standstill, averaging about 1,650 rigs. Twenty years ago there were over 2,000 rigs active. We should be utilizing 3,000 rigs if we are to bring on new production adequate to reverse our intolerable dependence on foreign supplies. This will require positive actions by the Congress and the Administration.

The Democrat-controlled Congress has given power to our environmental forces to hinder and retard the production of oil and gas. All thoughtful Americans want to take reasonable steps to protect our environment, but there must be a balance between our economic needs and our environmental needs. Among the militant environmentalists, there has been an over amount of emotionalism and an under amount of competence.

Nebraska is a State whose oil production is small. Yet our production is typical of a great number of other areas in the country. The EPA is threatening to cut down and put out of commission a number of oil wells that are now producing. There are a great many wells in Nebraska that are not being pumped because their production is classified as "old oil" and they cannot operate the well under the controlled price. Nebraska's small oil industry is typical in another respect. When these low-paying oilfields were discovered, the experts said that they would last for 10 years. A good many years have gone by and they are still predicting that they will last for 10 years. No man, no government, can say we are out of oil until we finish all the drilling that can be done.

Before Congress embarked upon these Marxist theories of taxation and control, our oil industry was growing and expanding—it fulfilled our needs, it provided production at a reasonable price. The superiority of the private enterprise system over Government action to produce oil and gas or anything else is so great that it is not debatable.

In addition to going forward with everything needed for the continued search and discovery of oil, we should develop every type of energy that we can. The way should be cleared by the change in environmental laws or otherwise for the full use of coal. We have great supplies of coal that will take care of our needs for hundreds of years, and I am convinced that, long before it is exhausted, solar energy will be practical, efficient and inexpensive. We should be using coal to produce electricity, to fire boilers and to run factories. Our environmental efforts should be directed not toward the curtailment of coal but toward the cleaning up process of burning coal. We want an expanding economy in America. We want jobs and more jobs, not only for our youth but for people of all ages. The expenditure of energy is a necessary ingredient in the production of jobs. It has been pointed out that this country is going to need 19 million additional jobs by 1985. This will require that we increase our energy supply by approximately 48 percent.

The maximun. use of coal for the Nation's energy can bring about a revitalization of the Nation's railroads. Thousands of new jobs could be created for the running of the trains, the building of cars and locomotives, the repair and maintenance of track and all other things connected therewith.

We should be making gasoline out of coal. It was my privilege to visit South Africa about 2 years ago. They were producing 15 to 20 percent of their gasoline needs from coal. After the world price went up, they were producing their gasoline from coal without a government subsidy. They are now expanding their facility so that they will be able to produce approximately one-half of their gasoline needs from coal. Why have we not done the same thing in the United States? The know-how for building and operating such a plant is available to us.

The ACTING PRESIDENT pro tempore. The time of the Senator has expired.

Mr. ROBERT C. BYRD. How much additional time does the Senator need?

Mr. CURTIS. I should like about 5 minutes more.

Mr. ROBERT C. BYRD. Mr. President, how much time do I have remaining?

The ACTING PRESIDENT pro tempore. The Senator has 7 minutes remaining.

Mr. ROBERT C. BYRD. I should like to have 4 minutes of my own. I yield 3 minutes to the Senator.

Mr. CURTIS. I thank the distinguished majority leader very much.

Another great source of energy for transportation is alcohol. Alcohol can be made from almost anything. Alcohol can be made from grain, but it also can be made from spoiling grain or spoiled potatoes, or other vegetables. It can be made from wood products. We can blend our gasoline with 10 or 15 percent alcohol. It would lessen our dependence upon foreign-produced petroleum by that much. Agriculture has not scratched the surface in its ability to produce. The farmers of America can produce the crops that can be turned into alcohol and, in turn, the alcohol can be mixed with motor fuel. There is a great potential in this field.

Early in the Eisenhower administration, I introduced the resolution which Congress passed, which called upon President Eisenhower to appoint a commission on the industrial uses of farm products. That commission was headed by J. LeRoy Welsh of Omaha. Mr. Welsh fought hard to inaugurate at that time a program of alcohol-blended motor fuel and alcohol-produced rubber. It is never too late to do good and such a program should be started now.

We are told by reliable authorities that when oil was discovered beneath the surface of the Earth, the searchers would have found a deposit of starch, and that they could do anything with the starch that they could with the oil. The good Earth produces great amounts of starch. It does so annually and it can produce more. That starch should be made into alcohol and used to provide a part of our transportation fuel as well as fuel used on our farms.

We should go ahead and develop every bit of water power that can be developed economically because we need the electrical energy. We will need more energy in the future. We should proceed with our nuclear powerplants and, equally if not more important, we should proceed with solar energy.

The Sun is the greatest source of energy in the whole universe. It is here for our use. It can be developed not only to heat our homes and buildings but to produce energy, to run factories, and to give us a vital and expanding growing economy.

Mr. President, the Carter energy policy is the product of men of little faith. The Carter energy policy is the result of fear—fear of the militant environmentalists who know not whereof they speak, and fear of the demagogs who espouse Marxist theories of taxation and regimentation that have proved failures throughout the centuries.

Mr. President, let us get America going. Let us launch upon a program for an expanded economy. Let us look to a bright future where there will be jobs and more jobs. All of this is going to take energy. Our job is to produce more energy. It can be done.

Mr. President, I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE ENERGY CRISIS

Mr. ROBERT C. BYRD. Mr. President, President Carter has courageously and honestly described the challenge which faces us today and in the remaining years of this century. He has described for us a balanced program which he believes should be our response to the energy crisis.

Members of Congress understand that this is just the beginning. This is the preamble. The most difficult part of our job is still ahead. That job will not be finished overnight.

As the President noted last night, Congress has already taken steps to encourage fuel efficiency and to encourage conservation. Many parts of the President's energy proposal package can be built on existing legislation or on legislation which is already being developed

in Senate or House committees. Other parts of his proposal will be carefully considered. They are entitled to careful consideration.

This is not the time for immediate and unthoughtful reaction. This is not the time for regional or parochial sensitivity. The energy problem is too serious, too universal, and too immediate.

The President is to be commended for his emphasis on equity and fairness. Every citizen, every industry, and every part of our economy must be fairly represented in the legislation which we finally develop to respond to our energy challenge. It will be necessary for all of us to listen carefully to the people just as they listen to us, as they listen to the President, and as he listens to them, in the coming national debate on this matter. In the end, it will be the people—the citizens of Beckley, W. Va., and Ontario, Calif., and Duluth, Minn., and Eugene, Oreg.—who will be our guide.

This is the "People's Branch" of the Government. The people will respond. Because of the seriousness of the problem, which the President has now outlined for the Nation so clearly, I believe that the people will respond with seriousness and with courage. We are a nation which has always reacted to danger and to difficulty with ingenuity and with strength. That strength comes from the people.

Our job in the Senate, Mr. President, will not be, in my judgment, to immediately begin punching holes in the President's proposal. I think his proposal is entitled to careful, thorough, exact scrutiny and examination, and if after careful thought, reflection, and study there appear to be parts of the proposal that need refinement, that need modification, and there is plenty of time yet to do that.

I say "plenty of time." I do not mean to wait until next year or the year after. But we do not have to shoot the President's package, or any part of it, down today. I do not think we ought to respond with a knee-jerk reaction to the President's proposal. There is plenty of time down the road to say, "no" to any portion of that package if need be. But let us at least give the President time, let us give his legislative proposal consideration, let us carefully study it first.

We owe this to the people. The legislation will not even be received from the White House until next Monday. There is plenty of time, Mr. President, to shoot it down or to shoot holes in it if the necessity arises.

I think, in the meantime, we ought to carefully evaluate it, carefully study it, and apply our best talents to the job.

Our job in the Senate will be to synthesize the needs and expectations of the people, and to be the forum of their collective will. I am confident that the Members of the Senate will do that job well. It is time to roll up our sleeves and get to work.

I will urge that the chairmen and members of committees which will first consider necessary legislation on these matters move as carefully and quickly as possible to hold hearings, compile information, and make reports. This is a time for national unity, and every opinion and suggestion must be listened to and must be understood. This is a time for cool heads and quiet determination. I hope every Member will join me in the effort to present that picture of the Senate to the people of the United States.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business until 1 p.m., with statements therein limited to 5 minutes.

ORDER TO HOLD H.R. 5840 AT THE DESK

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that H.R. 5840, to extend the Export Administration Act, be held at the desk when it arrives at the Chamber. This request has been cleared with the minority.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees, and withdrawing the nomination of John McGrath Sullivan, of Pennsylvania, to be an Assistant Secretary of Defense.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 6:04 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its clerks, announced that:

The House has agreed to the concurrent resolution (H. Con. Res. 198) to correct the enrollment of the bill (H.R. 4877), in which it requests the concurrence of the Senate.

The House has passed the bill (H.R. 5840) to amend the Export Administration Act of 1969 in order to extend the authorities of that act and improve the administration of export controls under that act, and to strengthen the antiboycott provisions of that act, in which it requests the concurrence of the Senate.

The Speaker has appointed as a member of the U.S. group of the North Atlantic Assembly Mr. DEL CLAWSON, to rank after Mr. FINDLEY, vice Mr. EDWARDS of Alabama, resigned.

The House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes; the House recedes from its disagreement to the amendments of the Senate numbered 3, 4, 8, 9, 10, 11, 12, 13, 14, 17, 19, 20, 21, 32, 34, 37, 44, 53, 63, 72, 93, 101, 102–134, inclusive, 138, 140, 141, 142, 143, 144, 151, 154, 155, 176, 184, 186, 187, 190, 196–202, inclusive, and 216 and concurs therein; the House recedes from its disagreement to the amendments of the Senate numbered 7, 43, 45, 50, 52, 59, 60, 61, 83, 90, 91, 173, and 211 and concurs therein, each with an amendment in which it requests the concurrence of the Senate; and that the House insists on its disagreement to the amendment of the Senate numbered 35.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC–1182. A letter from the Assistant Secretary of Defense transmitting, pursuant to law, the transition quarter report of receipts and disbursements pertaining to the disposal of surplus military supplies, equipment, material, and the production of lumber and timber products (with an accompanying report); to the Committee on Appropriations.

EC–1183. A letter from the Director of the Administrative Office of the U.S. Courts transmitting a draft of proposed legislation to provide for the transfer of the probation personnel from the Canal Zone Government to the Federal probation system (with accompanying papers); to the Committee on Armed Services.

EC–1184. A letter from the Vice President for Government Affairs for the National Railroad Passenger Corporation transmitting, pursuant to law, a report on the average number of passengers and the on-time performance of each train for the month of February 1977 (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–1185. A letter from the Secretary of the Interior transmitting, pursuant to law, a report on the receipts and expenditures of the Department in connection with the administration of the Outer Continental Shelf Lands Act of 1953 for the transition period, to the Committee on Energy and Natural Resources.

EC–1186. A letter, dated April 18, 1977 from the Assistant Legal Adviser for Treaty Affairs of the Department of State transmitting, pursuant to law, international agreements other than treaties entered into by the United States within the past 60 days

(with accompanying papers); to the Committee on Foreign Relations.

EC–1187. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Nicaragua—An Assessment of Earthquake Relief and Reconstruction Assistance" (ID–77–25) (with an accompanying report); to the Committee on the Foreign Relations.

EC–1188. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, Council Act No. 2–27, "An act to amend the police regulations of the District of Columbia to allow outdoor sidewalk cafes in districts zoned R and SP upon approval of the Board of Zoning Adjustment" (with accompanying papers); to the Committee on Governmental Affairs.

EC–1189. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, Council Act No. 2–21, "An act to order the closing of the public alley system in square 551, bounded by Florida Avenue, 1st, W, 3d, and R Streets, NW. (S.O. 74–252) (with accompanying papers); to the Committee on Governmental Affairs.

EC–1190. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, Council Act No. 2–22, "An act to order the closing of Portner Place, NW. between U and V Streets, NW. and of the public alleys in Square 204, bounded by 14th, U, 15th, and V Streets, NW. (S.O. 75–280) (with accompanying papers); to the Committee on Governmental Affairs.

EC–1191. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, Council Act No. 2–23, "An act to order the closing of 9th Street, NE. between G and H Streets, NE. and of the public alleys in Squares 912 and 934, bounded by G, 8th, 11th, and 10th Streets, NE. (S.O. 74–268) (with accompanying papers); to the Committee on Governmental Affairs.

EC–1192. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, Council Act No. 2–24, "An act to order the closing of Clifton Street, NW. between University Place, NW. and the north-south public alley in squares 2662 and 2663 (S.O. 71–220) (with accompanying papers); to the Committee on Governmental Affairs.

EC–1193. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, Council Act No. 2–25, "An act to order the closing of Neal Place, NW. between 4th and 5th Streets, NW.; of 4th Street, NW. between Neal Place and O Street, NW.; and of the public alleys in square 512, bounded by 4th, N, O, and 5th Streets, NW. (S.O. 74–208) (with accompanying papers); to the Committee on Governmental Affairs.

EC–1194. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, Council Act No. 2–28, "An act to abolish the Board of Consumer Goods Repair Services" (with accompanying papers); to the Committee on Governmental Affairs.

EC–1195. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Evaluation of the Analysis Supporting President Ford's Veto of H.R. 25, The Surface Mining Control and Reclamation Act of 1975" (EMD–77–37) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1196. A letter from the Deputy Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a followup report on the recommendations of the National Advisory Council on Economic Opportunity (with an accompanying report); to the Committee on Governmental Affairs.

EC–1197. A letter from the Assistant Secretary for Congressional Relations for the Department of State transmitting, notice that the Department will shortly begin to form a delegation for the 63d conference of the International Labor Organization that will be held at Geneva, Switzerland, from June 1 to June 22, 1977; to the Committee on Human Resources.

EC–1198. A letter from the Deputy Under Secretary for Legislative Affairs for the Department of Labor transmitting a draft of proposed legislation to provide employment and training opportunities for youth (with accompanying papers); to the Committee on Human Resources.

EC–1199. A letter from the Director of the Administrative Office of the U.S. Courts transmitting a draft of proposed legslation to amend section 1963 of title 28, United States Code, to provide for the registration of criminal judgments of fine or penalty (with accompanying papers); to the Committee on the Judiciary.

EC–1200. A letter from the Deputy Director of the Administrative Office of the U.S. Courts transmitting a draft of proposed legislation to amend chapter 313 of title 18 of the United States Code (with accompanying papers); to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. STENNIS, from the Committee on Armed Services:

S. Res. 142. An original resolution authorizing additional expenditures by the Committee on Armed Services for inquiries and investigations. Referred to the Committee on Rules and Administration.

By Mr. DOLE, from the Committee on Agriculture, Nutrition, and Forestrry; with an amendment:

S. 1240. A bill to extend the time for conducting the referendum with respect to the national marketing quota for wheat for the marketing year beginning June 1, 1978 (Rept. No. 95–97).

By Mr. TALMADGE, from the Committee on Agriculture, Nutrition, and Forestry; without amendment:

S. 955. A bill to amend the Federal Crop Insurance Act and for other purposes (title amended) (Rept. No. 95–98).

By Mr. SPARKMAN, from the Committee on Foreign Relations; with amendments:

H.R. 5040. An act to authorize additional appropriations for the Department of State out amendment; and

S. Res. 143. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to consideration of H.R. 5040. Referred to the Committee on the Budget.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary: Leonel J. Castillo, of Texas, to be Commissioner of Immigration and Naturalization.

George J. Mitchell, of Maine, to be U.S. attorney for the district of Maine.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

William M. Hoeveler, of Florida, to be U.S. district judge for the southern district of Florida.

Howell W. Melton, of Florida, to be U.S. district judge for the Middle District of Florida.

By Mr. STENNIS, from the Committee on Armed Services:

Edward Hidalgo, of the District of Columbia, to be an Assistant Secretary of the Navy.

Alan J. Gibbs, of New Jersey, to be an Assistant Secretary of the Army.

Russell Murray 2d, of Virginia, to be an Assistant Secretary of Defense.

Deanne C. Siemer, of New York, to be general counsel of the Department of Defense.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Michael J. Mansfield, of Montana, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Japan.

POLITICAL CONTRIBUTIONS

Contributions are to be reported for the period beginning on the first day of the fourth calendar day preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Mike Mansfield.

Post: U.S. Ambassador.

Contributions, amount, date and donee:

1. Self: None.
2. Spouse: None.
3. Children and spouses names: None.
4. Parents names; None.
5. Grandparents names: None.
6. Brothers and spouses names: None.
7. Sisters and spouses names: None.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

MICHAEL MANSFIELD.

W. Tapley Bennett, Jr., of Georgia, to be the U.S. permanent representative on the Council of the North Atlantic Treaty Organization, with the rank and status of Ambassador Extraordinary and Plenipotentiary.

POLITICAL CONTRIBUTIONS

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: W. Tapley Bennett, Jr

Post: Ambassador to NATO.

Contributions, amount, date, and donee.

1. Self: $50.00, 1974, H. Talmadge.
2. Spouse: $25.00, 1976, G. McGee.
3. Children and spouses names: None.
4. Parents names, W. Tap Bennett, (father); $1000.00, 1976, J. Carter.
5. Grandparents names: None.
6. Brothers and spouses names: None.
7. Sisters and spouses names: None.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

W. TAPLEY BENNETT.

Samuel W. Lewis, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Israel.

POLITICAL CONTRIBUTIONS

Contributions are to be reported for the period beginning on the first day of the

fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Samuel W. Lewis.

Post: Tel Aviv.

Contributions, amount, date, and donee.

1. Self: None.

2. Spouse: None.

3. Children and spouses names: Pamela S. Lewis, Richard W. Lewis; None.

4. Parents names, Grace M. Smoot: None.

5. Grandparents names: None.

6. Brothers and spouses names: None.

7. Sisters and spouses names, Mrs. J. C. Miller, Carman Miller: None.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

SAMUEL W. LEWIS.

Robert F. Gohcen, of New Jersey, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to India.

POLITICAL CONTRIBUTIONS

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Robert F. Goheen.

Post: Ambassador to India.

Contributions, amount, date, and donee.

1. Self: See attachment.

2. Spouse: See attachment.

3. Children and spouses names: See attachment.

4. Parents names: None (deceased).

5. Grandparents names: None (deceased).

6. Brothers and spouses names: See attachment.

7. Sisters and spouses names: See attachment.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

ROBERT F. GOHEEN.

1. Self (Robert F. Goheen):

1973

Anne Martindell for State Senate	$50
Democratic State Committee of N.J.	100
Friends of Senator Church	50
Total	200

1974

Mr. & Mrs. Thomas R. Crane, Jr.

Mr. & Mrs. William M. Swain, Jr.

Mr. & Mrs. Stephen S. Goheen.

Mr. & Mrs. Michael W. Lower.

Mr. & Mrs. Seth Klevans.

Mr. Charles R. Goheen.

4. Parents—deceased:

5. Grandparents—deceased:

6. Brothers and spouses:

Mr. & Mrs. James T. Skelly—$100 annually to National Republican Party.

7. Sisters and spouses:

Mr. & Mrs. Jeremiah S. Finch—roughly $10 to $25 annually to Democratic organizations.

Mr. & Mrs. Joseph C. Wheelock—none.

Miss Gertrude E. Skelly—$200 annually to National Republican Party.

(The above nominations reported from the Committee on Foreign Relations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated;

By Mr. RIEGLE (for himself, Mr. MAGNUSON, and Mr. STEVENSON):

S. 1330. A bill to amend the Toxic Substances Control Act to provide for a method of effectively responding to toxic chemical contaminations, and for other purposes; to the Committee on Environment and Public Works.

By Mr. CANNON:

S. 1331. A bill to provide for the establishment of a Center for the Book in the Library of Congress; to the Committee on Rules and Administration.

By Mr. ABOUREZK (by request):

S. 1332. A bill to designate certain lands as wilderness; to the Committee on Energy and Natural Resources.

By Mr. HUDDLESTON (for himself, Mr. FORD and Mr. ALLEN):

S. 1333. A bill to authorize payments to States as reimbursement for payments which were based upon erroneous information supplied by the Department of Health, Education, and Welfare; to the Committee on Finance.

By Mr. ANDERSON:

S. 1334. A bill to amend the Housing and Community Development Act of 1974 to provide assistance under that Act in support of a State role in the administration of activities assisted thereunder, to provide assistance for technical assistance provided by State agencies to localities assisted thereunder, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

By Mr. BUMPERS:

S. 1335. A bill for the relief of Myong Nyo Sin Purdom; to the Committee on the Judiciary.

By Mr. DOLE.

S. 1336. A bill to require daily release by the Secretary of Agriculture of reports of export sales of agricultural commodities; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. MAGNUSON (for himself and Mr. JACKSON):

S. 1337. A bill to modify the project for navigation improvement of Grays Harbor and Chehalis River and Hoquiam River, Washington; to the Committee on Environment and Public Works.

By Mr. HASKELL:

S. 1338. A bill to provide for the issuance and administration of permits for commercial outdoor recreation facilities and services on public domain national forest lands, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. STENNIS (by request):

S 1339. A bill to authorize appropriations to the Energy Research and Development Administration for national defense programs for the fiscal year 1978, and for other purposes; to the Committee on Armed Services.

By Mr. JACKSON:

S. 1340. A bill to authorize appropriations to the Energy Research and Development Administration for energy research, development, demonstration, and related programs in accordance with section 261 of the Atomic Energy Act of 1954, as amended, section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. STENNIS (for himself and Mr. JACKSON) (by request):

S. 1341. A bill to authorize appropriations to the Energy Research and Development Administration for military programs with potential civilian energy applications, and for other purposes; to the Committee on Armed Services and the Committee on Energy and Natural Resources, jointly, by unanimous consent.

By Mr. ROTH:

S. 1342. A bill to insure equal protection of the laws as guaranteed by the fifth or fourteenth amendments to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. HART:

S. 1343. A bill to require the Federal Government to use the total life cycle cost of an article, rather than the purchase price, for procurement of certain energy-intensive consumer products; to the Committee on Governmental Affairs.

By Mr. CANNON:

S. 1344. A bill to amend the Federal Election Campaign Act of 1971, and for other purposes; to the Committee on Rules and Administration.

By Mr BAYH (for himself and Mr. HATFIELD):

S. 1345. A bill to provide that polling and registration places for elections for Federal office be accessible to physically handicapped and elderly individuals, and for other purposes; to the Committee on Rules and Administration.

By Mr. BAYH:

S. 1346. A bill to amend title VII of the Civil Rights Act of 1964 to provide a program to prevent discrimination on account of the handicapped condition of an individual, and for other purposes; to the Committee on Human Resources.

By Mr. HOLLINGS (for himself and Mr. MAGNUSON):

S. 1347. A bill to create a National Advisory Committee on Oceans and Atmosphere, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. KENNEDY (for himself and Mr. MCGOVERN):

S. 1348. A bill to establish the African Development Foundation; to the Committee on Foreign Relations.

By Mr. HELMS:

S. 1349. A bill to declare a portion of Trent River in the City of New Bern, County of Craven, State of North Carolina, nonnavigable waters of the United States within the meaning of the laws of the United States; to the Committee on Environment and Public Works.

By Mr. PELL (for himself, Mr. HOLLINGS, Mr. MAGNUSON, and Mr. STEVENS):

S. 1350. A bill to amend the National Sea Grant Program Act, to extend the appropriation authorization thereunder, and for other purposes; to the Committee on Human Resources and the Committee on Commerce, Science, and Transportation, jointly, by unanimous consent.

By Mr. THURMOND:

S. 1351. A bill granting the consent of Congress to retired members of the uniformed services, members of Reserve components of the Armed Forces, and members of the Public Health Service Reserve Corps to accept employment with foreign governments; to the Committee on the Judiciary.

By Mr. THURMOND (for himself, Mr. TALMADGE, Mr. HOLLINGS, Mr. STAFFORD, Mr. NUNN, Mr. SCOTT, and Mr. LEAHY):

S. 1352. A bill to amend section 2107 of title 10, United States Code, to authorize financial assistance to be made available to an additional number of students enrolled in the Senior Reserve Officers' Training Corps programs at certain designated educational institutions, and for other purposes; to the Committee on Armed Services.

By Mr. THURMOND:

S. 1353. A bill to amend chapter 81 of title 28, United States Code, to provide review by the Supreme Court of the United States for decisions of the United States Court of Military Appeals; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. RIEGLE (for himself, Mr. MAGNUSON, and Mr. STEVENSON):

S. 1330. A bill to amend the Toxic Substances Control Act to provide for a method of effectively responding to toxic chemical contaminations, and for other purposes; to the Committee on Environment and Public Works.

CHEMICAL EMERGENCY RESPONSE TEAM ACT

Mr. RIEGLE. Mr. President, today I am introducing legislation to substantially increase the protection of the public and the environment in the United States from chemical contamination incidents. This legislation, the "Chemical Emergency Response Team Act," is designed to strengthen and coordinate Federal capacities to prevent, investigate, identify, control, and eliminate the effects of chemical contaminations of humans and the environment. This legislation also provides the means by which State and local governments and private entities can develop and improve their capacities to avoid or combat chemical contamination dangers.

The Chemical Emergency Response Team Act includes the following provisions:

First. The development of an interagency strike force chaired by the Environmental Protection Agency to identify, control, and clean up contamination incidents.

Second. The response team will respond to significant chemical contamination incidents which will or may result in unreasonable risk of injury to human beings or the environment of the United States.

The response team is also directed to respond where information indicates an unreasonable risk of injury to health or the environment may be presented by a chemical substance or mixture. In both of these cases the response team must respond where significant delay in responding may result in serious or irreversible deleterious effects.

Third. The Environmental Protection Agency, with the assistance of other relevant agencies, is directed to undertake a thorough survey of the adequacy of Federal, State, and private entities to respond to chemical contamination incidents. This survey will include the examination of the adequacy of quarantine procedues, reporting procedures, labeling procedures, and the availability of toxicological labs and medical personnel to respond to a chemical contamination incident. The survey is to be completed within 8 months of enactment and recommendations are to be presented to the President and the Congress at that time.

Fourth. Within 1 year of enactment, the response team will develop a systematic contingency plan to respond to chemical contamination problems. This contingency plan will coordinate the various agencies of the Federal Government to react as rapidly as possible to such dangers. Both the survey and the contingency plan are to be evaluated by the General Accounting Office in order to assure that they are thorough and accurate.

Fifth. The response team will be required to investigate such incidents at the request of any of its permanent members or by the request of the chief executive officer of any State. The response team may respond to the request of any other group or individual if it determines that information presented to it suggests that significant contamination of human beings and the environment of the United States may occur.

Sixth. The response team is not required to respond if it finds that such response will be duplicative of activities being undertaken by Federal, State, or local governments. The response team, however, is required to publish such finding in the Federal Register with the reasons therefor.

Seventh. This legislation also provides for matching grants to improve State programs in order that they may better respond to chemical contamination problems within their jurisdictions. And 75 percent of the funding can be provided by the Federal Government for these purposes.

Why is this legislation necessary? First, the danger of serious chemical contamination incidents has been increasing due to the enormous growth of the use of chemicals and chemical products in the United States. Sales of chemical products in the United States, for example, now exceed $100 billion a year. In just the past 10 years the production of synthetic organic chemicals has expanded by 233 percent. The production of the top 50 chemicals in this country alone total 410 billion pounds. In fact, it is estimated that there are presently two million recognized chemical compounds in existence, with nearly 250,000 new compounds produced each year. While most of these compounds will never be commercialized, the Environmental Protection Agency estimates that approximately 1,000 new chemicals each year will find their way into the marketplace and subsequently into the environment through use or disposal. Thus, our total environment is permeated with vast numbers of chemicals.

Second, present laws and regulations provide inadequate protection against chemical contamination problems. There are of course already a number of Federal agencies, each with limited jurisdiction and responsibilities to handle various types of toxic chemical contamination. Unfortunately, these groups are so fragmented and uncoordinated that a serious question is raised as to their ability to effectively respond to a major contamination problem or, worse, a number of contamination problems located in various parts of the country. In order to enhance our authority to respond to such chemical dangers, last session we enacted the Toxic Substances Control Act. This act closed a number of major regulatory gaps and provides the means for discovering adverse effects of chemicals on health or the environment before manufacture of new chemical substances. The Toxic Substances Control Act also provides the Environmental Protection Agency significantly enhanced powers to regulate toxic chemicals.

Despite these greatly enhanced protections, however, serious chemical contamination incidents can still occur in the following four ways:

First, negligence or accident. In 1973 in Michigan a potentially highly toxic fire-retardant material, polybrominated biphenyls—PBB—was substituted for animal feed. Before the full extent of this contamination could be controlled, it has been estimated that 9 million Michigan

citizens had traces of this material in their systems. Also for a number of months before the contamination was discovered and controlled, meat, poultry and dairy products were sold in Michigan and other parts of the United States at levels thousands of times above the safety levels now set by FDA.

In recent hearings that I chaired in Michigan, we discovered that even now, 4 years after what has been universally admitted to be one of the most serious food contamination episodes in U.S. history, we still do not have adequate acute or long-term animal or human health information concerning the effects of this chemical. Furthermore, the effects of this chemical on workers who utilized PBB's is only now beginning to be investigated. In summary, reaction of the various Federal, State, local, and private groups that were involved in responding to the PBB problem can only be charitably described as dangerously sluggish.

The economic and physical suffering this terrible tragedy brought to many Michigan families and interests is appalling. While I am of course closest to this disaster which occurred in my home State, I know this same kind of terrible drama has played in other States and communities. The PBB incident is not an isolated case of accidental or negligent dumping of chemicals. Just this week EPA is investigating the sudden appearance of an estimated 6 tons of two chemicals, Hexachlorocyclopentadiene and Octachlorocyclopentane, which recently "mysteriously" appeared in the sewage treatment system of Louisville, Ky. These chemicals were discovered only after 31 workers were overcome by fumes.

Also recently a large amount of carbon tetrachloride was found to have contaminated the Ohio River. These cases, however, only present a small fraction of the problem. The U.S. Department of Agriculture, for example, has provided the Senate Commerce, Science, and Transportation Committee with a list of 88 residue incidents affecting 30 States between 1969 and 1975. A total of 20 to 25 million head of livestock and poultry were affected resulting in losses of over $26 million.

Second. Acts of God. Even if great care is taken in handling chemical materials, these materials are constantly being transported by air, ship, train, and truck and stored in large quantities throughout the United States. These chemical products become particularly vulnerable and can be dangerously and widely dispersed in unexpected circumstances such as a tornado, hurricane, flood, earthquake, or other unforeseen calamity.

Third. Discovery of New Data. New information discovered in regard to the health or environmental effects of a chemical also can create an unforeseen crisis. Due to the fact that a multitude of chemicals have been widely dispersed with minimal or no testing of their effects on human health or the environment and that we are continually improving our sophistication in our methods of testing chemicals, it is quite likely that some chemicals which were initially considered to be safe will later be found to be highly dangerous. Once we determine that a chemical presently distributed in the environment is highly toxic, it will be crucial to rapidly act to control, contain and carry out extensive cleanup efforts in the affected area.

It is an obvious fact that chemical substances play an important role in our economy and society. We rely on them for countless, important functions, but we are being reminded more and more by contamination accidents and deleterious health effects that come to light, that many chemical substances are extremely dangerous. It is alarming to me that these incidents also remind us of how little we know about the health effects these chemical creations have on us as, one way or another, they find their way into our environment and our bodies. It is important that we learn to live with them, that we accept the responsibility to control them so that they serve our needs without jeopardizing our health and environment.

Mr. President, for all these reasons, I urge quick passage of the Chemical Emergency Response Team Act in order to assure that chemical contamination incidents do not turn into catastrophes. In order that there may be careful examination of this legislation, I ask unanimous consent that the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1330

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that this Act may be cited as the "Chemical Emergency Response Team Act".

FINDINGS AND POLICY

SEC. 2.(a) FINDINGS.—The Congress finds that—

(1) the manufacture, processing, distribution in commerce, use and disposal of chemical substances and mixtures in the United States continues to rapidly expand in scope;

(2) the widespread development and utilization of chemical substances and mixtures present increasingly complex chemical control problems;

(3) recent toxic substance contamination incidents have demonstrated that the present Federal mechanisms to investigate, identify, control and eliminate such contamination must be substantially strengthened and coordinated in order to insure a rapid and effective response to such incidents;

(4) Federal organizations charged with the identification and control of chemical substances and mixtures contamination also must be coordinated with similar programs in State and local governments as well as private entities in order to maximize timely and adequate protection of human health and the environment from the effects of chemical contamination incidents.

(b) POLICY.—It is the policy of this Act to—

(1) establish a Chemical Emergency Response Team within the Federal Government to strengthen and coordinate Federal resources, and to assist State and local governments, in the area of chemical contamination identification, control and clean up;

(2) provide the means to respond rapidly to incidents of significant chemical substance and mixture contamination, or conditions which may result in significant contamination of humans, animals, the food supply, or the environment or where new information indicates unreasonable risk of injury to health or the environment and to assist State and local governments in responding in such emergencies; and

(3) encourage State and local governments and private entities to expand their capabilities to prevent, identify, control, and respond to chemical substance and mixture contamination incidents.

AMENDMENTS TO THE TOXIC SUBSTANCES CONTROL ACT

SEC. 3. The Toxic Substances Control Act (15 U.S.C. 2601–2629) is amended as follows:

(1) Immediately after section 30 of such Act (15 U.S.C. 2629) insert the following new section:

"SEC. 31. CHEMICAL EMERGENCY RESPONSE TEAM.—

"(a) ESTABLISHMENT.—Within 90 days after the date of enactment of this section, the Administrator shall establish, and thereafter administer and maintain, a Chemical Emergency Response Team (hereinafter in this section referred to as the 'response team') which has available to it, within the Environmental Protection Agency, or from such other sources as the Administrator deems appropriate, adequate technical and scientific personnel, equipment, supplies, and other resources to respond rapidly to—

"(1) incidents of significant contamination, or conditions which may result in significant contamination, of human beings or their environment by a chemical substance or mixture which will or may result in an unreasonable risk of injury to human beings in the United States or the environment of the United States; and

"(2) situations where information indicates an unreasonable risk of injury to health or the environment may be presented by a chemical substance or mixture;

where significant delay in responding to such risk may result in serious or irreversible deleterious effects on health or on the environment.

"(b) COMPOSITION.—The response team, in addition to the Environmental Protection Agency, shall include—

"(1) representatives of the Department of Labor; the Department of Agriculture; the Department of Health, Education, and Welfare; the Department of Transportation; and the Consumer Product Safety Commission; and such other Federal departments, agencies, and entities as the Administrator deems appropriate and necessary, either on a permanent or on a temporary basis in order to respond to incidents, conditions, or situations as described in subsection (a); and

"(2)(A) to the maximum extent practicable, representatives of the technical, scientific, medical or other relevant institutions of any State or local governments which are necessary or appropriate as determined by the Administrator; and (B) representatives of any private, technical, scientific, medical, or other relevant institutions, which voluntarily or for compensation paid in accordance with subsection (d) are available in order to assist in controlling such incidents, conditions, or situations and which the Administrator determines, in his discretion, would be useful in assisting in such functions of the response team.

"(c) DUTIES AND RESPONSIBILITIES.—(1) The Administrator, on behalf of the response team, shall—

"(A) conduct a thorough survey of Federal, State, local and private resources and procedures to prevent, investigate, identify, control and otherwise react to incidents, conditions, or situations described in subsection (a). Such survey shall include—

"(i) an analysis of the availability and adequacy of facilities and equipment in the United States to carry out toxicological and epidemicological studies to respond to such incidents, conditions, and situations;

"(ii) an assessment of the capabilities of medical, safety, and other health related officials to respond rapidly to such incidents, conditions, or situations;

"(iii) an analysis of the adequacy of existing Federal, State, and local laws and private procedures, including international agreements and procedures which may be utilized to prevent or combat any such incident, condition, or situation. Such analysis shall include an investigation of the adequacy of Federal, State, and local laws and private procedures regarding quarantine, labeling, recordkeeping and reporting requirements; and

"(iv) an analysis of the ability of Federal, State, local and private organizations to detoxify humans or animals and to remove chemical substances or mixtures from the environment after such an incident, condition, or situation.

The results of such survey shall be submitted to the President and the Congress within 270 days after the enactment of this section. Such results shall include conclusions based on the data developed in the survey and, where any system, facility, resource or other item in the survey is found to be inadequate, recommendations as to how such inadequacy could be remedied. If any system, facility, resource, or other item is found to be adequate, the survey shall include a complete statement of the reasons for such findings. The survey shall include such other recommendations for legislative or administrative action, relating to the identification, investigation, prevention and control of any such incident, condition or situation as the Administrator determines is necessary or appropriate. The Administrator, not less than once every three years after the submissions of the results of the survey, shall review the findings of the survey and present his conclusions and recommendation to the President and the Congress.

"(B) in addition to the other reporting procedures or techniques otherwise provided for in this Act, establish, by rule, a reporting system that will provide the response team with timely, accurate information which indicates any incident, condition, or situation described under subsection (a). Such reporting system where appropriate shall utilize regional offices of the Environmental Protection Agency as well as other Federal agencies. Such reporting system shall also, where appropriate, utilize State, local, and private agencies and individuals, including privately and publicly employed physicians, veterinarians, and other health care personnel.

"(C) develop within one year of enactment of this section, by rule, on behalf of the response team, contingency plans, which describe the manner in which the response team will rapidly respond to any incident, condition, or situation described under subsection (a). Such plan shall include—

"(i) procedures which will be utilized by the response team to conduct investigations of such incidents, conditions, or situations in order to respond appropriately to protect health and the environment. Such procedures shall provide for sufficient equipment, supplies, scientific and medical personnel, and other resources as is necessary to determine the most appropriate course of action to control and eradicate any unreasonable risk of injury to health or the environment;

"(ii) procedures for the dissemination of information gathered under any investigation under this section to the public and to appropriate Federal, State, and local governments;

"(iii) procedures to coordinate regulatory programs at the Federal, State, and local level to prevent the further spread of any unreasonable risk of injury to health or the environment associated with such chemical substance or mixture and to eliminate such risk then in effect;

"(iv) procedures as may be appropriate to provide adequate medical assistance to persons and veterinary and other assistance to livestock and other animals affected by such incident, condition, or situation; and

"(v) procedures to coordinate among Federal, State, and local agencies and the private sector the manner in which information concerning the effects on health or the environment associated with the chemical substance or mixture responsible for such incident, condition, or situation is to be developed in order to protect against any unreasonable risk of injury to health or the environment.

"(2) The response team shall respond in accordance with the procedures established under paragraph (1)(C) upon the request of any permanent member of the response team, as described in subsection (b), or the Governor of any State. In addition, the response team may invoke the procedures provided for under paragraph (1)(C) upon the petition of any other person where the criteria provided under subsection (a) are determined by the response team to exist. Nothing contained herein shall require the response team to respond to any incident, condition, or situation described under subsection (a) when the response team finds and publishes in the Federal Register with reasons therefor that such response would be duplicative of activities being undertaken by Federal, State, or local governments.

"(3)(A) All agencies and departments of the Federal Government shall cooperate with the response team, and shall, to the maximum extent practicable and when requested by the response team, provide such assistance, personnel, supplies, and other materials and services as are necessary for the response team to properly discharge its functions under this section.

"(B) Any recommendation of the response team of any Federal department or agency shall be considered expeditiously. Within 45 days after the receipt of any such recommendation, such department or agency shall initiate the action requested or shall publish in the Federal Register reasons for not taking such action.

"(4) Within 60 days after the completion of the survey report under paragraph (1)(A) and the contingency plan developed under (1)(C), the Comptroller General of the United States shall evaluate such report and plan and submit such evaluation to the Congress.

"(d) REIMBURSABLE EXPENDITURES.—Any Federal agency that is a member of the response team created under this section or which incurs expenses in connection with any activities of the response team under this section, may be reimbursed for such expenditures from funds appropriated for the purposes of this section.

"(e) UTILIZATION OF SERVICES.—(1) In carrying out the purposes of this section, the Administrator is authorized to accept and utilize the services or facilities of any State or local government or private entity, or of any agency, office or employee thereof, with the consent of such government or entity.

"(2) In carrying out his responsibilities under this section, the Administrator is authorized—

"(A) to appoint and fix the compensation of such temporary personnel as may be necessary, without regard to the provisions of title 5, United States Code, governing appointment in competitive service;

"(B) to employ experts and consultants in accordance with the provisions of section 3109 of such title, without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates; and

"(C) to incur obligations on behalf of the United States by contract or otherwise for the acquisition, rental, or hire of equipment, services, materials, and supplies for shipping, drayage, travel, and communications, and for the supervision and administration of such activities.

Such obligations, including obligations arising out of the temporary employment of additional personnel, may be incurred by the Administrator in such amount as may be made available to him.

"(f) DEFINITION.—For the purposes of this section, the term 'chemical substance' shall have the same meaning as that contained in section 3(2) of this Act, but without regard to the exclusions contained in subparagraph (B)(i), (ii), and (vi) of such section 3(2)

"(g) AUTHORIZATION FOR APPROPRIATIONS.—For the purposes of this section, there are authorized to be appropriated not to exceed , and for the fiscal years ending on September 30, 1978; September 30, 1979; and September 30, 1980, respectively."

(2) Section 28(a) of the Toxic Substances Control Act (15 U.S.C. 2627(a)) is amended to read as follows:

"(a) IN GENERAL.—For the purposes of complementing but not reducing the authority of, or actions taken by, the Administrator under this Act the Administrator shall make grants to the States—

"(1) for the establishment and operation of programs to prevent or eliminate unreasonable risks within the State to the health or the environment which are associated with a chemical substance or mixture and with respect to which the Administrator is unable or is not likely to take action under this Act for their prevention or elimination; and

"(2) to assist the States to develop, strengthen, and execute contingency plans to respond rapidly to incidents, conditions, or situations described in section 31(a).

The amount of a grant under this subsection shall be determined by the Administrator, except that no grant for any State program may exceed 75 percent of the establishment and operation costs (as determined by the Administrator) of such program or developing, strengthening, and executing such plans during the period for which the grant is made.

(3) Section 28 of the Toxic Substances Control Act (15 U.S.C. 2627) is further amended by redesignating subsections (c) and (d) thereof as subsections (d) and (e), respectively, and by inserting immediately after subsection (b) thereof the following:

"(c) STATE PLANS.—The State contingency plan, developed under a grant made by the Administrator under subsection (a)(2), shall include—

"(1) the designation of a State agency or other State organization or individual to be the recipient of reports of incidents, conditions, and situations as described in section 31(a) occurring within the State;

"(2) a system to assure adequate reporting of any symptoms or other physical signs of any such incidents, conditions and situations to such designated agency, group, or individual and methods to provide where appropriate such information to the strike force;

"(3) a system for transporting, to any part of the State, rapidly, field personnel, equipment, and other resources necessary to respond to such incidents, conditions, or situations;

"(4) a method for coordinating, on a regional basis, the elements of the contingency plan with the plans of other States and the strike force established by the Administrator under section 31 of this Act; and

"(5) such other elements as the Administrator by rule may require which are related to enhancing the capability of a State to adequately respond to any incident, condition, or situation described in section 31(a).

(4) Section 28(d) of such Act is amended by striking "$1,500,000" wherever it appears and inserting in lieu thereof "————".

(5) Section 10(b)(2)(A) of such Act (15 U.S.C. 2609(b)(2)(A)) is amended by inserting at the end thereof the following: "Such data shall also include a comprehensive list of experts in the varicus fields related to toxicological or epidemiological research, and the names and addresses of laboratory and other research facilities and projects devoted to or involving toxicological or epidemiological research and analysis."

(6) Section 31 of such Act is renumbered as section 32.

(7) The table of contents of such Act is amended (A) by renumbering item 31 as item 32; and (B) by inserting immediately after item 30 the following new item:

"Sec. 31. Chemical Contamination Strike Force."

By Mr. CANNON:

S. 1331. A bill to provide for the establishment of a Center for the Book in the Library of Congress; to the Committee on Rules and Administration.

CENTER FOR THE BOOK

Mr. CANNON. Mr. President, I am today introducing a bill to establish within the Library of Congress a Center for the Book. We are all aware of numerous instances where educators are bemoaning the effect of modern technology on the basic reading and writing skills of students. Emphasis has shifted from the printed word to audio-visual materials. While audio-visual methods have a definite role in the educational process, we need to place greater emphasis on the book as one of the major avenues to obtain the knowledge with which we must find solutions to some of the problems facing us. The printed word has revolutionized human society. Civilizations have been judged by their written products.

The Center for the Book in the Library of Congress—which as we know is the greatest repository of the printed word in the world—would provide a research center that would investigate the history and the prospects of the book. It would be a place where scholars could trace schools of thought through the history of publishing and investigate the role of the book in the transmission of knowledge past, present, and future. It would be expected that the collections of the Library of Congress could be brought closer to the people through such a center. Most importantly, the center would place the book in the proper perspective—as a tool of learning—and assure its prominence in today's world.

There is no more fitting home for this center than the Library of Congress, which, through its long and honored tradition, has preserved the world's culture through its unparalleled collection of books on every subject and in every language known to man.

It should be noted that this bill and the center it would establish do not call for any appropriation of public funds, but instead would be supported entirely by private gifts to the Library of Congress for the purpose.

By Mr. HUDDLESTON (for himself, Mr. FORD and Mr. ALLEN):

S. 1333. A bill to authorize payments to States as reimbursement for payments which were based upon erroneous information supplied by the Department of Health, Education, and Welfare; to the Committee on Finance;

Mr. HUDDLESTON. Mr. President, the legislation I am introducing today would provide the authority to reimburse States for overpayments made to supplemental security income—SSI—recipients due to errors in information provided by the Social Security Administration.

Effective January 1, 1974, our Nation's system of providing income support for the needy aged, blind, and disabled underwent a major transformation. Supplemental security income took the place of the former Federal-State assistance programs for aged, blind, and disabled. At that time, if they wished to do so, States could provide supplementary payments to the aged, blind, and disabled to provide a higher level of assistance than that specified in Federal law. In certain circumstances the State supplementation was mandatory to insure that recipients did not experience a loss of income.

Although the basic SSI program is federally administered, States were given the option of administering the supplementary payments themselves or of contracting for Federal administration. The law and subsequent regulations also provided that the Social Security Administration through the Bureau of Supplemental Security Income—BSSI—would either administer the State supplemental payments or provide under contractual arrangement the information base necessary for the State to administer its own supplemental program.

In some cases, however, BSSI failed to fulfill its obligations under the agreement. The data given to some States in the early months was inaccurate and some of the basic payments also were inaccurate. Through the State data exchange—SDX—system, BSSI gave erroneous information to States and caused them to make overpayments to eligible SSI recipients and erroneous payments to individuals who were ineligible for any SSI supplement. While most of the overpayments were recoverable through deductions in future checks, the payments to individuals who were not qualified for any SSI supplement were lost. There is no mechanism by which the State can recover the funds through a withholding procedure in these cases.

Of those States which chose to administer their own supplemental programs, at least five have requested reimbursement from the Social Security Administration for overpayments caused by the inaccurate SDX data. The legislation I am introducing today would authorize and direct the Secretary of HEW to make payments to eligible States for nonrecoverable funds.

By Mr. ANDERSON:

S. 1334. A bill to amend the Housing and Community Development Act of 1974 to provide assistance under that act in support of a State role in the administration of activities assisted thereunder, to provide assistance for technical assistance provided by State agencies to localities assisted thereunder, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM

Mr. ANDERSON. Mr. President, I am introducing legislation today that would give smaller cities and their State governments an opportunity to work together in the community development block grant program.

The legislation would enable the Secretary of Housing and Urban Development to permit communities under 50,000 to use State agencies in the application process, administration, and implementation of these programs. Because of cooperative State involvement, they would be planned with State programs and State funding in mind. Communities would be able to make use of the expert knowledge available in their State governments, even if they are too small to build such capacity into their own local governments.

Mr. President, there are a number of advantages to closer cooperation between State and local governments as they work with Federal agencies. States have a vital interest in the health of local governments. In my own State of Minnesota, through State aids, technical assistance, and communication efforts, a substantial effort has been made to make sure that local communities are able to provide decent government services to their people, in rural and urban areas alike. In many areas of community develop- are already working hand in hand.

The cooperative approach authorized by this legislation would help strengthen local communities, but it also is valuable to State governments. If a State agency works closely with a community, the State leadership learns the real needs of local governments and comes to understand the problems that are created by unresponsiveness and ignorance of local realities in State agencies. Small communities as well as large ones must live with State laws and regulations, in order to receive assistance for the services they provide.

Mr. President, as Governor of Minnesota I had many opportunities to see both the possibilities of healthy cooperative relationships and the problems of isolated decisionmaking and planning. State participation in the administration of Community Development Block Grant programs can strengthen the relationship between State and city governments, and it can also provide better understanding and increased cooperation between State agencies and the Department of Housing and Urban Development.

The real future of healthy local governments depends, I believe, on a strengthened local-State-Federal part-

nership that encourages involvement and initiative at the local-State level. S. 1334 is an important step in this direction. Joint planning can enable a local government to put State and Federal assistance together for maximum impact at the local level. It can reduce duplication of projects, and it can reduce the conflict between State and local priorities and programs.

Mr. President, this legislation also gives States the opportunity to provide technical assistance to communities involved in housing assistance programs. Our own Minnesota State Housing Finance Agency already carries on such activities as they relate to State housing programs, putting together efforts that take advantage of both Federal and State assistance. This legislation would encourage such cooperation throughout the Nation.

This legislation does not require States to become involved in the development programs of their communities. It simply opens an avenue to those communities that want to make better use of State resources. It requires the Department of Housing and Urban Development to make such opportunities available in the Community Development Block Grant program.

Mr. President, my goal in this legislation is to assist in building stronger, more effective communities. That is the goal of local governments throughout this Nation, and it is also the goal of good State governments. Too often we underestimate the commitment of both States and smaller communities to that goal. Too often we underestimate their ability to plan and administer effective community development programs. This legislation is based on the belief that Federal legislation will work more effectively if the Congress and the Federal agencies recognize that cities exist within State governments and can use those governments to help them make our programs effective.

Mr. President, I ask unanimous consent that S. 1334 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1334

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 101 (b) of the Housing and Community Development Act of 1974 is amended by inserting before the period at the end thereof a comma and the following: "specifically including efforts by State governments to provide community development resources to local governments"

SEC. 2. Section 104 of the Housing and Community Development Act of 1974 is amended by adding at the end thereof the following

"(i) The Secretary shall provide an opportunity to Governors or State agencies designated by Governors to participate in the administration of activities assisted under this title (other than under section 106(b)) in their States, except that nothing in this subsection shall be deemed to permit a Governor or a State agency designated by the Governor to change the activities or the requested funding level of an applicant or recipient without the consent of that applicant or recipient or to devolve final decision-making responsibility from the Secretary.".

SEC. 3. Section 107(a) of the Housing and Community Development Act of 1974 is amended—

(1) by striking out "and" at the end of paragraph (5);

(2) by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(7) to States for the provision of technical assistance, particularly to nonmetropolitan communities.".

SEC. 4. Section 106(a)(1)(iv) of the Housing and Urban Development Act of 1968 is amended by inserting "by States" after "the provision of technical assistance".

By Mr. DOLE:

S. 1336. A bill to require daily release by the Secretary of Agriculture of reports of export sales of agricultural commodities; to the Committee on Agriculture, Nutrition, and Forestry.

EXPORT SALES REPORTING AMENDMENT

Mr. DOLE. Mr. President, in order to insure that farmers receive in the future pertinent export sales information on a timely basis, I am today introducing an amendment to section 812 of the Agricultural Act of 1970 as amended to require daily release by the Secretary of Agriculture of reports of export sales of agricultural commodities.

Farmers need the best market information available on as timely a basis as possible in order to market their crops to the best advantage. Sales such as the recent soybean optional origin sale to the Peoples Republic of China should be publicly reported within 24 hours because of possible market impact. If passed, my amendment will insure such timely reporting in the future.

By Mr. MAGNUSON (for himself and Mr. JACKSON):

S. 1337. A bill to modify the project for navigation improvement of Grays Harbor and Chehalis River and Hoquiam River, Wash.; to the Committee on Environment and Public Works.

GRAYS HARBOR NAVIGATION CHANNEL

Mr. MAGNUSON. Mr. President, today I am introducing for myself and Senator JACKSON legislation to authorize the U.S. Army Corps of Engineers to initiate phase I of advance engineering and design for the proposed deepening of the Grays Harbor Navigation Channel in Grays Harbor, Wash.

Continued review is required to determine whether the proposed deepening is economically and environmentally justified and has been specifically requested by the Board of Engineers for Rivers and Harbors in its report on December 8, 1976.

I am introducing this legislation now with the hope that the Environment and Public Works Committee will incorporate it in the next omnibus Water Resources Development Act which it reports to the Senate.

Mr. President, I ask unanimous consent that the text of the bill, together with the report of the Board of Engineers, be printed in the RECORD.

There being no objection, the bill and report were ordered to be printed in the RECORD, as follows:

S. 1337

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the project for navigation improvement of Grays Harbor and Chehalis River and Hoquiam River, Washington, authorized by section 2 of the River and Harbor Act of March 2, 1945 (59 Stat. 10), and section 101 of the River and Harbor Act of 1954 (68 Stat. 1253), is hereby further modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to undertake the Phase I design memorandum stage of advance engineering and design of the project, substantially in accordance with the recommendations contained in the Report of the Chief of Engineers dated at an estimated cost of $1,000,000.

DEPARTMENT OF THE ARMY, BOARD OF ENGINEERS FOR RIVERS AND HARBORS,
Fort Belvoir, Va., January 13, 1977.

Subject: Grays Harbor from the Outer Bar to Cosmopolis, Washington.

CHIEF OF ENGINEERS,
Department of the Army,
Washington, D.C.:

1. Authority.—This interim report is in partial response to two resolutions by the Committee on Public Works of the United States Senate adopted 21 October 1957 and 30 December 1957, and to a resolution by the Committee on Public Works of the House of Representatives adopted 16 July 1958. These authorities are quoted in full in the report of the District Engineer. This report addresses channel improvements at Grays Harbor from the outer bar to Cosmopolis on the Chehalis River. A final report in response to these authorities will be submitted later

2. Description.—Grays Harbor is a large estuary lying entirely in Grays Harbor County on the southwest coast of the State of Washington. The entrance to the harbor is 45 miles north of the mouth of the Columbia River and 110 miles south of the entrance to the Strait of Juan de Fuca. The estuary begins at the mouth of the Chehalis River and gradually broadens to a shallow, pear-shaped body of water encompassing North and South Bays. The estuary is inclosed on the ocean side by two long spits, Point Brown on the north, and Point Chehalis on the south, which are separated by a 2-mile wide opening forming the natural harbor entrance. Two convergent rock jetties, North Jetty and South Jetty, extend seaward from the points of the spits, constricting the entrance width to about 6,500 feet. The surface area of the estuary varies from 97 square miles at mean higher high water (MHHW) to 35 square miles at mean lower low water (MLLW). The mean tidal range at the harbor is approximately 8 feet. In addition, estuarine tidelands, composed, of fertile river-borne silts and vegetated by dense communities of marsh grass, form extensive mudflats throughout the harbor The natural transition of brushy upland vegetation into tidal marsh grass provides nesting habitat and shelter for numerous shorebirds and waterfowl.

3. Existing improvements.—The Federal Government constructed and maintains the two jetties at the harbor entrance and a 30-foot deep channel at MLLW for ocean navigation from the outer bar to Cosmopolis Other Federal improvements include an 18-foot by 100-foot navigation channel in the lower Hoquiam River, a 14-foot by 100-foot

navigation channel in the South Bay; a revetment and groin erosion protection system for Point Chehalis; and breakwaters and navigation channels for a small-boat basin at Point Chehalis. In addition, the Port of Grays Harbor has constructed terminals and other facilities for logs, lumber, general cargo, and petroleum. Private terminal facilities for the storage and handling of logs, lumber, woodchips, liquid lignin, and pulp are also located at the harbor. The existing Grays Harbor navigation project provides deep-draft vessels access to over 600 acres of publicly owned and 900 acres of privately owned industrial and terminal lands.

4. Tributary area and commerce.—The tributary area for Grays Harbor includes all of Pacific and Grays Harbor Counties, and parts of Lewis, Clallam, and Jefferson Counties. Historically, the economic development of the tributary area has been based on the timber resources of the region. Grays Harbor County has approximately 1.2 million acres of land, of which about 90 percent is in commercial forest use. The annual harvest potential for the tributary area is estimated at 1.7 billion board feet. Products from the forest industry primarily include lumber, plywood, paper, and chips. In 1975, approximately 1,945,000 tons of wood products were exported from Grays Harbor.

5. Problems and needs.—Existing deep-draft vessels using the port range in size from 8,000 to 30,000 deadweight tons with fully loaded midship drafts of 20 to 31 feet, and beams up to 82 feet. However, ocean-going vessels in the world fleet have been increasing in size to meet the competitive demand for efficiency in carrying capacity. The size of vessels engaged in the transportation of woodchips ranges up to 57,000 deadweight tons with loaded drafts of 39 feet and beams of 118 feet. Vessels carrying logs and lumber are as large as 44,000 deadweight tons with loaded drafts of 37 feet and beams of 101 feet. Many of the vessels now transporting forest products in worldwide trade cannot call at Grays Harbor due to depth limitations of the present channel and the restricted horizontal clearance of the existing Union Pacific Railroad bridge at Aberdeen. In addition, large ocean-going vessels often incur tidal delays in order to be able to leave the harbor fully loaded. The use of smaller vessels results in higher transportation costs, thereby making Grays Harbor less competitive with other United States and foreign ports also shipping forest products. Therefore, there is a need for channel improvements and modification of the railroad bridge to provide for safe navigation, to reduce tidal delays, and to permit the movement of waterborne commerce at lower transportation costs through the use of larger vessels.

6. Improvements desired.—The Port of Grays Harbor and other navigation interests desire that the existing Federal deep-draft navigation channel be enlarged from the outer bar to Cosmopolis, and that the Union Pacific Railroad bridge over the Chehalis River at Aberdeen be modified. Grays Harbor County and the cities of Aberdeen and Hoquiam have prepared "Shoreline Master Programs" in compliance with Washington State's Shoreline Management Act and the Federal Coastal Zone Management Act. Channel improvements as desired by local interests are consistent with the local shoreline master programs.

7 Improvements considered.—The District Engineer considered various alternatives for accommodating the increasing size of vessels transporting wood products from the Grays Harbor tributary area. These alternatives included consideration of increased channel dimensions in Grays Harbor, use of other existing west coast ports, and a system for transferring products from docks to oceangoing vessels anchored in deepwater by use of shallow-draft vessels. Certain channel enlargement alternatives included modification of the existing Union Pacific Railroad bridge to provide a greater horizontal clearance. In addition, two alternative plans for disposing of dredged material were considered.

8. Plans formulated.—Plans were formulated to meet the objectives of National Economic Development (NED) and Environmental Quality (EQ), as set forth in the Water Resources Council's Principles and Standards for Planning Water and Related Land Resources. Alternative plans were evaluated, giving consideration to technical, economic, environmental, and social factors. The NED Plan was determined to be an enlargement of the navigation channel from the outer bar to Cosmopolis and modification of the railroad bridge. Disposal of dredged material under the NED Plan would be by the least costly method, which involved both deepwater disposal in the ocean and harbor, and disposal on tidelands and uplands for port and industrial development. The EQ Plan was also determined to be an enlargement of the navigation channel. However, it involved disposal of all dredged material in a manner necessary to preserve and maintain the natural resources of the study area and to cause the least adverse environmental impact while addressing the problems and needs of waterborne commerce. Under the EQ Plan, all material dredged downstream of the existing bridges would be disposed of in deepwater in the ocean and adjacent to the South Jetty. Material dredged upstream of the bridges would be disposed of on adjacent uplands.

9. Plan of improvement.—The District Engineer found the EQ Plan to be the most suitable and advisable at this time. His proposed plan consists of modification of the existing project at Grays Harbor to provide for: an outer bar channel 48 feet deep below MLLW and 1,200 feet wide; an entrance channel 45 feet deep below MLLW and varying in width from 1,200 to 600 feet; a channel through the estuary 40 feet deep below MLLW and varying in width from 400 to 300 feet; a channel 40 feet deep below MLLW and 300 feet wide up the Chehalis River to Cosmopolis; a turning basin 40 feet deep below MLLW and 1,000-foot square at Cow Point; and a turning basin 40 feet deep below MLLW, 1,000 feet long and 800 feet wide in the Chehalis River near Cosmopolis. In addition, the Union Pacific Railroad bridge across the Chehalis River at Aberdeen would be modified to a vertical-lift span providing 140 feet vertical and about 275 feet horizontal clearances.

10. Economic evaluation.—Based on March 1976 prices, the District Engineer estimates the total cost of his proposed improvements to be $47,584,000, of which $46,692,000 would be Federal, and $892,000 would be non-Federal. The annual charges, based on a 50-year period for economic analysis and an interest rate of 6⅛ percent, are estimated at $5,080,000, including $2,000,000 for Federal maintenance in addition to that now required for the existing Grays Harbor navigation project. Average annual benefits are estimated at $9,953,000, and the result-cost ratio is 2.0. Use of the currently authorized Federal interest rate of 6⅜ percent would not have a significant impact on project economic justification.

11. Other considerations.—The District Engineer made an assessment of the economic, social, and environmental effects of his proposed plan. He found that widening of the channel bottom would involve 1,300 acres of the approximately 22,400 acres of the estuary below MLLW. The existing channel from the outer bar to Cosmopolis now occupies about 800 acres. Therefore, bottom-dwelling organisms would be reduced on an additional 500 acres by the increased dredging. In addition, hydraulic model studies indicate that salinity intrusion would move upstream from the present location at Cow Point to about Cosmopolis. The effect would be greatest during low freshwater inflows and high tides. Three of the four upland sites considered for disposal of dredged material are brushcovered, and vegetation would be destroyed. The remaining site is presently used for log and lumber storage, and has no vegetation. The District Engineer also found that the effects of ocean disposal of dredged material is not precisely known. Selection of the specific ocean site and method of disposal would require evaluation of data from tests now being conducted at the mouth of the Columbia River and at San Francisco Bay, together with additional data on ocean bottom characteristics off Grays Harbor. These studies would be conducted prior to construction.

12. Recommendations of the reporting officers.—The District Engineer recommends modification of the existing project for Grays Harbor, Washington, in accordance with the plan described in his report and subject to certain requirements of local cooperation. The Division Engineer concurs.

13. Public notice.—The Division Engineer issued a public notice stating the recommendations of the reporting officers and affording interested parties an opportunity to present additional information to the Board. Careful consideration has been given to the communications received.

VIEWS AND RECOMMENDATIONS OF THE BOARD OF ENGINEERS FOR RIVERS AND HARBORS

14. Views.—The Board of Engineers for Rivers and Harbors concurs with the reporting officers that there is a need to enlarge the existing channel at Grays Harbor and to modify the restrictive railroad bridge across the Chehalis River at Aberdeen to accommodate the increasing size of oceangoing vessels. The Board finds that studies have been sufficiently detailed to determine that a channel enlargement project would be economically justified. However, in reviewing the economic analysis undertaken by the reporting officers, the Board notes that the determination of the channel depths that are actually required, and at which net national economic benefits are maximized, is very sensitive to certain factors. These include the prospective vessel fleet composition, the utilization of the tides by large vessels, and the annual volume of commerce estimated to be transported in various size ships. Supplemental information furnished by the reporting officers, at the request of the Board, indicates that the project depth which maximizes net economic benefits at Grays Harbor ranges between the depths presently recommended in the report under review and project depths 5 feet less than those proposed by the reporting officers. Therefore, the Board believes that subsequent planning studies should further examine this aspect and determine more precisely the channel depths at which net economic benefits are maximized. Of particular importance is a determination of the capability of vessels to take advantage of the large tidal range at Grays Harbor.

15. Certain design criteria used by the reporting officers result in channel dimensions which may be substantially greater than those required for safe navigation at Grays Harbor and which appear to exceed traditional Corps of Engineers design standards. Of particular concern are the allowances used in the outer bar and entrance channels for determining vessel deviation from a straight course and for wave induced

vessel motions. Therefore, the Board believes that channel design criteria should also be reexamined during subsequent planning studies.

16. The Board carefully considered the environmental effects of the proposed project, including those discussed in the Revised Draft Environmental Impact Statement dated September 1976. As the reporting officers indicate, the Grays Harbor estuary offers a very diverse habitat. The estuary provides nursery areas for Dungeness crabs and many species of juvenile fish. It is used for spawning by herring and smelt, and is a transition area for salmon in their migrations between fresh and salt water. The forage fish, juvenile fish, and invertebrates living in Grays Harbor provide a source of food for larger fish, not only inside the bay, but in the open ocean as well. Some fish from outside the estuary, notably salmon from the ocean, enter Grays Harbor for feeding; thus the productivity of the estuary has far-reaching effects. In addition, the wetlands and shallow water areas serve as essential habitats for birds of the Pacific Flyway. Tideflats offer a food source for the birds; marshes and other wetlands also provide resting and breeding areas. In consideration of these environmental aspects, the Board believes that the plan for disposal of dredged material, as presently proposed by the reporting officers, provides an effective means of maintaining the valuable fish and wildlife resources of the Grays Harbor estuary and would have fewer adverse environmental impacts than other disposal plans examined. However, the Board also notes that additional information pertaining to the potential environmental impacts of the proposed modification is still needed prior to actual construction of the project. This factor has been addressed by various Federal and State agencies during coordination of the District Engineer's report. In addition, further consideration should be given to the creation of wetland areas using dredged material from construction and maintenance of the proposed project. Such considerations are in accordance with Section 150 of the 1976 Water Resources Development Act.

17. The Board also considered the effects of the proposed project on regional development and social well-being, as required by the Principles and Standards for Planning Water and Related Land Resources established by the Water Resources Council. The Board believes that the proposed plan will contribute to regional economic development and improved social well-being.

18. The Board notes that the report of the Fish and Wildlife Service is the first part of a two-stage detailed report to be prepared by that agency on the proposed channel modification project. The Service deviated from the traditional fish and wildlife report ordinarily prepared in accordance with provisions of the Fish and Wildlife Coordination Act. Based on its understanding that the proposed Grays Harbor project would be considered by the Congress under a two-stage authorization procedure, it assumed that this procedure permitted a two-stage fish and wildlife report. The initial report includes a list of environmental studies to be accomplished during Phase I planning. The Fish and Wildlife Service indicates that the final fish and wildlife report will be included with the Corps Phase I report which will be submitted to Congress for construction authorization. The Board notes that preparation of a two-stage report by the Fish and Wildlife Service is not a standard reporting practice, and that every effort should be made to obtain a complete and final fish and wildlife report during Corps preauthorization studies. The Board also notes that the environmental studies listed in the initial fish and wildlife report could cost an estimated $5 million. However, all of these studies are not directly related to the proposed Grays Harbor project, and some are presently being accomplished under other programs. The Corps has an ongoing ecological study pertaining to dredging effects in Grays Harbor, which will provide some of the information desired by the Fish and Wildlife Service. Other studies are also being undertaken by an estuarine management task force supported by coastal zone management funds through the Regional Planning Commission. The reporting officers have identified the additional environmental studies specifically needed for the proposed Grays Harbor navigation improvement project and have estimated their cost at $400,000. This amount has been included in the Engineering and Design estimate shown in the survey report, and the Board considers it to be adequate for continued evaluation of the environmental impacts of the proposed channel modification project.

19. Due to the possible changes in channel design criteria and economic factors, and the need for additional environmental and fish and wildlife studies, all as outlined in the preceding views, the Board believes that a recommendation for continued planning, rather than construction of the proposed Grays Harbor channel modification, would be appropriate in this specific instance.

20. Recommendations.—Accordingly, the Board recommends that the Phase I design memorandum stage of advanced engineering and design be undertaken for the proposed modification of the existing Grays Harbor, Washington project, generally in accordance with the plan of the District Engineer and with such modifications thereof as in the discretion of the Chief of Engineers may be advisable. The cost to the United States for the plan proposed by the District Engineer is presently estimated at $46,592,000 for initial construction, exclusive of $100,000 for aids to navigation, and $2,000,000 annually for operation and maintenance in addition to that now required. This recommendation is made with the provision that, prior to commencement of construction, non-Federal interests will agree to:

a. Provide without cost to the United States all lands, easements, and rights-of-way necessary for the construction and subsequent maintenance of the project and for aids to navigation upon the request of the Chief of Engineers, including suitable areas determined by the Chief of Engineers to be required in the general public interest for initial and subsequent disposal of dredged material, and including necessary retaining dikes, bulkheads, and embankments therefor, or the costs of such retaining works;

b. Accomplish without cost to the United States all alterations and relocations of transportation facilities (except the railroad bridge, separately covered below), storm drains, utilities, and other structures and improvements made necessary by the construction;

c. Provide a cash contribution for initial dredging equal to 50 percent of the final construction cost allocated to land enhancement resulting from landfill, exclusive of lands, easements, rights-of-way, alterations, and relocations;

d. Hold and save the United States free from damages due to the construction and maintenance of the project, not including damages due to the fault or negligence of the United States or its contractors;

e. Provide and maintain without cost to the United States adequate public terminal and transfer facilities open to all on equal terms;

f. Provide and maintain without cost to the United States depths in berthing areas and local access channels serving the terminals commensurate with the depths provided in the related project areas; and

g. Assume a share of the final cost of modifying the Union Pacific Railroad bridge across the Chehalis River at Aberdeen, apportioned in accordance with the principles of Section 6 of the Bridge Alteration Act of 21 June 1940, as amended.

21. The Board also recommends that aspects related to economic analysis, project design, and potential environmental impacts, as discussed in the foregoing views, be considered during the Phase I planning studies, and that the concerns of the Board as expressed herein be addressed in a subsequent report which should be referred to the Board for review prior to authorization for construction.

For the board:

R. C. MARSHALL,
Major General USA,
Chairman.

By Mr. HASKELL:

S. 1338. A bill to provide for the issuance and administration of permits for commercial outdoor recreation facilities and services on public domain national forest lands, and for other purposes; to the Committee on Energy and Natural Resources.

FOREST SERVICE SKI PERMITS

Mr. HASKELL. Mr. President, I introduce today a bill to reform the system of issuing and administering permits for ski area and other commercial outdoor recreation facilities and services on public domain national forest lands.

This bill is virtually identical to S. 2125 which was reported by a unanimous vote of the Senate Committee on Energy and Natural Resources and passed by voice vote in the Senate last Congress. It would provide a modern permit authority to the Forest Service to supplement and, in the case of ski areas, replace the increasingly inadequate, antiquated statutory base upon which the agency is dependent for permitting purposes.

Presently the Secretary of Agriculture employs two statutes for licensing concessioners: The act of June 4, 1897, which authorizes the Secretary to regulate occupany and use of the national forests; and the act of March 4, 1915, which authorizes the Secretary to issue permits for the use and occupancy of national forests for the specific purpose of constructing hotels, resorts, or other recreation facilities. Both these early statutes have been amended; however, the most recent amendment was made 20 years ago by the act of July 28, 1956, well before the recent heavy demand for outdoor recreation opportunities.

The time has passed when the Congress or the executive branch could hope to keep pace with the escalating demand for increasingly costly recreation facilities and services on national forest lands through the expenditure of public funds only. In the last decade alone, visits to the national forest system to pursue recreational opportunities increased 32 percent. Every indication is that Americans will continue to enjoy the increased leisure time, greater mobility, and higher personal incomes which have contributed to this dramatic rise in recreation use.

Accordingly, the Forest Service expects continued increases in the demand for recreation opportunities. The agency's most recent projections show an increase from 197.8 million visitor-days in 1975 to 276.1 to 342.4 million visitor-days an-

nually in the decade 2011 to 2020. The cost in Federal dollars to meet those demands would rise from $65.8 million in 1975 to 357.7 million annually in the decade 2011 to 2020. Approximately 60 percent of the annual visitor-days of recreation use in the national forests are dedicated to dispersed recreation—backpacking, camping, fishing, hunting, et cetera—which do not require large capital expenditures of funds in order to be managed effectively. These have been and can be the direct responsibility of the Forest Service. However, under Federal budgetary constraints, the more capital-intensive recreation pursuits which require heavy investments in facilities and to which 40 percent of the annual visitor-days are devoted can only be provided by private industry.

In 1975 the Forest Service had in force approximately 1,900 concessioner permits for the construction and operation of recreation facilities and provision of recreation services. Permittees' investments in improvements totaled over $270 million and receipts to the Treasury from permit fees were about $2.8 million. The Forest Service estimates that another $200 million of concessioners' investments will be required within the next 10 years in order to top up appropriated funds to meet the projected demand for recreation use of national forest lands. The capital-intensive demands of the recreation industry and a statutory base insufficient to provide security for investments in recreation facilities on national forest lands threatens the achievement of this projected level of funding from private sources by 1986.

To induce these investments, the Forest Service grants permits to the concessioners which afford them the privilege of pursuing private gain on public lands. Yet, the basic purpose of those permits is not to foster economic enterprise on national forest land but to assure the provision of high-quality services at a reasonable cost to the owners of that resource: the public. Any business which holds a Forest Service permit is uniquely affected with a public interest. It must expect vigorous enforcement of that interest; and that is achieved when the public is allowed to participate. Unfortunately, in the past, such participation has not been adequately encouraged or, on occasion, even permitted, and, consequently, such enforcement has been uneven at best, absent at worst.

Concessioners no longer limit their development activities to construction of facilities strictly for recreation purposes on national forest lands. Many such permittees become hotel and lodge operators and real estate developers on privately owned land adjacent to the national forest land. These developments by the permittees, in turn, stimulate similar development by others. These facilities and services and the population growth and secondary development they induce have significant adverse impacts upon the environment of national forest lands and private lands alike and create heavy demands for public services in largely rural areas. The communities in these areas are often ill-equipped in planning and financing capabilities to meet these public service demands and mitigate the environmental impacts. These impacts and demands are a direct result of the Federal permitting activity, yet the existing statutory base for that Forest Service activity fails to adequately address them.

The legislation I introduce today attempts to reform the Forest Service's antiquated statutory base by providing the Forest Service with congressionally established standards and directives to insure that a climate is established to encourage the level of concessioner investments necessary to meet recreation demands on national forest lands, that vigorous enforcement of the public interest is maintained through careful administration of concessioners' permits, that the public interest is continually defined by provision of increased opportunities for public participation, and that the secondary impacts and public service demands which are generated by concessioners' activities are properly addressed by the permitting agency.

This legislation is based on a lengthy set of hearings and investigations by the staff of the Subcommittee on the Environment and Land Resources. In February 1975, I received numerous complaints from constituents concerning a proposal of three of Colorado's largest ski areas to increase by 20 percent the daily adult tow ticket rate. Skiing is already too expensive for many Coloradans. I was concerned that so large an increase would put skiing beyond the reach of many more people, especially families. I do not wish to see the less affluent local skiers excluded by concessioners avidly seeking the more high-spending destination skiers and ski tourists. I particularly do not wish to witness the disappearance of the family skier from Colorado's slopes. For these reasons I wanted to be sure the proposed rate increase was justified.

As no public hearing is held on proposed rate increases, I asked the Forest Service to delay its decision on the rate hike to permit a careful review by all parties concerned. At the same time, to facilitate that review, I asked the Forest Service to provide me the financial information the three ski areas supplied in support of their requests.

The Forest Service did subsequently deny the full rate increase request by refusing to permit any interim rate hike for the remainder of that ski season and permitting a less than 20-percent increase for the next ski season. Yet, any meaningful review of even this Forest Service position was frustrated by that agency. The Forest Service denied access to the information I requested claiming that, under terms of leases with ski areas operating in the national forest, such information is confidential.

Mr. President, it was inconceivable to me that a Government agency could base a decision which so fundamentally affects the leisure lives of citizens on information which it refuses to make public. Not only is there no way for the public to adequately review a proposed rate hike, but any appeal process from a Forest Service decision to grant that increase would be a sham.

During the same period, representatives of the ski area operators came to me to express their own concern about certain of the outdated provisions in the agency's statutory base. Their greatest concern was with the acreage limitation. Under the 1950 amendment to the 1915 Term Permit Act recreation permits may cover no more than 80 acres of national forest land. The Forest Service has avoided this limitation by issuing ski area operators two permits: The 30-year 1915 act permit for the area on which the principal facilities are located and a special annual permit under the 1897 act for the remaining lifts and runs. My colleagues will recall that a similar technique of issuing more than one permit was employed by the Interior Department to attempt to avoid the right-of-way width limitations of the 1920 Mineral Leasing Act in awarding the Alaska pipeline right-of-way, and that the Federal courts declared that technique illegal. As the Forest Service's double-permitting method is now under similar challenge in the environmentalists' suit against the proposed Mineral King ski resort in California, the ski area operators are understandably nervous about the validity of existing and future Forest Service permits and the security of existing and proposed investments in ski facilities on national forest lands.

On July 1, 1975, I introduced S. 2125, which combined provisions which were sought by the industry and provisions which would open the agency decision-making process concerning rate increase requests and the administration of recreation permits. The Subcommittee on the Environment and Land Resources held field hearings on S. 2125 on October 4 and 6, 1975, in Aspen and Denver, Colo., and a hearing in Washington, D.C., on November 17, 1975. Testifying at these hearings were the chief forester, State, and local officials, ski area operators, skiers, representatives of environmental organizations and local citizens. Virtually all of the testimony favored enactment of S. 2125, although most witnesses suggested changes.

In October 1975, and again in January 1976, I was apprised by several of my constituents of a controversy concerning a proposed expansion of Mr. Howard H. Callaway's Crested Butte Ski Area and the treatment afforded that proposal in the East River Unit Plan for the Gunnison National Forest in Colorado. I requested an investigation of the controversy by the staff of the Subcommittee on the Environment and Land Resources, and, on April 8, 9, 10, and 12, and May 13 and 14, 1976, the subcommittee held legislative oversight hearings on this controversy and the results of the investigation. These hearings were termed "legislative oversight" hearings for good reason. Clearly, the controversy, raising as it did questions of whether the Forest Service succumbed to political pressure, required the oversight attention of the subcommittee; but it also provided a valuable case study of the procedures and policies employed by the Forest Service in determining whether

to issue and how to administer commercial outdoor recreation permits.

At my request, the subcommittee prepared and issued a report on the legislative oversight hearings, entitled "The Preparation of the East River Unit Plan, Gunnison National Forest, Colorado." Of the total of 196 pages, the report contained 26 pages of specific subcommittee recommendations for legislative and administrative reform of Forest Service permitting, and Federal conflict-of-interest, and policies and procedures.

S. 2155, as reported by the Energy and Natural Resources Committee and passed by the Senate, was substantially rewritten and expanded to reflect the concerns expressed by the many witnesses at the hearings on the bill and the recommendations made by the subcommittee in its East River Unit Plan report.

The deficiencies in the Forest Service's statutory base, policies, and practices identified by witnesses included: The 80-acre limitation for permits under the 1915 act which threatens the security of investments in ski resorts occupying more than 80 acres of national forest land; insufficient consideration of the secondary residential and commercial development, and the resulting impacts upon the environment and public service requirements, arising from large-scale ski resorts; failure to provide proper notice and opportunity to participate to affected citizens and State and local governments in permit issuing procedures; a lack of effective forums and procedures for citizen participation in reviewing permittees' performances; too small a percentage of, and serious use limitations on, permit fee moneys distributed to the States and local governments; no uniform and objective methods for reviewing requests by permittees to increase their charges to the public; only minimum public disclosure of information concerning permit issuing and administering decisions; inadequate consideration of the antitrust implications of awarding more than one permit to a single party in the same geographical area; and permittee pricing patterns which encourage "destination skiers" and discourage skiing by citizens of the communities and States in which the resorts are located.

To correct these deficiencies, the legislation would supplement and, in the case of ski area facilities and services supplant the 1897 and 1915 acts. Among other things, the bill would remove the 80-acre limitation; direct the Secretary of Agriculture to develop objective criteria for decisionmaking on both applications for permits and proposals of permittees to raise rates charged the public; require a more rigorous consideration of permit applications, including the secondary growth, environmental impact, public service, and antitrust implications of the proposed facilities and services; set out procedures to involve State and local governments and the public more fully in the permit issuing and review process; allow renewal of the 30-year permits within 10 years of their termination when the permittees make substantial capital investments; increase the non-Federal share of permit fee moneys from 25 to 50 percent, pay that share directly to affected local governments rather than the States, and widen its permissible use from construction of roads and schools only to construction of any public facility and provision of any public service; provide for disclosure of historical financial data supplied by permit applicants and permittees in support of permit applications, requests for permit renewals, and proposals for increases in charges to the public; and require verification by the Forest Service of information supplied by permittees or permit applicants upon which the agency expects to base permit issuing or administering decisions.

Although most of the provisions of the bill I introduce today are identical to those of S. 2125, as passed the Senate last Congress, I have made some changes.

First I have added in section 5(a)(3) an additional requirement to be included in the criteria to be used by the Secretary of Agriculture in determining whether to issue a commercial outdoor recreation permit. The Secretary would be required to find that any permit to be issued is in accord with the land management plan for the unit of the national forest involved. If it is not in accord, the unit plan must be amended as provided in the National Forest Management Act of 1976. If no unit plan exists, then one must be prepared before issuance of a permit. This provision would implement a suggestion of the subcommittee in the East River Unit Plan Report. It makes good sense; we should not permit one use which may frustrate all or most other uses until we have conducted multiuse planning to determine the best mix of uses for the land involved.

Second, I have added a new subsection 5(b). This subsection would require an applicant for a ski permit or amendment of a ski area permit to submit a plan to the Secretary showing how he will provide alternative low-cost tow or lift and related skiing facilities. The Secretary, prior to issuing a permit, must satisfy himself that the applicant will, to the maximum extent feasible, supply such facilities. I have added this provision out of a deep concern about the rising cost of skiing and the increasing exclusion of many segments of the skiing public from their own national forests. I firmly believe that the local family skier is becoming an endangered species on our publicly owned ski slopes. These slopes are becoming overpopulated instead with destination skiers. As the cost of skiing, no matter how high the prices charged by the ski area operator for lift tickets, is only a minor portion of the total expense of their vacations, destination skiers are more concerned with the quality of the skiing experience offered them than the cost of their lift tickets.

Accordingly, destination skiers demand of the ski area operator who wishes to attract them the most expensive skiing facilities. I do not deny that those members of the skiing public should be served and that such facilities should be built.

Furthermore, I recognize that in order to supply these facilities, ski resorts have become highly capital intensive and that, because of the financing requirements, the industry as a whole does not enjoy a high margin of profit. Clearly, low prices cannot be forced out of ski resorts which have made heavy investments in the most expensive equipment available. However, it certainly seems reasonable to require the Forest Service to ask permittees and permit applicants to install along with the expensive facilities alternative equipment of sufficiently modest cost to permit skiing by the less affluent skiing public.

Third, I have stiffened the public disclosure requirements of subsection 8(a). S. 2125, as passed by the Senate, required the disclosure of all information excluding financial projections submitted to the Department of Agriculture and used by that Department to reach a decision concerning issuance or administration of a permit, including the approval or disapproval of rate increase requests. The ski area operators had informed me that they would not object to such a disclosure provision as long as, among the financial data, only historical data must be made public. I believe this to be a reasonable position so far as a general disclosure rule is concerned.

However, if the Forest Service demands prospective financial data to render a decision concerning the permit, or the permittee or permit applicant voluntarily submits such data to the agency to influence such a decision, I believe that, in those two cases only, public disclosure of prospective data must be required. If disclosure is not required, then public review of the decision is impossible and the agency, simply by demanding, or using voluntarily submitted, prospective financial data, could avoid virtually any public accountability.

Accordingly, the new subsection 8(a) has a two part disclosure requirement: First, as the price of being granted the privilege of conducting business on the publicly owned resource, the permittee would be required to disclose to the public at request any historical financial data or any other information concerning the operation of any facilities or services covered by the permit. Second, the permittee would be required to disclose additionally any prospective financial data which are submitted to the agency in connection with the issuance or administration of the permit. So as to avoid placing onerous disclosure provisions on the very small commercial recreation operations such as outfitters, small stores, etc., the applicability of the disclosure provision is limited to commercial ski area permits and other commercial outdoor recreation permits which apply to more than 60 acres.

Finally, I have altered the "other uses" or "independent ski instructors" permitting provision—subsection 5(d) in the bill I am introducing today. This subsection, as phrased in S. 2125, as passed the Senate, would have authorized the Forest Service, upon satisfaction of appropriate proof of ability, liability and indemnification insurance requirements, to issue permits for secondary activities

on lands covered by a commercial outdoor recreation permit. These activities might be professional guiding, cross-country skiing, or independent ski instruction. Such a provision would permit the Forest Service to break the monopoly over all recreation activities on national forest ski slopes which each ski area operator or other commercial outdoor recreation permittee now has.

As the Forest Service opposed this provision, I became concerned that the authorization could be and probably would be ignored entirely; the agency would simply refrain from exercising the authority. Accordingly, I have rewritten the provision to direct the Forest Service to issue regulations for "other activities" permits and to issue such permits when the requirement of those regulations are met by permit applicants. The agency can still refrain from issuing a permit if it finds permit issuance would be "not in the public interest", but it would have to make such a determination on a case-by-case basis within an active program rather than on a general basis by refusing to even develop the program.

Although the bill as introduced would implement seven of the seventeen East River Unit Plan Report recommendations, during hearings on this proposal, I hope to quiz the Forest Service on the necessity of legislating the remainder of those recommendations which relate to the agency and which were not implemented by the National Forest Management Act of 1976. I also hope to receive additional testimony from the ski area operators and their customers—both the destination and the local skiers. With these views we can further refine the bill.

Mr. President, this bill is past due. It has enjoyed the full support of the Senate. I look forward to its prompt passage.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1338

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Congress hereby finds that appropriate facilities and services within the forest reserves created from the public domain may be desirable to meet the projected increasing demand for public recreation; and the enhancement of these opportunities for recreation and the protection of environmental quality require prudent development and substantial capital investment. It is the policy of the Congress that, where such facilities and services are determined to be advisable by the Secretary of Agriculture through long-range, multiple-use planning conducted by the Forest Service, and upon consideration of the views of the relevant State and local governments and the public, private development and management of such facilities and services, on a competitive basis where appropriate, may be authorized through issuance of permits. As the facilities and services authorized by any such permit, which has as its purpose the provision of needed services to the public on public lands, are affected with a public interest, such permit shall provide, consistent with the policy and provisions of this Act and subject to conditions which protect the soil, air, and water and the other uses of the forest reserves, for payment of reasonable fees which reflect a primary objective of maintaining a high quality of outdoor recreation facilities and services at reasonable prices for the use and enjoyment of the public.

(b) For the purpose of this Act—

(1) "forest reserves" or "forest reserve lands" means lands of the national forests which have been created from the public domain;

(2) "Secretary" means the Secretary of Agriculture;

(3) "person" means any individual, partnership, association, corporation, trust, estate, or other legal or commercial entity;

(4) "permittee" means the holder of a permit issued pursuant to this Act;

(5) "other recreation permit" means a permit or special use permit for commercial outdoor recreation facilities and services on forest reserve lands issued before or after enactment of this Act in whole or in part under the Act of March 4, 1915 (38 Stat. 1101, as amended; 16 U.S.C. 497), the Act of June 4, 1897 (30 Stat. 35, as amended; 16 U.S.C. 551), the Act of April 24, 1950 (64 Stat. 84, 16 U.S.C. 580(d)), or any other Act authorizing special use permits;

(6) "prior permit" means a permit or special use permit for commercial ski area facilities and services on forest reserve lands issued prior to the enactment of this Act under the Acts set forth in clause (5) of this subsection; and

(7) "local government" or "unit of local government" means a county, parish, township, municipality, borough, or other unit of general government as determined by the Secretary of the Treasury (on the basis of the same principles as are used by the Bureau of the Census for general statistical purposes).

PERMIT AUTHORITY

SEC. 2. Subject to such terms and conditions as he deems desirable or as required by this Act or other applicable law, the Secretary is authorized to permit any person to use and occupy areas within the forest reserves to provide commercial outdoor recreation facilities and services for the use and enjoyment of the general public.

AREA COVERED BY PERMITS

SEC. 3. The areas of land to which permits issued pursuant to this Act may apply shall in each case be determined by the Secretary, taking into consideration present and future public needs for all the multiple uses of the forest reserves: *Provided*, That—

(1) any permit issued pursuant to this Act for commercial outdoor recreation facilities and services other than commercial ski area facilities and services shall not apply to more than eighty acres of forest reserve lands;

(2)(A) any permit to be issued pursuant to this Act for commercial ski area facilities and services which will apply to more than three thousand acres of forest reserve lands shall not be approved until after (i) the Secretary has submitted to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives the draft environmental impact statement prepared pursuant to section 102(2)(C) of the National Environmental Policy Act (83 Stat. 852, 853, as amended; 42 U.S.C. 4321, 4332) and section 5(a)(2)(E) of this Act on the issuance of such proposed permit, together with the terms and conditions he expects to impose upon the permit applicant, and (ii) each committee has adopted a resolution stating that such committee approves of the issuance of the permit;

(B) whenever either committee fails to adopt a resolution of approval for the issuance of such proposed permit within one hundred and eighty days from the date of the submission of the draft environmental impact statement, the Secretary, should he continue to deem the facilities and services to be provided by the permit applicant to be advisable, the applicant to have met all requirements for the issuance of the proposed permit, and the proposed permit to contain all necessary and appropriate terms and conditions, shall submit to the Congress proposed legislation, together with a report thereon, authorizing the issuance of said permit;

(C) not more than one permit may be issued pursuant to this Act for commercial ski area facilities and services within an area of less than six thousand acres unless each such permit, irrespective of the acreage involved, is issued in accordance with procedures provided in this paragraph (2); and

(D) total area to be used by the applicant for a permit for commercial ski area facilities and service and to which such permit shall apply shall include all land within the outer boundaries of the land to be used by the proposed facilities and services, including uncleared or unimproved land between areas to be cleared or improved for ski runs, lifts, or other such ski area facilities and services.

PERMIT PERIOD; PERMIT TERMINATION AND SUSPENSION

SEC. 4. Subject to the provisions of this Act and other applicable law, the Secretary may—

(1) issue permits pursuant to this Act for such periods as he deems appropriate, but not to exceed thirty years;

(2) issue, at the expiration of the period of any such permit, a new permit pursuant to this Act to either a new permit applicant or the holder of the expired permit if such holder is determined by the Secretary to have fully complied with the terms of the expired permit: *Provided*, That the Secretary may issue a new permit pursuant to this Act to a permittee within a ten year period prior to the expiration of an existing permit issued pursuant to this Act if he approves a proposal by the permittee to make, prior to the expiration of the existing permit, a substantial capital investment to construct additional facilities, replace or remove existing facilities, or provide additional services consonant with the purpose for which the existing permit was issued; and

(3) suspend or terminate any permit issued pursuant to this Act for breach of the terms of said permit after giving the permittee due notice and a reasonable opportunity to conform with such terms, or if, in the judgment of the Secretary, the lands to which the permit applies are needed for another use: *Provided*, That the Secretary may order an immediate temporary suspension of any such permit prior to providing such notice and opportunity to conform with permit terms if he determines that such a suspension is necessary to protect public health or safety or the environment.

CONDITIONS FOR, AND TERMS OF, PERMITS

SEC. 5 (a)(1) Within six months from the date of enactment of this Act, the Secretary shall publish in the Federal Register and submit to the Congress proposed regulations containing objective criteria and procedures which must be applied and followed by him prior to issuance of a permit pursuant to this Act which applies to an area of more than 60 acres. Such criteria and procedures shall be applied and followed by the Secretary in determining whether such a permit shall be issued to a particular permit applicant or for a particular area. Such regulations shall not be promulgated prior to sixty days from the date of submission thereof to the Congress.

(2) Such regulations shall, among other things, require the Secretary, in making the

determinations required in paragraph (3) of this subsection, to follow the procedures set forth in this paragraph (2). The Secretary shall—

(A) notify the relevant State and local governments within fifteen days of the allocation of an area in a unit plan for a form of recreation which would require a permit issued pursuant to this Act which would apply to an area of more than 60 acres, the designation of an area as a winter sports site, the filing of an application for any such permit, or the taking of any action by a Forest Service employee which will likely result in the issuance of any such permit;

(B) consult with the relevant State and local governments within thirty days of any action set forth in clause (A) of this paragraph, and continue such consultation thereafter at each significant step in the permit issuance process;

(C) submit the permit application to the Attorney-General of the United States and the Attorney-General of the State involved to permit them to review such application under the Federal and State antitrust laws;

(D) consider, for both forest reserve lands and private land in the proximity thereof, all facilities to be constructed by the permit applicant, all residential, recreation, commercial, and transportation development which will likely occur as a result of the construction and operation of the applicant's facilities, all public services necessary for such facilities and development, and other direct and indirect financial impacts on State and local government;

(E) prepare an environmental impact statement pursuant to section 102(2)(C) of the National Environmental Policy Act (38 Stat. 852, 853, as amended; 42 U.S.C. 4321, 4332); and

(F) require the permit applicant to comply with any conceptual land use plan adopted by the relevant State and local governments including any plan which anticipates the direct and indirect impacts of the facilities and services and the development which will likely occur as a result of such facilities and services and which sets forth the policies and procedures to be employed in managing such impacts.

(3) Such regulations shall, among other things, establish objective criteria to be applied by the Secretary in making the determinations set forth in this paragraph (3). Such criteria shall insure that any such permit shall not be

(A) a land management plan for the unit of the National Forest System in which the forest reserve lands involved are situated has been prepared pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (88 Stat. 476, as amended; 16 U.S.C. 1600) and that the use of such lands for commercial outdoor recreation facilities and services accords with such plan or that such plan has been amended as provided in subsection (e)(4) of said section 6 to insure the accordance of such plan and such use;

(B) sufficient demand exists for the commercial outdoor recreation facilities and services;

(C) such facilities and services would not preempt more suitable uses of the forest lands involved;

(D) the public would not be better served by permitting or siting such facilities and services in a location other than that specified in the permit application;

(E) where any unit of the national park, wildlife refuge, wilderness preservation, and wild and scenic rivers systems is adjacent to or in the vicinity of the lands to which such permit would apply, such facilities and services would not adversely affect the purpose for which that unit is withdrawn, designated, or established;

(F) any conceptual land use plan identified pursuant to paragraph (2)(F) of this subsection is accurate and consistent with the policies and provisions of this Act and other relevant laws;

(G) all applicable State and local government laws, regulations, plans, and permitting and licensing requirements are or will be met by the permit applicant and are compatible with any conceptual land use plan identified pursuant to paragraph(2)(F) of this subsection; and

(H) the State and local governments have sufficient authority and capability to meet all significant public service demands generated by, and to mitigate all significant adverse environmental impacts of, such facilities and services and all residential, recreation, commercial, and transportation development which will likely occur as a result of such facilities and services.

(b) The Secretary shall require of the applicant for the issuance or amendment of any permit issued pursuant to this Act for commercial ski area facilities and services a plan for the prompt provision of alternative low cost tow or lift and related facilities. To assure provision of commercial ski area facilities and services on forest reserve land to the widest possible public, the Secretary, prior to issuance or amendment of any permit issued pursuant to this Act for commercial ski area facilities and services, shall determine that alternative low cost tow or lift and related facilities will be provided by the applicant to the maximum extent feasible.

(c) Development, management, and operation of the facilities and services to which any permit issued pursuant to this Act applies shall be the responsibility of the permittee, subject to such terms and conditions as the Secretary may prescribe, consistent with the policies and provisions of this Act and other applicable laws.

(d) The Secretary shall, within three months of the date of enactment of this Act, publish in the Federal Register proposed regulations, and, within five months of the date of enactment of this Act, promulgate regulations, for the issuance of permits within any area to which a permit issued pursuant to this Act applies to persons other than the permittee for other uses, such as cross-country skiing, independent ski instruction, and professional guide services, not incompatible with the facilities and services to which the permit applies. Such regulations shall contain proof of ability, liability and indemnity insurance, and such other requirements for any such use as the Secretary deems necessary to protect the public and the permittee. The Secretary shall issue a permit for any such use to any applicant who meets the requirements of the regulations promulgated pursuant to this subsection unless he determines that the issuance of such permit would not be in the public interest.

(e) Any information, data, or documents submitted by a holder of a permit issued pursuant to this Act, a prior permit, or any other recreation permit, by an applicant for a permit to be issued pursuant to this Act or any other recreation permit, or by any other party, which is required or used by the Secretary or any employee of the Department of Agriculture in reaching any decision concerning or leading to the issuance, transfer, or amendment of any such permit, including the preparation of a land management plan for any unit of the forest reserves or designation of any areas as a winter sports site, shall be verified as to the accuracy and completeness thereof by the Secretary prior to such decisionmaking.

PERMIT FEE

SEC. 6. (a) The permittee shall pay to the United States an annual fee for the use and occupancy of forest reserve lands to which the permit issued pursuant to this Act applies. In all cases, fees and charges shall be in accord with the principles set forth in title V of the Independent Offices Appropriation Act of 1925 (65 Stat. 290, 31 U.S.C. 483a).

(b) Notwithstanding the provisions of the Acts of May 23, 1908, and March 1, 1911 (35 Stat. 260 and 36 Stat. 963, as amended; 16 U.S.C. 500) and any other pertinent law, 50 per centum of all moneys received by the United States during any fiscal year from any permit issued pursuant to this Act, any prior permit, or any other recreation permit, shall be paid to the unit or units of local government within the boundaries of which the forest reserve lands to which the permit applies are situated, and such payments may be used by such unit or units for (i) planning; (ii) construction, operation, and maintenance of public facilities; and (iii) provision of public services: *Provided*, That, where all or part of one unit of local government is located within the boundaries of another unit and forest reserve lands subject to this subsection are within the boundaries of both such units, the payments shall be distributed between such units on the basis of population within the jurisdiction of each such unit: *Provided further*, That the Secretary of the Treasury shall promulgate regulations which provide that a share or shares of any such payments which otherwise would be paid in full under this subsection to the unit or units of local government within the boundaries of which the forest reserve lands to which the permit applies are situated shall be distributed to the unit or units of local government, (i) the boundaries of which do not encompass any forest reserve lands to which the permit applies, and (ii) which experience more significant economic, social, or environmental impacts from the commercial outdoor recreation facilities and services and the development which accompanies such facilities and services than do the unit or units of local government which would otherwise receive the full payments. When any such payments are shared the shares shall be divided equitably based on the impacts experienced by each eligible unit.

PERMITTEES' CHARGES TO THE PUBLIC

SEC. 7. (a) Within six months of the date of enactment of this Act, the Secretary shall publish in the Federal Register and submit to the Congress proposed regulations which set forth in detail the criteria the Secretary shall apply in exercising his authority under this Act and other laws to determine whether to allow, reject, or modify any request by a holder of any permit issued pursuant to this Act, any prior permit, or any other recreation permit to increase any charge to the public for use of the principal facilities and services of such holder. Such regulations shall not be promulgated prior to sixty days from the date of submission thereof to the Congress.

(b) Such regulations shall, among other things—

(1) require that the decision to allow, reject, or modify any such proposed increase in a charge to the public shall not be delegated below the level of regional forester;

(2) require that any such proposed increase shall not be unreasonable, and shall not unduly restrict access to the facility or service for which the charge is to be made, for any customer class, including families which, and individuals who, reside in the same State in which are located the forest reserve lands to which the permit applies;

(3) set forth conditions under which a holder of any such permit may offer special season rates or other special rates to, among other individuals, those who reside in the same general area in which are located the forest reserve lands to which the permit applies; and

(4) insure that any such proposed increase under a permit issued pursuant to this Act

for commercial ski area facilities and services or a prior permit, and the criteria to be used in the determination of whether to allow, reject, or modify such proposed increase, shall relate only to the operation of facilities and provision of services directly related to the activity of skiing.

PUBLIC DISCLOSURE

SEC. 8. (a) Notwithstanding any other provision of law, the Secretary shall: (1) make available for public inspection any and all memoranda, financial statements, or other materials, or portions thereof, providing financial data or information, or any other information, concerning the operation of commercial outdoor recreation facilities and services, furnished to him or any official of the Department of Agriculture in support of or in opposition to proposed increases in charges to the public for use of the facilities or services of the holder of any permit issued pursuant to this Act, or any other recreation permit, which applies to an area of more than 60 acres, or any prior permit, or in connection with the administration of any prior permit and the issuance and administration of any permit issued pursuant to this Act, or any other recreation permit, which applies to an area of more than 60 acres; and (2), require as a condition of any permit issued pursuant to this Act, or any other recreation permit, which applies to an area of more than 60 acres, or any prior permit that the holder of any such permit shall make available for public inspection upon request any and all memoranda, financial statements, or other materials, or portions thereof, providing historical financial data or information concerning the operation of the commercial outdoor recreation facilities and services to which the permit applies.

(b) A detailed statement providing the basis upon which a decision by the responsible officer of the Forest Service to issue, transfer, or amend a permit issued pursuant to this Act or any other recreation permit, amend or transfer a prior permit, or allow, reject, or modify a request to increase any charge to the public for use of the principal facilities or services of a holder of any permit issued pursuant to this Act, any prior permit, or any other recreation permit shall be made available for public inspection promptly after such decision is made.

PERMIT REVIEW

SEC. 9. Three years after the issuance of a permit pursuant to this Act or other recreation permit after the enactment of this Act, or three years after the enactment of this Act for any prior permit or other recreation permit issued prior to enactment of this Act, and at three-year intervals thereafter, the Secretary, when such permit applies to an area of more than 60 acres, shall hold a public hearing, with adequate public notice, in a location in the proximity of the area to which the permit applies to determine whether the holder of such permit has complied and is complying with the provisions of this Act and other applicable law and with the terms and conditions of the permit. The Secretary shall set forth his findings, based on the hearing, in writing and make them available to the public. Nothing in this section shall be construed as relieving the Secretary from his responsibility to review independently the performance of the holder of any such permit as periodically as necessary during such three-year periods to insure such compliance.

TITLE TO IMPROVEMENTS; COMPENSATION

SEC. 10. Any structure, fixture, or improvement which is not owned by the United States and to which a permit issued pursuant to this Act applies shall not be deemed to be the property of the United States. The permittee shall be deemed to be the owner thereof, and may remove the property and assign, transfer, encumber, or relinquish the title thereto. Said title shall not be extinguished by expiration or other termination of the permit and shall not be taken for public use without just compensation: *Provided*, That the use or enjoyment of any structure, fixture, or improvement shall be permissible only so long as the owner thereof holds a permit which applies to the area on which such structure, fixture, or improvement is located: *Provided further*, That, within six months following the expiration or other termination of such permit, the Secretary may order the removal of such structure, fixture, or improvement and the restoration of the site, and, upon failure of the owner to comply with such order, the Secretary may bring an action for ejection and recovery of costs incurred by the United States in such removal and restoration: *Provided further*, That, in the event the Secretary does not order the removal of such structure, fixture, or improvement and permits the continued use thereof either by the United States or by a person other than the permittee, then the Secretary shall, before allowing such use to become effective, take such action as may be necessary to assure the permittee of just compensation therefor, unless the Secretary and the permittee mutually agree to other arrangements for the disposition of such structure, fixture, or improvement: *And provided further*, That, if any permit is terminated by the Secretary for another use, the United States shall be obligated to pay an equitable consideration for the removal of such structure, fixture, or improvement and damage thereto resulting from the removal.

UTILITY SERVICES FOR CONCESSIONAIRES; REIMBURSEMENT

SEC. 11. The Secretary may furnish, on a reimbursement of appropriation basis, all types of utility services within the forest reserves to concessioners, contractors, permittees, or other users of such services: *Provided*, That reimbursement for costs of such services may be credited to the appropriation from which the expenditure was made.

RECORDKEEPING; AUDIT AND EXAMINATION; ACCESS TO BOOKS AND RECORDS

SEC. 12. Each permittee shall keep such records as the Secretary may prescribe in the permit to enable the Secretary to determine that all the terms of the permit have been and are being faithfully performed. The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall, for the purpose of audit and examination, have access to said records and to other books, documents, and papers of the permittee pertinent to the permit and all the terms and conditions thereof.

EFFECT ON OTHER LAWS; APPLICABILITY

SEC. 13. (a) This Act shall be construed as supplemental to, and not in derogation of, the provisions of the Act of March 4, 1915 (38 Stat. 1101, as amended; 16 U.S.C. 497); the Act of June 4, 1897 (30 Stat. 35, as amended; 16 U.S.C. 551); the Act of April 24, 1950 (64 Stat. 84, 16 U.S.C. 580(d)), or any other Act authorizing special use permits, except that this Act and the Act of April 24, 1950, shall be construed as the sole authorities for issuance of permits for commercial ski area facilities and services on forest reserve lands. Prior permits shall be subject to the provisions of section 6(b), 7, 8, and 9 of this Act and the applicable provisions of the other Acts enumerated in this subsection until the expiration of the periods of such permits remaining as of the date of enactment of this Act: *Provided*, That when one person holds more than one such prior permit applicable to a single, integrated commercial ski area facilities and services operation and such permits have different expiration dates, the provisions of this Act, other than the provisions of sections 6(b), 7, 8, and 9 hereof, shall not be applicable to such facilities and services and the holder of such permits until the expiration of the prior permit with the lengthiest remaining period, and those prior permits with shorter remaining periods may be amended or renewed under the authority of such Acts to remain valid until such expiration: *Provided further*, That the holder of any such prior permit may apply to the Secretary for cancellation thereof and issuance of a permit pursuant to this Act: *Provided further*, That the holder of such prior permit who applies for a permit to be issued pursuant to this Act shall be required to conform facilities operating under the prior permit to the provisions of sections 3 and 5(a) only to the extent practicable: *And provided further*, That the provisions of this Act shall be fully applicable to any amendment to a prior permit which would add an area of more than 60 acres to the land to which the prior permit applies.

(b) The provisions of this Act shall not be applicable to any existing or future application for a permit for commercial outdoor recreation facilities and services on forest reserve lands in Mineral King Valley, Sequoia National Forest, and shall not affect in any manner any litigation pertaining thereto.

(c) Nothing contained in this Act shall be construed as impairing, amending, broadening, or modifying any of the antitrust laws or limiting or preventing the application of any such law to any person under the provisions of this Act.

By Mr. STENNIS (by request):

S. 1339. A bill to authorize appropriations to the Energy Research and Development Administration for national defense programs for the fiscal year 1978, and for other purposes; to the Committee on Armed Services.

By Mr. JACKSON:

S. 1340. A bill to authorize appropriations to the Energy Research and Development Administration or energy research, development, demonstration, and related programs in accordance with section 261 of the Atomic Energy Act of 1954, as amended, section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Non-nuclear Energy Research and Development Act of 1974, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. STENNIS (for himself and Mr. JACKSON) (by request):

S. 1341. A bill to authorize appropriations to the Energy Research and Development Administration for military programs with potential civilian energy applications, and for other purposes; to the Committee on Armed Services and the Committee on Energy and Natural Resources, jointly, by unanimous consent.

Mr. STENNIS. Mr. President, the distinguished Senator from Washington, Mr. JACKSON, and I are today introducing three bills providing for the authorization for appropriations for the Energy Research and Development Agency for fiscal year 1978.

With the phaseout of the Joint Committee on Atomic Energy, which formerly had jurisdiction over all ERDA matters, Senate Resolution 4 divides the ERDA jurisdiction between the Commit-

tee on Armed Services and the Committee on Energy and Natural Resources.

Senator JACKSON and I have consulted and the bills we are introducing today represent the division of jurisdiction that we have agreed upon.

One of the bills relates only to matters under the jurisdiction of the Armed Services Committee; a second bill relates solely to matters under the jurisdiction of the Committee on Energy and Natural Resources; the third bill relates to matters in which both committees share an interest.

The Armed Services Committee has already held hearings on the fiscal year 1978 military applications portion of the ERDA request and I intend for the Committee on Armed Services to act on these bills at the earliest possible time.

Mr. JACKSON. Mr. President, I am introducing today, by request, a bill authorizing fiscal year 1978 appropriations to the Energy Research and Development Administration for its research and development programs in nonnuclear energy technologies and civilian applications of nuclear energy.

The remaining portions of the administration proposal—relating to the national security aspects of nuclear energy and to certain nuclear energy programs which have both civilian and military applications—will be introduced as two separate bills by the distinguished chairman of the Armed Services Committee.

Senator STENNIS and I have signed a memorandum which fully explains the method we have agreed upon for the consideration of the ERDA authorization by the Energy and Natural Resources Committee and the Armed Services Committee for this session of Congress.

Mr. President, I ask unanimous consent that the memorandum be printed in the RECORD at this point.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

MEMORANDUM FOR THE RECORD

The Carter Administration has transmitted to the Senate a draft proposal for authorization of appropriations to the Energy Research and Development Administration for Fiscal Year 1978. The changes to the Senate rules recently adopted in S. Res. 4 provide that the Armed Services Committee will have jurisdiction over the military applications of programs now administered by the Energy Research and Development Administration, including nuclear weapons procurement and related research and development, and that the Energy and Natural Resources Committee will have jurisdiction over the civilian applications of nuclear energy research, development and demonstration.

In light of the new responsibilities which both Committees have acquired with respect to nuclear energy, the Committee on Armed Services and the Committee on Energy and Natural Resources will consider the Administration's proposed bill in the following manner:

First, the Committee on Armed Services will be responsible for the military applications of nuclear energy and the Committee on Energy and Natural Resources will be responsible for the civilian applications of nuclear energy.

Second Title I of the proposed bill provides authorization to the Energy Research and Development Administration to conduct research and development in non-nuclear energy technologies and civilian applications of nuclear energy (with the minor exception of overhead administrative costs which are all contained in Title I rather than being allocated to Titles I, II, and III), and these matters clearly fall within the jurisdiction of the Committee on Energy and Natural Resources. On the other hand, Title II of the draft legislation concerns nuclear weapons research and development, and procurement matters and programs dealing with national security; as to these programs, the Committee on Armed Services has jurisdiction. Therefore, Titles I and II will be introduced as separate measures with the understanding that Title I should be referred solely to the Committee on Energy and Natural Resources and that Title II should be referred solely to the Committee on Armed Services.

Third, Title III of the draft legislation would authorize appropriations for programs in laser fusion, space applications and naval reactors. While these programs have been, and still are, primarily oriented toward military applications of nuclear energy, there exist significant possibilities for civilian-related energy applications in all three areas. In view of the interest both Committees share in these programs, a separate bill will be introduced this year which contains the provisions of Title III. With respect to this third bill, a joint referral to the two Committees is appropriate.

Regarding the laser fusion, space applications, and naval reactor programs, the course of action with respect to the third bill defined above is a temporary measure. Given the lack of experience with the subject matter by both Committees, the method prescribed seems to be the most prudent for this session of Congress. It is agreed that during the next year the resources for the civilian applications in these programs should be separated from the resources for the military applications to the extent possible, and the overhead costs should be appropriately divided between the civilian and military applications. The Administration will be called upon in future years to propose two separate bills that coincide with the two committees' areas of jurisdiction.

In further examination of the contents of the proposed legislation, the general provisions (Title IV) and the requirements of the Budget Impoundment and Control Act (Title V) will be made a part of all three measures.

JOHN C. STENNIS,
Chairman, Committee on Armed Services.

HENRY M. JACKSON,
Chairman, Committee on Energy and Natural Resources.

Mr. JACKSON. Mr. President, I ask unanimous consent that S. 1341 introduced by Senator STENNIS and myself be jointly referred to the Armed Services and Energy and Natural Resources Committee.

This is a matter that we have worked out between the two committee chairmen and I have cleared it with the ranking member of the Energy and Natural Resources Committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. ROTH:

S. 1342. A bill to insure equal protection of the laws as guaranteed by the 5th or 14th amendments to the Constitution of the United States; to the Committee on the Judiciary.

Mr. ROTH. Mr. President, the judicial review of legislation to insure its compliance with the mandates of the Constitution has long been considered a crucial function of our Nation's courts. However, today, we find with increasing frequency, that Federal judges are quick to strike down legislation as unconstitutional because hindsight has demonstrated that the operation of such statutes resulted in disproportionate impacts on certain segments of our society. This form of "Monday morning quarterbacking" has no place in our judicial system. Legislation cannot be abolished by the judiciary solely because of secondary results which were never intended, contemplated or reasonably foreseeable by the legislature.

The recent Supreme Court decisions in Washington against Davis and Village of Arlington Heights against Metropolitan Housing Development Corp. make it clear that effect alone is insufficient. These decisions require proof of a discriminatory intent or purpose to establish a violation of the Constitution.

Mr. President, I send to the desk a bill to insure equal protection of the laws as guaranteed by the 5th and 14th amendments to the Constitution of the United States.

My bill, consistent with these recent opinions of the High Court, would require proof of discriminatory intent or purpose as an essential element to establish a violation of the 5th or 14th amendments to the Constitution. Section 2 of the bill makes this requirement applicable to all court decisions not final prior to enactment.

While admittedly this is already the law of the land, I believe it is imperative to enact this language to insure this standard is universally applied by all courts. While the Supreme Court indicates that this requirement has always been basic to the equal protection principle, the courts have not been consistent in adhering to it. Equal protection of the laws is a cornerstone of our society which we cannot afford to have weakened by legal gamesmanship wherein similar cases are adjudged differently.

In our system of justice, it is the advocate's responsibility to distinguish similar factual circumstances and thereby argue the inapplicability of established legal principles to the controversy at hand. However, it is inappropriate for the courts to engage in this selective application of fundamental principles. This kind of judicial inconsistency severely undermines the basic fairness of our laws and the administration of justice.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any other provision of law, no court of the United States may find that Federal or State action challenged as discriminatory is a violation of the fifth or fourteenth amendments to the Constitution of the United States unless the court finds that such action was intentionally or purposefully discriminatory.

SEC. 2. This Act shall take effect with respect to any judgment or order of a court of the United States which is made after the

date of enactment or which is made prior to such date but is not final on such date.

By Mr. HART:

S. 1343. A bill to require the Federal Government to use the total life cycle cost of an article, rather than the purchase price, for procurement of certain energy-intensive consumer products; to the Committee on Governmental Affairs.

Mr. HART. Mr. President, today I am introducing legislation that takes a significant step toward reforming Federal buying practices. The bill will require the Federal Government to award contracts for articles that consume large amounts of energy on the basis of the lowest total longrun cost of ownership to the Government, instead of merely on the basis of cheapest initial price. This procurement technique is called life-cycle costing, and its adoption for energy-intensive goods will save money, will reduce energy consumption, and will encourage the commercial development of more energy-efficient consumer goods.

It is particularly appropriate that this bill is introduced as we prepare to debate the President's proposals for a national energy policy. The President is encouraging the American people to look beyond the here and now to the long-term costs of our patterns of energy consumption. The Government should do no less.

The Federal Government will spend over $60 billion for goods and services this year. Almost all of this procurement will be done on the old basis of lowest initial purchase price. Life-cycle costing has great potential for savings throughout this entire process, but it will initially be mandated for only 14 specific classes of energy-intensive consumer goods: articles that both use large amounts of energy, and are bought in sufficient quantity, so that the greatest initial savings can be realized. Instead of evaluating competing items on the basis of merely the lowest initial price, as is currently the rule, this bill will require the Government to consider other costs of ownership such as energy costs and costs of maintenance and support, before it awards a contract.

For instance, in a recent experimental procurement run by the Federal Supply Service for the purchase of air-conditioners, one model was offered to the Government for the price of $300. Another model was slightly more expensive and cost $301.19. Under the old method the supposedly cheaper model would have been bought, but it would not have been the best buy. When an evaluation of operating costs was conducted, the cheaper air-conditioner had an operating cost of $436, whereas the slightly more expensive model cost only $304 to run. In this rather dramatic case, the Government, by buying the slightly more expensive model, actually saved over $100 for each air-conditioner; $100 may not sound like a large sum of money, but when you consider that the Federal Supply Service buys over $1 million worth of air-conditioners every year, the potential savings begin to mount up fast. The few experimental purchases that have been tried have already resulted in a net savings of over $3 million.

Despite these impressive results, and despite the numerous recommendations that more consideration be given to this approach, by the Commission on Government Procurement, and by numerous GAO studies, Government awards are still generally based on the lowest initial price rather than the lowest overall cost to the Government.

One obstacle has been the lack of procurement personnel trained to use the new approach. However, the General Services Administration has created a training program and developed curriculum for a basic 40 hour course on life-cycle costing that is already available to the various Federal departments on a voluntary basis. The GSA estimates that its incremental costs for retraining each officer would be only $100. The Office of Federal Procurement Policy estimates that only 16 officers would initially need retraining under the terms of this bill, although additional training would be required because of turnover. Clearly retraining costs necessitated by the bill will be very low, and will be recovered many times over by the cost savings that are inherent in the new approach.

A second and more serious problem has been a lack of uniform statistics on operating costs. Without comparable figures the Government has had a difficult time making meaningful comparisons of total ownership costs. However, Public Law 94–163, the Energy Policy and Conservation Act, passed by this body in the 94th Congress, requires the National Bureau of Standards to develop tests that will show the annual operating costs of 14 different categories of energy-intensive goods. It is these very 14 classes of goods that are covered by this bill. Since the Government is already paying for the research in order to help consumers make more informed buying judgments, the Government should also take advantage of this information, in order to make the best buys possible.

The Office of Federal Procurement Policy estimates that about $226 million worth of Federal procurement will be directly affected by this legislation. Since the cost savings on the experiments that have been undertaken so far average between 10 and 15 percent, the potential savings to the Government conservatively amount to more than $20 million. Although this is a substantial sum, this may represent the least important impact of the bill. Federal procurement practices are the models on which many State governments pattern their own spending. A new approach, proven successful on the Federal level, should become adopted at all levels of government. In addition, more areas should turn up where this approach can be usefully applied as more people are trained to look at procurement from a total longrun cost perspective. Life-cycle costing has enormous potential for savings throughout the entire procurement process. Indeed, one of the problems has been that no one yet knows just how widely applicable this approach is, but the potential savings may well run into the billions of dollars.

But beyond even these considerations, by mandating lowest total cost as the method of award, we will stimulate commercial research and development into energy conservation. The more efficient consumer goods that this research will produce will benefit every citizen, and will decrease our reliance on foreign sources of energy. The days of almost unlimited cheap energy are behind us. We all must develop a new consciousness; a new energy awareness. At a time when this Nation is increasingly dependent upon foreign oil, it is vital that we inject this awareness into the Federal procurement process.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1343

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Life Cycle Costing Procurement Act".

SEC. 2. The Congress finds that—

(1) Current procurement tends to overemphasize the initial purchase price, rather than the total long-run cost of an article to the Government.

(2) In areas where operating expenses are a significant part of the total expense of an item, this overemphasis ignores the substantial savings that could be realized if the Government bought on a lowest total long-run cost basis.

(3) Operating costs for energy-intensive commercial products are substantial and vary significantly.

(4) The Government already requires, or soon will require, the publication of uniform statistics on energy efficiency which will provide a reasonable basis for estimating the operating costs of certain classes of energy-intensive consumer products.

(5) Therefore, it is the purpose of this bill to require the adoption of life cycle costing for the procurement of such products in order to realize the potential savings, to reduce energy consumption, and to encourage the commercial development of more energy-efficient consumer goods.

SEC. 3. As used in this Act, the term—

(1) "life cycle cost" means the total cost of an item to the Government during the time of ownership, taking into account the costs of acquisition, operation, maintenance, support, and disposal or replacement, as far as these costs can reasonably be determined.

(2) "Executive agency" has the same meaning as provided in section 105 of title 5, United States Code, and includes the United States Postal Service, Postal Rate Commission, and the General Accounting Office;

(3) "consumer product" means any product which is a covered product under paragraph (1) through (14) of section 322(a) of the Energy Policy and Conservation Act; and

(4) "motor vehicle" means any vehicle, self-propelled or drawn by mechanical power, designed and operated principally for highway transportation of passengers, except a vehicle primarily designed for military field training, combat, or tactical purposes.

SEC. 4. The Administrator for Federal Procurement Policy, pursuant to section 6 of the Office of Federal Procurement Policy Act, shall prescribe such policies, regulations, procedures, and forms as may be necessary to require procurement of consumer products and motor vehicles by Executive agencies to be done on the basis of lowest life cycle cost for contracts for the procurement of consumer products or motor vehicles the total purchase price of which under any one

contract exceeds $10,000, and which are awarded after January 1, 1978.

SEC. 5. Nothing in this Act shall be construed to impair any small business set-aside, any labor surplus area set-aside program, or the operation of the provisions of section 2 of title III of the Act entitled "An Act making appropriations for the Treasury and Post Office Department for the fiscal year ending June 30, 1934, and for other purposes", approved March 3, 1933, (41 U.S.C. 10a (the so-called Buy America Act)).

SEC. 6. (a) There are authorized to be appropriated such sums as may be necessary to provide for the training of government officers or employees in the use of life cycle cost as a basis for government procurement.

(b) Such sums as may be appropriated pursuant to this section shall be allocated among Executive agencies in accordance with such determinations of need for such training by the officers and employees of such Executive agencies as the Administrator for Federal Procurement Policy may make.

By Mr. CANNON:

S. 1344. A bill to amend the Federal Election Campaign Act of 1971, and for other purposes; to the Committee on Rules and Administration.

Mr. CANNON. Mr. President, today I am introducing a bill to amend the Federal Election Campaign Act of 1971. Many of the provisions in this bill reflect a number, although not all, of the recommendations submitted to the Congress by the President in his message of March 22, 1977, and by the Federal Election Commission in its 1976 annual report.

On May 4, 5, and 6, 1977, the Committee on Rules and Administration, of which I am chairman, will hold hearings on proposed amendments to the Federal Election Campaign Act, and other measures, and I would welcome comments on this bill, and the many other proposals pending before the committee at that time.

The essential thrust of this bill is to reduce many of the excessive record-keeping requirements of the law which create a burden on candidates and committees, as well as on the Commission which must process and store these reports. In the 1976 elections, 9,049 reporting entities representing 3,390 campaigns filed one million pages of disclosure forms containing 20 million separate pieces of information which the Commission attempted to process through its computer based information system. The provisions in this bill would reduce the maximum number of reports to be filed from 24 to 8, and still maintain full and adequate disclosure of campaign activities.

In this same regard, I propose that the threshold above which detailed information with respect to contributions and expenditures would have to be reported be raised from $100 to $200. For independent expenditures, the annual reporting threshold would be increased from $100 to $250 for individuals. This would further alleviate the reporting burdens and reduce by somewhere between one-quarter and one-third the files required to be processed and stored by the Commission. The more detailed records, with respect to contributions in excess of $50, would still have to be maintained by candidates and committees for audit and enforcement purposes.

The bill would also reduce the statutory 30-day conciliation period in the enforcement provisions of the law to 20 days to enable the Commission to handle complaints in a more expeditious manner, yet still maintain the concept of conciliation. The overall average time for disposition of complaints which the Commission closed in 1976 was 115 days. A 20-day conciliation period and increased efforts by the Commission should reduce this timelag significantly.

The other provisions of this bill are set forth in an accompanying summary, and I will only highlight some of them at this time. They include a prohibition on the conversion of campaign funds for personal use, a reduction in the congressional review period for Commission regulations from 30 to 20 legislative days, a provision to allow State and local party committees to participate in the Presidential general election, a clarification of the relationship between congressional and Presidential candidates of the same party, an allowance of public funds, not to exceed $500,000, for Presidential candidates to use to pay for costs of compliance, and a reduction in the period for the States' retention of campaign reports.

Finally, the bill would provide that anything of value given to or spent by a delegate pledged to a Presidential candidate will be a contribution to or expenditure by the Presidential candidate, except for certain travel and subsistence expenses. Unreimbursed travel and subsistence expenses of all delegates would be exempt from the law, as would contributions to or expenditures by unpledged delegates, unless the latter would qualify as independent contributions or expenditures, in which case they would be reported as such.

I welcome the views of my colleagues with regards to all of these proposals in the hope that we can report out of the Rules Committee proposed amendments which will met the problems experienced in the past elections while maintaining the basic principles and goals upon which this law is based.

I ask unanimous consent that a section-by-section summary and the text of the bill be printed in the RECORD.

There being no objection, the bill and summary was ordered to be printed in the RECORD, as follows:

S. 1344

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Election Campaign Act Amendments of 1977".

TITLE I—AMENDMENTS TO FEDERAL ELECTION CAMPAIGN ACT OF 1971

CHANGES IN DEFINITIONS

SEC. 101. (a) Section 301(e) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431(e)) (hereafter in this Act referred to as the "Act"), is amended—

(1) by striking out "but" at the end of paragraph (4); and

(2) by redesignating paragraph (5) as paragraph (6), and adding immediately after paragraph (4) the following:

"(5) means, with respect to any Presidential candidate, a gift of anything of value made to any delegate or for the purpose of influencing the election of any candidate for delegate to a caucus or convention of a political party, if such delegate or candidate is pledged to support such Presidential candidate, except that funds received in connection with travel and subsistence expenses associated with attendance at a caucus or convention shall not be deemed contributions; but".

(b) Section 301(e)(6) of the Act (2 U.S.C. 431(e)(6)), as redesignated in subsection (a), is amended—

(1) by inserting immediately before the semicolon in subparagraph (B) "to the extent that the cumulative value of such activities by such individual on behalf of any candidate does not exceed $500 with respect to any election";

(2) by inserting before the semicolon in subparagraph (C) "to the extent that the cumulative value of such activities by such vendor on behalf of any candidate does not exceed $500 with respect to any election";

(3) by inserting before the semicolon in subparagraph (D) "to the extent that the cumulative amount for such individual incurred with respect to such candidate does not exceed $500 with respect to any election";

(4) by striking out "or" at the end of subparagraph (H); and

(5) by striking out all after the semicolon in subparagraph (I) and adding the following:

"(J) any unreimbursed payment for travel and subsistence expenses made by any delegate or any candidate for delegate to a convention or caucus of a political party or any payment of expenses incurred by a State or local political party in sponsoring any party meeting, caucus, or convention held for the purpose of selecting delegates to a national nominating convention of a political party;

"(K) the payment by a State or local committee of a political party of the costs of campaign materials used in connection with volunteer activities on behalf of a Presidential candidate (such as pins, bumper-stickers, handbills, pamphlets, posters, and yard signs, but not including the use of broadcasting, newspapers, magazines, or other similar types of general public political advertising) if such payments are made only with funds not earmarked for a particular candidate; or

"(L) the value of listing or mentioning the name of any Presidential candidate in any Federal or non-Federal candidate's campaign materials, including any listing or mentioning made on broadcasting stations, in newspapers, magazines, or other similar types of general public political advertising, where the primary purpose of such listing or mentioning is to promote the candidacy of such Federal or non-Federal candidate;".

(c) Section 301(f) of the Act (2 U.S.C. 431(f)) is amended—

(1) by striking out "but" at the end of paragraph (3); and

(2) by redesignating paragraph (4) as paragraph (5), and adding immediately after paragraph (3) the following:

"(4) means, with respect to any Presidential candidate, a gift of anything of value made to any delegate or for the purpose of influencing the election of any candidate for delegate to a caucus or convention of a political party, if such delegate or candidate is pledged to support such Presidential candidate, except that funds spent in connection with travel and subsistence expenses associated with attendance at a caucus or convention shall not be deemed expenditures; but"

(d) Section 301(f)(5) of the Act (2 U.S.C. 431(f)(5)), as redesignated in subsection (c), is amended—

(1) by striking out "if" in subparagraphs (D) and (E) each place it appears, and inserting in lieu thereof "to the extent that";

(2) by striking out "do" in subparagraph (D) and inserting in lieu thereof "does";

(3) by striking out "or" after the semicolon in subparagraph (J);

(4) by adding at the end of such paragraph the following:

"(L) the value of listing or mentioning the name of any Presidential candidate in any Federal or non-Federal candidate's campaign materials, including any listing or mentioning made on broadcasting stations, in newspapers, magazines, or other similar types of general public political advertising, where the primary purpose of such listing or mentioning is to promote the candidacy of such Federal or non-Federal candidate;

"(M) any unreimbursed payment for travel and subsistence expenses made by any delegate or any candidate for delegate to a convention or caucus of a political party or any payment of expenses incurred by a State or local political party in sponsoring any party meeting, caucus, or convention held for the purpose of selecting delegates to a national nominating convention of a political party; or

"(N) the payment by a State or local committee of a political party of the costs of campaign materials used in connection with volunteer activities on behalf of a Presidential candidate (such as pins, bumperstickers, handbills, pamphlets, posters, and yard signs, but not including the use of broadcasting, newspapers, magazines, or other similar types of general public political advertising) if such payments are made only with funds not earmarked for a particular candidate, but such costs shall be reported in accordance with the requirements of section 304(b);".

ORGANIZATION OF POLITICAL COMMITTEES

SEC. 102. (a) Section 302(a) of the Act (2 U.S.C. 432(a)) is amended by striking out "chairman or treasurer, or their designated agents" in the second sentence and inserting in lieu thereof "treasurer, or his designated agent."

(b) Section 302(e) of the Act (2 U.S.C. 432(e)) is amended—

(1) by inserting before the period in the first sentence in paragraph (1) "or notify the Commission that such individual will not authorize any political committee to receive contributions or make expenditures on his behalf";

(2) by striking out "a" immediately before "political committee" in paragraph (2) and inserting in lieu thereof "an authorized"; and

(3) by adding at the end thereof the following:

"(4) The name of each principal campaign committee of a candidate shall include the name of such candidate.".

REGISTRATION OF POLITICAL COMMITTEES

SEC. 103. (a) Section 303(b) of the Act (2 U.S.C. 433(b)) is amended—

(1) by striking out paragraph (3) and redesignating paragraphs (4), (5), and (6) as paragraphs (3), (4), and (5), respectively;

(2) by striking out paragraphs (7) and (8) and redesignating paragraph (9) as paragraph (6);

(3) by adding "and" at the end of paragraph (6), as redesignated in paragraph (3); and

(4) by striking out paragraph (10) and redesignating paragraph (11) as paragraph (7).

(b) Section 303(c) of the Act (2 U.S.C. 483(c)) is amended by inserting immediately before the period a comma and "except that any change in the information required by subsection (b)(5) need not be reported by a multicandidate committee, as defined in section 320(a)(4)".

(c) Section 303(e) of the Act (2 U.S.C. 433(e)) is amended by striking out "a" immediately before "political committee" and inserting in lieu thereof "an authorized".

REPORTS

SEC. 104. (a) Section 304(a) of the Act (2 U.S.C. 434(a)) is amended to read as follows:

"(a)(1) Except as otherwise provided in paragraph (2), each treasurer of a political committee registered with the Commission as provided in section 303, each candidate for election to such office who has not designated a principal campaign committee as provided in section 302(e)(1), and each delegate and candidate for delegate to any Presidential nominating convention who is pledged to any candidate seeking nomination for election to be President of the United States and who accepts contributions or make expenditures on behalf of such candidate shall file with the Commission reports of receipts and expenditures on forms to be prescribed or approved by such Commission.

"The reports referred to in the preceding sentence shall be filed as follows:

"(A) In any calendar year in which an individual is a candidate for Federal office and an election for such Federal office is held in such year—

"(i) each political committee is authorized by a Presidential candidate to accept contributions or make expenditures on his behalf and which operates in more than one State, each multicandidate political committee or political committee authorized by a Presidential candidate to accept contributions or make expenditures on his behalf with respect to which the Commission has approved a request filed as provided in paragraph (3), each Presidential candidate who has not designated a principal campaign committee as provided in section 302(e)(1), and each delegate and candidate for delegate described in the first sentence of this paragraph shall file such reports monthly, as required by the Commission, except that in lieu of filing the report otherwise due in November of such year, a report shall be filed not later than the 12th day before the date on which such election is held and shall be complete as of the 20th day before the date of such election;

"(ii) in any other case, such reports shall be filed not later than the 12th day before the date on which such election is held and such reports shall be complete as of the 20th day before the date of any such election, and, in addition thereto, such reports shall be filed not later than the 10th day following the close of each calendar quarter (hereinafter referred to as 'quarterly reports'), such reports to be complete as of the close of such calendar quarter, except that if any such report which must be filed prior to any such section is due during the period beginning on the 5th day following the close of any calendar quarter and ending on the 15th such day, the quarterly report otherwise due need not be filed; and

"(iii) in addition to the reports required to be filed as provided in clauses (i) and (ii), such reports shall be filed after December 1 of such calendar year, but not later than January 31 of the following calendar year and shall be complete as of the close of the calendar year with respect to which such reports are filed.

"(B) In any other calendar year in which an individual is a candidate for Federal office, such reports shall be filed—

"(i) monthly, as required by the Commission, in the case of a multicandidate political committee or political committee authorized by a Presidential candidate to accept contributions or make expenditures on his behalf with respect to which the Commission has approved a request filed as provided in paragraph (3); and

"(ii) in any other case, not later than July 10 of such calendar year and shall be complete as of June 30, and after December 31 of such calendar year, but not later than January 31 of the following calendar year, and shall be complete as of the close of the calendar year with respect to which the report is filed. Any contribution of $1,000 or more received after the 15th day but more than 48 hours before any election shall be reported within 48 hours after its receipt. Any contribution of $1,000 or more made by a multicandidate political committee after the 20th day but more than 48 hours before any citizen shall be reported within 48 hours after it is made.

"(2)(A) Each treasurer of a political committee authorized by a candidate to accept contributions or make expenditures on his behalf, other than the candidate's principal campaign committee, and each candidate who designates a principal campaign committee as provided in section 302(e)(1) shall file the reports required by this section with the candidate's principal campaign committee.

"(B) Each delegate and each candidate for delegate to any Presidential nominating convention who is pledged to any candidate seeking nomination for election to be President of the United States and who accepts contributions or makes expenditures on behalf of such candidate shall file the reports required under this section with such candidate.

"(3) Upon request by any multicandidate political committee or any political committee authorized by a Presidential candidate to accept contributions or make expenditures on his behalf, the Commission may permit such committee to file monthly reports in any calendar year instead of the reports specified in paragraphs (1)(A)(ii) and (1)(B)(ii).".

(b) Section 304(b) of the Act (2 U.S.C. 434(b)) is amended by striking out "$100" in paragraphs (2), (7), (9), and (10) each place it appears and inserting in lieu thereof "$200".

(c) Section 304(e) (2 U.S.C. 434(e) is amended by striking out paragraphs (1) and (2) and inserting in lieu thereof the following:

"(1) Every person (other than a political committee or candidate) who makes independent expenditures expressly advocating the election or defeat of a clearly identified candidate, other than by contribution to a political committee or candidate, in an aggregate amount in excess of $250 during a calendar year shall file with the Commission, on a form prepared by the Commission, a statement containing the information required with respect to a person who makes a contribution in excess of $200 to a candidate or a political committee and the information required of a candidate or political committee receiving such a contribution.

"(2) Statements required by this subsection shall be filed on the date specified in subsection (a)(1)(A)(ii) or (a)(1)(B)(ii), whichever is appropriate. Such statements shall include (A) the information required by subsection (b)(9), stated in a manner indicating whether the independent expenditure is in support of, or opposition to, the candidate; (B) under penalty of perjury, a certification whether such independent expenditure is made in cooperation, consultation, or concert with, or at the request or suggestion of, any candidate or any authorized committee or agent of such candidate; and (C) an identification of each person who has made a contribution of more than $200 to the person filing such statement, which was made for the purpose of furthering an independent expenditure. Any independent expenditure, including those described in subsection (b)(13), of $1,000 or more made after the 20th day, but more than 24 hours, before any election shall be reported within 24 hours after such independent expenditure is made.".

REQUIREMENTS RELATING TO CAMPAIGN ADVERTISING

SEC. 105. Section 305(b) of the Act (2 U.S.C. 435(b)) is amended by striking out the material in quotation marks and inserting in lieu thereof the following: "A copy of our report is filed with and is available for purchase from the Federal Election Commission, Washington, D.C.".

FORMAL REQUIREMENTS RESPECTING REPORTS AND STATEMENTS

SEC. 106. Section 306 of the Act (2 U.S.C. 436) is amended by striking out "304(a)(1)(A)(ii), 304(a)(1)(B), 304(a)(1)(C)," in subsection (d), and inserting in lieu thereof "304(a)(1),".

CAMPAIGN DEPOSITORIES

SEC. 107. (a) Section 308(a)(1) of the Act (2 U.S.C. 437b)(a)(1)) is amended—

(1) by inserting immediately after the second sentence the following: "Any candidate who has not designated a principal campaign committee as provided in section 302(e)(1), in the account maintained by such candidate" immediately before the period in the fourth sentence, taking into account the amendment made in paragraph (1) of this subsection; and

(3) by inserting "or candidate" immediately after "committee" in the fifth sentence, taking into account the amendment made in paragraph (1) of this subsection, and striking out "such account," in such sentence and inserting in lieu thereof "the appropriate account described in this paragraph,".

(b) Section 308(b) of the Act (2 U.S.C. 437(b)) is amended—

(1) by inserting "or a candidate who has not designated a principal campaign committee as provided in section 302(e)(1)" immediately after "committee" in the first sentence; and

(2) by striking out "it" in the first sentence and inserting in lieu thereof "such committee or candidate".

(c) Section 308(c) of the Act (2 U.S.C. 437b(c)) is amended by inserting "or by such candidate if he has not designated a principal campaign committee as provided in section 302(e)(1)," immediately before "under" in the first sentence.

ENFORCEMENT

SEC. 108. Section 313(a)(5)(A) of the Act (2 U.S.C. 437g(a)(5)(A)) is amended—

(1) by striking out "30" and inserting in lieu thereof "20";

(2) by striking out "section 304(a)(1)(C) in clause (i) and inserting in lieu thereof "section 304(a)(1)(A)"; and

(3) by striking out "10" in clause (ii) and inserting in lieu thereof "12".

ADMINISTRATIVE AND JUDICIAL PROVISIONS

SEC. 109. (a) Section 315(a)(4) of the Act (2 U.S.C. 438(a)(4)) is amended by striking out the colon and the proviso and inserting in lieu thereof a comma and "except that any information copied from such report or statement shall not be sold or utilized by any person for the purpose of soliciting contributions or for any other commercial purpose, but the names and addresses of any political committee may be utilized for the purpose of soliciting contributions from such committee;".

(b) Section 315(c)(2) of the Act (2 U.S.C. 438(c)(2)) is amended by striking out "30" and inserting in lieu thereof "20".

STATEMENTS FILED WITH STATE OFFICERS

SEC. 110. (a) Section 316 (a) of the Act (2 U.S.C. 439(a)) is amended by striking out the first sentence and inserting in lieu thereof the following: "A copy of each statement required to be filed with the Commission by this Act shall be filed with the State official designated by the Governor of the appropriate State. The Governor of each State shall notify the Commission of the official so designated.".

(b) Section 316 (b) of the Act (2 U.S.C. 439 (b)) is amended—

(1) by striking out "Secretary of State, or the equivalent State officer, under" and inserting in lieu thereof "State official designated as provided in"; and

(2) by striking out paragraph (2) and inserting in lieu thereof the following:

"(2) to preserve such reports and statements for a period of 3 years from the date of receipt in the case of reports and statements relating solely to candidates for the House of Representatives, 5 years from the date of receipt in the case of reports and statements relating solely to candidates for President or Vice President, and 7 years from the date of receipt for reports and statements relating solely to candidates for the Senate;".

USE OF CONTRIBUTED AMOUNTS FOR CERTAIN PURPOSES

SEC. 111. Section 317 of the Act (2 U.S.C. 439a) is amended—

(1) by inserting "(a)" immediately before "Amounts";

(2) by inserting immediately before the period in the first sentence a comma and "except that no such amounts may be converted by any candidate to any personal use"; and

(3) by adding at the end thereof the following:

"(b) For purposes of this section, 'personal use' does not include the reimbursement of expenses incurred by a Federal officeholder in connection with his official duties.".

LIMITATIONS ON CONTRIBUTIONS AND EXPENDITURES

SEC. 112. (a) Section 320 (a) of the Act (2 U.S.C. 441a(a)) is amended—

(1) by striking out paragraph (1)(B) and inserting in lieu thereof the following:

"(B) to the political committees established and maintained by a national political party, in any calendar year, which, in the aggregate, exceed $20,000, except that if any Presidential or Vice Presidential candidate designates the national committee of a political party as his principal campaign committee, the limitations in subparagraph (A) shall apply with respect to contributions received as such authorized committee, for which separate books of account shall be maintained; or";

(2) by striking out paragraph (2)(B) and inserting in lieu thereof the following:

"(B) to the political committees established and maintained by a national political party, in any calendar year, which, in the aggregate, exceed $15,000, except that if any Presidential or Vice Presidential candidate designates the national committee of a political party as his principal campaign committee, the limitations in subparagraph (A) shall apply with respect to contributions received as such authorized committee, for which separate books of account shall be maintained; or";

(3) by inserting "which aggregate at least $1,000 each with respect to at least 5 such candidates" in the second sentence of paragraph (4) immediately before the period;

(4) by striking out "and" immediately after the semicolon at the end of subparagraph (B) of paragraph (7);

(5) by striking out the period at the end of subparagraph (C) of paragraph (7) and inserting in lieu thereof a semicolon and "and"; and

(6) by adding at the end of paragraph (7) the following:

"(D) contributions made to any delegate and to any candidate for delegate to any presidential nominating convention who is pledged to any candidate seeking nomination for election to be President of the United States and who accepts contributions or makes expenditures on behalf of such candidate shall be considered to be contributions made to such candidate.".

(b) Section 320(c)(1) of the Act (2 U.S.C. 441a(c)(1)) is amended by inserting "of this section and by subsection (f) of section 9004 of the Internal Revenue Code of 1954" immediately after "subsection (d)".

(c) Section 320(d) of the Act (2 U.S.C. 441a(d)) is amended—

(1) by striking out "The" in paragraph (3) and inserting in lieu thereof "Except as otherwise provided in paragraph (4),"; and

(2) by adding at the end thereof the following:

"(4) The State committee of a political party, including any subordinate committee of a State committee, may not make any expenditure in connection with the general election campaign of any candidate for President of the United States who is affiliated with such party which exceeds the greater of $20,000 or 2 cents multiplied by the voting age population of such State (as certified under subsection (e)).".

CONTRIBUTIONS OR EXPENDITURES BY NATIONAL BANKS, CORPORATIONS, OR LABOR ORGANIZATIONS

SEC. 113. Section 321(b) of the Act (2 U.S.C. 441b(b)) is amended by adding at the end thereof the following:

"(8) The name of any separate segregated fund established pursuant to this section shall include the name of the corporation, labor organization, membership organization, cooperative, or corporation without capital stock which established such fund.".

TITLE II—AMENDMENTS TO INTERNAL REVENUE CODE OF 1954

ENTITLEMENT OF ELIGIBLE CANDIDATES TO PAYMENTS

SEC. 201. Section 9004 of the Internal Revenue Code of 1954 (relating to entitlement of eligible candidates to payments) is amended by adding at the end thereof the following:

"(f) Legal and Accounting Costs.—In addition to any payments made under subsection (a), the eligible candidates of a political party shall be entitled to payments under section 9006 to defray qualified campaign expenses incurred by such eligible candidates or their authorized committees or to repay loans the proceeds of which were used to defray such qualified campaign expenses, or otherwise to restore funds (other than contributions to defray qualified campaign expenses received and expended by such candidates or such committees) used to defray such qualified campaign expenses, if such qualified campaign expenses represent legal and accounting costs incurred by such candidates for the purpose of insuring compliance with the provisions of this chapter or of the Federal Election Campaign Act of 1971, in an amount—

"(1) equal to not more than $500,000 in the case of any eligible candidate of a major party in a Presidential election;

"(2) which, in the case of any eligible candidate of a minor party in a Presidential election, bears the same ratio to the amount allowed under paragraph (1) for a candidate of a major party as the amounts received by such candidate of a minor party under subsections (a)(2) and (a)(3) bear to the amount allowed to any candidate of a major party under subsection (a)(1); or

"(3) which, in the case of any eligible

candidate of a new party in a Presidential election, bears the same ratio to the amount allowed under paragraph (1) for any candidate of a major party as the amount received by such candidate of a new party under subsection (a)(3) bears to the amount allowed to any candidate of a major party under subsection (a)(1).".

REPORTS TO CONGRESS; REGULATIONS

SEC. 202. Section 9009(c)(2) of the Internal Revenue Code of 1954 (relating to review of regulations) is amended by striking out "30" and inserting in lieu thereof "20".

CRIMINAL PENALTIES

SEC 203 Section 9012 of the Internal Revenue Code of 1954 (relating to criminal penalties) is amended—

(1) by striking out subsection (f); and

(2) by redesignating subsection (g) as subsection (f).

REPORTS TO CONGRESS; REGULATIONS

SEC. 204. Section 9039(c)(2) of the Internal Revenue Code of 1954 (relating to review of regulations) is amended by striking out 30 ' and inserting in lieu thereof "20".

TECHNICAL AMENDMENTS

SEC. 205. (a) Section 527(f)(3) of the Internal Revenue Code of 1954 (relating to certain separate segregated funds) is amended by striking out "section 610 of title 18" and inserting in lieu thereof "section 321 of the Federal Election Campaign Act of 1971".

(b) Section 9011(b) of the Internal Revenue Code of 1954 (relating to suits to implement chapter) is amended by striking out "contrue" and inserting in lieu thereof "construe"

FEDERAL ELECTION CAMPAIGN ACT AMENDMENTS OF 1977 SECTION BY SECTION SUMMARY

Section 101 of the bill would amend the definitions of the Federal Election Campaign Act in the following respects:

1. A contribution to a Presidential candidate will include anything of value given to a delegate or to influence the election of a candidate for delegate to a caucus or convention who is pledged to support that Presidential candidate, except for funds received or spent with regard to certain travel and subsistence expenses.

2 Three strictly clarifying amendments to existing 431(e)(5) which would transfer the $500 limits set forth at the end of that section and applicable to clauses B, C, and D, and incorporate them into those specific clauses B, C, and D.

3. Unreimbursed payments for travel and subsistence expenses made by a delegate (pledged or unpledged) for payment of expenses incurred by a state or local political party in sponsoring a party meeting, caucus, or convention held for the purpose of selecting delegates to a national nominating convention shall not be a contribution or an expenditure

4 A contribution or an expenditure shall not include the payment by a state or local committee of a political party of the costs of certain campaign materials used in connection with volunteer activities on behalf of a Presidential candidate (such as pins, bumper stickers, handbills, posters, and yard signs, but not including the use of broadcasting, newspapers, magazines, or other similar types of general public political advertising) if such payments are made only with funds not earmarked for a particular candidate.

Section 102(a) of the bill would amend Section 432(a) to provide that only when there is a vacancy in the office of treasurer (rather than chairman or treasurer) that a committee would be prohibited from making expenditures or receiving contributions.

Section 102(b) would amend Section 432 (e) to provide an option so that candidates would not have to designate a principal campaign committee if they certify to the Commission that they will not authorize any political committee to receive contributions or make expenditures in their behalf.

It would also require that each principal campaign committee of a candidate contain in the name of the committee the name of such candidate.

Section 103 of the bill would amend Sec. tion 433(b) of the Act by deleting certain information now required to be contained in a statement of organization which the Commission feels is not pertinent. It would also provide that multi-candidate committees need not amend their registration statements when supporting additional candidates as this information is reflected in reports of expenditures.

Section 104 of the bill would amend completely Section 434(a) of the Act setting forth the reporting requirements of candidates and committees. This, with other provisions in the bill, would reduce the maximum number of reports that would have to be filed from twenty-four to eight and still maintain full and adequate disclosure of campaign activities.

Section 104(b) of the bill would amend Section 434(b) by raising the threshold above which detailed information with respect to contributions and expenditures would have to be reported to the Commission from $100 to $200. The purpose of this is to alleviate the reporting burden on candidates and committees and reduce by approximately one-third the information that is required to be stored and processed by the Commission without significantly reducing public disclosure of campaign activities. The information would be reported in the aggregate and the more detailed information now required to be kept with respect to contributions in excess of $50 would still have to be maintained by candidates and committees for audit and enforcement purposes.

Section 104(c) of the bill would amend Section 434(e) to raise the reporting threshold for independent expenditures from $100 per year to $250 for all persons other than political committees or candidates. It would also eliminate the requirement that persons who make independent contributions in excess of $100 file reports with the Commission and would provide instead that the person who receives the contribution, and subsequently makes the independent expenditure would report having receved that contribution to the Commission.

Section 105 of the bill would simplify the disclaimer required on all solicitations of contributions.

Section 106 of the bill is strictly a technical amendment to Section 436 reflecting changes in the provisions relating to reporting requirements.

Section 107 of the bill would amend Section 437b relating to campaign depositories to provide for the situation where a candidate does not designate a principal campaign committee and maintains checking accounts or other accounts in a depository of his own designation.

Section 108 of the bill would alter the statutory conciliation period from thirty days to twenty days in order to facilitate the Commission's more expeditious handling of complaints, leaving intact the rest of the enforcement provisions except for technical changes to reflect the changes proposed in the reporting requirements.

Section 109 of the bill would amend Section 438(a)(4) of the Act (which provides that information filed with the Commission shall not be sold or utilized by any person with the purpose of soliciting contributions or for any commercial purpose) to permit the names and addresses of any political committee on file at the Commission to be utilized for the purpose of soliciting contributions from that committee.

Section 109 of the bill would also propose to shorten the Congressional review period of FEC regulations from thirty to twenty legislative days.

Section 110 of the bill would amend Section 439(a) of the Act to provide that copies of reports would be filed with the state official designated by the Governor of the appropriate state to accommodate those states which do not have Secretaries of State, or where the Secretary of State does not handle the campaign finance information. It would also change the retention period for records filed with the states so that House reports would be preserved for three years. Presidential reports for five years, and Senate reports for seven years, in lieu of the present five and ten year requirements which the states have indicated is excessive. The Commission would still be required to preserve its reports for the ten and five year periods.

Section 111 of the bill would amend Section 439a of the Act to provide specifically that excess campaign funds may not be converted to personal use by any candidate to reflect the provision adopted by the Senate in S. Res. 110.

Section 112(a) of the bill would clarify that if a national committee of a political party is designated as the principal campaign committee for a Presidential or Vice Presidential candidate, that the contribution limits applicable to that national committee would still be applicable, but the committee would have to maintain separate books for contributions received as the authorized committee of a Presidential candidate. This Section would also provide that contributions made to any delegate or candidate for delegate to a Presidential nominating convention who is pledged to any candidate and accepts contributions or makes expenditures on behalf of such a candidate shall be considered to be contributions made to that candidate.

Section 112(c) of the bill would amend Section 441a(d) to permit state committees of a political party, including any subordinate committee of a state committee, to make expenditures in connection with a general election campaign of a Presidential candidate of that party up to the greater of $20,000 or 2¢ multiplied by the voting age population of that state. This is to remedy an apparent oversight in existing law and permit state parties to make coordinated expenditures to support the general election campaign of a Presidential candidate.

Section 113 of the bill would amend Section 441b(b) to provide that any separate, segregated fund established pursuant to that section shall contain, in the name of such fund, the name of the corporation, labor organization, membership organization, cooperative, or corporation without capital stock which established the fund.

Section 201 of the bill would provide a grant of $500,000 to Presidential candidates in the general election to defray the legal and accounting costs of complying with the law. Under present law, Presidential candidates could receive contributions from individuals to defray these costs and with the grant of public funds, such contributions would be prohibited.

Sections 202 and 204 of the bill would change the Congressional review of FEC regulations from thirty to twenty legislative days with respect to the Presidential public financing provisions.

Section 203 of the bill would strike Section 9012(f) of Title 26, a provision considered to be unconstitutional in light of *Buckley* v. *Valeo* and unenforced by the Commission.

Section 205 of the bill contains technical amendments.

By Mr. BAYH (for himself and Mr. HATFIELD):

S. 1345. A bill to provide that polling and registration places for elections for Federal office be accessible to physically handicapped and elderly individuals, and for other purposes; to the Committee on Rules and Administration.

Mr. BAYH. Mr. President, today my colleague from Oregon, Mr. HATFIELD, and I are introducing legislation which is designed to help the elderly and the handicapped exercise one of our most sacred privileges—the right to vote. This legislation is substantially identical to legislation introduced in the House of Representatives by Congressmen KOCH and COHEN along with 57 other cosponsors.

The right to vote is regarded by most Americans as one of the vital ingredients in the functioning of our democratic society. Despite our allegiance to this sacred principle, every election day every year, we disenfranchise millions of our Nation's voters. This disenfranchisement takes place because many of our registration sites and voting places prove to be inaccessible for our Nation's elderly or handicapped. Architectural barriers in effect prevent these citizens from being able to participate in the electoral process that is the very bulwark of our Nation.

While it is difficult to obtain accurate statistics on the number of voters that are affected by such impediments as architectural barriers, it has been estimated that the number of persons in the United States that must rely on mobility aids is placed conservatively at 20 million. When you add to this figure the number of elderly persons who might have similar mobility problems, the figure climbs even higher. In my own State of Indiana, there are 598,000 disabled persons and 701,511 people over the age of 60. These figures amply document the seriousness of the problem.

The legislation we are introducing today seeks to correct this unfortunate situation by requiring that all polling places and voter registration sites used in Federal elections be located in facilities which would provide temporary or permanent access by ramp or other means for persons in wheelchairs. In the event that modification of such sites is not possible, the bill would require that adequate voting alternatives be used. For example, the handicapped or elderly could be assigned an alternative voting place free of architectural barriers.

Additionally, this legislation would require that paper ballots be available at all voting sites used for Federal elections for those persons unable to use a conventional voting machine. Blind and other voters who have difficulty both in operating a voting machine and in marking a paper ballot would be allowed to designate an individual to assist them.

Mr. President, we have come a long way toward extending the franchise to those various groups in our society who have been denied the vote over the years. It is no longer permissible to discriminate against a voter because of his race or his language. With the passage of the legislation we are introducing today, it will no longer be permissible to discriminate against the older or handicapped voter.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1345

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Voting Rights for the Elderly and Handicapped Act".

PURPOSE

SEC. 2. It is the intention of Congress in enacting this Act to promote the fundamental right of all citizens to vote by requiring polling and registration places for elections for Federal office to be readily accessible to physically handicapped and elderly individuals.

SELECTION OF POLLING AND REGISTRATION PLACES

SEC. 3. (a) The Attorney General, in consultation with the Secretary of Health, Education, and Welfare, shall prescribe, in accordance with section 553 of title 5, United States Code, such standards for polling and registration place facilities used for elections for Federal office as may be necessary to insure that physically handicapped and elderly individuals have ready access to such facilities. Except as provided in subsection (b), such standards shall require at a minimum that all polling and registration places be located in a building or other facility which provides access, by ramp or otherwise, to individuals in wheelchairs, and be located on the ground level of a building or other facility, or at a location within such building or facility as is accessible by elevator. Any building or other facility which is temporarily made to comply with the standards prescribed by the Attorney General under this subsection may be used as a polling or registration place.

(b)(1) No site which does not comply with the standards of accessibility prescribed under subsection (a) may be used as a polling or registration place in elections for Federal office unless it is determined by the appropriate election official of a State or political subdivision, after all reasonable efforts have been made to locate an appropriate site, that there is no such site available in the applicable voting precinct.

(2) Whenever a site which does not comply with the standards prescribed under subsection (a) is designated as a polling or registration place for an election for Federal office under subsection (b)(1), the appropriate election official shall file a report with the Attorney General not later than sixty days before the election in the case of a polling place and not later than sixty days before the close of registration in the case of a registration place, in such form and containing such information as the Attorney General may require, including assurances that all reasonable efforts have been made to locate an appropriate site.

(c) The requirements under subsections (a) and (b)(2) shall not apply to any State which, in the determination of the Attorney General, (1) has established by law standards for polling and registration places at least as stringent as those prescribed by the Attorney General under subsection (a), and (2) has adopted and is implementing adequate procedures for the enforcement of such State's standards. The Attorney General may require such State to keep records and make reports as he deems necessary to implement this Act.

ALTERNATIVE METHODS OF VOTING AND REGISTRATION FOR THE PHYSICALLY HANDICAPPED AND THE ELDERLY

SEC. 4. (a) Each State shall provide by law, within one year of the date of enactment of this Act, for one or more alternative methods of voting by physically handicapped and elderly individuals in elections for Federal office in cases in which such individuals are assigned under section 3(b)(1) to polling places which do not meet the standards prescribed under section 3(a). Such alternatives may include—

(1) the selection of one or more alternative polling places outside of the voting precinct (but within the same congressional district) to which such an individual may be assigned to vote;

(2) the selection of an alternative method of voting within the voting precinct, such as by the use of an absentee ballot on or before election day, or by curbside balloting outside of polling place; or

(3) any other method, or combination of methods, which guarantees that such individuals will be able to fully exercise their right to vote.

(b) Whenever an alternative method of voting is selected under subsection (a) for a voting precinct, the appropriate election official of the State or political subdivision in which such precinct is located shall issue public notice of such method as early as practicable, but in any case not later than sixty days before the election in which the alternative method is to be used. Any physically handicapped or elderly individual who notifies the appropriate election official of his or her intention to vote by the alternative method at least thirty days before such election and who is otherwise eligible to vote in such election, shall be allowed to vote by such method.

(c) Each State shall provide by law, wtihin two years of the date of enactment of this Act, for one or more alternative methods of registering to vote for elections for Federal office by physically handicapped and elderly individuals who do not have ready access to registration places meeting the standards prescribed under section 3(a).

(d) Whenever an alternative method of registration is selected under subsection (c) the appropriate election official of the State or political subdivision in which such precinct is located shall issue public notice of such method of registration as early as practicable but in any case not later than sixty days before the deadline for registration for the election for which the alternative method is to be used.

ALTERNATIVE PAPER BALLOTS AND SELECTED ASSISTANTS

SEC. 5. (a) Paper ballots shall be made available at each polling place for an election for Federal office, whether or not such polling place is in compliance with the standards prescribed under section 2(a), for the use of voters who would otherwise be prevented from voting because of their inability to operate a voting machine.

(b) Any voter who is unable to operate a voting machine or use a paper ballot, because of blindness or other physical handicap, shall be permitted to select a person of his choice to accompany such voter into the polling place in an election for Federal office to assist him in the completion of his ballot.

ENFORCEMENT

SEC. 6. Whenever the Attorney General has reason to believe that a State or political subdivision (1) has selected a site for a poll-

ing or registration place within a voting precinct which does not comply with the standards prescribed under section 3(a), and that there exists within such precinct an available site which does comply with such standards, (2) has failed to provide an alternative method of voting or registering to vote as required by section 4, or (3) has failed to make paper ballots available or to permit alternative selected assistants as required by section 5, he may institute, in the name of the United States, any actions in a district court of the United States against the State or political subdivision, including actions for injunctive relief, as he may determine to be necessary to implement this Act.

DEFINITIONS

SEC. 7. As used in this Act, the term—

(1) "elderly individuals" means individuals 65 years of age or older;

(2) "election for Federal office" means a general, special, primary, or runoff election for the office of President or Vice President of the United States, or Senator or Representative in, or Delegate or Resident Commissioner to the Congress of the United States;

(3) "physically handicapped individuals" means individuals who need mechanical or personal assistance to provide for their safety and mobility; and

(4) "voting precinct" means the area inhabited by all citizens assigned to one polling place for an election for Federal office.

By Mr. BAYH:

S. 1346. A bill to amend title VII of the Civil Rights Act of 1964 to provide a program to prevent discrimination on account of the handicapped condition of an individual, and for other purposes; to the Committee on Human Resources.

Mr. BAYH. Mr. President, today I am introducing legislation to guarantee the civil rights of one of our Nation's more valuable untapped resources, the handicapped. Specifically, my legislation would address the problem of employment discrimination against the handicapped by adding the handicapped as an additional category to those already protected from employment discrimination by title VII of the Civil Rights Act of 1964.

Over the past decade, we have witnessed a growing awareness of the rights of many disadvantaged groups in our society. Women and minorities, backed with the protection of the Civil Rights Act, have begun to make substantial inroads in the labor market. Essentially unnoticed during this period, however, were the employment problems of the Nation's handicapped.

The right to work is one of the most basic of all human rights. Work gives an individual not only economic self-sufficiency, but also a sense of dignity, self-worth, and a knowledge of making his or her contribution to our society. Unfortunately, the sad fact is that all too often, people with handicaps are denied this right to self-sufficiency and self-esteem due to employment discrimination.

The actual figures are appalling. Although precise figures are difficult to obtain, it has been estimated that there are about 36 million handicapped persons in our Nation. Of these, only about 5.6 million are in the work force. Regrettably, the handicapped individual's unemployment impairs not only his or her own right to self-sufficiency, but frequently impacts on the ability to support a family as well. As a result, many of these victims of discrimination and their families are forced to turn to welfare.

Why does this condition exist? There are several reasons, among them the difficulty of transportation and physical barriers for the handicapped. However, the most crucial deterrent seems to be employer attitude. Acting from presumed stereotypes, many employers fear that the handicapped person will be unable to perform assigned tasks. This attitude appears to exist despite the results of numerous studies showing that a handicapped worker, when assigned to an appropriate position, performs as well or better than his nonhandicapped coworkers.

I do not think that most of us are aware of the depth of the problem facing these millions of Americans. Employment discrimination against the handicapped is not just confined to the person in the wheelchair; it also extends to persons recovering from an illness such as cancer. The American Cancer Society has estimated that "for about 90 percent of cancer patients going back to work, there is a serious discrimination problem." Many employers refuse to hire such people at all citing an unfounded fear of contagion. Such fear was exemplified by a New York employer who was hesitant to rehire a victim suffering from cancer of the larynx fearing he would be forced to install a separate bathroom for the cancer victim so as not to infect the rest of the staff.

The other attitude by employers which deters the hiring of cancer victims is the assumption such workers will not be able to perform at full capacity. This attitude on the part of many employers flies in the face of studies showing cancer victims to be full-time productive members of the work force. In 1972, the Metropolitan Life Insurance Co. reviewed its experience with the employment of persons with a history of cancer. The conclusions of the study showed that the reasons for past employment discrimination were, indeed, unfounded. The overall employment record for cancer victims in the Metropolitan study was good, showing only a small turnover. The absentee record was considered satisfactory and work performance adequate. The study concluded with the statement that:

> . . . selective hiring of persons who have been treated for cancer, in positions for which they are physically qualified, is a sound industrial practice.

There is Federal legislation already on the books which makes a first step toward protecting handicapped victims from employment discrimination. Most notable is the Vocational Rehabilitation Act of 1973. This legislation prohibits employment discrimination against any otherwise qualified handicapped individual in any Federal contract of more than $2,500 or in any Federal program.

I support the worthwhile goals of the Vocational Rehabilitation Act, but at the same time, I am convinced that this legislation does not go far enough. It is for this reason that I am introducing legislation which will give the handicapped full protection under the Civil Rights Act of 1964. By putting the handicapped under the civil rights bill, we would be extending employment discrimination protection to all handicapped workers in companies of more than 15 employees.

In order to more fully explain the specific contents of my bill, I ask unanimous consent that a section-by-section analysis together with the bill be printed in the RECORD at this point followed by two excellent articles documenting the need for its enactment.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1346

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Handicapped Condition Antidiscrimination in Employment Act."

SEC. 2. Section 701 of the Civil Rights Act of 1964 is amended by adding at the end thereof the following:

"(k) The term 'handicapped condition' means any individual who—

"(1) has a physical or mental impairment which substantially limits one or more of such person's major life activities.

"(2) has a record of such impairment, or

"(3) is regarded as having such an impairment. For purposes of this Part a handicapped individual is 'substantially limited, if he or she is likely to experience difficulty in securing, retaining, or advancing in employment because of a handicap."

"(4) 'Qualified handicapped individuals' means a handicapped individual as defined in this Section who is capable of performing the functional requirements of the particular job."

SEC. 3. (a)(1) Section 703(a)(1) of the Civil Rights Act of 1964 is amended by inserting immediately after the word "sex" a comma and the words "handicapped condition".

(2) Section 703(a)(2) of such Act is amended by inserting immediately after the word "sex" a comma and the words "handicapped condition".

(b) Section 703(b) of such Act is amended by inserting immediately after the word "sex" a comma and the words "handicapped condition".

(c)(1) Section 703(c)(1) of such Act is amended by inserting immediately after the word "sex" a comma and the words "handicapped condition".

(2) Section 703(c)(2) of such Act is amended by inserting immediately after the word "sex" a comma and the words "handicapped condition".

(d) Section 703(d) of such Act is amended by inserting immediately after the word "sex" a comma and the words "handicapped condition".

(e)(1) Section 703(e) of such Act is amended by inserting immediately after the word "sex" a comma and the words "handicapped condition".

(2) Section 703(e) of such Act is further amended by inserting before the period a comma and the following: "and (3) it shall not be an unlawful employment practice for an employer to hire or refuse to hire and employ employees, for an employment agency to limit; segregate or classify, or fail or re-

fuse to refer for employment any individual, for a labor organization to exclude or expel from membership or to limit, segregate or classify its membership or to classify or refer for employment any individual, or for an employer, labor organization, or joint-labor-management committee controlling apprenticeship or other training or retraining programs to fail or refuse to admit or employ any individual in any such program, on the basis of his handicapped condition if such employer, employment agency, labor organization, or joint labor-management committee establishes that such an individual would endanger his own health or the health of other employees or individuals in such a program".

(f) Section 703(h) of such Act is amended by inserting after the word "sex" both times it appears in such subsection a comma and the words "handicapped condition".

(g) Section 703(j) of such Act is amended by inserting after the word "sex" each time it appears in such subsection a comma and the words "handicapped condition".

(h) Section 703 of such Act is amended by adding at the end thereof the following new subsection:

"(k) Nothing contained in this title shall be interpreted to prevent an employer, employment agency, or labor organization to observe the terms of any bona fide employee benefit plan such as a retirement, pension, or insurance plan if such a plan and differences in that plan with respect to any individuals with handicapped condition is not a subterfuge to evade the purposes of this title, except that no such employee benefit plan shall excuse the failure to hire any individual".

(i) The section heading of section 703 of such Act is amended to read as follows:

"DISCRIMINATION BECAUSE OF RACE, COLOR, RELIGION, SEX, HANDICAPPED CONDITION, OR NATURAL ORIGIN"

SEC. 4. (a) Section 704(b) of the Civil Rights Act of 1964 is amended by inserting after the word "sex" both times it appears in such subsection a comma and the words "handicapped condition".

(b) Section 706(g) of such Act is amended by inserting after the word "sex" a comma and the words "handicapped condition".

SEC. 5. (a) Section 717(a) of the Civil Rights Act of 1964 is amended by inserting after the word "sex" a comma and the words "handicapped condition".

(b) Section 717(c) of such Act is amended by inserting after the word "sex" a comma and the words "handicapped condition".

SEC. 6. The amendment made by this Act shall take effect 6 months after the date of its enactment.

SECTION-BY-SECTION ANALYSIS OF A PROPOSED BILL TO AMEND TITLE VII OF THE CIVIL RIGHTS ACT OF 1964 TO PROVIDE A PROGRAM TO PREVENT DISCRIMINATION ON ACCOUNT OF THE HANDICAPPED CONDITION OF AN INDIVIDUAL

Title VII of the 1964 Civil Rights Act provides for equal employment opportunities. Generally, this proposed bill would extend the guarantees against discrimination in employment on account of race, color, religion, sex or national origin to handicapped persons.

Section 1 of the proposed bill states that it may be cited as "the Handicapped Condition Antidiscrimination in Employment Act".

Section 2 of the bill amends section 701 of the 1964 Civil Rights Act (42 U.S.C. § 2000e), which contains definitions for the subchapter, to include the term handicapped condition. A new subsection k is added which defines handicapped condition as any person who either has a physical or mental impairment which substantially limits one or more of that person's major life activities or has a record of such impairment or is regarded as having such an impairment. Substantially limited as well as qualified handicapped individuals are also defined.

Section 3 of the proposed bill amends section 703 of the Civil Rights Act of 1964 (42 U.S.C. § 2000e–2). Section 3(a) of the bill amends section 703(a)(1) and (2) by inserting the words handicapped condition after the word sex. If amended by this bill section 703(a) would read: "It shall be an unlawful employment practice for an employer—(1) to fail or refuse to hire or to discharge any individual, of otherwise to discriminate against any individual with respect to his compensaton, terms, conditions, or privileges of employment, because of such individual's race, color, religion, sex, handicapped condition or national origin—(2) to limit, segregate, or classify his employees or applicants for employment in any way which would deprive or tend to deprive any individual of employment opportunities or otherwise adversely affect his status as an employee, because of such individual's race, color, religion, sex, handicapped condition or national origin."

Similarly, section 3(b) of the proposed bill would amend section 703(b) to include the term handicapped condition. If amended this section would state: "It shall be an unlawful employment practice for an employment agency to fail or refuse to refer for employment, or otherwise to discriminate against, any individual because of his race, color, religion, sex, handicapped condition or national origin, or to classify or refer for employment any individual on the basis of his race, color, religion, sex, handicapped condition, or national origin."

Section 3(c) of the proposed bill would amend sections 703(c)(1) and (2) which prohibit discrimination in labor union practices by adding the words handicapped condition. If amended these sub-sections would state: "(c) It shall be an unlawful employment practice for a labor union organization—(1) to exclude or to expel from its membership, or otherwise to discriminate against, any individual because of his race, color, religion, sex, handicapped condition, or national origin; (2) to limit, segregate, or classify its membership or applicants for membership, or to classify or fail or refuse to refer for employment any individual, in any way which would deprive or tend to deprive any individual of employment opportunities, or would limit such employment opportunities or otherwise adversely affect his status as an employee or as an applicant for employment, because of such individual's race, color, religion, sex, handicapped condition, or national origin . . ."

Section 3(d) of the bill amends section 703(d) which prohibits discrimination in training programs by adding the words handicapped condition. This section, if amended, would read: "It shall be an unlawful employment practice for any employer, labor organization, or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs to discriminate against any individual because of his race, color, religion, sex, handicapped condition, or national origin in admission to, or employment in, any program established to provide apprenticeship or other training."

Section 703(e) of the 1964 Civil Rights Act which states that certain classification by race or other characteristic is not an unlawful employment practice would be amended by section 3(e) of the bill. Section 3(e)(1) would insert handicapped condition after the word sex and section 3(e)(2) would add a new section 3 providing that it would not be an unlawful employment practice to refuse to hire or otherwise discriminate against a handicapped person if it is established that such an individual would endanger his own health or the health of others in such a program.

Section 3(f) of the proposed bill would amend section 703(h) of the 1964 Civil Rights Act by inserting the word handicapped condition after the word sex. Section 703(h) discusses seniority or merit systems and presently provides that it shall not be an unlawful employment practice for an employer to apply different standards of compensation pursuant to a bonafide seniority or merit system provided that such differences are not the result of an intention to discriminate because of race, color, religion, sex, or national origin. This section also provides that it shall not be an unlawful employment practice to give or act upon the results of any professionally developed ability test provided that such test is not intended or used to discriminate because of race, color, religion, sex or national origin.

Section 3(g) of the proposed bill would amend section 703(j) by inserting the words handicapped condition after the word sex. Section 703(j) of the 1964 Civil Rights Act currently provides that the subchapter shall not be interpreted to require preferential treatment to any individual or group because of their race, color, religion, sex, or national origin on account of an imbalance with respect to total number or percentage of such persons.

Section 3(h) of the proposed bill also adds a new subsection k which concerns employee benefit plans. This new subsection specifically states:

Nothing contained in this title shall be interpreted to prevent an employer, employment agency, or labor organization to observe the terms of any bona fide employee benefit plan such as a retirement, pension, or insurance plan if such a plan and differences in that plan with respect to any individuals with handicapped condition is not a subterfuge to evade the purposes of this title, except that no such employee benefit plan shall excuse the failure to hire any individual.

Finally, section 3(i) amends the section heading of section 703 to read "Discrimination Because of Race, Color, Religion, Sex, Handicapped Condition, or Natural (sic) Origin".

Section 4(a) of the proposed bill amends section 704(b) of the 1964 Civil Rights Act (42 U.S.C. Sec. 2000e–3) by inserting the words handicapped condition after the word sex both times it appears in the subdivision. This subsection prohibits advertisements relating to employment from indicating a preference based upon race, color, religion, sex, or national origin is a bona fide occupational qualification for employment.

Section 706(g) of the 1964 Civil Rights Act (42 U.S.C. Sec. 200e–5) is amended by section 4(b) of the proposed bill by inserting the words handicapped condition after the word sex. Section 706(g) currently provides for court injunctions if a court finds that a respondent is or has intentionally engaged in an unlawful employment practice and for other relief such as payment of back pay It also states that these remedies shall not apply if such individual was refused admission, suspended, or expelled, or was refused employment or advancement or was suspended or discharged for any reasons other than discrimination on account of race, color, religion, sex, or national origin.

Section 5 of the proposed bill would amend Section 717(a) and (c) of the 1964 Civil Rights Act (42 U.S.C. Sec. 2000e–16) by in-

serting the words handicapped condition after the word sex. Generally, Section 717 concerns employment by the Federal Government. Section 717(a) prohibits employment discrimination in the Federal Government based on race, color, religion, sex, or national origin. Subsection (c) provides that an aggrieved individual may file a civil action after final administrative action on a complaint of discrimination based upon race, color, religion, sex or national origin.

The final section of the proposed bill, section 6, provides that the amendments made by the bill shall take effect 6 months after its date of enactment.

EMPLOYMENT PROBLEMS OF DISABLED PERSONS

(By Sar A. Levitan and Robert Taggart)

One in seven noninstitutionalized adult Americans age 20 through 64 has one chronic condition or more lasting at least 6 months which limits the kind or amount of work he or she can perform. The consequences of these work disabilities are serious for the individuals and for society. Earnings are curtailed or eliminated, and income is lowered. Only two-fifths of the disabled are employed during a typical year, compared with three-fourths of the able-bodied. The mean annual earnings of disabled workers are roughly seven-tenths those of the able-bodied, and households with a disabled adult must make do with a third less income than other households. Behind these numbers lie untold personal tribulations resulting from the loss of work status and independence.

The economy suffers to the extent that useful skills go unutilized. Relatives of disabled persons must supplement reduced earnings while bearing extra medical and personal care expenses. Taxpayers support extensive income transfers to the disabled, amounting to estimated Federal outlays of more than $28 billion in fiscal 1977.

Vocational rehabilitation seeks to restore lost or stunted productivity, thereby increasing earnings, independence, and well-being of the disabled, and reducing the need for public income transfers. To achieve these goals, medical, prosthetic, psychological, and other services treating mental and physical handicaps are combined with counseling, vocational training, work experience, placement, and other services addressing the temporary or long-term employment problems related to these handicaps. In 1975, an estimated $1.7 billion was spent on such services.

Work disability and vocational rehabilitation services cannot be considered in a vacuum. Many of the socioeconomically handicapped have complicating mental or physical problems, and a large proportion of those with mental or physical handicaps have limited education, work experience, or other employment impediments. There is thus an extensive overlap between the disabled and the socioeconomically disadvantaged. Vocational rehabilitation efforts for the disabled and employment and training programs for the socioeconomically disadvantaged face many of the same obstacles and must resolve many of the same issues. This article explores the employment difficulties of the disabled as part of a broader problem, and examines rehabilitation strategies as one component of the effort to help handicapped persons failing in or being failed by the labor market.

EMPLOYMENT PROBLEMS

There are essentially two interrelated dimensions to work disability: the presence or perception of physical or mental handicaps and reduced work capacity. The Social Security Act defines disability narrowly, limiting benefits to the most severe cases. Under the act, a disability is the "inability to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or has lasted or can be expected to last for a continuous period of not less than 12 months." The Social Security Administration, in its surveys of the disabled in 1966 and 1972, has defined disability much less restrictively as a limitation in the kind or amount of work, including housework, which results from a chronic condition lasting 6 months or longer. Under this definition, the physicial or mental conditions are self-assessed rather than medically determined, and they may be of shorter duration. Most importantly, this definition includes not only those unable to work regularly or at all, who are classified as "severely disabled," but also those who can work but must change occupations, that is, the "occupationally disabled," and those who can continue in the same job but are limited in the amount of work (including housework) they can perform, that is, persons considered to have "secondary work limitations." The Social Security Act's definition encompasses around 3 million adults under age 65. Two and one-half million disabled workers received disability benefits at the end of 1975. In contrast, the 1972 survey of the disabled counted 7.7 million severely disabled age 20 to 64 years, 3.5 million occupationally disabled, and 4.4 million persons with secondary work limitations.

The extent of work limitation ranges from complete to marginal. Only a seventh of the severely disabled were employed at the time of the 1972 survey, and only 6 percent held full-time jobs (table 1). The occupationally disabled were substantially better off, with 71 percent employed and 45 percent in full-time jobs. However, they were still worse off than the able-bodied population, among whom 74 percent were employed, 60 percent full time. Severely disabled men had one-fifth the chance of being employed as the nondisabled had, and less than one-seventh the probability of being employed full time.

TABLE 1.—EMPLOYMENT STATUS OF PERSONS AGE 20 TO 64, 1972 SURVEY WEEK

Item	Ablebodied	Disabled	Severely disabled	Occupationally disabled	Secondary work limitations
Percent outside the labor force:					
Total	22.5	51.9	81.8	22.2	22.7
Men	2.3	35.0	75.2	5.2	5.8
Women	41.1	65.9	85.9	43.0	39.0
Percent employed:					
Total	73.7	42.9	14.0	71.4	71.5
Men	95.0	59.6	21.1	89.1	96.4
Women	54.2	29.2	9.5	49.6	57.1
Percent employed full time:					
Total	60.6	29.3	5.7	45.0	58.7
Men	84.6	47.1	11.7	69.8	75.9
Women	38.7	14.7	2.0	14.5	42.0

Source: Social Security Administration, "1972 Survey of the Disabled."

Occupationally disabled men were employed somewhat less often than the nondisabled but had twice the frequency of part-time work. Only 1 in 10 severely disabled women engaged in gainful employment. Occupationally disabled women were more frequently forced into part-time work. (The secondary work limitation category is difficult to interpret for women because it includes women who cannot perform housework as well as those who are or would be in the labor force.)

The disabled are subject to frequent work interruptions. During the year prior to the 1972 survey, 72 percent of the disabled men age 20 to 64 held jobs compared with 98 percent of the able-bodied. But 73 percent of the able-bodied, compared with only 36 percent of the disabled, worked full time, full year (table 2).

The employment problems of the disabled have other dimensions. At the time of the 1972 interview, 37 percent of the severely disabled who claimed to be employed were not currently on the job, compared with just 1 in 8 of the able-bodied with a job. The employed nondisabled averaged 41 hours of work weekly, but the severely disabled averaged 26 and the occupationally disabled, 36 hours. Accounting for a tenth of the work force, the disabled were a sixth of all service workers, laborers, and farmers, and more than a third of all private household workers.

The weekly wage of employed disabled men was 79 percent that of the able-bodied; for the severely disabled, it was only 67 percent. The ratios for women were even lower, 74 and 46 percent, respectively. With more frequently interrupted work, the annual earnings of disabled men with work experience were 69 percent those of the nondisabled; the severely disabled earned less than half as much; the occupationally disabled, 70 percent; and persons with secondary work limitations, 79 percent.

Nearly 3 of every 10 persons age 20 through 64 not in the labor force in 1972 were disabled, as were 7 of 10 working age men without jobs and not looking for work (table 3). Conversely, less than 8 percent of full-time workers had a limitation in the kind or amount of work they could perform. With an unemployment rate twice that of the nondisabled, disabled men accounted for a fourth of jobless men. Disabled women, on the other hand, apparently dropped out of the labor market rather than continue the futile search for work, so that their unemployment rates differed little from those of the able-bodied. Whereas the disabled represented 28 percent of all persons who did not work during 1971, and a fifth of those working less than 26 weeks, they accounted for only 7 percent of full-time, full-year workers. Two-thirds of men who did not work and more than a fourth of those with less than 26 weeks of employment were disabled.

TABLE 2.—WORK EXPERIENCE OF PERSONS AGE 20 TO 64, 1971

[In percent]

Work experience and sex	Ablebodied	Total disabled	Severely disabled	Occupationally disabled	Persons with secondary work limitations
BOTH SEXES					
Did not work	20.7	45.8	69.5	21.1	23.5
Worked	79.1	54.1	30.3	78.9	76.5
Full time 50 to 52 weeks	50.4	22.7	5.4	37.7	41.5
Full time 26 to 49 weeks	12.1	11.9	6.8	14.7	18.8
Part time 26 weeks or more	8.1	8.1	6.6	14.2	5.9
Less than 26 weeks	6.3	9.4	10.0	9.3	8.1
Not available	2.4	2.1	1.7	3.0	2.1

CHARACTERISTICS

The young and old, blacks, women, the unmarried, and persons with limited education are over-represented among persons without jobs or without stable employment as well as among the disabled. The mentally and physically handicapped with such characteristics are more frequently unable to work regularly or at all than other disabled persons. By the same token, the employment problems of the aged, of blacks, and of the poorly educated are very often related to mental or physical problems.

Age. A third of all persons age 60 to 64, and a fourth of those age 55 to 59, were disabled in 1972, compared with 1 in 10 35- to 44-year-olds. Whereas persons age 55 to 64 represented only a sixth of nondisabled adults, they accounted for more than a third of the disabled. Finally, two-thirds of disabled persons age 55 and over were unable to work regularly or at all, compared to only two-fifths of younger persons with disabilities.

Race. Blacks, who represented 9 percent of able-bodied adults in 1972, accounted for 14 percent of the disabled and 16 percent of the severely disabled. Among blacks with a disability, 58 percent could not work regularly or at all, compared to 48 percent among whites with a disability.

Sex and marital status. The incidence of disability was only slightly higher among women than men, but 56 percent of disabled women, compared with only 42 percent of disabled men, were unable to work regularly or at all. Marital status was also a factor. Among the nondisabled, only 9 percent of adults were widowed, divorced, separated, or had an absent spouse; the proportion among the disabled was twice as high.

Education. Whereas 7 of 10 able-bodied adults had at least a high school diploma in 1972, only 44 percent of the disabled and less than a third of the severely disabled had 12 years of schooling or more. A third of all persons with eight grades of attainment or less, and nearly a fifth of high school dropouts were disabled, compared to only 8 percent of those with some college education. Nearly two-thirds of the disabled with eight grades of schooling or less could not work regularly or at all, compared with two-fifths of disabled high school graduates and three-tenths of those with some college training.

The compounding of mental or physical and socioeconomic handicaps reduces the chances of labor market success. Those who are both disadvantaged and disabled are more likely to have severe employment problems than any other group. The 1969 earnings of disabled white men age 45 to 54 were three-fifths those of the able-bodied. Disabled black men in the same age bracket earned only a fourth as much as nondisabled white men; disabled black women, less than a twelfth.

MULTIPLE HANDICAPS

The incidence and severity of disability is affected by the type and number of the resulting afflictions and the functional limitations. In 1972, almost half of all noninstitutionalized adults age 20 to 64 reported suffering from one or more chronic conditions. However, only 30 percent of these were limited in the kind or amount of work, with just 15 percent unable to work regularly or at all. What made a chronic condition a disabling one? The incidence of disability and severe disability varied by condition. Only 3 in 10 persons with varicose veins, a third of those with deafness, and, perhaps suprisingly, a fourth missing arms or hands were limited in the kind or amount of work they could perform (table 4). Even smaller proportions of persons with these conditions could not work regularly or at all. In contrast, 96 percent of mentally retarded adults had work limitations, as did 89 percent of those with multiple sclerosis, 84 percent of stroke victims, 80 percent of the mentally ill, and 73 percent of those with epilepsy; more than 7 in 10 with such conditions could not work regularly or at all.

The disabled, especially the severely disabled, were more likely to suffer from these more serious problems than others with chronic conditions but no work limitations. Nevertheless, the most prevalent disabling conditions were arthritis and rheumatism, trouble with the back or spine, high blood pressure, heart trouble, and chronic nervous disorders. Looking at broader categories, musculoskeletal problems were present among three-fifths of the disabled and cardiovascular difficulties among half.

TABLE 4.—INCIDENCE OF CHRONIC CONDITIONS AND DISABILITY, 1972

Type of problem	Percent with condition who are disabled	Percent with condition who are severely disabled	Percent able-bodied with condition	Percent disabled with condition	Percent severely disabled with condition
Musculo-skeletal	45	23	13	61	61

The compounding of unfavorable conditions frequently results in disability. Whereas only 6 percent of the nondisabled reported three or more chronic conditions, more than half of the disabled were plagued by such multiple maladies. Arthritis or a nervous disorder alone might not greatly limit work, but combined with high blood pressure or thyroid problems, they might create severe impediments. The incidence of multiple conditions increases with age, and this is one of the reasons for the correlation between age and disability.

Severe and multiple conditions reduce the capacity to function physically and emotionally, and the discomforting symptoms may sap work motivation. More than four-fifths of the disabled in 1972 suffered from some physical limitation: two-fifths had trouble walking; three-fifths in lifting more than 10 pounds; and more than half could not stand for long periods or had difficulty stooping and kneeling. The majority of persons with such physical impairments were disabled, especially if they had trouble walking or reaching. The disabled were also more frequently the victims of multiple limitations. A third had five or more, compared with less than 2 percent of the nondisabled population. Eight in 10 persons reporting five or more physical limitations were limited in the kind or amount of work they could perform.

These limitations are self-assessed but apparently realistic. A study comparing physicians' and patients' assessments of physical capacity found agreement on the presence or absence of a limitation in two-thirds to three-fourths of the cases. The employed tended to overestimate their capacities and the unemployed to understate them, while transfer recipients were likely to feel more limited than their diagnoses would indicate.[1] Quite clearly, the chronic conditions and their effects are real and serious in most cases. The disabled cannot function as well as the able-bodied, and the severely disabled who are unable to work regularly or at all tend to have the most frequent and severe problems. Yet the fact remains that many with serious conditions or multiple functional handicaps are able to work while large numbers of persons with less severe problems claim to be disabled.

SEPARATING THE CAUSES

The extent that a condition or limitation is disabling depends on the work experience, demographic characteristics, and personal attributes of the individual. For instance, the white-collar worker with lower back pains or high blood pressure might be able to continue employment, whereas a laborer could not. A person whose employment options were limited to low wage, menial jobs would have a greater propensity to give up, claim disability, and live on transfers. The person who has worked at a construction job for 30 years is much more likely to have physical problems than the person who has worked at a desk.

Determining the relative importance of physical or mental and socioeconomic factors is basic to successfully prescribing services for an individual. In the aggregate, scarce resources must be allocated between medical treatments, employment and training services, and direct transfers, depending on their relative effectiveness in overcoming impediments of the target groups.

Work disability results from the interaction of a number of factors, and there is no doubt that functional limitations are crucial. In 1966, 81 percent of disabled men with no functional limitations were employed, compared with 71 percent of those with minor or moderate limitations and 45 percent of the severely limited and dependent.[2] Yet the chances of being unable to work regularly or at all were also affected by age, sex, education, and previous employment. Among the disabled with only minor restrictions, 11 percent of men age 18–44 were unable to work regularly or at all, compared with 34 percent of men age 55–64. Two-fifths of the disabled having minor or moderate limitations and less than 9 years of education were severely disabled compared with 22 percent of high school graduates.

Our assessment of the research on disability[3] indicates that, at present, there is no way to untangle the Gordian knot of interacting factors to explain why 15.6 million American adults are (or perceive themselves to be) limited in the type or amount of work they can perform.

WORK ADJUSTMENTS

The onset of disability is reflected in declining employment. Among persons who became disabled between October 1969 and March 1971, 85 percent of the men and three-fifths of the women had been employed at the onset of the disability, but a third of these had not returned to work by the survey date in the summer of 1971.

A fourth of previously employed men continued working for the same employer despite the disability, and 37 percent returned after a temporary absence; only 7 percent shifted employers. Even more dramatically, 95 percent of the women who continued working or returned to work stayed with the same employer.[4]

The disabled returning to or continuing work had to make adjustments, however. Two-thirds reported some change, with a third saying, respectively, that they did less heavy work, that they rested more often, and that they took it easier on the job. Nearly a fourth worked fewer hours. On the other hand, only 7 percent were given special equipment, and only 4 percent learned a new skill or trade.[5]

Employment immediately before and soon after disability may affect labor market success over the longer run. Seven of 10 disabled men who had been employed in the year before the onset of their condition were working in 1965, compared with 6 in 10 of those who had not been employed. For women, 44 percent of those working before onset were employed in 1966, compared with 19 percent of those previously not working. (For the disabled population in 1966, the mean duration since onset was 8 years.) Again, a key factor was the ability to return to the same job. Among men, two-thirds of those who had been employed at onset of disability stayed with or returned to the same job, 16 percent found another one, and 18 percent did not look for or did not find a job. For women, 56 percent stayed or returned, 34 percent quit looking, and only 10 percent found another job. Occupation at onset influenced the rates of continuing or returning. For men, 87 percent of farmers and farm managers, 84 percent of salesworkers, and 80 percent of clerical workers continued or returned to the same job, compared to 67 percent of all men employed at onset. Women who were farmers and farm laborers were also most likely to return to their work.[6]

Over time, the chance of employment declines. Among persons disabled less than 10 years were employed in 1966, only 78 percent of men and 71 percent of women were still working in 1969. The decline in employment among the disabled under age 45 was 15 percent, compared with 43 percent among 55- to 64-year-old workers. Among the severely disabled holding jobs in 1966, half of men and a third of women remained employed in 1969. Meanwhile, less than 1 in 8 of the disabled not in the labor force in 1966 had found employment. Because recovery rates were highest for those employed in 1966, employment dropped from 47 percent among the disabled in 1966 to 28 percent among members of the cohort remaining disabled in 1969.[7]

While longer run patterns remain a matter of conjecture, it is clear that the disabled are not a static population group, but rather one in constant flux, with inflows of newly disabled, outflows resulting from recovery, death, or retirement, and a good deal of fluctuation in the severity of physical and employment problems. In deciding who can and should be helped, the chances of improvement or recovery with and without aid are critical issues. Lower age and better education are strongly related to higher rates of improvement and recovery. Also, men tend to improve and recover more often than women do. Work prior to onset is a major determinant of work afterwards. A majority of those who eventually become employed after being disabled return to the same jobs, and those who do not more often remain outside the labor force than find other employment.

THE DISABLED IN A CHANGING LABOR MARKET

The disabled are disproportionately affected by labor market changes. In good times, employers are more willing to retain

Footnotes at end of article.

workers who have suffered some loss in productivity and to hire those for whom some adjustments may be necessary in the workplace. In bad times, those who become disabled are the most expendable workers, and disabled are also adversely affected by any disabled jobseekers lose out in the competition with others who are not disabled. The structural changes which reduce the number of lower skilled, low-paying jobs to which they are disproportionately relegated.

Between the 1966 and 1972 surveys of the disabled, the number of persons reporting a work disability of any type declined, but the number unable to work regularly or at all increased. Those reporting secondary limitations, that is, persons able to work regularly in the same job but less effectively and women unable to carry on housekeeping responsibilities, fell by 2.3 million, of which 1.6 million were men. Apparently, in the recession environment of 1972, workers with slight handicaps were less willing to report them, or perhaps many with problems had joined the ranks of the unemployed, ascribing their fate to economic conditions rather than their own difficulties.

Between 1966 and 1972, the number of severely and occupationally disabled remained relatively constant, although there were dramatic shifts within this group, suggesting a marked decline in the availability of regular work or in the willingness of those with disabilities to seek jobs. The proportion claiming inability to work regularly or at all rose from 55 to 69 percent (table 5). There were no compositional changes which would explain this dramatic decline in employability. The proportion of the severely and occupationally disabled who were dependent on the care of others declined from 14 to 11 percent. The proportion of unmarried family heads rose from 17 to 20 percent; this increased share of household heads should have been related to higher income needs and work propensities. The number of whites rose slightly while the number of blacks declined; for both groups the proportion of severely disabled increased. The educational attainment of the disabled also increased.

Changes in the characteristics of the severely and occupationally disabled do not then explain the dramatic increase in the proportion unable to work regularly or at all. What occurred was a rapid decline in employment prospects or propensities, proportionately greatest for those with the most severe physical or mental and socioeconomic handicaps. This is reflected even more directly in employment data. Between the 1966 and 1972 surveys, the proportions of the severely and occupationally disabled who were not in the labor force increased while the proportions employed declined (table 6). Over the same period, employment and labor force participation increased noticeably among the nondisabled. If the employment rate among the disabled had increased the same 6-percentage points as among the able-bodied, rather than falling 4 points, there would have been over a million additional severely and occupationally disabled persons working in 1972.

TABLE 5.—CHANGES IN THE DISABLED POPULATION, 1966 AND 1972

Disability category	1966	1972	Change
Total disabled	17,753	15,550	−2,203
Severely disabled	6,100	7,717	+1,617
Occupationally disabled	5,014	3,473	−1,541
Secondary limitations	6,639	4,360	−2,279
SEVERELY AND OCCUPATIONALLY DISABLED			
No limitations or minor one	5,253	5,015	−237
Moderate limitations	2,265	1,930	−349
Severe limitations or dependency	3,537	4,106	+434
Severely disabled:			
No limitations or minor one	2,325	2,656	+331
Moderate limitations	1,184	1,344	+160
Severe limitations or dependency	2,550	3,599	+1,049
Occupationally disabled:			
No limitations or minor one	2,923	2,361	−562
Moderate limitations	1,081	586	−495
Severe limitations or dependency	987	507	−480

REASONS FOR DECLINING EMPLOYMENT

The growth of income support was a major reason for the enormous shifts of the disabled out of the work force. The latest available data indicate that the disabled have become more and more dependent upon public support. The reported recipients of disability insurance benefits and public assistance for the blind and totally disabled increased by two-thirds between 1966 and 1972, and expenditures more than tripled. In the next 3 years, the combined caseload rose by another two-fifths, or by a greater absolute number than between 1966 and 1972. In 1971, half of all disabled household units received public support. Social security aided nearly a fourth. One in 7 received welfare benefits and 1 in 10 veterans compensation. Social insurance benefits averaged $2,100 annually per recipient unit, and public assistance, $1,500. Together, they accounted for an eighth of the aggregate income of households with a disabled adult, and almost a fourth for those with a severely disabled adult. Since household survey data tend to substantially undercount transfer payments, and since the dollar totals do not include in-kind aid, such as subsidized medical care and housing, food stamps, social services, and other assistance, the importance of government assistance is understated.

As benefit levels improved during the 1960's, the option of not working became more attractive than the low-wage, menial jobs available to many of the disabled. At the same time, however, it is clear that the disabled were pushed as well as pulled out of the labor market. There was increased competition for less-skilled jobs, as a flood of women, youth, and illegal immigrants entered the labor market. Moreover, there was a decline in the jobs traditionally held by the disabled. For instance, a disproportionate number are farmers, probably because they can work around their handicaps. The decline of small family farms and the commercialization of farming have curtailed this option. The proportion of the severely disabled with jobs who were working in agriculture fell from 24 percent in 1966 to 15 percent in 1972. Among the occupationally disabled, the decline was from 13 to 8 percent. This represented an absolute decline of 272,000 jobs, accounting for almost half of the net national decline in farmworkers over the period.

Data are not available to determine what has happened to the employment status of the disabled as a result of the massive recession in 1974 and 1975, but one indication comes from annual work experience data. The number of persons age 16 to 65 not in the labor force at all because of illness or disability remained constant at 2.5 million from 1966 to 1968, and then rose to 3.1 million in 1971 after the recession. In 1974, the number jumped to 4.3 million. Even this increase did not reflect the full impact. The disabled were overrepresented among the long-term unemployed relying on unemployment compensation and, by definition, still in the labor force until exhaustion of benefits. A survey in 1975 found that 21 percent of men and 19 percent of women who had exhausted their unemployment benefits were limited in the kind or amount of work they could perform, double the proportions in the 1970 adult population.[9]

Almost certainly, the next survey of the disabled will document a very substantial drop in employment over the 1970's. Structural shifts in demand, increased competition from women, youth, and illegal aliens, as well as increased availability of income support are critically important factors in assessing vocational rehabilitation prospects and policies.

VOCATIONAL REHABILITATION EFFORTS

With the aim of increasing employment among the disabled, vocational rehabilitation has developed into a major national social commitment. Disabled veterans have been provided compensation since the beginning of the Republic, and rehabilitation services were initiated after World War I. The Federal State vocational rehabilitation program also goes back to the 1920's. Administered by states with substantial Federal contributions, this program serves those whose physical or mental handicaps limit work and who are likely to benefit from the receipt of services. Clients range from the most severely disabled to those with only secondary work limitations. While the vocational rehabilitation program has always included public assistance and social insurance recipients among its clients, a supplementary effort was added in 1965 to rehabilitate disability insurance recipients, and in 1972 to aid blind and disabled public assistance beneficiaries. A broad range of employment and training programs were launched in the 1960's to aid the disadvantaged, including a not insignificant number of disabled. Sheltered workshops are the final major component of the rehabilitation system. These have a long history in providing employment for some of the most severely handicapped. There are other, disparate, education and training activities such as rehabilitation for workers compensation claimants and social services for disabled welfare recipients.

There is some logic to this evolving system. Sheltered workshops are the employer of last resort as well as a source of services for those most in need. Rehabilitation of

Footnotes at end of article.

severely disabled income transfer recipients is carried out by the Federal/State vocational rehabilitation program on a reimbursable basis. The basic Federal/State effort serves a mixture of clients, while veterans and manpower programs concentrate on the more advantaged among the disabled. There are functional linkages between these efforts.

All of these components have expanded rapidly in the last decade. In fiscal 1975, the program served a total of 1.8 million clients, or nearly triple the comparable figure a decade earlier (table 7). Expenditures rose over this period from $262 million to $1.7 billion, or 3.7 times after adjusting for the cost-of-living increases. During the decade ending in 1975, the Federal/State system closed a total of 4 million cases, covering an estimated 3.5 million different persons after adjusting for repeaters. A good guess is that sheltered workshops employed nearly a million separate clients over the decade, and manpower and veterans programs together reached about half a million.

In addition to these publicly supported efforts, the disabled may purchase services themselves, rehabilitation may be financed by insurance plans, or aid may be received from a variety of nonprofit agencies. In fact, two-thirds of the disabled who receive rehabilitation services do not report getting them from a public agency or program. Counting both public and other sources of aid, a fourth of the 15.5 million disabled in 1972 reported having received rehabilitation services, and 36 percent of these received them in the prior year. The incidence of receipt was roughly the same among the severely, occupationally, and secondarily limited disabled, but proportionately 50 percent more men than women were served. The disabled age 18 to 44 were almost twice as likely to have been assisted as those who were older. Likewise, those supported by transfers received aid twice as frequently as other disabled. Rehabilitation services may have aided in recovery or gone to those recovering on their own.

TABLE 7.—VOCATIONAL REHABILITATION ACTIVITY 1965 AND 1975

	Fiscal 1975	Fiscal 1965
Activity clients served (number in thousands):		
Federal/State vocational rehabilitation:		
Basic program	1,143	441
Services for disability insurance recipients	76	----
Services for Supplemental Security Income beneficiaries	46	----

Sheltered workshops	455	50
Manpower programs	178	23

[1] Does not include special benefits for housing adaptations, cars or special equipment but does include estimate of costs of counseling psychologists and vocational rehabilitation specialists employed by the Veterans Administration.

Source: Manpower Report of the President, 1976 and 1966; William H. Button, "Sheltered Workshops in the United States: An Institutional Overview," Rehabilitation, Sheltered Workshops and the Disadvantaged (Ithaca, N.Y.; Cornell University, 1970); State Vocational Rehabilitation Agency Program Data, Fiscal Years 1968 and 1975 (Washington, U.S. Department of Health, Education, and Welfare, 1969, 1976); Veterans Benefits Under Current Educational Programs (Veterans Administration, 1974); Caseload Statistics, State Vocational Rehabilitation Agenciese, 1974 (Washington, U.S. Department of Health, Education, and Welfare, 1975); Sar A. Levitan and Garth L. Mangum, Federal Training and Work Programs in the Sixities (Ann Arbor, University of Michigan—Wayne State University, Institute of Labor and Industrial Relations, 1969); Annual Report, Administration of Veterans Affairs, 1965 (Washington, 1965); Greenleigh Associates, The Role of Sheltered Workshops in the Rehabilitation of the Severely Handicapped (New York Greenleigh Associates, 1976) Vol. II; Special Analysis J, Budget of the United States Government, 1977 (Washington, 1976); Committee Staff Report on the Disability Insurance Program, House Committee on Ways and Means (Washington, 1974).

In 1972, 9.2 million of the nondisabled responded that they had previous disabilities. One and a half million, or 17 percent, remembered receiving vocational services—a proportion lower than among those remaining disabled. Of these, 335,000 had been aided in the previous year.

There has been a dramatic increase in service levels. Between 1966 and 1972, the proportion of the disabled who had been aided doubled. The 1.4 million assisted in 1971 was twice the number in 1965. The severely disabled represented 46 percent of those reporting services in 1965 but 52 percent in 1971, though their relative chances of receiving services did not improve.

NEED ESTIMATES

Vocational rehabilitation efforts seek to increase the employability of those who are limited by mental or physical handicaps, but not all disabled persons are feasible candidates. Some may have perfectly adequate earnings; others without earnings may be receiving income transfers; still others may have so little vocational potential that services could do little to enhance their employability. Any reasonable estimate of needs must screen out persons with less consequential difficulties as well as those with problems so severe that they can never be overcome and those who do not want help. There are no hard and fast rules.

Five major universe of needs studies have yielded estimates of 3.5 to 7.1 million for fiscal 1973.[9] One set of calculations yielded the 7.1 million estimate. It included all persons under 65 who had retired or left their last employment because of disability, were forced into part-time work, or could not perform housekeeping or schoolwork. Less inclusive definitions confined the universe to disabled persons who were unemployed or underemployed, homemakers with limited capability, and persons actively seeking work but who would work if they had the opportunity. They estimated that 5.1 million disabled persons would benefit from services, or 3.5 million excluding persons with only secondary work limitations.

Under our assumptions, the estimated universe of need is reduced substantially:

1. Persons in need of homemaker services are excluded. Though they are eligible for vocational rehabilitation services, there is no standard for determining who needs aid or what the benefits and costs may be. Dealing with homemakers is certainly different than aiding labor force participants. Excluding homemakers from some of the less inclusive needs estimates (by Susan Shea Ridge, John D. Worrall, Craig Schoon, and Monroe Berkowitz), there were 3.4 million disabled persons in need of employment-related services counting those with secondary work limitations, or 3.0 million excluding them.

2. Data from the 1972 survey of the disabled suggest that unemployment is less than projected in the earlier estimates based on 1966 numbers. In 1972, a total of 710,000 disabled were jobless, or 485,000 excluding those with secondary work limitations, compared to the estimated 979,000 and 680,000, respectively.

3. Projected for 1973 from 1966 data, our estimate of the number of disabled not in the labor force but wanting a job is lower than the 1.4 million estimated in previous needs surveys. There were 619,000 persons in 1973 who claimed they wanted a job currently but were not looking because of either illness or disability, and some of these were merely ill rather than disabled. Many of these disabled may want a job but are unable to work because they are too incapacitated. Others may claim to want a job because it is socially acceptable, but really have little desire. Assuming arbitrarily that half of the 619,000 are disabled, desire employment, and can feasibly work with assistance, the discouraged disabled would be 310,000, including 60,000 persons with secondary work limitations.

4. The 1972 survey found that among the 6.7 million employed disabled, 18 percent earned under $50 weekly. This estimate of the underemployed would yield 1.2 million persons in 1972, including 259,000 persons with secondary work limitations.

Using these alternative figures (and assuming they held true for 1973 when economic conditions improved), the universe of need would be 2.2 million, or 1.7 million, excluding those with secondary work limitations.

Comparing enrollments in vocational rehabilitation programs with these needs estimates exaggerates the service deficit in two ways: First, public programs are only one source of services. If there is a deficit, it may make sense to expand the public vocational rehabilitation programs, but the deficit must be calculated by considering *all* providers. Second, the ratio of services to needs compares a flow with a stock, that is, persons served each year with all persons disabled and in need of services.

It is difficult to estimate the annual number of persons who either become disabled and need services or have a deterioration in conditions generating need. The 1971 Survey of Recently Disabled Adults found that 1.7 million persons became disabled between October 1969 and March 1971. On an annual basis, this amounted to 1.2 million, including 574,000 severely disabled, 245,000 occupationally disabled, and 339,000 persons with secondary work limitations. Yet in 1971, more than a fourth of these newly disabled were employed full time, compared with half the total work force.[10] If the differential is used as an estimate of the extra need generated by disability, this results in only 280,000 persons annually added to the disabled with serious labor market problems.

Additional need increments are generated when those already disabled suffer physical or economic setbacks. Among the 2.3 million disabled persons employed full time in 1966, 573,000 were either not in the labor force, unemployed, or employed part time 3 years later. If half of these are arbitrarily and conservatively assumed to be in need of services (part-time working may be voluntary and most of those outside the labor force do not want jobs), the number coming into need over 3 years is 286,000, of whom a third may be assumed to enter the universe of need in any particular year. Adding the newly disabled and those with deteriorating conditions would suggest an annual flow of around 400,000 into the universe of need. Whatever the exact number, it is clear that public rehabilitation programs, serving more than 1.5 million disabled persons annually, come much closer to meeting needs than is frequently assumed.

REHABILITATION AS AN INVESTMENT

Central to vocational rehabilitation and manpower programs for the disadvantaged is the notion that public investments in human capital can be profitable. Services raise productivity and future earnings, and the present value of this stream of benefits can be compared with program outlays to calculate a rate of return. A benefit-to-cost ratio of 1.0 means that the services pay for them-

Footnotes at end of article.

selves through subsequent gains of recipients. A ratio of 1.2 means that the return on the investment is 20 percent, comparing favorably to the payoff sought in business investments.

A number of benefit-cost studies in the 1960's purported to demonstrate the effectiveness of manpower programs for the disadvantaged. These varied in their scope, focus, technical sophistication, and assumptions. Though the results were generally favorable, most frequently yielding benefit-cost ratios between 1 and 4 under standard assumptions,[11] the uncertainties in the methodology left room for doubt about the payoff, and some critics went so far as to conclude that manpower programs had failed.

In contrast, benefit-cost analyses of vocational rehabilitation yielded payoff rates so high that few questioned the profitability and value of these efforts. Benefits typically exceeded costs fivefold to thirty-five fold.[12] The lowest ratios for rehabilitation programs usually exceeded the highest for manpower programs, suggesting that the former were a more reasonable investment.

Under careful scrutiny, however, the differences in payoff rates appear to be more the result of benefit-cost methodology than differing program impacts. Most critically, the studies have not used control groups to assess the gains of participants in rehabilitation. Since rehabilitation programs select the disabled who have better chances of recovery and increased employability, and since many among the disabled improve without receiving any help, all of the changes for participants cannot be attributed to enrollment. The use of these techniques inflates the vocational rehabilitation benefit cost estimates.

THE PROPER RECIPE

The Federal/State vocational rehabilitation program demonstrates that many roads lead to Rome. The States offer essentially 50 different models of possible service levels and mixes. About the only thing which can be done is to try to pin down the relationships between certain approaches and background factors. Job creation makes sense in a slack labor market. To the extent the more severely handicapped are served, the need increases for sheltered workshop opportunities. If the needs of a more select clientele are emphasized, public sector transitional jobs would be desirable. Flexible supported work programs, now being tested for disabled groups such as addicts and alcoholics, are another alternative.

In a tight labor market, on-the-job training might receive greater play, perhaps in the form of a special national subsidy program for employers hiring the handicapped. This would be most effective when combined with affirmative antidiscrimination efforts. To the extent that the creation of jobs lessens the need for counseling and restoration, such services can be targeted for those who cannot perform in available slots.

These observations stop far short of identifying an ideal service mix. In the absence of hard evidence, judgments must be based on "gut feelings about the nature of the problems and the promise of different approaches. Since the employment perspective begins by concentrating on labor markets and the vocational dimensions of rehabilitation, it is perhaps not surprising that this approach would end up favoring greater emphasis on job creation and development. There is evidence, however, that the majority of potential clients support this priority. Among the 1972 disabled or previously disabled who had received services from any source, 71 percent reported receipt of physical therapy and special devices compared with only 28 percent getting what they considered vocational services. Yet when all the disabled and previously disabled (including previous recipients of aid) were asked what services they currently wanted, 67 percent of those with needs wanted vocational assistance and only 20 percent physical therapy or special devices. Among the recovered still desiring services, less than a tenth needed restoration, but four-fifths wanted vocational assistance.

The message is not simply that restoration is being overemphasized or that the socioeconomic handicaps of the disabled should receive more attention. Rather, it is that current restoration and labor market efforts for the disabled will have a greater impact if more attention is paid to the jobs which may be eventually secured. This means more than merely gearing up labor market services for the disabled. The disabled who are at the end of the labor queue need special assistance in overcoming institutional barriers and reestablishing or establishing a lasting job connection. Training and other services must be linked with jobs, and where these are not available they must be forged. Subsidies and job creation programs can be used as mechanisms to change institutions where feasible. Greater focus is needed on placing the disabled in better jobs where they can sustain their independence without falling back on relief. There must be a renewed commitment to self-supporting employment, the primary goal of vocational rehabilitation.

ABROAD IN THE LAND: LEGAL STRATEGIES TO EFFECTUATE THE RIGHTS OF THE PHYSICALLY DISABLED

"Movement, we are told, is a law of animal life. As to man, in any event, nothing could be more essential to personality, social existence, economic opportunity—in short, to individual well-being and integration into the life of the community—than the physical capacity, the public approval, and the legal right to be aboard in the land." [1]

The past decade has witnessed a growing public awareness of the rights of many disadvantaged and previously ignored groups in society. Essentially unnoticed, however, are the problems of the physically disabled.[2] Discrimination against the handicapped exists in many forms. For instance, entire school systems flagrantly violate state law by excluding handicapped children; [3] planners design public buildings which are inaccessible to the physically disabled [4] and employers, fearful of higher insurance costs, refuse to hire them.[5] While the ensuing economic costs are serious, the human costs, in terms of the suffering and wasted lives, are even more distressing.

While a number of laws have been enacted which affect the handicapped [6] it is only recently that the handicapped themselves vocally have asserted their right to equal treatment.[7] Proposed amendments to Title VI [8] and Title VII [9] of the Civil Rights Act of 1964 would have prohibited discrimination against the handicapped in federal programs and in private employment. Although there was strong support for these bills among the handicapped, no action was taken. A similar provision to prohibit discrimination in federal programs was included in the Rehabilitation Act of 1972 [10] which was passed by Congress but subsequently vetoed by the President.[11]

In view of this limited legislative action, the handicapped may be forced to resort to the courts in order to vindicate their rights. To do so, they must develop new legal strategies by using existing theories in previously unexplored ways. This Note will consider the development of such strategies in the areas of education, physical access and employment.

EDUCATION

Sixty percent of the estimated seven million handicapped children in the United States are denied the special educational assistance they need for full equality of opportunity.[12] One million are excluded entirely from public school systems.[13] The bases for this discrimination lie in constitutional provisions,[14] statutes [15] and court decisions [16] of the various states. Two recent district court opinions, however, recognized the right of the handicapped to participate equally in public education. A consent decree issued in *Pennsylvania Association For Retarded Children* v. *Pennsylvania* [17] required the state to provide free access to public education and training for all mentally retarded children.[18] The court in *Mills* v. *Board of Education* [19] stated that the education right extended to the physically handicapped as well as to the mentally retarded.[20] The *Mills* court held that the denial of a publicly supported education for the handicapped in the District of Columbia, where public education was available to all others, violated the due process clause of the fifth amendment.[21] The same rationale may be applicable to the states through the equal protection clause of the fourteenth amendment.[22]

The Supreme Court has applied two tests

Footnotes at end of article.

for judging whether a state's justification defeats an equal protection challenge. Under the more lenient rational basis test, a state's classification is unconstitutional only if based on grounds totally irrelevant to the state's objective.[23] However, when fundamental interests [24] or suspect classifications [25] are involved, the Court scrutinizes discriminatory laws more carefully and requires the state to demonstrate an interest sufficiently compelling to overcome a presumption of invalidity.[26]

Discrimination against the handicapped may be a suspect classification. The courts have found suspect classifications when the particular group involved is saddled with such disabilities, subjected to a history of such purposeful discrimination, or relegated to a position of such political weakness as to require special protection.[27] The stigma of inferiority usually attached to such a classification has been the major determining factor in designating classifications as suspect.[28] Handicapped groups historically have been politically weak and fragmented,[29] and handicapped persons have been stigmatized by society with a badge of inferiority.[30] The handicapped condition, often congenital and unalterable, has been analogized to racial classifications [31] which almost always compel the strict standard of review.[32] Classification of the handicapped, involving a politically weak group with a congenital or unalterable trait, similarly should undergo the strictest scrutiny by the courts.

The alternative method to invoke the application of the compelling state interest test is to recognize education as a fundamental interest.[33] The Supreme Court, however, in *San Antonio Independent School District* v. *Rodriguez*,[34] sustained Texas' use of the property tax as the means for financing public education, while holding that education is not a fundamental interest.[35] The Court, nevertheless, left open a door to a constitutional attack on unequal educational opportunity when this inequality consists of an absolute denial of education.[36] Such an absolute denial of education is what confronts many handicapped children.[37] Hence the holding of *Mills* v. *Board of Education*,[38] that the right to a free, publicly supported education extends to all handicapped children,[39] should not be placed in jeopardy by the *Rodriguez* decision. In situations where there is no absolute denial of education to the handicapped, but merely the allegation that the education provided by the state is inadequate, the *Rodriguez* decision will limit plaintiff's attempts to obtain the strict scrutiny of suspect classification analysis.

If successful in establishing the handicapped condition as a suspect classification, traditional arguments offered as justifications by the state probably would not pass the compelling interest test. While a state might argue that prohibitive costs compel such classification, the Supreme Court has stated previously that constitutional rights cannot be denied merely because their protection will necessitate the expenditure of public funds.[40] Similarly administrative inconvenience is not a compelling interest justifying the exclusion of the physically disabled.[41] School systems which discriminate against or totally exclude handicapped children then would have to provide the equal educational opportunities to which all children are entitled.[42]

PHYSICAL ACCESS

Transportation

The two major barriers to complete utilization of transportation facilities by the physically handicapped are architectural design and legal recognition of the rights of the handicapped. Architectural impediments are particularly acute for individuals confined to wheelchairs who are often unable to enter buses, trains, planes, or transportation terminals.[43] Since these physical obstacles can be eliminated effectively by modern technology and proper planning,[44] the only remaining barrier to sufficient mobility is the lack of legal principles implementing the right to fully use such facilities.[45] Even where that right clearly is established by legislation,[46] some officials have failed to initiate effective action.[47] Thus, the courts again may be called upon to provide relief where legislation is either non-existent or not fully implemented by public officials.

The Supreme Court has developed the principle that the right to interstate travel and the right to use the instrumentalities of interstate commerce are fundamental under the Constitution.[48] In *Shapiro* v. *Thompson*,[49] the Court declared that statutes requiring residence as a prerequisite for the receipt of welfare benefits infringe upon the constitutional right to travel by inhibiting movement from one state to another.[50] The Court reasoned that residency requirements create two classes of potential welfare recipients—those living within the state for the prescribed period and those living within the state for less than the prescribed period.[51] Applying the compelling state interest test, the Court concluded that a classification which infringes the fundamental right to travel violates the equal protection clause of the fourteenth amendment.[52]

Similarly, all travelers might be classified into two groups—the physically handicapped, who have restricted access to the instrumentalities of interstate travel, and the non-handicapped, who have complete access. Since these discriminatory restrictions constitute an infringement on the right to travel, transportation companies should be required to demonstrate that a compelling state interest justifies the exclusion of the handicapped. Of course, some governmental action must be shown as a prerequisite for application of either the due process or the equal protection clauses.[53] Publicly owned transportation companies, and even certain privately owned companies,[54] would satisfy the "state action" requirement.

The cost of solving current architectural problems through existing technology should not be a sufficiently compelling interest to justify the denial of a fundamental constitutional right such as travel.[55] Therefore, courts may be asked to require publicly owned and some privately owned transportation systems to spend the funds necessary to make their facilities accessible to the physically handicapped.

Public buildings

The handicapped presently are excluded from many public buildings by architectural barriers ranging from monumental staircases to six-inch curbs.[56] Although federal law requires that all new federal and federally assisted facilities designed for public use be readily accessible,[57] there is no provision for existing structures.[58] State statutes addressing the problem of architectural barriers also generally ignore the need for modifications of existing buildings.[59] These buildings house a wide range of federal and state agencies and services to which the public must have access; the efforts of the handicapped individual to secure assistance and present grievances and complaints are impeded by his inability to gain physical access to the buildings. If this interference infringes the handicapped person's constitutional rights, removal of the interference may be forced by court action.

The Supreme Court long has recognized that citizens have the right to come to their "seats of government" [60] to transact business and petition for redress of grievances.[61] This freedom to petition is protected by the first amendment [62] and applies to all branches of government, including the administrative agencies.[63] The judiciary has been vigilant to prohibit infringement upon the citizen's right to communicate freely with the government. In *Brown v. Louisiana* [64] the Supreme Court upheld the right of the citizen to be physically present in a public building to petition for redress of a grievance related to the operation of that facility.[65] Moreover, in *Edwards* v. *South Carolina* [66] the Court viewed the defendants' efforts to enter the state house grounds, a public facility, to present their grievances as an exercise of first amendment rights in its most "pristine and classic form." [67] Thus, while public agencies have the right to regulate access to their facilities,[68] they may not do so in an unreasonable and discriminatory manner.[69] Since the physical barriers which impede the handicapped individual's access generally exist because of poor planning choices and serve no useful purpose, they may be attacked as unreasonable and discriminatory. The possibility of alternative means of communication is irrelevant. The defendants in *Brown* and *Edwards* had other means of communication but the Court nevertheless found the restrictions on defendants' access to be an unjustifiable burden on their first amendments rights.[70]

Since the right to petition is protected by the first amendment it may only be infringed when a danger exists to interests which the state lawfully may protect.[71] The state clearly has infringed the rights of the handicapped since, although it did not create their physical condition, by constructing physical barriers it created their exclusion.[72] The state had the alternative when building its facilities to use designs which would have made them fully accessible at similar cost.[73] By an official choice of construction [74] the state has infringed the rights of the handicapped without countervailing state interest. Therefore the state has a duty to eliminate all such impediments to the free exercise by the handicapped of their rights.[75] Some changes, such as ramps and railings, may be effected at minimal financial outlay; [76] others may involve expensive structural changes. The courts, however, will order costly protections when Bill of Rights freedoms are involved.[77] Thus the handicapped individual may have a remedy against either the state or the federal government for violation of his first amendment rights.

EMPLOYMENT

Private employment

Only a small percentage of the estimated 14 million physically handicapped Americans who could work if given the opportunity actually are employed.[78] The handicapped individual's unemployment naturally impairs his ability to support a family and to participate fully in the daily activities of society. Some, unable to rely on family support or other resources, are forced to accept welfare.[79]

Although transportation and physical barriers play significant roles in restricting employment possibilities,[80] a crucial factor is employer attitude. In addition to stereotyped prejudices,[81] many employers fear that the handicapped person will be unable to perform assigned tasks.[82] This attitude exists despite the results of numerous studies showing that the handicapped worker, when assigned an appropriate position, performs as well as, or better than, his non-handicapped co-workers.[83]

In spite of reassurances by insurance associations, many employers also fear that workmen's compensation rates will increase due to employment of the disabled.[84] However, employment of the handicapped does not affect the premium rates either for non-occupational benefit plans or for workmen's compensation.[85] Furthermore, 46 states have second-injury laws which afford the employer some protection against bearing the full cost of support if a disabled employee is reinjured and permanently disabled.[86]

Footnotes at end of article.

Nevertheless, employer prejudice against the handicapped as an insurance liability remains.

Present governmental efforts promote voluntary action by employers [87] and encourage placement activities [88] but do not aid persons refused employment because of handicaps.[89] Other groups, especially blacks, also face serious discrimination in hiring by private employers. Gradually barriers are being overcome and jobs are being opened to qualified persons without regard to race. Progress has been achieved by litigation based either on recent [90] or on Civil War era [91] legislation. There may be some hope for similar progress through the courts for the handicapped.

The primary federal law prohibiting discrimination by private employers, Title VII of the Civil Rights Act of 1964,[92] clearly does not proscribe discrimination against the handicapped.[93] However, a 1968 Supreme Court decision, *Jones v. Alfred H. Mayer Co.*,[94] involving racial discrimination may provide a possible avenue of relief. The Court held that Section 1982 of title 42 of the *United States Code*,[95] a relatively obscure statute originally derived from the Civil Rights Act of 1866,[96] applies to private racial discrimination in the sale of housing.[97] In refuting the general belief that state action was required,[98] the Court indicated that a companion statute, Section 1981,[99] is applicable to private discrimination in employment.[100]

The *Jones* Court examined the legislators' intent in enacting the 1866 Act and the thirteenth amendment, the latter stating that "[n]either slavery nor involuntary servitude . . . shall exist within the United States . . ." [101] An enabling clause grants Congress the power to enforce the amendment by appropriate legislation.[102] The *Jones* Court considered the amendment to have both a negative aspect—the abolition of slavery—and an implicit positive corollary—the establishment of universal freedom.[103] While specifically declining to decide whether the amendment itself did any more than establish universal freedom,[104] the Court held that Congress, under the enabling clause, had the power to decide what acts constituted "badges and incidents of slavery" and thus could be prohibited.[105] Although the Court indicated that *Jones* is applicable only to race,[106] some commentators suggest that the rationale of *Jones* applies to other forms of discrimination.[107] Thus, it is possible to construct an argument asserting that the thirteenth amendment and the subsequent Civil Rights Act of 1866 prohibit employment discrimination against the handicapped.

In passing the thirteenth amendment the primary consideration in the minds of the legislators was Negro slavery in the South.[108] However, in drafting the amendment the legislators recognized that it would make fundamental changes in the federal system and would enable Congress to establish laws insuring equality for all citizens.[109] By enacting section one of the 1866 Act, Congress extended to "citizens of every race and color" the same rights to purchase and contract as those enjoyed by "white persons." [110] Section 1981, derived from section one, is even broader—encompassing not only citizens but "all persons" within the United States.[111] The debates at the time of enactment indicate that the legislators did not intend to limit the protection of the Act to blacks.[112] Both sides in the controversy stated that the Act applied to all persons.[113] The legislators intended to prevent any group from being held in an inferior status by ensuring that only one level of citizenship existed throughout the land.

Due to its language and its history, section 1981 has been applied to prohibit both racial [114] and non-racial [115] discrimination. If the intent of the framers was indeed to secure universal freedom and to establish equality, then "white citizens," must be interpreted broadly. This standard was selected at a time when, compared with other groups, white did enjoy superior right and was intended to indicate the highest form of personal liberty and freedom. The purpose and intent of the framers of the statutory provision, therefore, requires that the law not be limited to racial discrimination or to non-whites.[116]

The *Jones* Court, while calling segregated housing patterns a "relic" of slavery,[117] applied the term to practices which could be traced only indirectly to the institution of slavery itself.[118] Thus the expression should not be used to limit a "badge or incident" to those employment practices which existed during the period of slavery. If by "relic" the Court meant the discrimination which the black man faces, not because of his former servitude, but because of his current second-class status in society,[119] then that same discrimination is suffered by the handicapped who are isolated and set apart from the mainstream of society.[120] It cannot be said that the handicapped are treated as first class citizens enjoying all of the rights of "white persons." The handicapped, therefore, should be protected by both the thirteenth amendment and section 1981.

Such a view of the amendment and its purpose is consistent with the intention of its framers to secure universal freedom.[121] Even if the framers comprehended no other discrimination than racial, the Constitution is not an inflexible document, frozen by the attitudes and conditions which prevailed at the time of its passage.[122] Rather, the Constitution is a living institution, adaptable to the circumstances of modern society and responsive to the ideal of true equality for all people. Since the courts must determine the significance of constitutional principles by considering their growth as well as their origin,[123] their interpretation of the Constitution can be responsive to the changing social and economic values of the nation.[124] The evil which the thirteenth amendment originally sought to eradicate was the inherent injustice of maintaining a class of people in a position of inferiority. An interpretation of the amendment which includes all persons who suffer from such inferiority, even if not the specific intent of the framers, would be within the spirit of their enactment.[125]

Public employment

While federal agencies are prohibited by law from discriminating against an individual because of a physical handicap,[126] few states have similar statutes. Moreover, the courts have given scant attention to whether a state agency is prohibited from refusing to hire an otherwise qualified person purely on the basis of a physical handicap.[127] The Supreme Court consistently has recognized that the fourteenth amendment, while granting the states power to treat classes of people in different ways,[128] does deny them the power to discriminate on the basis of irrelevant criteria.[129] Thus the Court, although never acknowledging the existence of a right to public employment,[130] has held that a person constitutionally is protected by the fourteenth amendment from arbitrary employment discrimination by the state.[131]

If a handicapped individual alleges facts which indicate arbitrary employment discrimination, action may be maintained under section 1983 of title 42 of the United States Code.[132] Since the action of an agency through its officials is state action within the meaning of the statute, the claim is cognizable.[133] The complainant of course must be prepared to prove that the denial of employment was due to discrimination and not to a lack of proper qualifications.

If an action is maintainable under either section 1983 or the fourteenth amendment alone,[134] the handicapped person may have recourse against a number of employers, depending upon their relationship with the state. Under a broad interpretation an action should be maintainable against all public agencies as well as private organizations significantly controlled by the state.[135] The handicapped individual must select the defendant carefully since municipalities may be immune from suit under section 1983.[136] However, recovery has been allowed against entities such as school boards [137] and state universities.[138] Even if an immunity exists, the plaintiff may sue the state employee who deprived him of his rights in the employee's individual capacity [139] Thus, the handicapped may have a potent means of redress for public employment discrimination.

CONCLUSION

Although concern for the plight of the handicapped may be increasing, they still face serious obstacles in their effort to achieve equal treatment by society. While many areas merit attention, education, physical access, and employment are among the most significant. Although there has been little litigation involving the rights of the disabled, possibilities for redress do exist. By carefully selecting strong cases in which the right denied is extremely important, and the discrimination and damage are evident, the handicapped may be able to achieve some success through the courts. However, the theories discussed herein are only suggestions for legal action; they are largely unexplored and do not preclude the development of other strategies.

It is nonetheless imperative for the handicapped to continue to focus efforts on Congress and the state legislatures. Legislation ensuring the rights of the handicapped would be the most uniform and far reaching solution to the problems presented. The inclusion of the handicapped among those protected by the Civil Rights Act of 1964 [140] is the most desirable solution on the federal level. Such an amendment would allow the handicapped access to the Act's complaint mechanisms and to the expertise of its enforcement offices. The enactment of legislation will not, however, be the end of the struggle. Rather, it will be the beginning of a process which eventually must ensure that every handicapped individual has an even start with the rest of society.

FOOTNOTES

[1] Jacobus tenBrock, *The Right to Live in the World: The Disabled in the Law of Torts*, 54 CALIF. L. REV. 841 (1966) (Professor tenBrock himself was blind).

[2] The total number of physically handicapped individuals in the United States is not readily ascertainable. One authority recently placed the number at 11.7 million. *See Hearings on H.R. 8395 Before the Subcomm. on the Handicapped of the Senate Comm. on Labor and Public Welfare*, 92d Cong., 2d Sess. 265 (1972) [hereinafter cited as *Handicapped Hearings—Senate*]. The difficulty in obtaining accurate and meaningful statistics is attributable to the inability of statisticians to measure the effect of a defined handicap on the capacity of the handicapped to function normally in society. For example, the epileptic may not be handicapped in his capacity to use public transportation; however, he is severely limited in his ability to secure and maintain employment. *See* M. Gandy, Notes on Employment Problems and Epilepsy Patients, Jan. 4, 1971 (available from Epilepsy Foundation of America). Similarly, an individual with a spinal cord injury may be able to obtain employment but incapable of utilizing public transportation in order to seek and maintain employment. *See Handicapped Hearings—Senate* 1006. Numerical statistics must be evaluated in terms of the resultant effect of a specific disability on participation in normal activity. *See generally* U.S. SOCIAL SECURITY ADMIN., DEP'T OF HEALTH, EDUC., & WELFARE, SOCIAL SECURITY

SURVEY OF THE DISABLED; 1966 (Rpt. No. 10, 1970); U.S. DEP'T OF HEALTH, EDUC., & WELFARE, CHRONIC CONDITIONS AND LIMITATIONS OF ACTIVITY AND MOBILITY (National Health Survey Series 10, No. 61, 1971); U.S. HEALTH SERVICES & MENTAL ADMIN., DEP'T OF HEALTH, EDUC., & WELFARE, USE OF SPECIAL AIDS, (National Health Survey Series 10, No. 78, Public Health Service Pub. No. (HSM) 73-1504).

[3] *See* CONG. REC. 1258 (1972) (remarks of Representative Vanik).

[4] *See* Washington Post, Dec. 8, 1972. § D, at 3, col. 1.

[5] *See* M. Gandy, *supra* note 2, at 8.

[6] Most of these laws do not secure the civil rights of the handicapped, but rather provide services and assistance. 29 U.S. §§ 31-42b (1970) (vocational rehabilitation for persons injured in industry); Developmental Disabilities Services and Facilities Construction Amendments of 1970, 42 U.S.C. §§ 2661-66, 2670-77c (1970). *See generally* U.S. DEP'T OF HEALTH, EDUC. & WELFARE, SUMMARY OF SELECTED LEGISLATION RELATING TO THE HANDICAPPED (1971). However, three recently enacted federal laws protect some aspects of a handicapped person's civil rights. *See* 42 U.S.C. §§ 4151-56 (1970) (prohibits architectural barriers in newly constructed and renovated federal buildings); Act of Oct. 21, 1972, Pub. L. No. 92-515, 86 Stat. 970 (protects civil rights of the blind and the otherwise physically disabled in the District of Columbia; requires equal access to public places, public accommodations and conveyances; prohibits discrimination in employment; and guarantees equal access to housing); Education Amendments of 1972, Pub. L. No. 92-318, § 904, 86 Stat. 235 (prohibits discrimination against the blind in federally funded educational programs).

Several states have gone further than the federal government in securing the rights of the disabled. The Illinois constitution guarantees the physically and mentally handicapped the fullest possible participation in the social and economic life of the state. ILL. CONST. art I, § 19. Other states have anti-discrimination laws protecting handicapped persons seeking employment in private industry. *See* IOWA CODE ANN. § 601A.7 (Supp. 1972); WIS. STAT. § 111.31 (1969). In addition, many state constitutions provide for education as a basic right. *See* F. WEINTRAUB, A. ABESON AND D. BRADDOCK, STATE LAWS ON EDUCATION OF HANDICAPPED CHILDREN; ISSUES AND RECOMMENDATIONS 11 (1971). *But see id.* at 11-12, 17 (some state constitutions permit omission from mandatory attendance laws of children with certain handicaps); notes 14-16 *infra* and accompanying text. A number of state statutes provide that publicly funded buildings must be accessible to handicapped persons, and some statutes include publicly used-privately owned buildings as well. *See* COMMITTEE ON BARRIER FREE DESIGN, THE PRESIDENT'S COMMITTEE ON EMPLOYMENT OF THE HANDICAPPED, A SURVEY OF STATE LEGISLATION TO REMOVE ARCHITECTURAL BARRIERS. *See also* note 59 *infra*.

[18] *Id.* at 1259.

[19] 348 F. Supp. 866 (D.D.C. 1972).

[20] *Id.* at 878.

[21] *Id.* at 875.

[22] The fifth amendment, which contains a due process clause, is applicable to the District of Columbia, while the fourteenth amendment, which contains both a due process clause and equal protection clause, applies only to the states. *See* Bolling v. Sharpe, 347 U.S. 497, 499 (1954). Though both concepts stem from the American ideal of fairness, they are not mutually exclusive. While the equal protection clause is a more explicit safeguard against prohibited unfairness than the due process clause, every interest found to be fundamental and protected under due process probably is fundamental under the equal protection clause as well. *See Developments in the Law—Equal Protection*, 82 HARV. L. REV. 1065, 1130 (1969). Thus the *Mills* court's rationale based on the due process clause in the District of Columbia is sound precedent for application of the equal protection clause to the states.

[23] *See, e.g.*, Reed v. Reed., 404 U.S. 71, 75-76 (1971); Morey v. Doud, 354 U.S. 457, 463-64 (1957); Lindsey v. Natural Carbonic Gas Co., 220 U.S. U.S. 61, 78 (1911); *see* notes 129-130 *infra* and accompanying text.

[24] Fundamental interests include travel, voting, criminal procedure, marriage and procreation. *See* Shapiro v. Thompson, 394 U.S. 618, 638 (1969) (travel); Reynolds v. Sims, 377 U.S. 533, 561-62 (1964) (voting); Douglas v. California, 372 U.S. 353, 357 (1963) (criminal procedure); Skinner v. Oklahoma *ex rel.* Williamson, 316 U.S. 535, 541 (1942) (marriage and procreation).

[25] Suspect classifications are those classifications based on alienage, race and national ancestry. *See* Graham v. Richardson, 403 U.S. 365, 371 (1971) (alienage); Loving v. Virginia, 388 U.S. 1, 9 (1967) (race); Korematsu v. United States, 323 U.S. 214, 216 (1944) (national ancestry).

[26] *See, e.g.*, Dunn v. Blumstein, 405 U.S. 330, 339 (1972); Harper v. Virginia Bd. of Elections, 383 U.S. 663, 670 (1966); McLaughlin v. Florida, 379 U.S. 184, 191-92 (1964). The presence of a fundamental interest or a suspect classification is sufficient to trigger the compelling state interest test. *See, e.g.*, Graham v. Richardson, 403 U.S. 365, 371-72 (1971); Shapiro v. Thompson, 394 U.S. 618, 638 (1969); Loving v. Virginia, 388 U.S. 1, 11 (1967); Skinner v. Oklahoma *ex rel.* Williamson, 316 U.S. 535, 541 (1942).

[27] *See* San Antonio Independent Schol Dist. v. Rodriguez, 41 U.S.L.W. 4407, 4415 (U.S. Mar. 21, 1973).

[28] *See, e.g.*, Loving v. Virginia, 388 U.S. 1, 7 (1967) (racial classification); Brown v. Board of Educ., 347 U.S. 483, 494 (1954) (racial classification); Korematsu v. United States, 323 U.S. 214, 239 (1944) (Murphy, J., dissenting) (national ancestry classification). *See generally* Comment, *The Evolution of Equal Protection—Education, Municipal Services and Wealth*, 7 HARV. CIV. RIGHTS-CIV. LIB. L. REV. 103, 132-35 (1972).

[29] *See Handicapped Hearings—Senate* 564-67.

[30] Kriegel, *Uncle Tom and Tiny Tim: Some Reflections on the Cripple as Negro*, 38 AMERICAN SCHOLAR 412 (1969). *But see Developments in the Law, supra* note 22, at 1127 (stigma of inferiority does not attach to certain physical disabilities as it does to recognized suspect classifications).

[31] Kriegel, *supra* note 30, at 416.

[32] The Supreme Court struck down a racial classification involving segregation in the public schools. Brown v. Board of Educ., 347 U.S. 483 (1954). Per curiam decisions issued by the Court subsequent to *Brown* dealing with other public facilities such as parks, bathhouses and golf courses indicate that all racial classifications are viewed with strictest scrutiny. *See, e.g.*, New Orleans City Park Improvement Ass'n v. Detiege, 358 U.S. 54 (1958), *aff'g mem.* 252 F.2d 122 (5th Cir.); Mayor & City Council v. Dawson, 350 U.S. 877 (1955), *aff'g mem.* 220 F.2d 386 (4th Cir.); Muir v. Louisville Park Theatrical Ass'n, 347 U.S. 971 (1954), *vacating mem.* 202 F.2d 275 (6th Cir. 1953). Subsequent decisions have applied the same strict standard. *See, e.g.*, Swann v. Board of Educ., 402 U.S. 1 (1971); Loving v. Virginia, 388 U.S. 1 (1967); McLaughlin v. Florida, 379 U.S. 184 (1964).

[33] *See, e.g.*, Rodriguez v. San Antonio Independent School Dist., 337 F. Supp. 280, 283 (W. D. Tex. 1971), *rev'd*, 41 U.S.L.W. 4401 (U.S. Mar. 21, 1973); Van Dursatz v. Hatfield, 334 F. Supp. 870, 874-75 (D. Minn. 1971); Serrano v. Priest, 5 Cal. 3d 584, 604-10, 487 P.2d 1241, 1255-59, 96 Cal. Rptr. 601, 615-619 (1971).

[34] 41 U.S.L.W. 4401 (U.S. Mar. 21, 1973).

[35] *Id.* at 4417.

[36] Whatever merit appellees' argument might have if a State's financing system occasioned an absolute denial of educational opportunities to any of its children, that argument provides no basis for finding an interference with fundamental rights where only relative differences in spending levels are involved and where—as is true in the present case—no charge fairly could be made that the system fails to provide each child with an opportunity to acquire the basic and minimal skills necessary for the enjoyment of the rights of speech and of full participation in the political process. *Id.* at 4418.

[37] *See* notes 13-16 *supra* and accompanying text.

[38] 348 F. Supp. 866 (D.D.C. 1972); *see* notes 19-22 *supra* and accompanying text.

[39] 348 F. Supp. at 875.

[40] *See, e.g.*, Graham v. Richardson, 403 U.S. *365*, 376 (1971); Boddie v. Connecticut, 401 U.S. 371, 382 (1971); Goldberg v. Kelly, 397 U.S. 254, *265-266* (1970).

[41] *Cf.* Boddie v. Connecticut, 401 U.S. 371, 381 (1971); Goldberg v. Kelly, 397 U.S. *254, 265-66* (1970).

[42] *See* F. WEINTRAUB, A. ABESON AND D. BRADDOCK, *supra* note 6, at 40-46.

[43] *See* Mandella & Schweikert, *Mobility for Physically Impaired Persons*, 25 PARAPLEGIA NEWS, Nov. 1972, at 14.

[44] *Id.* at *15-16*. For example, California's Bay Area Rapid Transit System was designated to be totally accessible to disabled persons. *Id.*

[45] Some attempts have been and are being made. The Civil Aeronautics Board has notified air carriers of its intention to exercise rule-making authority with regard to the transportation of physically disabled persons. *See 36* Fed. Reg. 20,309 (1971). The move is in reaction to present dissatisfaction with a 1962 industry agreement. *See* CAB Agreement No. 16614 (Dec. 31, 1962). *See generally Medical Criteria for Passenger Flying*, ARCHIVES OF ENVIRONMENTAL HEALTH, Feb., 1961. The new rules have not been promulgated.

The Interstate Commerce Commission has not regulated the transportation of handicapped persons via rail or interstate bus. *See*

Handicapped Hearings—Senate 515. However, the National Railroad Passenger Corporation (AMTRAK) has provided barrier-free construction in new equipment and facilities and renovation of old equipment and facilities where practical and feasible National Railroad Passenger Corp. Executives Memorandum No. 72-4 (March. 15, 1972).

[46] *See* 42 U.S.C. § 4151 (1970) (requiring that buildings financed with federal funds be designed and constructed to be accesible to the physically handicapped). The statute was amended in 1970 to include the Washington, D.C., subway system, presently under construction. *See* Act of Mar. 5, 1970, Pub. L. No. 91-205, 84 Stat. 49 *amending* 42 U.S.C. § 4151 (1970).

[47] Washington, D.C., subway officials refused to approve installation of elevators in the local system, as mandated by Congress, until ordered by the court to do so. *See* Washington Urban League, Inc. v. Washington Metropolitan Area Transit Authority, Inc., Civil No. 776-72 (D.D.C., June 29, 1973). The suit focused on the need for further appropriating legislation rather than individual rights.

[48] *See* United States v. Guest, *383 U.S. 745 757* (1966). The right was first articulated by Chief Justice Taney in the *Passenger Cases*, a series of cases concerning the right of the states to impose a tax on aliens. Passenger Cases, 48, (7 How.) 282, 463 (1849) (Taney, C.J., dissenting). Eighteen years later a majority of the Court adopted Taney's earlier views that the right to travel is an incident of national citizenship. Crandall v. Nevada, 73 U.S. (6 Wall.) *35, 49* (1867).

[49] 394 U.S. 618 (1969).

[50] *Id.* at 629. Pennsylvania, Connecticut and the District of Columbia had statutory provisions denying welfare assistance to individuals who had not resided in the particular jurisdiction for at least one year. *Id.* at 622-27. *See also* Dunn v. Blumstein, 405 U.S. 330 (1972) (durational residency requirement as prerequisite for voting violative of fundamental right to travel calling for application of compelling state interest test).

Whereas both *Guest* and *Shapiro* only involved the right to travel interstate, lower courts have found a fundamental right to travel intrastate. *See* King v. New Rochelle Municipal Housing Authority, 442 F.2d 646, 648 (2d Cir.), *cert. denied*, 404 U.S. 863 (1971); Cole v. Housing Authority, 435 F.2d 807, 809 (1st Cir. 1970); Valenciano v. Bateman, 323 F. Supp. 600, 603 (D. Ariz. 1971). The Supreme Court has never addressed the question of purely intrastate travel. The majority in *Shapiro* did not ascribe the right to travel to any particular constitutional provision but rather to the general constitutional concepts of personal liberty. 394 U.S. at 629. In dissent, Chief Justice Warren and Justice Black looked to the commerce clause for the origins of the right. *See id.* at 644, 648 (Warren, C.J., & Black, J., dissenting). Justice Harlan, in dissent, concluded that the right has its source in the due process clause of the fifth amendment. *Id.* at 655, 671 (Harlan, J., dissenting). The Court has also found a close relationship between the freedom to travel and the freedoms of speech and association. *See* Aptheker v. Secretary of State, 378 U.S. 500, 517 (1964). Under the view that the right to travel stems from the commerce clause, it probably would not apply to purely intrastate transportation. But, if the right derives from the freedoms of speech and association, it would be difficult to deny its application to intrastate travel. *See* Note, *Residence Requirements After Shapiro v. Thompson*, 70 COLUM. L. REV. 134, 138 (1970).

[51] 394 U.S. at 627.

[52] *Id.* at 638. The Court further held that the District of Columbia's residence requirements for welfare benefits violated the due process clause of the fifth amendment. *Id.* at 641-42. *See generally* 1 C. ANTIEAU, MODERN CONSTITUTIONAL LAW § 8.94 (1969). The equal protection clause does not apply to the District of Columbia. *See* note 22 *supra*.

[53] For a court to find that a transportation system is in violation of equal protection, state action must be shown. U.S. CONST. amend. XIV, § 1. Governmental action is also necessary for application of fifth amendment due process. *See* Public Utilities Comm'n. v. Pollack, 343 U.S. 451, 461 (1952); Corrigan v. Buckley, 271 U.S. 323, 330 (1926). The operation of a transportation company regulated under the authority of Congress constitutes governmental action. *See* Public Utilities Comm'n. v. Pollack, *supra* at 461-62.

[54] A privately owned municipal transit system can be so enfranchised that it is state action for the company to engage in conduct violative of equal proteciton. *See* Boman v. Birmingham Transit Co., 280 F.2d 531 (5th Cir. 1960); Williams, *The Twilight of State Action*, 41 TEXAS L. REV. 347, 358-59 (1963). The courts have found state action in various other instances. *See, e.g.*, Evans v. Newton, 382 U.S. 296 (1966) (private organization carrying out a public function); Burton v. Wilmington Parking Authority, 365 U.S. 715 (1961) (private business an integral part of a public building devoted to a public service); Shelley v. Kraemer, 334 U.S. 1 (1948) (judicial enforcement of a private agreement). *But see* Moose Lodge 107 v. Irvis, 407 U.S. 163 (1972) (mere licensing does not constitute state action).

[55] *See, e.g.*, Graham v. Richardson, 403 U.S. 365, 376 (1971); Boddie v. Connecticut, 401 U.S. 371, 382 (1971); Goldberg v. Kelly, 397 U.S. 254, 255-56 (1970).

[56] *See* Martin, *A Wheelchair View*, Washington Post, Dec. 8, 1972, § D, at 5, col. 1; Martin, *When 'Up' is a Down*, Washington Post, Oct. 29, 1972, § K, at 1, col. 1; Martin, *Handicaps on the Hill*, Washington Post, Oct. 1, 1972, § L, at 1, col. 8.

[57] *See* 42 U.S.C. §§ 4151-56 (1970). Primary responsibility for developing standards is lodged with the Administrator of General Services who must consult with the Secretary of Health, Education, and Welfare. *Id.* § 4152 (1970). Regulations passed pursuant to the legislation have incorporated detailed accessibility standards adopted by the American National Standards Institute. Federal Property Management Regulations, 41 C.F.R. § 101-17.704 (1972); *see* AMERICAN NATIONAL STANDARDS INSTITUTE, AMERICAN STANDARD SPECIFICATIONS FOR MAKING BUILDINGS AND FACILITIES ACCESSIBLE TO AND USABLE BY THE PHYSICALLY HANDICAPPED, USAS A117.1 (1961). The ANSI standards include ramp gradients, water fountain heights, and door and toilet stall widths. *Id.* § 5.

[58] Only existing structures which are altered for federal use or with federal funds are included in the legislation. *See* 42 U.S.C. § 4151 (1970).

[59] *See* COMMITTEE ON BARRIER FREE DESIGN, *supra* note 7. Some of the statutes provide that accessibility is required only if economically feasible and not unreasonably complicated. Others require that the building have one entrance which is accessible while ignoring other barriers. *See id.* Four states have laws covering publicly used, privately owned buildings; fourteen explicitly cover remodeling. *See id.* Like the federal government, most states have no provision for existing structures. One county in Ohio did consent to erect an elevator in the existing county courthouse after suit by a local resident. Consent Decree, Wargowsky v. Novak, Civil No. C-72-138 (N.D. Ohio, March 30, 1973). Another county in Ohio consented to remove barriers from its courthouses and the health and welfare building. Friedman v. County of Cuyahoga, Case No. 895961 (Cuyahoga County Ct. 1972).

[60] The seat of government is where the courts, executive and legislature are located. *Cf.* Edwards v. South Carolina, 372 U.S. 229, 235 n.10 (1963).

[61] *See* Crandall v. Nevada, 73 U.S. (6 Wall.) 35, 44 (1867); Passenger Cases, 48 U.S. (7 How.) 282, 491 (1849) (Taney, C.J., dissenting). Although courts recognize the extreme importance of the right to petition, it has received much less attention than the rights of speech and assembly. This may be due to the fact that it is closely intertwined with the latter rights. *See* United Mine Workers v. Illinois State Bar Ass'n, 389 U.S. 217, 222 (1967) (speech, assembly and petition intimately connected and equally fundamental). *See also* De Jonge v. Oregon, 299 U.S. 353, 364 (1937) (right to petition an integral part of republican form of government).

[62] U.S. CONST. amend. I. The first amendment's prohibition of acts by Congress abridging the right to petition has been extended to the states through the fourteenth amendment. Cartwell v. Connecticut, 310 U.S. 296, 303 (1940); Schneider v. State, 308 U.S. 147, 160 (1939); Gitlow v. New York, 268 U.S. 656 (1925). Section 1983 of title 42 of the *United States Code* prohibits state violations of rights protected by the fourteenth amendment and can serve as a basis for suit against the state. *See* Wilwording v. Swenson, 404 U.S. 249 (1971); Hatfield v. Bailleaux, 290 F. 2d 632, 636 (9th Cir. 1961); 42 U.S.C. § 1983 (1970). *See also* Chambers v. Baltimore & O.R.R., 207 U.S. 142, 148 (1907) (right to sue and defend is privilege under article IV of the Constitution; right conservative of all other rights).

[63] *See* California Motor Trans. Co. v. Trucking Unlimited, 404 U.S. 508, 510 (1972). Although access to the courts is protected by the first amendment, when the state denies a party use of the courts or refuses a remedy, due process may be violated. While a state may regulate the manner in which its courts operate, due process is denied if its conditions are unreasonable. *See* Cohen v. Beneficial Finance, 337 U.S. 541 (1949). *See also* Sniadach v. Family Finance Corp., 395 U.S. 337 (1969) (garnishment without opportunity to defend). Such due process requirements extend to administrative actions as well. *See* Bell v. Burson, 402 U.S. 535 (1971) (license revocation by Bureau of Motor Vehicles); Goldberg v. Kelly, 397 U.S. 254 (1970) (no evidentiary hearing prior to termination of welfare benefits).

In a recent case the appellants argued that the imposition of filing fees on indigents in divorce actions violated their first amendment right to petition. *See* Boddie v. Connecticut, 401 U.S. 371 (1971). The Court, however, viewed access to the courts as an element of due process in this instance because the judicial process was the only means available for dissolving the marriage. *Id.* at 375. Why the Court chose due process is not clear since issues such as service of process would not have been necessary to resolve had they relied on the first amendment. *See* La France, *Constitutional Law Reform for the Poor: Boddie v. Connecticut*, 1971 DUKE L.J. 487, 529 (the author was counsel for appellants).

[64] 383 U.S. 131 (1966).

[65] *Id.* at 142.

[66] 372 U.S. 229 (1963).

[67] *Id.* at 235.

[68] *See* Brown v. Louisiana, 383 U.S. 131, 143 (1966).

[69] *Id.* Discriminatory regulations infringing first amendment rights are prohibited even for restricted areas such as military bases. *See* Flower v. United States, 407 U.S. 197 (1972) (leafletting permitted on "public street" within military base); *cf.* Downing v. Kunzig, 454 F. 2d 1230 (6th Cir. 1972) (public normally has access when conducting own business). *But see* Barrett v. Kunzig, 331 F. Supp. 266 (1971), *aff'd*, 41 U.S.L.W. 3128 (6th Cir. Feb. 22, 1972), *cert. denied*, 409 U.S. 914 (1972).

[70] *See* Brown v. Louisiana, 383 U.S. 131 (1966) (statute infringed right to enter library to petition for end to segregated library system); Edwards v. South Carolina, 372 U.S. 229 (1963) (statute infringed right

to enter state house grounds to express grievances). *But see* Adderly v. Florida, 385 U.S. 39 (1966) (state's interest in controlling jail-yard property was sufficient to uphold convictions of demonstrators); Cox v. Louisiana, 379 U.S. 559 (1965) (activities near court house may be limited in deference to judicial integrity).

[71] *See* NAACP v. Button, 371 U.S. 415, 438 (1963) (only compelling state interest can justify limiting first amendment freedoms).

[72] Even if no first amendment right of access exists, the handicapped individual may be denied equal protection of the laws if the state creates an unreasonable classification between the disabled and the non-disabled without a rational relationship to some state interest. *See* note 23 *supra* and accompanying text.

[73] Cost estimates by the National League of Cities based on seven hypothetical buildings indicate that the additional cost involved in making them barrier free would be less than one-half of one percent. *See* NATIONAL COMMISSION ON ARCHITECTURAL BARRIERS, DESIGN FOR ALL AMERICANS 7 (1967). Studies based on three buildings actually constructed indicated that the cost was increased by only one-tenth of one percent. *See id.*

[74] *See* United States v. Raines, 362 U.S. 17, 25 (1960) (requirement of state action met when source is person or agency formally identifiable).

[75] *Cf.* Brown v. Board of Educ., 349 U.S. 294, 300 (1955) (remedies to constitutional infringement must be enforced). A court might find that the state's duty to provide access could be fulfilled by means other than barrier removal, such as providing agents to assist the handicapped individual in securing services he otherwise might be unable to obtain. While this may be an administratively logical solution, it does not seem to be fully within the meaning of the constitutional imperative that there be no infringement.

[76] NATIONAL COMMISSION ON ARCHITECTURAL BARRIERS, *supra* note 73, at 3.

[77] *See* Harper v. Virginia Bd. of Elections, 383 U.S. 663 (1966) (abolished poll tax); Gideon v. Wainwright, 372 U.S 335 (1963) (right to counsel at trial); Douglas v. California, 372 U.S. 353 (1963) (right to counsel on appeal). *See also* Note, *Discriminations Against the Poor and the Fourteenth Amendment*, 81 HARV. L. REV. 435, 440–41 (1967) (financial interests of the state).

[78] 118 CONG. REC. 1472 (1972) (remarks of Senator Williams). One study showed that 25 percent of the unemployed handicapped respondents had tried but were unable to find jobs. *See* A.D. Little Co., Employment, Transportation and the Handicapped, July 1963, at 30 (U.S. Social and Rehabilitation Serv., Dept. of Health, Education, and Welfare, No. C-69492).

Among the more severely handicapped, however, fully a third of those surveyed were unable to obtain employment. *Id.* at 31. The rate of employment for the entire sample was 50 percent, varying from a high of 75 percent for individuals with back and spine problems to a low of 29 percent for amputees. *Id.* at 29–30.

In addition to private employment, sheltered workshops funded by the state vocational agencies provide training and work for some handicapped individuals. These workshops are partially exempt from the minimum wage requirements of the Fair Labor Standards Act. *See* 29 U.S.C. § 214(d) (1970). Encouraged as a necessary alternative for the disabled, the workshops are criticized for providing inadequate wages and facilities. *See Handicapped Hearings—Senate* 1046–47. *See also* H.R. REP. NO. 92–1135, 92d Cong., 2d Sess. 43 (1972). Additional jobs are provided under the Randolph-Sheppard Act of 1936 which grants blind people licenses and initial financial aid for the operation of vending stands. 20 U.S.C. § 107 (1970); *see* H.R. REP. NO. 92–1135, 92d Cong., 2d Sess. 49–55 (1972). These jobs may be limited by the increasing use of automatic vending machines. *Id.* at 52. Encouragement to enterprises hiring the blind is also provided by the Wagner-O'Day Act which authorizes special purchases by federal agencies of blind-produced supplies. *See* 41 U.S.C. §§ 46–48 (Supp. 1971).

[79] It is estimated that rehabilitation by federally financed state vocational rehabilitation agencies of 51,084 handicapped persons saved over $40.5 million in public assistance payments, H.R. REP. No. 92–1135, 92d Cong., 2d Sess. 12 (1972).

[80] *See Handicapped Hearings—Senate* 515, 534–35; A.D. Little Co., *supra* note 78, at 30; notes 43–45 *supra* and accompanying text.

[81] One study showed that all disabled groups were subject to prejudice and that personnel directors would prefer to hire a former prison inmate or mental hospital patient than an epileptic. *See* Richard, Triandis & Patterson, *Indices of Employer Prejudice Toward Disabled Applicants*, 47 JOURNAL OF APPLIED PSYCHOLOGY 52 (1963). *See also* M. Gandy, *supra* note 2.

[82] *See* U.S. BUREAU OF LABOR STANDARDS, DEP'T OF LABOR, BULL. NO. 234, WORKMEN'S COMPENSATION AND THE PHYSICALLY HANDICAPPED WORKER 5, 20 (1961).

[83] *See id.* at 6–8.

[84] The Association of Casualty and Surety Companies pointed out that rates are based solely on the relative hazards in the company's work and the company's accident experience. *Id.* at 45. Statistics show that a company actually might minimize their accident experience by hiring the disabled since they have eight percent fewer accidents than their co-workers. *See Handicapped Hearings—Senate 539.*

[85] U.S. BUREAU OF LABOR STANDARDS, *supra* note 82, at 10.

[86] *See Handicapped Hearings—Senate 535.* Although many of these laws are limited in the types of injuries covered and the amount of liability, some states are attempting to strengthen the laws. *Id.* at 536. *See also Hearings on H.R. 8395, H.R. 9847 and Related Bills Before the Select Subcomm, on Education of the House Comm. on Education and Labor*, 92d Cong., 2d Sess. (1972) (hereinafter cited as *Handicapped Hearings—House*); U.S. EMPLOYMENT STANDARDS ADMINISTRATION, DEP'T OF LABOR, BULL. NO. 212 (1971).

[87] The President's Committee on Employment of the Handicapped works with industry to gain acceptance of the handicapped worker and sponsors a National Employ the Handicapped Week to publicize its efforts. *See Handicapped Hearings—Senate* 540, 1036–37. Each state has a Governor's Council on Employment of the Handicapped which works closely with the President's Committee. In addition there are over 1,000 local committees. *Id.* at 539.

[88] In accordance with a 1971 Presidential directive, the vocational rehabilitation agencies, in conjunction with the United States Employment Service and the Veterans Administration, are placing special emphasis on training and job placement of Vietnam veterans. *See Handicapped Hearings—Senate* 254–56.

[89] Only a few states have laws which prohibit private employment discrimination. *See, e.g.*, ILL. ANN. STAT. ch. 38, § 13–2 (Smith-Hurd 1972); IOWA CODE ANN. § 601A.7 (Supp. 1972); WIS. STAT. ANN. § 111.31 (Supp. 1973).

[90] *See* Civil Rights Act of 1964, Title VIII 42. U.S.C. § 2000e (1970).

[91] *See* Act of May 31, 1870, ch. 114, § 16, 42 U.S.C. § 16, 42 U.S.C. § 1981 (1970); note 99 *infra*.

[92] 42 U.S.C. § 2000c (1970).

[93] Title VII makes it an unlawful employment practice to discriminate against any person because of race, color, religion, sex or national origin. *Id.* § 2000e-2(a) (1970). Efforts have been made to expand it to include the handicapped without success. *See* notes 8–10 *supra* and accompanying text. Even if efforts to include the handicapped in Title VII are successful, no Title VII remedy exists against employers of less than 25 workers. 42 U.S.C. § 2000e(b) (1970).

[94] 392 U.S. 409 (1968).

[95] 42 U.S.C. § 1982 (1970).

[96] Act of April 9, 1866, ch. 31, § 1, 14 Stat. 27.

[97] 392 U.S. at 420.

[98] *See id.* at 409, 419–20, 436. Prior to *Jones* it generally had been assumed that section 1982 required state action. See Larson, *The Development of Section 1981 as a Remedy for Racial Discrimination*, 7 HARV. CIV. RIGHTS-CIV. LIB. REV. 56, 57 (1972); 35 BROOK. L. REV 275, 276–77 (1969). *But see* United States v. Morris, 125 F.2d 322 (E.D. Ark. 1903 (section one of Civil Rights Act of 1866, predecessor of section 1982, prohibits private acts of discrimination aimed at preventing blacks from buying land).

[99] The statute provides that "All persons . . . shall have the same right . . . to the full and equal benefits of all laws and proceedings for the security of persons and property as is enjoyed by white citizens . . ." 42 U.S.C. § 1981 (1970).

Both sections 1981 and 1982 are derived from section one of the Civil Rights Act of 1866. 392 U.S. at 422 n.28. The current *United States Code* notes that Section 1982 is derived from the 1866 Act but attributes section 1981 only to the 1870 statute which reenacted the 1866 Act after the fourteenth amendment was passed. However, section 1981 retains the scope of the 1866 statute. *See* Note, *Racial Discrimination In Employment Under the Civil Rights Act of 1866*, 36 U. CHI. L. REV. 615, 619 (1969).

[100] The Court, in a lengthy footnote, specifically overruled an earlier decision which held that section 1981 required state action in employment discrimination, 392 U.S. at 441 n.78, *overruling* Hodges v. United States, 203 U.S. 1 (1906). A lower court was prompt in seizing upon the language in *Jones* to prohibit discrimination by private employers on racial grounds. *See* Dobbins v. Local 212, IBEW, 292 F. Supp. 413 (S.D. Ohio 1968). To date five circuits have agreed. *See* Bradley v. Bristol-Myers, Inc., 459 F.2d 621 (8th Cir. 1972) (racial discrimination in hiring practices); Brown v. Gaston County Dyeing Mach. Co., 457 F.2d 1377 (4th Cir.), *cert. denied*, 409 U.S. 982 (1972) (racial discrimination inpromotion policies); Young v. International Telephone & Telegraph Co., 438 F.2d 757 (3d Cir. 1971) (racial discrimination by both employer and union); Sanders v. Dobbs Houses, Inc., 431 F.2d 1097 (5th Cir. 1970), *cert. denied*, 401 U.S. 948 (1971) (refusal to rehire based on race); Waters v. Wisconsin Steel Works, 427 F.2d 476 (7th Cir.), *cert. denied*, 400 U.S. 911 (1970) (racial discrimination in hiring practices).

One court has questioned whether section 1981 is in fact derived from the 1866 Act. *See* Cook v. Advertiser, 323 F. Supp. 1212 (M.D. Ala. 1971), *aff'd on other grounds*, 458 F.2 1119 (5th Cir. 1972). The discrepancies on which the *Cook* court based its opinion may be due to the mistake of a codifier in compiling and revising the statutes. *See* Note, *Section 1981 and Private Discrimination*, 40 GEO. WASH. L. REV. 1024, 1036–39 (1972). *See generally* Larson, *supra* note 98, at 56.

[101] U.S. CONST. amend. XIII; *See* 392 U.S. at 422–44.

[102] *See* U.S. CONST. amend, XIII, § 2.

[103] 392 U.S. at 439; *see* Bailey v. Alabama, 219, U.S. 219, 241 (1911); Hodges v. United States, 203 U.S. 1, 17 (1906); Civil Rights Cases, 109 U.S. 3, 20 (1883).

[104] 392 U.S. at 439.

[105] *Id.* By passing the 1866 Act, Congress indicated that it considered discrimination in both the rights to purchase and the right to contract a "badge" or "incident". *Id.* as 441. indicated that it considered discrimination in regard to private denial of public accommo-

dations as a "badge or incident of slavery" under the thirteenth amendment since it had nothing to do with slavery or involuntary servitude. Civil Rights Cases, 109 U.S. 3, 24 (1883). It viewed badges and incidents as those burdens and disabilities on fundamental rights, such as the right to contract and to purchase property, imposed by slavery. *Id.* at 22. Both employment discrimination and the housing discrimination prohibited in *Jones* fall within the earlier Court's definition.

[106] 392 U.S. at 413.

[107] *See* Note, *Jones v. Mayer: The Thirteenth Amendment and the Federal Anti-Discrimination Laws*, 69 COLUM. L. REV. 1019, 1026–27 (1969); 20 CASE W. RES. L. REV. 448, 457–59 (1969).

[108] The thirteenth amendment was one of a series of post-Civil War enactments aimed at terminating the last signs of slavery and ensuring freedom. It was preceded by the wartime Emancipation Proclamation and passed to insure that document's post-war validity. *See* 1. STATUTORY HISTORY OF THE UNITED STATES: CIVIL RIGHTS 13 (B. Schwartz ed. 1970).

[109] *See* J. tenBROEK, EQUAL UNDER LAW 157–73 (1965).

[110] Act of April 9, 1866, ch. 31, § 1, 14 Stat. 27.

[111] *See* 42 U.S.C. § 1981 (1970); note 99 *supra*.

[112] *See* J. tenBROEK, *supra* note 109, at 179; CONG. GLOBE, 39th Cong. 1st SESS. 438 (1866).

[113] *See* United States v. Classic, 313 U.S. 299, 327 (1941); CONG GLOBE, 39th Cong., 1st SESS. 599, 601 (1866).

[114] Central Presbyterian Church v. Black Liberation Front, 303 F. Supp. 894 (E.D. Mo. 1969, Gannon v. Action, 303 F. Supp. 1240 (E.D. Mo. 1969), *modified on other grounds*, 450 F.2d 127. (8th Cir. 1971). The courts in *Central Presbyterian Church* and *Gannon* held, in effect, that when blacks invaded a white church, whites were denied the rights of "white citizens." *Contra* Perkings v. Banster, 190 F. Supp. 98, *aff'd*, 285 F.2d 426 (4th Cir. 1960) (section 1981 jurisdiction not available to white claiming false arrest). *See also* Dombrowski v. Dowling, 459 F.2d 190, 199 n. 24 (7th Cir. 1972) (court suggest without deciding that section 1981 may not apply to white who was denied office rental because associates were blacks); Carter v. Gallagher, 452 F.2d 315 (8th Cir. 1971), *cert. denied*, 406 U.S. 950 (1972) (section 1981 prohibits employment discrimination based on race, whether it is against blacks or whites; court however viewed section 1981 as based on fourteenth amendment); 23 VAND L. REV. 413 (1970) (discussion of *Gannon*).

[115] *See* Scher v. Board of Educ., 424 F.2d 741, 743 (3d Cir. 1970) (per curiam) (sections 1981 and 1983 do not apply exclusively to racial or religious discrimination; available to boy denied equal protection by arbitrary expulsion from school). *Contra* Schetter v. Heim, 300 F. Supp. 1070, 1073 (E.D. Wisc. 1969). *But cf.* Georgia v. Rachel, 384 U.S. 780, 791–92 (1966) (legislative history of Civil Rights Act of 1866 shows intent restricted to racial equality).

The Court also has upheld anti-peonage statutes based on the thirteenth amendment regardless of the race of the defendant. *See* Clyatt v. United States, 197 U.S. 207, 218 (1905). Section 1981 was enacted to enforce the thirteenth amendment and applies to all races and colors. Buchanan v. Warley, 245 U.S. 60, 78 (1917). However, the Court in *Buchanan* appeared to place some weight on the reenactment of section 1981's predecessor, the Civil Rights Act of 1866, after the fourteenth amendment became effective. *Id.* at 74–76. Two other cases which hold that section 1981 applies to all races and colors appear to rely at least in part on the fourteenth amendment rationale. *See* Takahashi v. Fish Comm'n, 334 U.S. 410, 419 (1948) (section 1981 rests in part on the fourteenth amendment); United States v. Wong Kim Ark, 169 U.S. 649, 695–96 (1898) (acknowledges section 1981's thirteenth amendment basis but uses fourteenth amendment rationale). However, in a recent case involving denial of welfare benefits to resident aliens the Supreme Court indicated that section 1981 was separate from the fourteenth amendment. *See* Graham v. Richardson, 403 U.S. 365 (1971) (state statute violated fourteenth amendment as well as federal power to regulate aliens as carried out by section 1981). Moreover, the *Jones* Court stated that reenactment of the 1866 Act after the fourteenth amendment did not affect the scope of the Act. *See* Jones v. Alfred H. Mayer Co., 392 U.S. 409, 436 (1968).

[116] It has been suggested that limiting the protection of the Act to blacks offends the equal protection clause of the fourteenth amendment. *See*, Note, *The "New" Thirteenth Amendment: A Preliminary Analysis*, 82 HARV. L., REV. 1294, 1315–16 (1969); 20 CASE W. RES. L. REV. 448, 459 n.75 (1969).

[117] 392 U.S. at 442–43.

[118] The Court viewed racial ghettoes which are a development of the 20th century as a "relic" of slavery. *Id. But see* Casper, *Jones v. Mayer: Clio, Bemused and Confused Muse*, 1968 S. CT. REV. 89 (description of housing segregation during Civil War).

[119] While some of the discriminatory racial practices existing today may have been in existence at the time of slavery they appear to be based less on former servitude and more on unreasoning prejudice which causes some whites to view blacks as inferior. *See 392* U.S. at 446 (Douglas, J., concurring).

[120] *See* Lassen, *Voice of the Militant Cripple*, EVENT (Aug. 1969) (published by the President's Committee on Employment of the Handicapped). The isolation may stem in large part from discrimination by employers and school systems. *See* notes 12–16, 78–86 *supra* and accompanying text.

[121] *See* note 103 *supra* and accompanying text.

[122] *See* United States v. Classic, 313 U.S. 299, 316 (1941); Wright v. United States, 302 U.S. 583, 607 (1938). The Constitution is a starting point for developing legal reasoning rather than an aggregate of hard and fast precepts to be handed on and followed from generation to generation. *See* Stone, *The Common Law in the United States*, 50 HARV. L. REV. 4, 23 (1936).

[123] *See* Gompers v. United States, 233 U.S. 604, 610 (1914) (Holmes, J.).

[124] *See* Note, *supra* note 116, at 1302–03. The lawmakers couched the amendment in terms general enough to encompass the total institution of slavery as it developed, responding fully to the evil perceived. *Id.* at 1302. As modern perception of that evil grows, the response may assume an increasingly broader scope. *Id.* By rejecting an overly narrow interpretation of the amendment it may be more readily adapted to the "evils" of today's society. *Id.* at 1302–13.

[125] *See* Griffin v. Breckenridge, 403 U.S. 88, 97 (1971) (accords early civil rights statutes a sweep as broad as their language. However, *Griffin* indicated that the thirteenth amendment is closely related to slavery. *See id.* at 105. In another decision the Court dismissed an argument that a city's action to close its pools rather than to integrate them was a badge or incident of slavery. Palmer v. Thompson, 403 U.S. 217 (1971). The Court noted that although the enabling clause of the amendment might allow the passage of legislation to control pool closings, Congress had not chosen to pass such a statute. *Id.* at 227.

[126] *See* 5 U.S.C. § 7153 (1970). Only one action has been brought under this statute. *See* Kletzing v. Young, 210 F.2d 729 (D.C. Cir. 1954) (suit by blind man to be reinstated on Civil Service employment register; brought under section 7153's predecessor; dismissed as moot since register had expired).

The Vocational Rehabilitation Act of 1972 contained a section prohibiting discrimination in federally funded programs. *See* H.R. 8395, 92nd Cong., 2d Sess. § 604 (1972). The Act was vetoed by the President. Weekly Compliation of Presidential Documents, Oct. 30, 1972.

[127] *See* King-Smith v. Aaron, 455 F.2d 378 (3d Cir. 1972), *rev'g* 317 F. Supp. 164 (W.D. Pa. 1970). The Third Circuit, in reversing the abstention-dismissal by the district court, remanded the plaintiff's fourteenth amendment and section 1983 claims and asserted that these claims enjoyed jurisdiction which the federal court had a duty to consider, *Id.* at 381; *see* 42 U.S.C. § 1983 (1970).

[128] *See*, e.g., Eisenstadt v. Baird, 405 U.S. 438, 446–47 (1970), *citing* Reed v. Reed, 404 U.S. 71, 75–76 (1971); Railway Express Agency v. New York, 336 U.S. 106 (1949); Barbier v. Connally, 113 U.S. 27 (1885).

[129] *See, e.g.*, Eisenstadt v. Baird, 405 U.S. 438, 446–55 (1972) (statute barring sale of contraceptives distinguished between married and unmarried individuals); Reed v. Reed, 404 U.S. 71, 75–76 (1971) (statute gave preference to men in granting letters of estate administration); Morey v. Doud, 354 U.S. 457, 465–66 (1957) (licensing statute exempted one corporation); Armstead v. Starkville Municipal Separate School Dist., 325 F. Supp. 560, 569 (N.D. Miss. 1971), *modified*, 461 F.2d 276 (5th Cir. 1972) (racial discrimination in hiring and retaining public school teachers); *accord*, Chambers v. Hendersonville City Bd. of Educ., 364 F.2d 189, 192 (4th Cir. 1966) (en banc). *See also* note 23 *supra* and accompanying text.

[130] For many years government employment and government services have been regarded as privileges, not rights, and thus unprotected by rules of substantive due process. However, such distinctions have been so eroded that the concept remains of doubtful validity. *See generally* Alstyne, *The Demise of the Right-Privilege Distinction in Constitutional Law*, 81 HARV. L. REV. 1439 (1968).

[131] *See* Keyishian v. Board of Regents, 385 U.S. 589, 605–06 (1967); Wieman v. Updegraff, 344 U.S. 183, 191–92 (1952). An individual is also constitutionally protected from employment discrimination by the federal government. *See* Colorado Anti-Discrimination Comm'n v. Continental Airlines, Inc., 372 U.S. 714, 721 (1963) (racially discriminatory federal hiring regulation would violate the fifth amendment); United Pub. Workers v. Mitchell, 330 U.S. 75, 100 (1947) (Congress could not enact regulation providing that no Republican, Jew or Negro could be appointed to federal office). *See also* Comment, *Aliens and the Civil Service: A Closed Door?*, 61 GEO. L.J. 207, 215–18 (1972) (federal discrimination and the fifth amendment).

Even if a handicapped individual has a valid claim, he faces, however, the general reluctance of the courts to oversee federal agencies' hiring practices. *See* Comment, *Racial Discrimination in the Federal Civil Service*, 38 GEO. WASH. L. REV. 265, 280 (1969); Comment, *Aliens and the Civil Service: A Closed Door?*, 61 GEO. L.J. 207, 216–17 (1972).

[132] 42 U.S.C. § 1983 (1970). Section 1983 requires two elements: the party must have been deprived of rights secured by the Constitution and laws of the United States; and the deprivation must have been under the color of state law. Adickes v. S.H. Kress & Co., 398 U.S. 144 (1970).

Section 1983 was originally section one of the Civil Rights Act of 1871 which was enacted to enforce the provisions of the fourteenth amendment. Mitchum v. Foster, 407 U.S. 225, 238 (1972); *see* Act of Apr. 20, 1871, ch. 22, § 1, 17 Stat. 13, *as amended*, 42 U.S.C. § 1983 (1970). Section one was modeled on section two of the Civil Rights Act of 1866.

407 U.S. at 238; *see* Act of Apr. 9, 1866, ch. 31, § 2, 14 Stat. 27.

[134] The legislative debates surrounding passage of section 1983's predecessor indicate that the discriminatory state action may be executive, legislative or judicial. Mitchum v. Foster, 407 U.S. 225, 238 (1972); *Ex parte* Virginia, 100 U.S. 339, 346–47 (1879). Even an abuse of authority is covered by section 1983. *See* Monroe v. Pape, 365 U.S. 167, 172 (1961); United States v. Classic, 313 U.S. 325, 326 (1941).

However, the federal government and the District of Columbia are not states within the meaning of the Statute. District of Columbia v. Carter, 409 U.S. 418, 419 (1973).

[135] An action for denial of equal protection of the laws may be maintained under the fourteenth amendment alone. *See, e.g.*, Griffin v. County School Bd., 377 U.S. 218, 232–33 (1964); Burton v. Wilmington Parking Authority, 365 U.S. 715 (1961); Staub v. City of Baxley, 355 U.S. 313 (1958). One court has held that an action not cognizable under section 1983 against a county could be maintained against the same defendant under the fourteenth amendment. *See* Shelbourne Inc. v. New Castle County, 293 F. Supp. 237, 245–46 (D. Del. 1968). *Contra*, Whitner v. Davis, 410 F.2d 24 (9th Cir. 1969). The requirements for state action are the same under section 1983 and the fourteenth amendment. United tSates v. Price, 383 U.S. 787, 794 n.7 (1966).

[135] Discrimination in transportation systems has been successfully labeled state action. *See* Kissinger v. New York City Transit Authority, 274 F. Supp. 438 (S.D.N.Y. 1967); note 54 *supra* and accompanying text.

Actions of hospitals, too, have come under judicial scrutiny. *See* McCabe v. Nassau County Medical Center, 453 F.2d 698 (2d Cir. 1971). In *McCabe* the court held that since the hospital was a public institution, the plaintiff need not point to specific state statutes compelling them to act as they did in order to meet the "under color of state law" requirement of section 1983. *Id.* at 703–04. It is the source of the defendant's authority, not only the laws that purport to justify the action, which determine whether the defendant has acted under color of law. *Id.* at 704. Whether or not the state's role in regulating private hospitals would be sufficient to make their actions "state action" has been considered by several lower courts. The majority seem to have concluded that due to the states' role in disbursement of funds under the Hill-Burton Act private discrimination is state action. *See* Simkins v. Moses H. Cone Memorial Hosp., 323 F.2d 959 (4th Cir. 1963) (excellent discussion of Hill-Burton; racial discrimination); Holmes v. Silver Cross Hosp., 340 F. Supp. 125 (N.D. Ill. 1972) (violation of religious belief); Sams v. Ohio Valley General Hosp. Ass'n, 257 F. Supp. 369 (N.D.W. Va. 1966) (discrimination against out-of-state physicians); Hill-Burton Act § 622(f), 42 U.S.C. § 211(e)(f) (1970). *But see* Place v. Shepherd, 446 F.2d 1239 (6th Cir. 1971) (receipt of state or federal funds did not transform private hospitals into public institutions). The court in *Place* indicated, however, that there might be a cause of action if a public hospital refused to hire. *Id.* at 1246.

[136] *See* Monroe v. Pape, 365 U.S. 167, 191 n.50 (1961) (Chicago not "person" under statute). The decision has caused considerable confusion in the circuits, and some courts either have interpreted the Court's statements narrowly or have considered *Monroe* overruled *sub silentio* by later opinions which failed to consider whether the entity sued was proper under section 1983. Other courts have distinguished between actions for damages, such as *Monroe*, and those for equitable relief, or have ignored *Monroe* completely. *See* Johnson v. Cincinnati, 450 F.2d 796 (6th Cir. 1971) (ignored *Monroe*); Harkless v. Sweeney Independent School Dist., 427 F.2d 319 (5th Cir. 1970), *cert. denied*, 400 U.S. 991 (1971) (restricted *Monroe* to its facts and granted equitable relief under section 1983); Schnell v. City of Chicago, 407 F.2d 1084, 1086 (7th Cir. 1969) (*Monroe* limited to money damages); Local 858, Am. Fed'n of Teachers v. School Dist. No. 1, 314 F. Supp. 1069, 1073 (D. Colo. 1970) (*Monroe* rendered irrelevant by Supreme Court cases ignoring it); Note, *Civil Rights—School Officials Not Persons For Purposes of Section 1983 Regardless of Relief Sought*, 24 S.W.L.J. 360, 362–64 (1970) (discussion of cases in which the appropriateness of the entity sued was ignored).

Moreover, one court held that while a police department was not a person for purposes of section 1983, a suit for denial of equal protection could be maintained under section 1981. *See* United States *ex rel.* Washington v. Chester County Police Dep't, 294 F. Supp. 1157 (E.D. Pa. 1969), *aff'd on rehearing*, 300 F. Supp. 1279 (E.D. Pa. 1970). *See generally* Thornberry, *Suing Public Entities Under the Federal Civil Rights Act: Monroe v. Pape Reconsidered*, 43 U. COLO. L. REV. 105, 108–17 (1971); Note, *Developing Governmental Liability Under 42 U.S.C. § 1983*, 55 MINN. L. REV. 1201 (1971); 24 VAND. L. REV. 1252 (1971).

[137] *See, e.g.*, Walton v. Nashville Special School Dist., 401 F.2d 137 (8th Cir. 1968); Rolfe v. County Bd. of Educ., 391 F.2d 77 (6th Cir. 1968); Wall v. Stanley County Bd. of Educ., 378 F.2d 275 (4th Cir. 1967).

[138] *See* Brown v. Strickler, 422 F.2d 1000 (6th Cir. 1970) (no discussion of *Monroe*). *Contra*, Kirstun v. Rector, 309 F. Supp. 184 (E.D. Va. 1970) (relies on *Monroe*).

[139] *See* Monroe v. Pape, 365 U.S. 187, 192 (1961). Suits against the individual, however, may have a limited effect on the public agencies' policies and may produce little in the way of monetary recovery. *See* Note, *Developing Governmental Liability Under 42 U.S.C. § 1983*, 55 MINN. L. REV. 1201, 1209 (1971) (discussing recovery against policemen).

[140] 42 U.S.C. § 2000c (1970).

SECTION-BY-SECTION ANALYSIS OF A PROPOSED BILL TO AMEND TITLE VII OF THE CIVIL RIGHTS ACT OF 1964 TO PROVIDE A PROGRAM TO PREVENT DISCRIMINATION ON ACCOUNT OF THE HANDICAPPED CONDITION OF AN INDIVIDUAL

Title VII of the 1964 Civil Rights Act provides for equal employment opportunities. Generally, this proposed bill would extend the guarantees against discrimination in employment on account of race, color, religion, sex or national origin to handicapped persons.

Section 1 of the proposed bill states that it may be cited as "the Handicapped Condition Antidiscrimination in Employment Act". Section 2 of the bill amends section 701 of the 1964 Civil Rights Act (42 U.S.C. § 2000e), which contains definitions for the subchapter, to include the term handicapped condition. A new subsection k is added which defines handicapped condition as any person who either has a physical or mental impairment which substantially limits one or more of that person's major life activities or has a record of such impairment or is regarded as having such an impairment. Substantially limited as well as qualified handicapped individuals are also defined.

Section 3 of the proposed bill amends section 703 of the Civil Rights Act of 1964 (42 U.S.C. § 2000e–2). Section 3(a) of the bill amends section 703(a) (1) and (2) by inserting the words handicapped condition after the word sex. If amended by this bill section 703(a) would read: "It shall be an unlawful employment practice for an employer—(1) to fail or refuse to hire or to discharge any individual, or otherwise to discriminate against any individual with respect to his compensation, terms, conditions, or privileges of employment, because of such individuals' race, color, religion, sex, handicapped condition or national origin—(2) to limit, segregate, or classify his employees or applicants for employment in any way which would deprive or tend to deprive any individual of employment opportunities or otherwise adversely affect his status as an employee, because of such individual's race, color, religion, sex, handicapped condition or national origin."

Similarly, section 3(b) of the proposed bill would amend section 703(b) to include the term handicapped condition. If amended this section would state: "It shall be an unlawful employment practice for an employment agency to fail or refuse to refer for employment, or otherwise to discriminate against, any individual because of his race, color, religion, sex, handicapped condition or national origin, or to classify or refer for employment any individual on the basis of his race, color, religion, sex, handicapped condition, or national origin."

Section 3(c) of the proposed bill would amend sections 703(c) (1) and (2) which prohibit discrimination in labor union practices by adding the words handicapped condition. If amended these sub-sections would state: "(c) It shall be an unlawful employment practice for a labor union organization—(1) to exclude or to expel from its membership, or otherwise to discriminate against, any individual because of his race, color, religion, sex, handicapped condition, or national origin; (2) to limit, segregate, or classify its membership or applicants for membership, or to classify or fail or refuse to refer for employment any individual, in any way which would deprive or tend to deprive any individual of employment opportunities, or would limit such employment opportunities or otherwise adversely affect his status as an employee or as an applicant for employment, because of such individual's race, color, religion, sex, handicapped condition, or national origin . . ."

Section 3(d) of the bill amends section 703(d) which prohibits discrimination in training programs by adding the words handicapped condition. This section, if amended, would read: "It shall be an unlawful employment practice for any employer, labor organization, or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs to discriminate against any individual because of his race, color, religion, sex, handicapped condition, or national origin in admission to, or employment in, any program established to provide apprenticeship or other training."

Section 703(e) of the 1964 Civil Rights Act which states that certain classification by race or other characteristic is not an unlawful employment practice would be amended by section 3(e) of the bill. Section 3(e)(1) would insert handicapped condition after the word sex and section 3(e)(2) would add a new section 3 providing that it would not be an unlawful employment practice to refuse to hire or otherwise discriminate against a handicapped person if it is established that such an individual would endanger his own health or the health of others in such a program.

Section 3(f) of the proposed bill would amend section 703(h) of the 1964 Civil Rights Act by inserting the word handicapped condition after the word sex. Section 703(h) discusses seniority or merit systems and presently provides that it shall not be an unlawful employment practice for an employer to apply different standards of compensation pursuant to a bona fide seniority or merit system provided that such differences are not the result of an inten-

tion to discriminate because of race, color, religion, sex, or national origin. This section also provides that it shall not be an unlawful employment practice to give or act upon the results of any professionally developed ability test provided that such test is not intended or used to discriminate because of race, color, religion, sex or national origin.

Section 3(g) of the proposed bill would amend section 703(j) by inserting the words handicapped condition after the word sex. Section 703(j) of the 1964 Civil Rights Act currently provides that the subchapter shall not be interpreted to require preferential treatment to any individual or group because of their race, color, religion, sex, or national origin on account of an imbalance with respect to total number or percentage of such persons.

Section 3(h) of the proposed bill also adds a new subsection k which concerns employee benefit plans. This new subsection specifically states:

"Nothing contained in this title shall be interpreted to prevent an employer, employment agency, or labor organization to observe the terms of any bona fide employee benefit plan such as a retirement, pension, or insurance plan if such a plan and differences in that plan with respect to any individuals with handicapped condition is not a subterfuge to evade the purposes of this title, except that no such employee benefit plan shall excuse the failure to hire any individual."

Finally, section 3(i) amends the section heading of section 703 to read "Discrimination Because of Race, Color, Religion, Sex, Handicapped Condition, or Natural (sic) Origin".

Section 4(a) of the proposed bill amends section 704(b) of the 1964 Civil Rights Act (42 U.S.C. Sec. 2000e-3) by inserting the words handicapped condition after the word sex both times it appears in the subsection. This subsection prohibits advertisements relating to employment from indicating a preference based upon race, color, religion, sex, or national origin is a bona fide occupational qualification for employment.

Section 706(g) of the 1964 Civil Rights Act (42 U.S.C. Sec. 200e-5) is amended by section 4(b) of the proposed bill by inserting the words handicapped condition after the word sex. Section 706(g) currently provides for court injunctions if a court finds that a respondent is or has intentionally engaged in an unlawful employment practice and for other relief such as payment of back pay. It also states that these remedies shall not apply if such individual was refused admission, suspended, or expelled, or was refused employment or advancement or was suspended or discharged for any reasons other than discrimination on account of race, color, religion, sex, or national origin.

Section 5 of the proposed bill would amend Section 717(a) and (c) of the 1964 Civil Rights Act (42 U.S.C. Sec. 2000e-16) by inserting the words handicapped condition after the word sex. Generally, Section 717 concerns employment by the Federal Government. Section 717(a) prohibits employment discrimination in the Federal Government based on race, color, religion sex, or national origin. Subsection (c) provides that an aggrieved individual may file a civil action after final administrative action on a complaint of discrimination based upon race, color, religion, sex or national origin.

The final section of the proposed bill, section 6, provides that the amendments made by the bill shall take effect 6 months after its date of enactment.

By Mr. HOLLINGS (for himself and Mr. MAGNUSON):

S. 1347. A bill to create a National Advisory Committee on Oceans and Atmosphere, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. HOLLINGS. Mr. President, I rise today to introduce the National Advisory Committee on Oceans and Atmosphere Act of 1977, a bill to alter and improve the National Advisory Committee on Oceans and Atmosphere, NACOA.

NACOA was established by statute in 1971, in response to recommendations from the eminent Stratton commission that there be an independent body of experts to help the Federal Government deal with our increasingly complicated oceanic and atmospheric issues. The committee was reauthorized in 1972, and again in 1975. Its present authorization ends this coming September 30.

Unlike some other advisory committees, NACOA looks at a very wide range of issues in an effort to see the "big picture." It has several specific duties. It performs a continuing review of the marine and atmospheric science and service programs of the United States; advises the Secretary of Commerce with respect to the National Oceanic and Atmospheric Administration; and submits an annual report on marine and atmospheric affairs, as well as other reports that are requested by either the President or the Congress. To date, NACOA has submitted five annual reports and four special reports.

The bill I introduce today has been written with three main objectives in mind. First, the committee is continued, in order to provide more of the independent and expert advice that we need in the oceans and atmosphere field. In the oceans area, for instance, we need advice on such complex issues as how to better protect the marine environment and how best to develop and manage the precious food, energy, and mineral resources of the seas. There are also major policy issues associated with the atmosphere, especially the question of climatic change and how the Nation should deal with it. However, this bill continues the committee for just 1 additional year. At the present time, there is a great deal of discussion about how to improve the organization of Federal ocean agencies, and within the next year the Government itself may become better able to deal with marine issues. At the end of this year of change, we will be better able to judge whether NACOA or some different kind of entity is needed over the long term.

Second, the bill keeps NACOA's funding at the present level of $445,000 a year, and reduces the number of committee members from 25 to 15. This has been done in the spirit of the Federal Advisory Committee Act, which directs us to evaluate carefully the role and cost of advisory groups. It also has been done to meet the President's wish that the cost of advisory committees be kept to a minimum.

Third, the bill tries to give the committee more guidance about the kinds of assistance the Congress is seeking from NACOA. When the Stratton commission proposed an oceans advisory committee, and when the Congress accepted that proposal and created NACOA, we wanted the advisory group to do several things:

Facilitate two-way communication between the Federal Government and the larger oceans community, and in the process be a forum for public participation in national ocean policymaking.

Provide detailed information and advice on specific policies and programs, in order to help the Government do its job better.

Finally, provide innovative policy leadership and new ideas regarding oceanic and atmospheric affairs.

The key to performing all three of these tasks is to focus on a few major issues at any one time, so that the committee and its staff can examine issues in enough detail to produce useful analyses and recommendations. An advisory committee such as NACOA must be selective in choosing its topics, and must get into the details of policies, programs, and budget priorities. Otherwise the recommendations tend to be too vague to be of much use to those of us who must make decisions.

NACOA has done some of these things well, and has had an important and constructive influence on policy. For instance, one of its recommendations led to the valuable national marine fisheries plan. The committee was instrumental in keeping the advanced salvage vessel *Glomar Explorer* from being scrapped, thus preserving a ship that one day may be of great value in oceanographic research. And the committee's four special reports have contained useful ideas.

At other times, however, NACOA has not focused on just a few important issues, and the resulting work has not been as detailed and useful as one might wish. In particular, trying to cover up to a dozen different topics in a single annual report, as NACOA has done, has led to some vague and not very helpful recommendations. Nor has the committee often taken the lead on key oceanic and atmospheric matters, in the sense of developing original ideas or drafting its own bills to get new discussions going.

NACOA does have a point when it says that its staff is small and its mandate broad, and that, therefore, it cannot cover many issues in detail. Still, I think the committee could be more selective, could focus more on a few key issues that are arising in the marine and atmospheric areas. Personally, I think the best justification for a budget increase would be evidence that NACOA can do a few things well with its small budget. That would give the Congress some assurance that it could do more good things with a larger amount of money.

Part of the problem is that the present NACOA Act is not explicit about this need for selectivity in choosing topics, or the need that these few central issues be examined in detail so that the recommendations can help the Congress and the executive make their detailed and specific decisions. The present act gives NACOA a broad mandate without making clear Congress desire for advice on key problems, not on everything.

The bill I introduce today tries to remedy this shortcoming by directing the committee to undertake its duties "on a selective basis." And the point will be further discussed in the hearings the committee will hold on May 2, as we ex-

plore how NACOA's duties and operations might be changed to increase its usefulness and increase the ocean community's participation in policymaking. A sharper focus on a few major issues of concern to the oceans community and to decisionmakers would go a long way toward making NACOA the kind of incisive and useful committee that the original legislation envisioned.

Mr. President, in conclusion I ask unanimous consent to have printed in the RECORD a section-by-section analysis of the National Advisory Committee on Oceans and Atmosphere Act of 1977. The bill is similar to the original 1971 legislation, though there are several significant changes.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

Section 102. Establishment. This section establishes a NACOA of 15 members. The present Committee has 25 members.

Section 103. Membership, Terms, and Duties. Members are not to be government employees, and are to be appointed by the President. They are to meet certain qualifications, having some knowledge or expertise about oceanic or atmospheric affairs or related activities. Members are to serve three-year terms. A Chairman and Vice Chairman shall be designated by the President. The Committee shall (1) undertake a continuing review, on a selective basis, of national policy, coastal zone management, and the status of the marine and atmospheric science and service programs of the United States; and (2) advise the Secretary of Commerce with respect to the carrying out of the programs administered by the National Oceanic and Atmospheric Administration.

Section 104. Reports. The Committee is to submit an annual report, and other such reports as requested by the President and the Congress. The Secretary of Commerce is to comment on the report.

Section 105. Compensation. This section provides for compensation and expenses for Committee members.

Section 106. Interagency Cooperation and Assistance. Federal ocean and atmospheric agencies are to appoint observers. The Committee may request assistance from Federal agencies, and the agencies may provide it. The Secretary of Commerce is to provide staff and other support for the Committee.

Section 107. Repeal. This section repeals the original NACOA Act of 1971.

Section 108. Authorization for Appropriations. $445,000 is authorized for the fiscal year ending September 30, 1978.

By Mr. KENNEDY (for himself and Mr. MCGOVERN):

S. 1348. A bill to establish the African Development Foundation; to the Committee on Foreign Relations.

Mr. KENNEDY. Mr. President, I am introducing a bill with the Senator from South Dakota, Mr. MCGOVERN, to create an African Development Foundation to promote direct assistance to community self-help activities in Africa.

This measure, the African Development Foundation Act of 1977, responds both to the development needs within many African nations as well as to the positive and successful example of the Inter-American Development Foundation. The IAF has operated projects throughout the Western Hemisphere for the past 6 years and has compiled an exceptional record of achievement.

We believe the African Development Foundation can do the same and can once more give substance to the American people's desire to have direct people-to-people impact on the standard of living and the level of hope within poor communities around the globe.

In statistical terms, Africa is the world's poorest continent. Of the globe's 29 poorest countries, 18 are in Africa. These countries have a per capita income of less than $150 per year. Some, in fact, such as Mali, Upper Volta, and Rwanda, have per capita incomes of less than $100. As low as these figures are, they do not accurately reflect the depth and pervasiveness of the poverty that exists in Africa. Skewed income patterns within many African countries leave the vast majority of their populations below the average per capita income line. In countries such as Chad, Benin, Malawi, and Tanzania, for example, this poor majority constitutes over 90 percent of the population.

Over the past decade, the U.S. Congress has demonstrated its recognition of these conditions in mandating that our official development assistance focus on aiding the poorest countries, their poor majorities, and upon involving the poor in the development process. It has recognized that development does not take place purely through a transfer of resources. Rather the quality of the assistance and to whom it is delivered are of paramount importance. "Participation" is in the process of replacing "trickle down" as the byword of international development, but this will constitute little more than a change in rhetoric unless we clearly perceive what true participation signifies and support the mechanisms through which it can occur.

It is not enough simply that the minimum material needs of people are satisfied. How it is accomplished also is critically important. Enhancing a community's potential to shape its own fate ultimately will determine the success of development. Leaving it to others to interpret and act upon a community's needs and aspirations denies the dignity and undermines the ability to generate future development. It is this development of human resources with which we should be most concerned.

Nowhere in the world is widespread participation in development planning more imperative than in Africa, where unmatched diversity in cultures, history, geography, language, tradition, and social structures—even within the same country—makes implausible any uniform development formula. In dealing with a continent so abundantly endowed with natural and human resources, we should be working collaboratively with those who are attempting to promote human values and local community institutions.

Such assistance should not be limited, for instance, to short-term U.S. foreign policy objectives. Nor should it be designed to serve to underwrite any ideological panacea, to facilitate multinational corporations investment, or to be politically beneficial to any specific regime. Rather, if it can support the efforts of poor Africans to forge a better life for themselves, their communities, and their countries, then it stands a good chance of promoting mutually respectful relations in the long-run.

Ten thousand dollars provided to an African community in support of a development initiative that it has taken will have a far more beneficial impact in many instances than a $10 million loan to many a self-interested regime. Far greater flexibility is required than currently exists in our official development assistance program. We need the flexibility of the African Development Foundation to respond quickly and appropriately to initiatives taken by groups which traditionally have been at the margins of society.

It will not suffice, in other words, solely to increase the flow of financial assistance through existing Government institutions. By its nature, the Agency for International Development operates almost exclusively through institutions of developing country governments. It can only with difficulty discover new and innovative funding relationships.

The African Development Foundation would be complementing the work of AID. Through it, we as Americans could offer our committed support to the efforts of poor Africans to define and undertake their own development.

The creation of an African Development Foundation has a precedent in the Inter-American Foundation. The IAF was established as the Inter-American Social Development Institute in 1969 as a reflection of the will of the Congress to bring foreign aid out of Government and into communities. It was established as an autonomous, nonprofit, U.S. Government corporation with a Board of Directors from the public and private sectors chosen by the President. During its 6 years of operation it has carried out its mandate to respond to grass roots initiatives for social development in Latin America and the Caribbean. Its positive experience exemplifies the approach to development assistance that is contained within this legislation.

A similar institution for African development has to be shaped to the very different set of circumstances present in Africa.

Not only will it be responding to community-defined needs and solutions; but in the process, it will be expanding the capabilities for decisionmaking within those communities. The process is one of both supporting and helping to inspire awareness within African nations of the potential for self-help and community based development. Its experience, as it has in Latin America, will become a laboratory of widely different models, some to be adopted on a broader scale immediately, others to be modified and later incorporated into larger national development programming. But in all instances, it will be a responsive institution, dedicated not to the imposition of U.S. solutions but to the encouragement of African initiatives.

The African Development Foundation will be established as a nonprofit U.S. Government corporation. Its Board members will be selected by the President from both the public and private sectors. It will operate with complete independ-

ence from short-term U.S. foreign policy considerations.

It will be the purpose of the Foundation to support African initiatives designed to enlarge the opportunities for human and community development, to stimulate wider participation in the development process, and to promote greater control by Africans over decisions affecting their lives. In so doing, the Foundation will place primary emphasis on cooperative, community, and other group endeavors aimed at improving the quality of life of all participants.

The central function of the Foundation will be the funding of projects and programs that community groups undertake to foster their own development. Funding is to be effected as directly as possible and in a strictly responsive fashion.

Second, this institution will support the development of local institutions and of innovative relationships with representative intermediary organizations. This will constitute a challenging but critically important task for the Foundation.

Third, the Foundation will seek to evaluate project experiences with the involvement of experienced African development specialists.

A fourth function of the Foundation will be the support of African research and the facilitation of the transfer of African development resources, experience, and knowledge among the African nations themselves.

Lastly, it will be a function of the Foundation to disseminate to the American public and to other U.S. development institutions its experiences. This, in the last analysis, is a strong justification in itself for the creation of a new foundation, for it will move both Americans and Africans toward a clearer understanding of one another, and of the tortuous path toward development.

I am confident that this legislation offers a possibility of adding a new component to the relationship among the people of Africa and the United States, a relationship based on mutual trust and mutual respect.

Mr. President, I ask unanimous consent to have the bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1348

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "African Development Foundation Act".

SEC. 2. Part VI of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following:

"Chapter 2—THE AFRICAN DEVELOPMENT FOUNDATION ACT

"SEC. 921. FINDINGS.—The Congress finds that—

"(1) social and economic development ultimately depends on the progress and enhancement of opportunities for individuals within a society;

"(2) the development of individuals and institutions in African nations can benefit by providing support for community-based self-help activities;

"(3) by enacting title IX of the Foreign Assistance Act of 1961, the Foreign Assistance Act of 1973, and the International Development and Food Assistance Act of 1975, the Congress sought to enable the poor to participate in the process of development;

"(4) the Inter-American Foundation, established by Congress in the Foreign Assistance Act of 1969 to support the efforts of the people of Latin America and the Caribbean to solve their development problems, has demonstrated a successful approach to development; and

"(5) an African Development Foundation, patterned after the Inter-American Foundation, can complement current United States development programs in Africa.

"SEC. 922. PURPOSES.—(a) The purpose of the Foundation will be to enable Africans to develop their potential, fulfill their aspirations, and enjoy better, more productive lives.

"(b) The Foundation, in cooperation with indigenous organizations representative of the needs and aspirations of the poor and in coordination with private, regional, and international organizations, shall—

"(1) strengthen the bonds of friendship and understanding between the people of Africa and the United States;

"(2) support self-help initiatives designed to enlarge the opportunities for individual and community development;

"(3) stimulate and assist effective and expanding participation of Africans in their development process;

"(4) encourage the establishment and growth of private and governmental, indigenous, democratic institutions which can respond to the requirements of the poor majority of Africans; and

"(5) improve the quality of life for Africans, including but limited to, enlarging educational opportunities, at all levels, producing food, developing agriculture, improving the environment, and providing health care, labor organizations, and housing.

"SEC. 923. ESTABLISHMENT AND TERMINATION.—(a) There is established as a body corporate the African Development Foundation (hereinafter referred to as the "Foundation"). The Foundation shall have its offices in the United States and shall not have permanent representation in any other country.

"(b) The Foundation shall be a nonprofit corporation and shall have no capital stock. No part of its revenue, earnings, or other income or property shall inure to the benefit of its directors, officers, and employees, and such revenue, earnings, or other income or property shall only be used for carrying out the purposes set forth in this Act.

"(c) Upon termination of the corporate life of the Foundation its assets shall be liquidated and, unless otherwise provided by Congress, shall be transferred to the United States Treasury as the property of the United States.

"SEC. 924. MANAGEMENT.—(a)(1) The management of the Foundation shall be vested in a Board of Directors (hereafter referred to as the 'Board') composed of seven members appointed by the President, by and with the advice and consent of the Senate, one of whom he shall designate to serve as Chairperson of the Board and one of whom he shall designate to serve as Vice Chairperson of the Board. Four members of the Board shall be appointed from private life. Three members of the Board shall be appointed from among officers or employees of agencies of the United States concerned with African affairs.

"(2) Members of the Board shall be appointed for terms of six years, except that of the members first appointed, as designated by the President at the time of their appointment, two shall be appointed for terms of two years, and two shall be appointed for terms of four years. A member of the Board appointed to fill a vacancy occurring before the expiration of the term for which his predecessor was appointed shall be appointed only for the remainder of such term, but upon the expiration of his term of office such member shall continue to serve until his successor is appointed and shall have qualified. Members of the Board shall be eligible for reappointment.

"(b) Members of the Board shall serve without additional compensation, but shall be reimbursed for actual and necessary expenses not in excess of $50 per day, and for transportation expenses, while engaged in their duties on behalf of the Foundation.

"(c) A majority of the Board shall constitute a quorum.

"(d) The Board may appoint such committees for carrying out the work of the Foundation as the Board finds is in the best interests of the Foundation. Each such committee shall consist of not less than two members of the Board. The Board may delegate any part of the management of the business of the Foundation to such committees.

"(e)(1) The Board of Directors shall appoint a president of the Foundation on such terms as the Board may determine. The president shall receive compensation at a rate not to exceed that provided for level IV of the Executive Schedule under section 5315 of title 5, United States Code.

"(2) Experts and consultants, or organizations thereof, may be employed by the Board as authorized by section 3109 of title 5, United States Code.

"(3) Upon approval by the Board, the officers and employees of the Foundation may accept and hold offices or positions with governments or governmental agencies of foreign countries to which no compensation is attached.

"(f)(1) There shall be established a Council to be composed of such number of individuals as may be selected by the Board from among individuals, including foreign nationals, who are knowledgeable about development activities in Africa.

"(2) The Board shall consult the Council concerning the objectives and activities of the Foundation at least once each year.

"(3) Members of the Council shall receive no compensation for their services but shall be entitled to reimbursement in accordance with section 5703 of title 5, United States Code, for travel and other expenses incurred by them in the performance of their functions under this subsection.

"SEC. 925. FUNCTIONS.—(a) The Foundation may make grants, loans, and loan guarantees to any individual, corporation, or other entity, wherever situated, or to any government or governmental agency, foreign or domestic, to carry out the purposes of this Act, including but not limited to—

"(1) building local institutions and developing innovative relationships with intermediary organizations;

"(2) evaluating projects with a view to the transferability of such projects;

"(3) supporting African research and facilitating the transfer of development resources, expertise, and knowledge within Africa; and

"(4) disseminating to the American public and to United States development institutions insights gained through African development experiences.

"(b) In making grants, loans, and loan guarantees under subsection (a), the Foundation shall give priority to such projects and programs which community groups undertake to foster their own development, and only in poor communities where there are no such projects or programs may the Foundation make such grants, loans, and loan guarantees to African intermediary organizations which are representative and knowledgeable of, and sensitive to, the needs and aspirations of the poor.

"SEC. 926. POWERS.—The Foundation—

"(1) shall have perpetual succession unless dissolved by an Act of Congress;

"(2) may sue and be sued, complain, and defend, in its corporate name in any court of competent jurisdiction;

"(3) may adopt, alter, and use a seal, which shall be judicially noticed;

"(4) prescribe, amend, and repeal by its Board of Directors such rules and regulations as may be necessary for the conduct of the business of the Foundation;

"(5) may make and perform contracts and other agreements with any individual, corporation, or other entity however designated and wherever situated, or with any government or governmental agency, foreign or domestic;

"(6) may determine and prescribe the manner in which its obligations shall be incurred and its expenses allowed and paid, including expenses for representation not to exceed $10,000 in any fiscal year;

"(7) may, as necessary for the transaction of the business of the Foundation, employ, and fix the compensation of not to exceed seventy-five persons at any one time;

"(8) may lease, purchase, or otherwise acquire, own, hold, improve, use, or otherwise deal in and with any property, real, personal, or mixed, or any interest therein, wherever situated;

"(9) may accept gifts or donations of services, or of property, real, personal, or mixed, tangible or intangible, in furtherance of the purposes of this Act; and

"(10) shall have such other powers as may be necessary and incidental to carrying out its powers and duties under this Act.

"SEC. 927. GOVERNMENT CORPORATION CONTROL ACT.—The Foundation shall be subject to title I of the Government Corporation Control Act.

"SEC. 928. AUTHORIZATION OF APPROPRIATIONS.—(a) Notwithstanding any other provision of this Act, not to exceed an aggregate amount of $25,000,000 of the funds made available for each of the fiscal years 1978, 1979, and 1980 to implement this Act shall be made available to carry out the purposes of this chapter.

"(b) Funds made available under subsection (a) shall remain available until expended.".

By Mr. HELMS:

S. 1349. A bill to declare a portion of Trent River in the city of New Bern, County of Craven, State of North Carolina, nonnavigable waters of the United States within the meaning of the laws of the United States; to the Committee on Environment and Public Works.

Mr. HELMS. Mr. President, today I am introducing a bill to declare a portion of the Trent River at New Bern, N.C., as nonnavigable waters of the United States. The purpose of this bill is to allow the redevelopment commission of the city of New Bern to develop and revitalize a three block, 22-acre area adjoining the New Bern business district.

Investigations by the planning commission of the city of New Bern coupled with studies conducted by the urban planning division of the North Carolina Department of Conservation and Development revealed an urgent need for upgrading several areas of New Bern.

Further investigation showed that several programs administered by the U.S. Department of Housing and Urban Development could meet some of New Bern's needs where private capital would not venture. Therefore, the necessary preliminary work was done, and on July 29, 1969, HUD approved a renewal project for three blocks of New Bern's downtown waterfront.

The redevelopment commission was then appointed by the city alderman to administer the redevelopment program. That and countless hours spent by professional planners and the commission resulted in an ambitious face-lifting goal for once thriving, but now blighted area.

The three block, 22-acre urban renewal area has been cleared, bulkheaded, and its elevation raised a minimum of 7 feet, above river level.

Proposals for development, including a pedestrian mall, underground utilities, modern area lighting, ample parking, and landscaping will provide an attractive area for a variety of customer services, and inject new life into the economy of New Bern and the surrounding area.

However, in order for this much-needed development to proceed, legislation is necessary to officially declare this 22-acre tract as nonnavigable waters of the United States. This type of legislation is not unique, and has been done previously when similar situations have existed. Its enactment would obviously be of great benefit to the citizens of New Bern and the area of Craven County, N.C.

I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1349

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. That those portions of the Trent River in the City of New Bern, County of Craven, State of North Carolina, bounded and described as follows, are hereby declared to be non-navigable waters of the United States within the meaning of the laws of the United States:

All of those tracts or parcels of land lying and being in Craven County, North Carolina, in the City of New Bern between the high water mark of Trent River as it formerly existed, and the bulkhead marking the southern boundary of the lands of the New Bern Redevelopment Commission Project No. NCR-71, and more particularly described as follows:

Tract 1: Beginning at a point which lies south 12 degrees 12 minutes west 499.296 feet from the southwest corner of the intersection of Tryon Palace Drive and U.S. Highway No. 70; and running thence along the former high water mark of Trent River, the following courses and distances: North 79 degrees 07 minutes 24 seconds west 2.65 feet; north 8 degrees 20 minutes east 12.45 feet; north 44 degrees 57 minutes west 30.00 feet; north 89 degrees 45 minutes west 22.00 feet; south 86 degrees 45 minutes west 35.00 feet; south 12 degrees 25 minutes west 76.00 feet; north 76 degrees 35 minutes west 40.00 feet; north 7 degrees 20 minutes east 54.00 feet; north 24 degrees 45 minutes east 43.00 feet; north 24 degrees 45 minutes west 29.00 feet; north 53 degrees 30 minutes west 26.00 feet; north 15 degrees 00 minutes east 21.00 feet; north 77 degrees 15 minutes west 15.00 feet; north 10 degrees 00 minutes east 19.00 feet; north 83 degrees 45 minutes west 28.00 feet; south 37 degrees 55 minutes west 26.00 feet; south 20 degrees 45 minutes west 26.00 feet; south 10 degrees 00 minutes west 30.00 feet; south 49 degrees 45 minutes west 34.00 feet; north 84 degrees 55 minutes west 24.00 feet; north 12 degrees 10 minutes east 100.00 feet; east 7.00 feet; north 11 degrees 00 minutes east 56.00 feet; north 28 degrees 15 minutes west 34.00 feet; north 89 degrees 35 minutes west 15.00 feet; south 17 degrees 40 minutes west 23.00 feet; south 12 degrees 45 minutes west 44.00 feet; north 78 degrees 30 minutes west 85.00 feet; south 11 degrees 00 minutes west 74.00 feet; south 79 degrees 35 minutes east 9.00 feet; south 6 degrees 30 minutes west 39.00 feet; north 84 degrees 35 minutes west 41.00 feet; north 9 degrees 35 minutes east 124.00 feet; north 76 degrees 50 minutes west 54.00 feet; south 11 degrees 00 minutes west 108.00 feet; south 84 degrees 00 minutes west 32.00 feet; north 7 degrees 30 minutes east 71.00 feet; north 72 degrees 00 minutes west 32.00 feet; north 7 degrees 35 minutes east 39.00 feet; north 79 degrees 50 minutes west 29.00 feet; south 13 degrees 20 minutes west 37.00 feet; south 42 degrees 50 minutes west 22.00 feet; north 64 degrees 15 minutes west 13.00 feet; south 57 degrees 20 minutes west 14.00 feet; north 82 degrees 15 minutes west 60.00 feet; north 80 degrees 00 minutes west 108.00 feet; north 52 degrees 30 minutes west 40.00 feet; north 80 degrees 50 minutes west 32.00 feet; north 79 degrees 00 minutes west 32.00 feet; north 9 degrees 30 minutes east 16.00 feet; north 86 degrees 00 minutes west 17.00 feet; south 15 degrees 15 minutes west 40.00 feet; north 77 degrees 00 minutes west 54.00 feet; south 11 degrees 10 minutes west 157.00 feet; south 78 degrees 35 minutes east 5.00 feet; and south 9 degrees 40 minutes west 87.92 feet to the outer edge of the existing bulkhead of the New Bern Redevelopment Commission; thence with the outer edge of said bulkhead the following courses and distances: South 85 degrees 59 minutes 41 seconds east 34.92 feet; north 48 degrees 37 minutes 43 seconds east 135.44 feet, south 86 degrees 14 minutes 57 seconds east 574.09 feet; south 41 degrees 01 minutes 58 seconds east 134.16 feet; south 86 degrees 11 minutes 18 seconds east 62.96 feet; north 48 degrees 44 minutes 56 seconds east 124.48 feet and north 79 degrees 07 minutes 24 seconds west 2.99 feet to the place of beginning, containing 2.83 acres.

Tract 2: Beginning at a point in the eastern line of Middle Street at its intersection with the former high water mark of Trent River, said place of beginning being south 9 degrees 41 minutes west 702.783 feet along the eastern line of Middle Street from the southeast corner of Middle Street and Tryon Palace Drive, and running thence from this place of beginning along the former high water mark of Trent River north 82 degrees 46 minutes 30 seconds west 12.256 feet; thence north 9 degrees 48 minutes east 101.36 feet; thence north 78 degrees 41 minutes west 36.37 feet; thence south 9 degrees 11 minutes west 110.69 feet to the outer edge of the existing bulkhead of the New Bern Redevelopment Commission; thence with the outer edge of the existing bulkhead of the New Bern Redevelopment Commission south 85 degrees 59 minutes 41 seconds east 120.50 feet to a point where the existing bulkhead intersects the former high water mark of Trent River; thence north 82 degrees 46 minutes 30 seconds west 72.544 feet along the former high water mark of Trent River, to the place of beginning; containing 0.09 acres.

Tract 3: Beginning at a point which is located south 80 degrees 00 minutes east 50 feet, south 9 degrees 50 minutes west 313.31 feet; south 5 degrees 54 minutes 24 seconds west 155.79 feet; south 2 degrees 08 minutes east 46 035 feet and south 6 degrees 20 minutes 48 seconds east 1.86 feet from the intersection of the southern line of Tryon Palace Drive and the center line of the Atlantic and North Carolina Railroad; and running thence from this place of beginning with the outer edge of the existing bulkhead of the New Bern Redevelopment Commission the following courses and distances: South 86 degrees 41 minutes 04 seconds east 18.78 feet; thence south 41 degrees 08 minutes 50 seconds east 337.44 feet and south 85 degrees 59 minutes 41 seconds east 40.01 feet; and running thence with the former high water mark of

Trent River the following courses and distances: North 9 degrees 34 minutes east 165.69 feet; north 79 degrees 25 minutes west 69.00 feet; north 74 degrees 05 minutes west 73.00 feet; north 8 degrees 58 minutes east 162.00 feet; north 47 degrees 30 minutes west 65.00 feet; south 11 degrees 20 minutes west 101.50 feet; north 80 degrees 20 minutes west 21.00 feet; north 9 degrees 50 minutes east 133.00 feet; north 35 degrees 45 minutes west 33.00 feet; north 28 degrees 20 minutes west 32.00 feet; north 59 degrees 28 minutes 42 seconds wst 9.76 feet; south 2 degrees 00 minutes west 69.00 feet; south 9 degrees 40 minutes west 91.00 feet; south 89 degrees 10 minutes west 13.00 feet; south 20 degrees 10 minutes west 39.00 feet; south 47 degrees 10 minutes west 58.36 feet and south 6 degrees 20 minutes 48 seconds east 1.86 feet to the place of beginning; containing 1.20 acres.

The descriptions of the foregoing three tracts or parcels of land are taken from a survey prepared by Eastern Engineering & Associates, New Bern, North Carolina, Darrel D. Daniels, Registered Land Surveyor, dated July 28, 1972, revised August 4, 1975, reference to which is hereby made.

Being respectively Parcels 8, 7 and 6, as reflected upon the foregoing plat.

Being that portion of the waters of Trent River which were bulkheaded, and filled under permit bearing date January 16, 1970, addressed to the Redevelopment Commission of the City of New Bern, issued by the Wilmington District, Corps of Engineers, by authority of the Secretary of the Army.

SEC. 2. The declaration in Section 1 of this Act shall apply only to portions of the above described area which are either bulkheaded and filled, or occupied by permanent pile-supported structures, plans for such work having been approved by the Secretary of the Army acting through the Chief of Engineers.

By Mr. PELL (for himself, Mr. HOLLINGS, Mr. MAGNUSON, and Mr. STEVENS):

S. 1350. A bill to amend the National Sea Grant Program Act, to extend the appropriation authorization thereunder, and for other purposes; to the Committee on Human Resources and the Committee on Commerce, Science, and Transportation, jointly, by unanimous consent.

Mr. PELL. Mr. President, I am today introducing, for myself and Senators MAGNUSON, HOLLINGS, and STEVENS, legislation to extend for 2 years the appropriations authorization for the national sea grant college program.

The sea grant college program was established in 1966 with the goal of improving our Nation's use and management of our marine resources through programs of education, applied research, and extension services. The program has the objective of doing for our marine resources what the land grant college system has accomplished so effectively in developing our agricultural resources.

In the decade of its existence, the program has proven its worth. Last year, the Senate National Ocean Policy Study conducted a thorough review of the program and the basic authorizing legislation was revised to strengthen the program. In effect, the national sea grant college program in 1976 was subjected to the kind of basic review that is envisioned in "sunset" and zero-based budgeting proposals. After that review the National Ocean Policy Study, the Committee on Commerce and the Committee on Labor and Public Welfare recommended a $50,000,000 authorization for fiscal year 1977 and that recommendation was approved by the Congress.

The bill I am introducing today would extend the authorization of appropriations at the $50,000,000 level for fiscal years 1978 and 1979. It would also extend for 2 years the separate appropriation authorizations for two new sea grant program activities authorized by the 1976 legislation: A national needs category of sea grant activity, and a program to encourage international cooperation and exchanges in marine technology transfer and resource development.

Mr. President, as the original Senate sponsor of the legislation which established this program, I have been pleased and proud to see the program's measured growth and growing accomplishments.

Here in the Senate, the program has enjoyed broad support and I am particularly grateful to the distinguished chairman of the Senate Committee on Commerce, Science and Transportation, Senator MAGNUSON, and to the distinguished junior Senator from South Carolina, Senator HOLLINGS, for the immense contributions they have made to the sea grant college program through their leadership and support.

Mr. President, the Sea Grant College Act has played a vital role in building a national marine science capability that is responsive to local, State, and regional needs. This capability has become increasingly important as opportunities and pressures for increased use of our coastal areas and marine resources increase.

The program is also succeeding in developing and applying new technology with commercial, job-producing potentials. A recent study by the Center for Policy Alternatives at the Massachusetts Institute of Technology of 77 sea-grant projects concluded that these projects had a potential annual commercial sale potential of from $82 to $122 million by 1980.

Mr. President, I believe the sea-grant college program has grown stronger, more productive, and more necessary to our national well-being with each year. For that reason I am proud to join with Senators MAGNUSON and HOLLINGS in introducing this legislation.

Mr. HOLLINGS. Mr. President, the sea-grant program has made significant contributions which aid our understanding and management of the Nation's valuable coastal and ocean resources. It was created in 1966 through the Marine Resources and Engineering Development Act, which authorized a program to fund a series of educational, research, and advisory activities, most of them at colleges and universities around the country. Grants are made on a matching basis, with States and private groups sharing in the financing. The program originally was administered by the National Science Foundation, but was transferred in 1970 to the National Oceanic and Atmospheric Administration.

Sea grant is a practical and useful program. It funds the education and training of ocean professionals, researchers, and technicians. It supports research aimed at better understanding the oceans and coastal zone, knowledge which bears on both the development of resources and the protection of the environment. Much of this research is to improve our understanding and utilization of fisheries and aquaculture. Other work deals with improving harbors, understanding the ecology and economics of the coastal regions, and the development of new and environmentally sound ways to utilize marine minerals, including offshore oil and gas. The program also funds valuable marine advisory services, which directly provide information and assistance to industry and to State and local governments; sea grant believes in making its findings useful.

The program now is managed by NOAA's small and highly professional Office of Sea Grant. On the field level, the heart of the program is a series of schools designated as "sea-grant colleges." Located around the country, each such college program is designated to be a center of excellence for marine education, research, and advice for its particular area.

Last year the Sea Grant Act was 10 years old, and the program itself had grown from $8 1 million in 1968—$5 million in Federal money, the rest matching funds—to $39.9 million in 1976—$23.1 million in Federal money. The Congress took a comprehensive look at the program, and the result was the Sea Grant Program Improvement Act of 1976 (Public Law 94-461). The new law included these features:

The administrative provisions of the act were spelled out in greater detail both to provide more specific policy guidance and to facilitate congressional oversight.

The program's basic authorization of $50 million was continued for 1 additional year.

Two new aspects were added to the program. One was a separate 1-year authorization of $5 million for nonmatching grants to meet specific national needs in the marine area. This was done to improve NOAA's ability to understand today's complex policy issues, especially those dealing with the management of coastal and marine resources. Another separate 1-year authorization of $3 million was made for nonmatching grants to enhance the marine science and technology capabilities of developing countries and to encourage international sharing and exchange of information.

The new act also provided for regional consortia of colleges, in order to build cooperation among schools involved in marine and coastal affairs.

A small sea grant fellowship program was created as a means to encourage and recognize the efforts of qualified gradutes and undergraduates in marine and coastal affairs.

It established a sea grant review panel to monitor the program and offer advice to the office of sea grant.

The act requires the Secretary of Commerce to submit an annual report reviewing the activities of and outlook for sea grant, and containing independent evaluations by the Office of Management and Budget and the Office of Science and Technology Policy.

The new law was passed with a 1-year authorization, so that this year the Congress would hold hearings to review the

implementation of the new provisions, and to provide policy guidance where needed.

I look forward to the hearings that the Senate committee will soon hold on this bill. Sea grant is a nationally important program which has performed very well in the 11 years since it was created, and I am sure in the future that it will continue to contribute greatly to our understanding of the coastal and marine environments.

Mr. STEVENS. Mr. President, in 1966, Congress enacted Public Law 69-688, the National Sea Grant College and Program Act. The intent of the original act was to bring to bear on our Nation's rich ocean resources the same mechanisms that our system of land-grant colleges applied to the development of our Nation's agricultural resources. This act was reauthorized for 1 year during the last session of Congress and I am again happy to join with Senator HOLLINGS in reauthorizing this program.

The Sea Grant Act has authorized matching grants to colleges, universities, and other institutions for educational programs designed to solve national needs related to marine resources and to educate marine policy and resource specialists. Assigned originally to the National Science Foundation, the program became a part of the National Oceanic and Atmospheric Administration in October 1970, under the President's Reorganization Plan No. 4.

Currently, upward of 125 educational institutions are participating in the program and over 400 governmental agencies and private companies are involved in various sea grant programs. Grants issued under sea grant are currently averaging about 60 percent Federal funding—the Federal maximum allowable level under the act is 66⅔ percent. Eleven State legislatures appropriate matching funds as explicit items in their State budgets. Over 3,500 individuals are directly involved in sea-grant sponsored activities.

The sea grant program, given the funding limitations imposed on its operation, has proved to be a much needed component in the educational system. Experience in administering the basic act, however, has indicated that the program needs to be updated to meet the needs of the future. I feel it is critical to the long-range interests of this Nation that a vital and responsive sea grant program is in effect to educate and train those individuals who will be responsible for maintaining U.S. leadership in ocean activities.

Mr. President, it was 11 years ago that the Congress enacted the Pell-Rogers Act establishing the national sea grant college program. The objective was to provide an effective mechanism to increase practical knowledge and productive use of our Nation's marine resources.

Now, with the benefit of over a decade of experience with the national sea grant college program, we have before us legislation to reauthorize the program.

Through its selective and competitive system of matching grants, the sea grant college program has harnessed the energies of colleges and universities, State and local governments and other institutions, to produce effective programs of marine education, applied research on the problems of ocean resource development, and highly successful advisory services that reach out to all who are interested in the use and preservation of our coastal resources.

Because it is a matching grant program, the sea grant program has had an impact far greater than would be expected from its modest budget. And, because local interests share in the funding of sea grant programs, local sponsors have had a strong interest in seeing that the programs are directed to priority needs and are efficient and productive.

In Alaska, the University of Alaska, through sea grant, is doing a number of studies on shellfish and salmon fisheries, paralytic shellfish poison, commercial fishing safety, and commercial fisheries development. This work will be a great aid in our continuing efforts to replenish our depleted fish stocks and revitalize our fishing industry.

Over the last 11 years, sea grant has grown and developed into an outstanding program for ocean research. In the future, sea grant will be able to provide us with new information on regenerating, production, and harvest of our marine resources. Particularly in light of our new management authority in the 200-mile zone, sea grant will take on an added significance in the next few years.

Mr. President, I strongly support passage of this legislation. I also want to express my appreciation and admiration for the leadership and the cooperation demonstrated in the consideration of this legislation by the senior Senator from Washington, Senator MAGNUSON, chairman of the Commerce Committee, and the senior Senator from South Carolina, Senator HOLLINGS, chairman of the Subcommittee on Oceans and Environment, both of whom have given strong and consistent support to sea grant and to our entire national oceans program.

JOINT REFERRAL OF A BILL

Mr. PELL. Mr. President, I ask unanimous consent that the bill, the national sea grant college program, for the next 2 years' authorization introduced by myself, Senators HOLLINGS, MAGNUSON, and STEVENS, be jointly referred to the Committee on Human Resources, and the Committee on Commerce, Science, and Transportation.

This has been agreed to by the chairmen and the ranking minority members on both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. THURMOND:

S. 1351. A bill granting the consent of Congress to retired members of the uniformed services, members of reserve components of the Armed Forces, and members of the Public Health Service Reserve Corps to accept employment with foreign governments; to the Committee on the Judiciary.

Mr. THURMOND. Mr. President, retired members of the uniformed services and certain others are denied retirement benefits when they are employed by foreign governments. I am proposing legislation to authorize these earned benefits for which they are otherwise eligible under applicable laws.

This problem has been examined by the Comptroller General of the United States. The following is an extract from a report to me on this matter.

Article I, section 9, clause 8 of the Constitution of the United States provides as follows:

"No title of Nobility shall be granted by the United States: And no Person holding any Office of Profit or Trust under them, shall, without the Consent of the Congress, accept of any present, Emolument, Office, or Title, of any kind whatever, from any King, Prince, or foreign State."

The history of this provision indicates that the intent was to prevent foreign governments from exercising undue influence upon officers of the United States. 24 Op. Atty. Gen. 116 (1902). In this regard, it has been the longstanding position of this Office that the above-quoted provision of the Constitution requires the withholding of the retired pay of Regular members of the armed services, including officers retired for length of service who are employed in circumstances prohibited by the subject constitutional provision. See 41 Comp. Gen. 715 (1962); B-152844, December 12, 1963; 44 Comp. Gen. 130 (1964); and 53 Comp. Gen. 753 (1974).

The basis for such conclusion is founded on the well established holding that a Regular officer of the armed services who is retired from active service is still in the military service of the United States. *United States* v. *Tyler*, 105 U.S. 244 (1881); 10 U.S.C. 3075 (1970). See also *Hooper* v. *United States*, 164 Ct. Cl. 151 (1964). We have long held that certain members of the armed services, including Regular officers retired for length of service, receive retired pay by virtue of their continuing status in the military service after their retirement. See 23 Comp. Gen. 284 (1943); 37 Comp. Gen. 207 (1957); 38 Comp. Gen. 523 (1959); and 41 Comp. Gen. 715 (1962).

Although there are a great number of retirees living in foreign countries, it is not known how many are employed or desire to be employed by foreign governments. Most of them work for our Government or with U.S. contractors and civilian enterprises.

Mr. President, I believe that by establishing certain procedures under a new law, the historic objections of possible undue influence by foreign governments over these American retirees can be controlled and properly handled, if violations occur. The bill which I am proposing would permit retired members of the uniformed services to accept foreign government employment provided they have received prior approval of the Secretary of State and the Secretary of the Department concerned. It is my understanding, that the relevant departments do not oppose legislation to correct this inequity.

Legislative action of this type is necessary because of the determination by the Comptroller General that retired officers of certain uniformed services still hold an office of profit and trust under the U.S. Government even after retirement, and are thus subject to the restrictions of the last paragraph of the Constitution. Under present practice, failure to comply with the Comptroller General's interpretation of the constitutional pro-

visions results in loss of retirement benefits.

Mr. President, the legislation would, in effect, extend to retired regular officers of the specified services, consent that Congress granted to Reserve members of the armed services in 1952 (see U.S.C. 1032).

Consequently, I am introducing a bill granting the consent of the Congress to retired members of the uniformed services, members of Reserve components of the Armed Forces and members of the Public Health Service Reserve Corps to accept employment with foreign governments.

Mr. President, I sincerely urge my distinguished colleagues to give this proposal serious and favorable action. I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1351

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That (a) subject to the condition described in subsection (b), the consent of Congress is granted to—

(1) any retired member of the uniformed services,

(2) any member of a reserve component of the Armed Forces, and

(3) any member of the commissioned Reserve Corps of the Public Health Service, to accept any civil employment (and compensation therefor) with respect to which the consent of Congress is required by the last paragraph of section 9, article I of the Constitution of the United States, relating to acceptance of emoluments, offices, or titles from a foreign government.

(b) No individual described in subsection (a) may accept any employment or compensation described in such subsection unless the Secretary concerned and the Secretary of State approve such employment.

(c) For purposes of this Act, the term—

(1) "uniformed services" mean the Armed Forces, the commissioned Regular and Reserve Corps of the Public Health Service, and the commissioned corps of the National Oceanic and Atmospheric Administration;

(2) "Armed Forces" means the Army, Navy, Air Force, Marine Corps, and Coast Guard; and

(3) "Secretary concerned" means—

(A) the Secretary of the Army, with respect to retired members of the Army and members of the Army Reserve;

(B) the Secretary of the Navy, with respect to retired members of the Navy and the Marine Corps, members of the Navy and Marine Corps Reserves, and retired members of the Coast Guard and members of the Coast Guard Reserve when the Coast Guard is operating as a service in the Navy;

(C) the Secretary of the Air Force, with respect to retired members of the Air Force and members of the Air Force Reserve;

(D) the Secretary of Transportation, with respect to retired members of the Coast Guard and members of the Coast Guard Reserve when the Coast Guard is not operating as a service in the Navy;

(E) the Secretary of Commerce, with respect to retired members of the commissioned corps of the National Oceanic and Atmospheric Administration; and

(F) the Secretary of Health, Education, and Welfare, with respect to retired members of the commissioned Regular Corps of the Public Health Service and members of the commissioned Reserve Corps of the Public Health Service.

(d) Section 1032 of title 10, United States Code, is repealed.

By Mr. THURMOND (for himself, Mr. TALMADGE, Mr. HOLLINGS, Mr. STAFFORD, Mr. NUNN, Mr. SCOTT, and Mr. LEAHY):

S. 1352. A bill to amend section 2107 of title 10, United States Code, to authorize financial assistance to be made available to an additional number of students enrolled in the Senior Reserve Officers' Training Corps programs at certain designated educational institutions, and for other purposes; to the Committee on Armed Services.

Mr. THURMOND. Mr. President, in the last session of Congress, five of my distinguished colleagues and I introduced S. 2563 to authorize the reallocation of Reserve Officer Training Corps—ROTC—scholarships to designated military colleges and others which met certain requirements.

Since this very worthy measure was not acted upon, several of my colleagues and I are reintroducing a similar bill today. I believe that this bill has even more merit than when we introduced it originally in the 94th Congress.

Mr. President, many of our highly qualified young men today who are motivated for a military career cannot afford to go to a 4-year college where the ROTC programs are superior because the cost is prohibitive. This bill would help some of these less fortunate, but top caliber, young men to pursue a military career at some of our best military colleges where four years of a disciplined and military environment are required. Our service academies can only accept a limited number of thousands of highly qualified applicants.

Mr. President, this bill is different from the last one in one major area. My bill in the last session of Congress reallocated authorized scholarships. My current proposal would increase the total number of scholarships. It will not reduce the scholarships at other fine colleges and universities where there are excellent ROTC programs on an optional basis. This bill will authorize additional ROTC scholarships at designated military universities over and above the current 19,000 scholarships authorized under the law. It will authorize 60 ROTC scholarships for each military service represented on the campus at each of the four designated military institutions: The Citadel; Virginia Military Institute (VMI); North Georgia College; and Norwich University. These scholarships to each of these designated military schools would be in addition to those scholarships awarded to individual's who choose to attend one of the designated military schools, or other colleges where 4 years of ROTC are available. The military services which are presently represented at these designated military institutions are: The Citadel and VMI, Army, Navy and Air Force; Norwich University, Army and Air Force; and North Georgia College, Army.

In addition, this bill will authorize the same additional number of scholarships to each accredited educational institution which meets the established criteria in the proposed measure. However, military colleges other than those designated where the criteria can be complied with are unknown.

Mr. President, the total additional ROTC scholarships annually authorized by my bill for the currently designated colleges would be 540. The estimated cost today for a 4-year scholarship student is about $15,000, or about $3,750 per year. Consequently, the approximate cost of this measure initially would be about $1.9 million, plus costs of military colleges which may qualify as a designated college in the future under this measure. This bill will increase the currently authorized scholarships from 19,000 to 19,540. The Department of Defense currently budgets about $89 million for the scholarship program.

The cost may sound expensive, but when comparing the $15,000 for one 4-year scholarship at an ROTC college to $102,000 estimated for one 4-year graduate of West Point, when the cost is not excessive. At our military academies, the Government funds the entire cost of the academies, whereas a designated military college is mostly or entirely financed from sources other than Federal revenues. The average cost to a designated military college to graduate a commissionee is estimated to be about $17,824 for fiscal year 1977.

It should be pointed out that the Defense Department is currently authorized 19,000 ROTC scholarships. Many of the 19,000 are 2-year scholarships. A budget of approximately $89 million annually has been sufficient to maintain the current level of scholarships. The additional 540 ROTC scholarships for designated colleges specified in this bill will increase the scholarships annual funding to about $90.9 million.

Mr. President, the single factor which most differentiates the military college from other ROTC host institutions is the total immersion in a military environment as opposed to the part-time participation.

The military colleges organize their students in a Corps of Cadets—an organization that exists 24 hours a day, 7 days a week. These corps, other than providing military regimentation, also provide the continuing environment through which individuals develop leadership abilities. The development of these abilities is promoted through an organized military chain of command wherein individual cadets occupy the military positions comparable to their counterparts in an active military organization. Thus, in the 4 years of attendance at a full-time military college, a student has opportunity to progress through various ranks and responsibilities in a progressive pattern of leadership.

This process is carried out both in the barracks and classroom for the chain of command is constantly in effect and the regulations of the corps always pertain.

The conduct of drill, wearing of the uniform, routine inspections, and attendance at ROTC classes, all have their parallels at some of the nonmilitary ROTC host institutions. However, it is the total immersion in the military environment which most distinguishes the military colleges.

Certainly, the student who has been trained militarily on a continuing basis versus the part-time ROTC student will have a distinct advantage at the time of his commission into a military service of his choice.

Mr. President, for the convenience of my distinguished colleagues, I would like to extract some of the rationale for introducing the previous measure. The following are extracts from the CONGRESSIONAL RECORD of October 22, 1975, volume 121, No. 155:

Mr. President, a few years ago our military establishment and our Nation experienced a devisive antimilitary and antipatriotic era beyond all reason because of the Vietnam War. It is indeed heartening and encouraging that we are now beginning to see in our society a dramatic move back toward patriotism, citizenship, honor, and integrity by our young people.

There are many signs of this trend today in our society, but one of the most obvious indicators is the great increase in applications to our service academies and our Reserve Officer Training Corps—ROTC—colleges.

Mr. President, more young Americans are seeking the challenges offered by a military education which can be readily seen in recent application figures from the national service academies. This past year there were just under 11,000 applicants to the U.S. Military Academy at West Point; however, only 1,500 cadet spaces were available for the last school year 1974–75. There were approximately 4,000 fully qualified applicants remaining who could not be admitted due to space limitations.

Both the Air Force and Naval Academies enjoyed similar record application figures. My own applicants to the service academies have almost doubled the last 2 years. This is particularly significant when we see many of our Nation's colleges and universities experiencing a drop in enrollment.

Thus, it has become most apparent to me that our military colleges such as The Citadel, the Virginia Military Institute (VMI), North Georgia College (NGC) and (Norwich University added) along with our service academies, should play an increasingly important role in this resurgence of the basic principles which have provided our Nation with enduring greatness. I am convinced that our country is realizing only a small fraction of the potential of the national resources that our military colleges represent, as producers of high quality career officers and citizen soldiers.

Mr. President, we have long recognized the truth that our service academies produce the type and quality of leaders that are required by our Armed Forces. It is also true that a regimented and disciplined educational environment stressing integrity, character building and leadership is a sound basis for selecting future leaders. Furthermore, attendance at a military college with a nonpermissive regimen can be a measure of the motivation and interest for extended service of scholarship students.

Therefore, I am introducing legislation which would allow our Nation to more fully realize the advantages offered by the unique leadership laboratories of the military college. This legislation advocates directing a number of ROTC scholarship students each year to specified military colleges which require a total of 4-year military environment. The variety of academic disciplines at these institutions, plus an improved curriculum resulting from such a program could readily accommodate scholarship students from each service each year.

Mr. President, the certification of the military college in public law has always been a strong prestige factor to specified schools. It was apparently considered necessary for their continued national reputations and consequent capability to attract students on a national basis. To me, this concept is, in today's society, more important than ever. However, the military college ROTC program for scholarship purposes, is treated like other ROTC units whose missions do not concentrate on career recruitment of officers nor have the training and development comparable to the service academies. Military colleges, like The Citadel, VMI, NGC, and (Norwich University added) are comparable in these fields to the service academies. Admittedly, equal programs deserve equal treatment, but I believe additional considerations are fully justified for programs which offer a total military environment.

Mr. President, I believe certain military colleges are entitled to a greater number of 4-year ROTC scholarship recipients, thus more fully employing the resources of these fine institutions in providing our Armed Forces with a well trained young leader who is endowed with a high sense of duty, integrity and courage.

Also, many thousands of our Nation's outstanding high school graduates are interested in military colleges and qualified but cannot attend college because of the excessive spiraling costs of a college education.

Mr. President, I am proposing an amendment to section 2107, title 10 of the United States Code to authorize an additional 540 ROTC scholarships for the Army, Navy, and Air Force to be allocated on the basis of 60 per military service hosted at each of the following designated military colleges: The Citadel, Charleston, S.C.; Virginia Military Institute, Lexington, Va.; North Georgia College, Dahlonega, Ga.; and Norwich University, Norfield, Vt. These 540 scholarships are over and above those authorized under the Department of Defense current program, whereby a person is awarded a scholarship and chooses the college he desires which may or may not be one of the designated military schools. The same standards for awarding scholarships apply to both categories.

In addition, this bill will provide additional scholarships for those military colleges which may qualify under the criteria of the bill. The bill requires that: The college be an accredited educational institution; makes the ROTC program available for all students for 4 years and requires that at least 2 years be mandatory; authorized to grant baccalaureate degrees; and has been specifically designated by the Secretary of Defense.

Mr. President, this is the objective of my bill. I sincerely urge my distinguished colleagues to give this proposal serious and favorable action. I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1352

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2107 of title 10, United States Code, is amended by adding at the end thereof a new subsection as follows:

"(i)(1) In addition to the total number of appointments specified in subsection (h)—

"(A) not more than 60 appointments may be awarded to students enrolled in the Army Reserve Officers' Training Corps program, not more than 60 appointments to students enrolled in the Naval Reserve Officers' Training Corps program, and not more than 60 appointments to students enrolled in the Air Force Reserve Officers' Training Corps program at the following educational institutions:

"(i) The Citadel, Charleston, South Carolina;

"(ii) Virginia Military Institute, Lexington, Virginia;

"(iii) North Georgia College, Dahlonega, Georgia; and

"(iv) Norwich University, Northfield, Vermont.

"(B) not more than 60 appointments may be awarded to students enrolled in the Army Reserve Officers' Training Corps program, not more than 60 appointments to students enrolled in the Naval Reserve Officers' Training Corps program, and not more than 60 appointments to students enrolled in the Air Force Reserve Officers' Training Corps program at each accredited educational institution (other than an institution named in subclause (A)) which (i) makes the Reserve Officers' Training Corps program a mandatory course of study for at least two years, (ii) is authorized to grant baccalaureate degrees, and (iii) has been specifically designated by the Secretary of Defense for such additional number of appointments.

"(2) No appointment may be made under this subsection in any Army, Naval, or Air Force Reserve Officers' Training Corps program, as the case may be, at any educational institution named in clause (1)(A) or designated under clause (1)(B) unless such program is offered by such institution as a four year program.".

By Mr. THURMOND:

S. 1353. A bill to amend chapter 81 of title 28, United States Code, to provide review by the Supreme Court of the United States for decisions of the U.S. Court of Military Appeals; to the Committee on the Judiciary.

Mr. THURMOND. Mr. President, the Supreme Court of the United States by writ of certiorari reviews the decisions of Federal courts in criminal cases, except those of the U.S. Court of Military Appeals. Review by certiorari of the Court of Military Appeals decisions is desirable to insure proper and complete resolution of constitutional issues in military justice. As the Supreme Court has recognized the expertise of the Court of Military Appeals, it would be appropriate as well as efficient to provide for direct review of decisions by the Supreme Court. Direct review would replace an inefficient system of indirect review, beginning in the Federal district courts, through collateral attacks on military convictions.

The annual report of the U.S. Court of Military Appeals and the Judge Advocates General of the Armed Forces and the General Counsel of the Department of Transportation provided to Congress for 1974 indicates that the services tried 47,818 courts-martial. Of that number, 5,330 were reviewed by Courts of Military Review. During this period, 1,417 cases were docketed with the U.S. Court of Military Appeals. Nevertheless, there should be no large increase in the workload of the Supreme Court. Few military cases include the type of issues which would lead to issuance of a writ of certiorari. Even though few military cases would come before the Supreme Court, their impact would be great in view of the military cases tried. This bill will insure the Highest Court of the Nation

a direct influence on military criminal jurisprudence.

ADDITIONAL COSPONSORS

S. 175

At the request of Mr. SCHWEIKER, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 175, a bill to provide a special program of financial assistance to opportunities industrialization centers and to other national community based organizations.

S. 247

At the request of Mr. GOLDWATER, the Senator from Oklahoma (Mr. BELLMON) was added as a cosponsor of S. 247, to provide recognition to the Women's Air Forces Service Pilots.

S. 270

At the request of Mr. KENNEDY, the Senator from Vermont (Mr. STAFFORD), the Senator from Michigan (Mr. RIEGLE), the Senator from Ohio (Mr. METZENBAUM), the Senator from Alaska Mr. GRAVEL), and the Senator from Hawaii (Mr. MATSUNAGA) were added as cosponsors of S. 270, the Public Participation in Federal Agency Proceedings Act.

S. 380

At the request of Mr. DOLE, the Senator from Texas (Mr. TOWER) was added as a cosponsor to S. 380, which would amend section 111 of the Agricultural Trade Development and Assistance Act of 1954 to modify the so-called 75/25 food assistance requirement provided for in such section.

S. 708

At the request of Mr. CLARK, the Senator from Oregon (Mr. PACKWOOD) was added as a cosponsor of S. 708, to amend the Social Security Act.

At the request of Mr. CLARK, the Senator from Missouri (Mr. EAGLETON) was added as a cosponsor of S. 708, to amend title XVIII of the Social Security Act to provide payment for rural health clinic services.

S. 779

At the request of Mr. BURDICK, the Senator from Minnesota (Mr. ANDERSON) and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of S. 779, to amend the Internal Revenue Code of 1954.

S. 834

At the request of Mr. SCHWEIKER, the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 834, to amend the Internal Revenue Code of 1954 to permit a taxpayer to deduct, or to claim a credit for, amounts paid as tuition to provide education for himself, his spouse, or his dependents.

S. 846

At the request of Mr. DOMENICI, the Senator from Alaska (Mr. GRAVEL) and the Senator from Idaho (Mr. MCCLURE) were added as cosponsors of S. 846, the Water Resources Research and Technology Development Act.

S. 987

At the request of Mr. ANDERSON, the Senator from Utah (Mr. GARN), the Senator from North Dakota (Mr. YOUNG), and the Senator from Minnesota (Mr. HUMPHREY) were added as cosponsors of S. 987, to amend the Immigration and Nationality Act.

S. 995

At the request of Mr. WILLIAMS, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 995, to amend the Civil Rights Act of 1964.

S. 1014

At the request of Mr. DOMENICI, the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 1014, to amend the Internal Revenue Act of 1954.

S. 1167

At the request of Mr. DOMENICI, the Senator from Texas (Mr. TOWER) was added as a cosponsor of S. 1167, the Native Latex Commercialization Act.

S. 1177

At the request of Mr. CHILES, the Senator from Florida (Mr. STONE), the Senator from Alabama (Mr. ALLEN), the Senator from Montana (Mr. MELCHER), and the Senator from Indiana (Mr. LUGAR) were added as cosponsors of S. 1177, to amend the Occupational Safety and Health Act.

S. 1260

At the request of Mr. HART, the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 1260, the Health Protection Tax Act of 1977.

S. 1326

At his own request, the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 1326, to designate the Thaddeus Kosciuszko Historic Route.

SENATE RESOLUTION 117

At the request of Mr. NELSON, the Senator from South Carolina (Mr. HOLLINGS) and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of Senate Resolution 117, to designate National Small Business Week.

SENATE CONCURRENT RESOLUTION 6

At the request of Mr. BAYH, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of Senate Concurrent Resolution 6, to place a statue of Martin Luther King, Jr., in the Capitol.

AMENDMENT NO. 136

At the request of Mr. SCHWEIKER, the Senator from Utah (Mr. HATCH) and the Senator from California (Mr. HAYAKAWA) were added as cosponsors of amendment No. 136, intended to be proposed to H.R. 4876, making economic stimulus appropriations for the fiscal year ending September 30, 1977.

AMENDMENT NO. 188

At the request of Mr. DOMENICI, the Senator from New Hampshire (Mr. DURKIN) was added as a cosponsor of amendment No. 188, intended to be proposed to H.R. 3477, the Tax Reduction and Simplification Act of 1977.

AMENDMENT NO. 190

At the request of Mr. CHURCH, the Senator from Texas (Mr. BENTSEN), the Senator from North Dakota (Mr. BURDICK), the Senator from Alaska (Mr. GRAVEL), the Senator from New Hampshire (Mr. DURKIN), the Senator from Colorado (Mr. HART), the Senator from California (Mr. HAYAKAWA), and the Senator from South Carolina (Mr. HOLLINGS) were added as cosponsors of amendment No. 190, intended to be proposed to H.R. 3477, the Tax Reduction and Simplification Act of 1977.

AMENDMENT NO. 195

At the request of Mr. GOLDWATER, the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of amendment No. 195, intended to be proposed to H.R. 3477, the Tax Reduction and Simplification Act of 1977.

SENATE RESOLUTION 140—SUBMISSION OF A RESOLUTION AUTHORIZING ADDITIONAL EXPENDITURES

(Referred to the Select Committee on Small Business.)

Mr. NELSON (for himself and Mr. WEICKER) submitted the following resolution:

S. RES. 140

Resolved, That, in holding hearings, reporting such hearings, and making investigations as authorized by section 134(a) of the Legislative Reorganization Act of 1946, as amended, and Senate Resolution 58, Eighty-first Congress, agreed to February 20, 1950, as amended and supplemented, in accordance with its jurisdiction under such Senate Resolution, the Select Committee on Small Business, or any subcommittee thereof, is authorized from July 1, 1977, through February 28, 1978, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency, and (4) to procure the temporary services (not in excess of one year) or intermittent services of individual consultants, or organizations thereof, in the same manner and under the same conditions as a standing committee of the Senate may procure such services under section 202(i) of the Legislative Reorganization Act of 1946, as amended.

SEC. 2. The expenses of the committee under this resolution shall not exceed $174,500.00, of which amount not to exceed $1,500.00 may be expended for the procurement of the services of individual consultants, or organizations thereof.

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1978.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

SENATE RESOLUTION 141—SUBMISSION OF A RESOLUTION AUTHORIZING EXPENDITURES BY THE SELECT COMMITTEE ON NUTRITION AND HUMAN NEEDS

(Referred to the Committee on Human Resources.)

Mr. MCGOVERN (for himself, Mr. PERCY, Mr. KENNEDY, Mr. HUMPHREY, Mr. DOLE, Mr. SCHWEIKER, Mr. LEAHY, and Mr. ZORINSKY) submitted the following resolution:

S. RES. 141

Resolved, That the expenses of the Select Committee on Nutrition and Human Needs,

established by S. Res. 281, Ninetieth Congress, agreed to on July 30, 1968, and extended by S. Res. 4 through December 31, 1977, shall not exceed $241,500.00, of which amount not to exceed $12,500.00 shall be available for the procurement of the services of individual consultants, or organizations thereof, for the period of July 1, 1977, through December 31, 1977.

SEC. 2. Expenses of the Committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the Chairman of the Committee.

SEC. 3. Severance benefits shall be extended to staff of the Select Committee on Nutrition and Human Needs in the same amount and under the same formula as benefits paid to staff of Committees terminated under the provisions of S. Res. 4.

Mr. McGOVERN. Mr. President, I am submitting, on behalf of myself, Senator PERCY, the ranking minority member, and other Senators, a resolution extending the Select Committee on Nutrition and Human Needs through December 31, 1977, and authorizing additional expenditures by the committee for that period.

The committee met in executive session this morning and following a poll of members, unanimously approved this resolution and the budget expenditure which it would authorize.

Mr. President, the proposed extension and budget of the select committee reflect two important realities: First, the need for fiscal restraint in Government; and second, recognition of the vitally important work that remains to be done in the areas of nutrition education, nutrition research, diet and health, and the still too prevalent problems related to malnutrition.

The proposed committee budget for the period July 1 through December 31, 1977, is $241,500—less than a 10-percent increase over the budget approved for the previous 12 months. The fact that this increase hardly even meets the likely rate of inflation does not reflect a diminished salience or priority of nutrition issues.

Indeed, in areas ranging from food stamps to child nutrition to nutrition problems of the elderly, the value of the committee's work continues to grow. Rather the size of the proposed budget increase, which in real dollars represents virtually no increase and in fact provides no additional staff, is a result of my strong conviction, and that of the committee in general, that every part of Government ought to restrain spending to the maximum possible extent and achieve the maximum return for each dollar of expenditure. There has been no attempt to inflate the budget request to absorb an anticipated cut. The committee believes this to be a realistic, minimum budget.

Committee members also emphasized the importance of providing identical severance benefits to staff members as those provided other staffers of committees terminated by Senate Resolution 4.

SENATE RESOLUTION 142—ORIGINAL RESOLUTION REPORTED AUTHORIZING ADDITIONAL EXPENDITURES

(Referred to the Committee on Rules and Administration.)

Mr. STENNIS, from the Committee on Armed Services, reported the following original resolution:

S. RES. 142

Resolved, That, in holding hearings, reporting such hearings and making investigations as authorized by sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, in accordance with its jurisdiction under rule XXV of the Standing Rules of the Senate, the Committee on Armed Services, or any subcommittee thereof, is authorized from July 1, 1977, through February 28, 1978, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

SEC. 2. The expenses of the committee under this resolution shall not exceed $500,000, of which amount not to exceed $36,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202 (i) of the Legislative Reorganization Act of 1946, as amended).

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1978.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

SENATE RESOLUTION 143—ORIGINAL RESOLUTION REPORTED RELATING TO THE CONSIDERATION OF H.R. 5040

(Referred to the Committee on the Budget.)

Mr. SPARKMAN, from the Committee on Foreign Relations, reported the following original resolution:

S. RES. 143

Resolved, that (a) pursuant to 402(c)(1)(A) of the Congressional Budget Act of 1974 (Public Law 93-344; 88 Stat. 297), subsection (a) of such section shall not apply with respect to the consideration in the Senate of the bill (H.R. 5040) to authorize additional appropriations for the Department of State for fiscal year 1977.

(b) Such waiver is necessary for the following reasons:

(1) U.S. contributions to UNESCO, the authorization of appropriations for which is the principal purpose of this bill, were suspended by Congress in December 1974 until such time as the President certified to Congress that UNESCO had adopted policies more consistent with that organization's original objectives; such certification having been made on December 29, 1976, funds are now needed for the payment of U.S. arrearages; and

(2) the other appropriations authorized by the bill—for migration and refugee assistance in Indochina, for aid to Soviet refugees, and for the construction of Foreign Service buildings in Cairo—represent needs which were not identified by the Committee until this session of Congress.

AMENDMENTS SUBMITTED FOR PRINTING

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977—H.R. 3477

AMENDMENT NO. 200

(Ordered to be printed and to lie on table.)

Mr. DANFORTH. Mr. President, on behalf of Mr. JAVITS, Mr. BELLMON, Mr. DOMENICI, Mr. DOLE, Mr. MCCLURE, Mr. CHAFEE, Mr. HATFIELD, Mr. LUGAR, and myself, I submit an amendment for printing which we intend to propose to H.R. 3477, and I ask unanimous consent that the text of the amendment be printed at this point in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 200

Beginning on page 32, line 1, up to page 37, line 1, in lieu of the material sought to be inserted by the committee amendment, insert thereof the following:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2 (a)), a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $4,200	No tax.
Over $4,200 but not over $5,200	$120, plus 13% of excess over $4,200.
Over $5,200 but not over $6,200	$250, plus 15% of excess over $5,200.
Over $6,200 but not over $7,200	$4,00, plus 16% of excess over $6,200.
Over $7,200 but not over $9,200	$560, plus 18% of excess over $7,200.
Over $9,200 but not over $13,200	$1,280, plus 21% of excess over $9,200.
Over $13,200 but not over $17,200	$2,120, plus 24% of excess over $13,200.
Over $17,200 but not over $21,200	$3,080, plus 27% of excess over $17,200.
Over $21,200 but not over $25,200	$4,160, plus 32% of excess over $21,200.
Over $25,200 but not over $29,200	$5,440, plus 36% of excess over $25,200.
Over $29,200 but not over $33,200	$6,880, plus 39% of excess over $29,200.
Over $33,200 but not over $37,200	$8,440, plus 42% of excess over $33,200.
Over $37,200 but not over $41,200	$10,120, plus 45% of excess over $37,200.
Over $41,200 but not over $45,200	$11,920, plus 48% of excess over $41,200.
Over $45,200 but not over $53,200	$13,840, plus 50% of excess over $45,200.
Over $53,200 but not over $65,200	$17,840, plus 53% of excess over $53,200.

"If the taxable income is:	The tax is:
Over $65,200 but not over $77,200	$24,200, plus 55% of excess over $65,200.
Over $77,200 but not over $89,200	$30,800, plus 58% of excess over $77,200.
Over $89,200 but not over $101,200	$37,760, plus 60% of excess over $89,200.
Over $101,200 but not over $121,200	$44,960, plus 62% of excess over $101,200.
Over $121,200 but not over $141,200	$57,360, plus 64% of excess over $121,200.
Over $141,200 but not over $161,200	$70,160, plus 66% of excess over $141,200.
Over $161,200 but not over $181,200	$83,360, plus 68% of excess over $161,200.
Over $181,200 but not over $201,200	$96,960, plus 69% of excess over $181,200.
Over $201,200	$110,760, plus 70% of excess over $201,200.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(b)) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $4,200	No tax.
Over $4,200 but not over $5,200	$120, plus 14% of excess over $4,200.
Over $5,200 but not over $7,200	$260, plus 17% of excess over $5,200.
Over $7,200 but not over $9,200	$600, plus 18% of excess over $7,200.
Over $9,200 but not over $11,200	$960, plus 21% of excess over $9,200.
Over $11,200 but not over $13,200	$1,380, plus 22% of excess over $11,200.
Over $13,200 but not over $15,200	$1,820, plus 24% of excess over $13,200.
Over $15,200 but not over $17,200	$2,300, plus 26% of excess over $15,200.
Over $17,200 but not over $19,200	$2,820, plus 28% of excess over $17,200.
Over $19,200 but not over $21,200	$3,380, plus 30% of excess over $19,200.
Over $21,200 but not over $23,200	$3,980, plus 32% of excess over $21,200.
Over $23,200 but not over $25,200	$4,620, plus 35% of excess over $23,200.
Over $25,200 but not over $27,200	$5,320, plus 36% of excess over $25,200.
Over $27,200 but not over $29,200	$6,040, plus 38% of excess over $27,200.
Over $29,200 but not over $31,200	$6,800, plus 41% of excess over $29,200.
Over $31,200 but not over $35,200	$7,620, plus 42% of excess over $31,200.
Over $35,200 but not over $39,200	$9,300, plus 45% of excess over $35,200.
Over $39,200 but not over $41,200	$11,100, plus 48% of excess over $39,200.
Over $41,200 but not over $43,200	$12,060, plus 51% of excess over $41,200.
Over $43,200 but not over $47,200	$13,080, plus 52% of excess over $43,200.
Over $47,200 but not over $53,200	$15,160, plus 55% of excess over $47,200.
Over $53,200 but not over $55,200	$18,460, plus 56% of excess over $53,200.
Over $55,200 but not over $67,200	$19,580, plus 58% of excess over $55,200.
Over $67,200 but not over $73,200	$26,540, plus 59% of excess over $67,200.
Over $73,200 but not over $79,200	$30,080, plus 61% of excess over $73,200.
Over $79,200 but not over $83,200	$33,740, plus 62% of excess over $79,200.
Over $83,200 but not over $91,200	$36,220, plus 63% of excess over $83,200.
Over $91,200 but not over $103,200	$41,260, plus 64% of excess over $91,200.
Over $103,200 but not over $123,200	$48,940, plus 66% of excess over $103,200.
Over $123,200 but not over $143,200	$62,140, plus 67% of excess over $123,200.
Over $143,200 but not over $163,200	$75,540, plus 68% of excess over $143,200.
Over $163,200 but not over $183,200	$89,140, plus 69% of excess over $163,200.
Over $183,200 but not over $283,200	$102,940, plus 70% of excess over $183,200.
Over $283,200	$172,940, plus 70% of excess over $283,200.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

If the taxable income is:	The tax is:
Not over $2,700	No tax.
Over $2,700 but not over $3,200	$60, plus 13% of excess over $2,700.
Over $3,200 but not over $3,700	$125, plus 15% of excess over $3,200.
Over $3,700 but not over $4,200	$200, plus 16% of excess over $3,700.
Over $4,200 but not over $6,200	$280, plus 18% of excess over $4,200.
Over $6,200 but not over $8,200	$640, plus 21% of excess over $6,200.
Over $8,200 but not over $10,200	$1,060, plus 22% of excess over $8,200.
Over $10,200 but not over $12,200	$1,500, plus 24% of excess over $10,200.
Over $12,200 but not over $14,200	$1,980, plus 27% of excess over $12,200.
Over $14,200 but not over $16,200	$2,520, plus 29% of excess over $14,200.
Over $16,200 but not over $18,200	$3,100, plus 31% of excess over $16,200.
Over $18,200 but not over $20,200	$3,720, plus 34% of excess over $18,200.
Over $20,200 but not over $22,200	$4,400, plus 36% of excess over $20,200.
Over $22,200 but not over $24,200	$5,120, plus 38% of excess over $22,200.
Over $24,200 but not over $28,200	$5,880, plus 40% of excess over $24,200.
Over $28,200 but not over $34,200	$7,480, plus 45% of excess over $28,200.
Over $34,200 but not over $40,200	$10,180, plus 50% of excess over $34,200.
Over $40,200 but not over $46,200	$13,180, plus 55% of excess over $40,200.
Over $46,200 but not over $52,200	$16,480, plus 60% of excess over $46,200.
Over $52,200 but not over $62,200	$20,080, plus 62% of excess over $52,200.
Over $62,200 but not over $72,200	$26,280, plus 64% of excess over $62,200.
Over $72,200 but not over $82,200	$32,680, plus 66% of excess over $72,200.
Over $82,200 but not over $92,200	$39,280, plus 68% of excess over $82,200.
Over $92,200 but not over $102,200	$46,080, plus 69% of excess over $92,200.
Over $102,200 but not over $152,200	$52,980, plus 70% of excess over $102,200.
Over $152,200 but not over $202,200	$87,980, plus 70% of excess over $152,200.
Over $202,200, but not over $302,200	$122,980, plus 70% of excess over $202,200.
Over $302,200	$192,980, plus 70% of excess over $302,200.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

If the taxable income is:	The tax is:
Not over $2,100	No tax.
Over $2,100 but not over $2,600	$120, plus 13% of excess over $2,100.
Over $2,600 but not over $3,100	$250, plus 15% of excess over $2,600.
Over $3,100 but not over $3,600	$400, plus 16% of excess over $3,100.
Over $3,600 but not over $4,600	$560, plus 18% of excess over $3,600.
Over $4,600 but not over $6,600	$1,280, plus 21% of excess over $4,600.
Over $6,600 but not over $8,600	$2,120, plus 24% of excess over $6,600.
Over $8,600 but not over $10,600	$3,080, plus 27% of excess over $8,600.
Over $10,600 but not over $12,600	$4,160, plus 32% of excess over $10,600.
Over $12,600 but not over $14,600	$5,440, plus 36% of excess over $12,600.
Over $14,600 but not over $16,600	$6,880, plus 39% of excess over $14,600.
Over $16,600 but not over $18,600	$8,440, plus 42% of excess over $16,600.
Over $18,600 but not over $20,600	$10,120, plus 45% of excess over $18,600.
Over $20,600 but not over $24,600	$11,920, plus 48% of excess over $20,600.
Over $24,600 but not over $28,600	$13,840, plus 50% of excess over $24,600.
Over $28,600 but not over $34,600	$17,840, plus 53% of excess over $28,600.
Over $34,600 but not over $40,600	$24,200, plus 55% of excess over $34,600.
Over $40,600 but not over $46,600	$30,800, plus 58% of excess over $40,600.
Over $46,600 but not over $52,600	$37,760, plus 60% of excess over $46,600.
Over $52,600 but not over $62,600	$44,960, plus 62% of excess over $52,600.
Over $62,600 but not over $72,600	$57,360, plus 64% of excess over $62,600.
Over $72,600 but not over $82,600	$70,160, plus 66% of excess over $72,600.
Over $92,600 but not over $102,600	$83,360, plus 68% of excess over $82,600.
Over $82,600 but not over $92,600	$96,960, plus 69% of excess over $92,600.
Over $102,600	$110,760, plus 70% of excess over $102,600.

On page 47, immediately before line 11, insert the following:

TITLE II—ADDITIONAL REDUCTION AND SIMPLIFICATION OF INDIVIDUAL INCOME TAXES

On page 47, line 11, strike out "Sec. 202." and insert in lieu thereof "Sec. 201.".

On page 58, line 9, strike out "Sec. 203." and insert in lieu thereof "Sec. 202.".

On page 59, line 24, strike out "Sec. 204." and insert in lieu thereof "Sec. 203.".

On page 61, line 21, strike out "Sec. 205." and insert in lieu thereof "Sec. 204.".

On page 62, line 16, strike out "201 and 202" and insert in lieu thereof "101 and 201".

On page 64, line 11, strike out "Sec. 206." and insert in lieu thereof "Sec. 205.".

On page 64, line 13, strike out "201, 202, and 204" and insert in lieu thereof "101, 201, and 203".

On page 64, line 16, strike out "205" and insert in lieu thereof "204".

On page 2, in the table of contents, strike out the matter relating to title I and insert in lieu thereof the following:

TITLE I—PERMANENT INCREASE IN AMOUNT OF STANDARD DEDUCTION

SEC. 101. CHANGE IN TAX RATES AND TAX TABLES TO REFLECT PERMANENT INCREASE IN STANDARD DEDUCTION.

On page 2, in the table of contents, strike out "TITLE II—REDUCTION" and insert in lieu thereof "TITLE II—ADDITIONAL REDUCTION".

On page 2, in the table of contents, strike out the item relating to section 201 and redesignate the items relating to sections 202 through 206 as relating to sections 201 through 205.

AMENDMENT NO. 203

(Ordered to be printed and to lie on the table.)

Mr. CHAFEE submitted an amendment intended to be proposed by him to the bill (H.R. 3477), supra.

AMENDMENT NO. 204

(Ordered to be printed and to lie on the table.)

Mr. KENNEDY submitted an amendment intended to be proposed by him to the bill (H.R. 3477), supra.

AMENDMENT NO. 205

(Ordered to be printed and to lie on the table.)

Mr. KENNEDY (for himself, Mr. JAVITS, and Mr. HUMPHREY) submitted an amendment intended to be proposed by them jointly to the bill (H.R. 3477), supra.

AMENDMENT NO. 206

(Ordered to be printed and to lie on the table.)

Mr. HUDDLESTON (for himself, Mr. FORD, Mr. STONE, Mr. WILLIAMS, and Mr. PACKWOOD) submitted an amendment intended to be proposed by them jointly to the bill (H.R. 3477), supra.

Mr. HUDDLESTON. Mr. President, the amendment I am proposing modifies the rules established by the Tax Reform Act of 1976 in regard to the withholding of income tax on winnings from wagers placed in parimutuel pools with respect to horseraces, dograces, or jai alai.

Before the 1976 act, withholding on racetrack winnings was not required, although payouts of $600 or more to winners of daily doubles, exactas, and similar wagering pools were reportable on information returns. The Internal Revenue Service enforced this requirement only where the odds were 300 to 1 or higher. To deal with some underreporting of gambling winnings on income tax returns, the 1976 act supplemented the information reporting requirement with a provision for withholding 20 percent of net winnings of more than $1,000 from sweepstakes, wagering pools, and lotteries.

During the conference on the 1976 act, many people, including the Commissioner of Internal Revenue, as well as Members of Congress and their staffs, understood that, as to parimutuel pools with respect to horseraces, dograces, and jai alai, winnings over $1,000 would be subject to withholding only if the odds were at least 300 to 1. However, the law as enacted did not include any odds requirement. The Internal Revenue Service has concluded that it is generally not productive to enforce reporting of winnings based on low odds.

This amendment provides that withholding, in the case of those kinds of parimutuel pools, will be required on winnings of more than $1,000, but only if the amount of the winnings is at least 300 times the amount of the bet.

It is my intent by this amendment that aggregation will not apply to parimutuel pools for horse races, dog races, and jai alai. Under the amendment, withholding should only be required if the proceeds are $1,000 or more and only then if the proceeds are at least 300 times as great as the amount of the wager with each wager considered separately. It is my understanding that the IRS agrees that it is impractical to enforce any aggregation rules with respect to parimutuel wagering.

The changes made by this amendment will apply to proceeds paid after April 30, 1977.

The revenue impact of these changes are estimated by the Joint Committee on Internal Revenue Taxation to be within the third concurrent budget resolution.

The amendment is designed to meet minimum needs at this time and is not an endorsement per se of the concept of withholding on parimutuel winnings. The distinguished Commission on the Review of the National Policy Toward Gambling concluded in its first report last year that

> . . . The withholding measure will increase the advantage to illegal operators, generate minimal revenues to the Government, and unnecessarily increase administrative burden to the legal gambling businesses . . . If, upon reexamination, Congress finds the proposed withholding tax to be destructive of existing legal gambling industries, the Commission recommends that these withholding provisions be repealed.

In light of these findings, I believe that it would be appropriate if the Internal Revenue Service, the Department of the Treasury and the Department of Commerce would cooperate with all segments of the parimutuel industry in determining the ultimate productivity of withholding.

The IRS should determine:

First, the effect of withholding on the

churn of parimutuel dollars to determine whether withholding these winnings produces enough net Federal revenue to offset the loss of revenue to the States;

Second, if winnings of less than $1,000 are not ultimately offset by losses, with the end result that IRS and the industry will subject themselves to considerable additional administrative expense without commensurate benefits in the form of Government revenue;

Third, whether the confusion engendered by the adoption of different parameters for reporting of parimutuel winnings and withholding from them will not be counterproductive both for the industry and for the Federal Government.

Fourth, if the revenue to be derived from such withholding in reality is consistent with the IRS estimates of said revenue and whether withholding of parimutuel funds is productive to the Federal Government; and

Fifth, finally, and most importantly, if the addition of withholding on the parimutuel industry drives the bettors from the legal sources of wagering into the hands of illegal bookmakers who do not withhold.

Along with passage of this legislation, it is essential that the IRS study these potential areas of counterproductivity and report back to Congress within a reasonable time after the date of enactment.

The racing and breeding industries have contributed significantly not only to the tourist industries and quality of life in the 33 States which have parimutuel racing, but have made significant financial contributions as well. In the four decades since accurate records have been kept, the various States which conduct parimutuel wagering have received in excess of $11.25 billion in direct parimutuel revenue, in addition to which they have received untold billions of dollars in additional, less obvious, revenues from sources such as property taxes, payroll taxes, sales taxes on admissions, concessions, farm equipment, on the sale of horses, and even on breeding fees for, in most States, horses are the one breed of livestock which do not fall under agricultural exemptions from sales tax on breeding fees.

There are more than 230,000 people in this country today who are licensed to make their living at the racetracks, and they must be supported by more than 100,000 additional workers directly employed in the breeding and raising of these horses to race. These are mainly unskilled people, who might find it difficult to find employment in more specialized fields. Then, too, there are thousands of others in supportive industries which provide feed, equipment, housing and informational services to support the racing and breeding of horses in the United States.

In my State of Kentucky alone, Mr. President, the thoroughbred industry is estimated to be worth $1 billion, and the annual sales taxes on thoroughbred stud fees alone annually amounts to more than $1.5 million. Our own direct marimutuel revenue is estimated to have been $12.5 million in relatively painless cheap revenue, revenue which would have to be made up somewhere else if it were not for the racing industry.

Mr. President, I urge the Senate to pass this amendment, which merely makes the law into what we thought the law would be when we passed the 1976 act.

FIRST BUDGET RESOLUTION—SENATE CONCURRENT RESOLUTION 19

AMENDMENT NO. 207

(Ordered to be printed and lie on the table.)

Mr. PROXMIRE (for himself, Mr. SPARKMAN, Mr. BROOKE, Mr. MATHIAS, Mr. RIEGLE, Mr. KENNEDY, Mr. HUMPHREY, Mr. JAVITS, Mr. SARBANES, Mr. METCALF, Mr. CASE, Mr. GRAVEL, Mr. PELL, and Mr. MCINTYRE) submitted an amendment intended to be proposed by them jointly to Senate Concurrent Resolution 19, a concurrent resolution setting forth the congressional budget for the U.S. Government for the fiscal year 1978.

Mr. PROXMIRE. Mr. President, I am submitting on behalf of Mr. SPARKMAN, Mr. BROOKE, Mr. MATHIAS, Mr. RIEGLE, Mr. KENNEDY, Mr. HUMPHREY, Mr. JAVITS, Mr. SARBANES, Mr. METCALF, Mr. CASE, Mr. GRAVEL, Mr. PELL, Mr. MCINTYRE, and myself an amendment to the first concurrent resolution on the budget for fiscal year 1978.

This amendment would restore to the proposed budget $6 billion for housing assistance to low- and moderate-income families, and $500 million for community development assistance to cities, counties, and towns throughout the United States.

The funds restored by the amendment are funds requested by the Carter administration in its fiscal year 1978 budget. The Secretary of Housing and Urban Development, Mrs. Harris, testified on Tuesday of this week. This cut, if maintained, will virtually destroy this administration's effort to provide assistance to our urban areas and will set back the cause of housing for those unable to house themselves adequately.

On Wednesday of this week, Senators SPARKMAN, BROOKE, and MATHIAS and I wrote to all of the Members of the Senate urging them to join us in restoring the administration request. We stated that the proposed cutback of $6.7 billion in budget authority would, according to estimates prepared by the Congressional Budget Office, reduce total budget outlays by only $34 million in 1978 and by less than $200 million per year in 1979 and 1980.

We said that the proposed cuts would reduce assistance for over 500 cities and reduce assisted housing starts by some 75,000 units and potential employment by over 150,000 jobs.

Mr. President, the proposed cutbacks of assistance for housing and community development programs are unwarranted.

The Carter administration has requested $4 billion for community development and $32.8 billion for housing. The Senate Committee on Banking Housing, and Urban Affairs and the Committee on Appropriations have recommended that the administration's proposals be accommodated.

The amendment I am introducing today would authorize the amount requested by the administration in the first budget resolution.

I urge that this amendment be adopted by the Senate.

DEPARTMENT OF ENERGY—S. 826

AMENDMENT NO. 201

(Ordered to be printed and referred to the Committee on Governmental Affairs.)

Mr. DOMENICI. Mr. President, for myself and Senator NUNN, I am submitting today an amendment to S. 826, the administration's bill to create a Department of Energy. This amendment, which is cosponsored by Senator NUNN, is designed to assure the active participation of our Nation's colleges and universities in the implementation of any national energy program. Specifically, this is to be done by requiring the Secretary of Energy to include in his annual report to the President a summary of departmental efforts to: First, stimulate and encourage development of appropriate manpower resources; and second, involve these institutions in the execution of the Department's research and development programs.

Mr. President, since Dr. Dixie Lee Ray's 1973 report to the President on "The Nation's Energy Future," each annual energy report has acknowledged the importance of utilizing the technical expertise of our university and college faculties and of providing the support necessary to assure an adequate supply of properly prepared technical and scientific manpower. However, even with this verbal acknowledgment, many educators believe the various research and development agencies have not effectively used the resources available at our colleges and universities.

In 1976, U.S. colleges of engineering graduated the lowest number of B.S. degree candidates in many years. As a consequence, the very best students were heavily recruited by Government and industry, and many chose not to enroll in graduate school. Energy R.D. & D. depends heavily on graduate students trained to the M.S. and Ph. D. levels in appropriate fields, and the number of students, and thus graduates, at these levels is expected to decline for several more years, at least. Furthermore, competition with Government agencies—such as ERDA and NRC—and their contractors has made it difficult for many utilities to attract the engineers needed for their continually expanding role of providing electrical energy. A 1974 National Science Foundation report indicates that "the Government is a major creator of requirements for scientists and engineers." The proposed amendment will assure that proper attention is given to the manpower supply and research roles of the universities.

Although engineering educators have worked to assure recognition of these problems within ERDA, the ERDA Office of University Programs has been relatively ineffective at attracting and supporting significant numbers of top quality students in all energy R.D. & D. fields. It may be that individual energy research divisions should have the responsibility for interacting with the universities rather than operating through a centralized office. The proposed amendment would assure that the new Department

Secretary seeks the most effective organizational structures "to stimulate and encourage the development of new manpower resources" and to use the expertise of the universities in the execution of the Nation's R.D. & D. programs.

I hope that my Senate colleagues will give serious consideration to supporting this amendment. Mr. President, I ask unanimous consent that the text of this amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 201

On page 35, line 20, insert the following:
SEC. 624. (a)(6)
A summary of substantive measures taken by the Department to stimulate and encourage the development of new manpower resources through the Nation's colleges and universities and to involve these institutions in the execution of the Department's research and development programs.

NATIONAL SCIENCE FOUNDATION AUTHORIZATIONS—S. 855

AMENDMENT NO. 202

(Ordered to be printed and to lie on the table.)

Mr. HATCH submitted an amendment intended to be proposed by him to the bill (S. 855) authorizing funds to the National Science Foundation for fiscal year 1978 and 1979.

FOREIGN ASSISTANCE ACT—S. 1160

AMENDMENT NO. 208

(Ordered to be printed and referred to the Committee on Foreign Relations.)

Mr. KENNEDY (for himself and Mr. PELL) submitted an amendment intended to be proposed by them jointly to S. 1160, a bill to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes.

AID TO CYPRUS

Mr. KENNEDY. Mr. President, I am introducing today, for myself and the distinguished Senator from Rhode Island (Mr. PELL), an amendment to S. 1160, the pending International Security Assistance and Arms Export Control Act of 1977, to provide $15 million in assistance to the people of Cyprus.

The purpose of this amendment is to continue American humanitarian concern and assistance to Cyprus. It corrects an omission in the previous administration's budget request, as well as in the revised budget submitted by President Carter, which neglects to provide needed funds for Cyprus.

Mr. President, it is now nearly 3 years since the massive Turkish invasion of Cyprus in 1974, which created some 200,000 refugees and divided the island. Although the emergency situation has passed, the crisis of people very much remains—especially among the displaced and needy people in the government-controlled areas of the island.

Thanks to the generous assistance of the international community—and substantial contributions by the United States—the initial needs of the Cypriot refugees have been met. But Turkish forces still occupy 40 percent of Cyprus, and Cypriot-Greek refugees still cannot return to their homes. Until an equitable solution is found to the human and political tragedy of Cyprus, these refugees will need our help and concern.

The purpose of this amendment is to continue this help—at a modest level that reflects both the changing character and dimension of the humanitarian and economic needs on Cyprus.

To date, the United States has provided some $70 million in humanitarian assistance to Cyprus. Because officials in the Agency for International Development have been unconscionably slow and bureaucratic in obligating these funds appropriated by Congress, there is a sizable pipeline remaining. However, estimates from the field indicate that these funds, principally for housing for the refugees, will be inadequate to meet additional housing requirements in 1978. Also, the economic situation on Cyprus remains tenuous, largely because of the heavy financial burden being carried by the Government of Cyprus in meeting the needs of the displaced refugees, and coping with the island's shattered economy.

It is for these reasons, Mr. President, that this amendment provides continued assistance through the security supporting assistance account—to reflect the more general character of the needs on Cyprus. Prior year funds were properly authorized under the humanitarian assistance provisions of the foreign assistance bill because of the clearly defined needs among the refugees, and the fact that funds were being channeled through the United Nations High Commissioner for Refugees. However, the UNHCR is now phasing out its operation. Also, today's needs on Cyprus have changed somewhat in character, and the administration needs flexibility in responding to the continuing requirements on Cyprus.

Mr. President, I am hopeful that the Committee on Foreign Relations will give favorable consideration to this amendment when the pending foreign assistance bill is marked up in the coming weeks. The $15 million authorized by this amendment for Cyprus is $5 million below the budget ceiling already established.

I ask unanimous consent that the text of the amendment be printed at this point in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 208

On page 7, on lines 19 and 20, strike out "$1,887,200,000" and insert in lieu thereof "$1,902,200,000, of which not less than $15,000,000 shall be available only for Cyprus".

Mr. PELL. Mr. President, I wish to join the distinguished Senator from Massachusetts in proposing an amendment to the military assistance bill to provide $15 million in assistance to the people of Cyprus. As the Senator from Massachusetts has pointed out, our amendment would correct an omission in the previous administration's request as well as in the revised budget submitted by President Carter.

Although the United States has been forthcoming in the past in providing assistance to Cyprus to cope with the refugee problem created by the Turkish invasion of the island in 1974, the needs are still great and the means available to Cyprus to meet them are inadequate. In this connection, it should be borne in mind that Cyprus is a small developing country in which some 40 percent of the people became refugees. The remaining 60 percent of the population simply cannot meet the needs of the refugees, who have been deprived of their property and livelihood, without further outside assistance.

The economy of Cyprus has improved recently, but recovery has not been sufficient in just 2½ years after the invasion to meet, alone, the needs of the large refugee population. The gross domestic product of Cyprus for example was in 1976, despite a gain over 1975, still 22 percent lower than in 1973, the last normal year before the invasion.

The most pressing need in Cyprus now is for housing. While some prior years funds are still in the AID pipeline—because of bureaucratic unresponsiveness rather than because of a lack of need in Cyprus—the funds available are inadequate to meet current and future requirements in fiscal year 1978.

Cyprus has been locked in the grip of a foreign military occupation for almost 2 years now with no political solution in sight which would end the occupation. The people of Cyprus have borne up courageously during this situation, but they need the continuing support and generosity of the American people as they endure the hardship of waiting and hoping for a political solution which will permit them to find permanent homes and to reconstruct their lives.

Mr. President, I find it ironic that today, as the Senator from Massachusetts and I are proposing a modest $15 million to help the refugees in Cyprus, the administration has requested an increase in the ceiling for foreign military sales and credits to Turkey from $125 million in fiscal year 1977 to $175 million in fiscal year 1978. If the occupiers of 40 percent of Cyprus are to be accommodated so generously, it seems to me that the people who suffer from the Turkish occupation deserve some sympathetic consideration as well.

HOUSING AND COMMUNITY DEVELOPMENT ACT—S. 1246

AMENDMENT NO. 209

(Ordered to be printed and referred to the Committee on Banking, Housing, and Urban Affairs.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to S. 1246, a bill to amend the Housing and Community Development Act of 1974 to provide a more equitable allocation of funds, to authorize a fuller range of community development activities, to establish an urban development action grant program for severely distressed cities; to amend section 312 of the Housing Act of 1964, as amended; to amend section 701 of the Housing Act of 1954, as amended; and for other purposes.

Mr. CRANSTON. Mr. President, this amendment is meant to address a problem that is of paramount importance to present and future homeowners, Federal savings and loan associations across the country in high cost metropolitan

areas, and particularly inner cities where extensive rehabilitation is needed.

Federal savings and loan associations are generally restricted from making single-family home loans over a $55,000 limitation. All loans over this amount are assigned to their general 20 percent of assets category. When the general 20 percent category reaches its maximum S. & L.'s are prohibited from making any loans over $55,000.

The recent rapid increase in the median sales prices of new homes is causing Federal savings and loan associations in high cost metropolitan areas to use their general 20-percent category to participate in the single-family housing market. This phenomenon indicates that many Federal savings and loan associations will undoubtedly exhaust their lending capacity in the near future.

According to the Federal Home Loan Bank Board's mortgage interest rate survey the average price of new homes financed with conventional mortgages exceeded $55,000 in 10 of the 18 metropolitan areas for which such information is compiled. Economic data from the Federal National Mortgage Association indicates that from September 1974—when the $55,000 loan ceiling limitation was last increased—through December 1976, the median national sales price for new housing was up 26.8 percent; for existing homes it was up 20.4 percent. Based on this data alone, the conventional loan ceiling of $55,000 set in 1974 should have been $68,000 as of the end of calendar year 1976.

During the same period, the median sales price in the Los Angeles/Long Beach area has gone from $48,267 to $71,000, an increase of 47 percent. With a normal 20-percent down payment, the loan secured on a median California $71,000 new housing property is $56,680, which means that loans securing one-half of California's new housing market already exceed the $55,000 limitation.

While California home prices may appear to be above the normal U.S. trend, data compiled by the Federal Home Loan Bank Board which includes Census Bureau data on conventional mortgages, sales prices of new homes and FHA/VA mortgages indicates that new homes that require financing above the $55,000 mortgage limit are becoming a normal part of the housing market and hardly represent a fringe luxury market. Even national data which includes rural and low-cost areas indicates that 32 percent of all new homes sold in the fourth quarter of 1976 carried a sales price in excess of $55,000 and 25 percent carried a sales price in excess of $60,000.

To address this potential problem, sections 1 and 2 of my amendment raises the 5(c) loan limit from $55,000 to $70,000 and permits Federal savings and loan associations to put only the amount over $70,000 into the general 20 percent of asset category instead of the whole loan. This amendment will give relief to S. & L.'s in high-cost metropolitan areas where they are rapidly filling up their general category with loans over $55,000 and in inner city areas where rehabilitated property mortgages generally exceed the $55,000 limitation.

Section 2(b) of my amendment attempts to give relief in areas of the country where there is a high demand for low- and moderate-apartment financing. There is a separate "special" 20 percent of assets category for apartment loans where the loan amount is consistent with the maximum per dwelling unit limits in section 207(c)(3) of the National Housing Act for low and moderate apartments.

Many elderly and handicapped people on fixed incomes are having a difficult time finding apartments at reasonable rents. There just are not enough apartments available to meet the demands and this is driving rents up in many areas of the country. Savings and loan associations that service market areas where apartment construction is important should be permitted to meet this kind of demand.

My amendment would abolish the special 20-percent category for low- and moderate-apartment loans thereby putting these loans in the category with single-family homes. In addition, when apartment loans exceed the low- and moderate-unit limitations under 207(c)(3) of the National Housing Act, only that excess amount over $60,000 as with 5(c) single-family homes will be placed in the 20 percent of asset general category. This amendment will free up additional lending authority for low- and moderate-cost apartments and serve a much-needed public purpose and consumer demand.

Section (c) increases the statutory property improvement loan ceiling from $10,000 to $15,000 in light of the rise in construction costs since the last change in this ceiling.

I would like to make it clear that these amendments are in no way an attempt to restructure Federal savings and loan lending restrictions in the special and general category. I am addressing three minor changes in the special and general categories because of the impending crisis that could occur in high-cost metropolitan areas if such restrictions remain. These amendments are meant to give only temporary relief. They in no way obviate the need to completely restructure Federal savings and loan associations' lending powers or to simplify section 5(c) of the Homeowners Loan Act as it was proposed in the Financial Institutions Act which the Congress will be taking up later on in the year. I fully support this proposal.

I ask unanimous consent that several letters and reports concerning these amendments be printed in the RECORD.

FEDERAL HOME LOAN BANK BOARD,
Washington, D.C., April 18, 1977.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CRANSTON: This is in response to your letter of March 30 in which you requested the Federal Home Loan Bank Board to present its opinion on raising the $55,000 home mortgage ceiling contained in section 5(c) of the Homeowners' Loan Act. Your letter also raised questions and solicited the Board's opinion about the need to increase the property improvement loan ceiling, the removal of multi-family housing from the 20 percent of assets category, and the feasibility of permitting savings and loan associations to provide interim construction financing without a security interest in the property on which the loan is made.

Your questions are very timely and touch on a number of matters that have been of concern to the Bank Board for some time. Your question with regard to raising the home mortgage ceiling limit for Federal savings and loan associations under section 5(c) of the Homeowners' Loan Act is especially appropriate because of several recent developments.

First, we are getting more reports about the degree to which Federal savings and loan associations are using their 20 percent of assets basket under which most of the authority to make home mortgage loans in excess of $55,000 is contained.

Second, home prices in many parts of the country, especially those on homes that are conventionally financed, have reached levels where a substantial proportion of home mortgage loans needed by consumers are now in excess of $55,000. So many home loans now fall into this category in high cost metropolitan areas that they can hardly be considered as financing for "luxury" housing.

Third, commercial banks and many state-chartered thrift institutions do not have a home mortgage limit and are now in a position to preempt an increasing proportion of the home mortgage market from Federal savings and loan associations as the latter use up an increasing proportion of their general 20 percent assets basket.

Fourth, as you know, Secretary Harris of HUD has proposed an increase in the maximum limit on FHA-insured home mortgages from $45,000 to $60,000. This $60,000 limit would be in excess of the general $55,000 maximum limit for conventional loans made by Federal savings and loan associations even though such conventional mortgages are normally for larger amounts than those that are FHA insured. Obviously, an implication of Secretary Harris' recommendation with respect to the maximum limit on FHA-insured mortgage loans is that an increase in the home mortgage limit for Federal savings and loan associations is equally important although this can be carried out in a number of different ways.

In formulating our opinion on your questions, especially the one pertaining to the home mortgage ceiling for Federal savings and loan associations, we had the Office of Economic Research do an extensive analysis of the factual situation. We thought that it would be useful to share this analysis with you even though it is extensive and resembles more what you would expect in a piece of testimony rather than in response to a letter. I have appended the analysis to this letter.

The balance of this cover letter summarizes the highpoints of our analyses and our conclusions. We have first indicated the nature of the special percentage of assets basket under which Federal savings and loan associations can make home mortgages above the normal limit. This will bring out the fact that the question of the home mortgage limit cannot be viewed alone since the major basket under which loans in excess of this limit are made also contains authority for Federal savings and loan associations to make apartment loans and commercial loans. It so happens that many savings and loan associations are located in sections of the country that both have a heavy demand for apartment (and perhaps commercial) mortgages and which are also high cost areas in which a substantial proportion of home mortgages being originated now are in excess of $55,000.

In the analysis, we review both aggregate national data and metropolitan data that have a bearing on the degree to which the general 20 percent basket is being utilized under which home mortgage loans are made above the $55,000 limit. Our data on this are not as precise or current as we would like them to be. Nonetheless, we do believe that the data can be used to draw certain conclusions about the likely leeway that Federal savings and loan associations have in making home mortgage loans above $55,000 and

in making apartment loans. We present a specific example of a Federal savings and loan association in the Los Angeles area which has used up its general 20 percent basket already, indicating how this has occurred and why the restriction under which this Federal savings and loan association now operates is hardly consistent with the public interest.

Since the data available to us on the utilization of the 20 percent of assets basket is not up to date, we analyze in some detail recent increases in home prices as revealed by the Bank Board's Mortgage Interest Rate Survey and data on home prices from both the Census Bureau and the National Association of Realtors. These sources indicate the rapidly increasing and already large proportion of home mortgages in excess of $55,000 that are needed in many high cost metropolitan areas of the country. The review of the increase in home prices is especially important to our analysis because the current percentage of outstanding home mortgages in excess of $55,000 to total assets of Federal savings and loan associations reflects to a large extent mortgages that were put on the books many years ago. However, given the record number of home mortgage loans being put on savings and loan books at the present time and the very strong demand for home mortgage loans in excess of $55,000 in many metropolitan areas, we can expect a rapid increase in this ratio of outstanding home mortgage loans in excess of $55,000 to total assets so that past data on the utilization of the 20 percent of assets basket is likely to become outdated rapidly.

The attached analysis indicates the many options by which Congress could deal with the increasing constraint that the general 20 percent basket will be exerting on home mortgage and apartment lending. These include: (1) a simplified section 5(c) of the Homeowners' Loan Act, doing away with complex multi-loan baskets and replacing them by limitations that apply to individual loan categories—these could provide the needed leeway for savings and loan associations to serve consumer needs in the housing markets, (2) assuming retention of the present baskets, increasing both the special 20 percent basket for low-cost apartment mortgage loans and the 20 percent general basket to 25 percent, (3) deal with the $55,000 mortgage limit constraint problem by counting only those parts of home mortgages in excess of $55,000 in the existing general 20 percent basket, (4) index the mortgage loan limit by tying it to new and existing home prices, (5) follow the precedent with respect to Hawaii, Alaska, and Guam and set a different home mortgage ceiling rate for each housing market (or at least for high-cost metropolitan areas) that reflects prices in these markets, (6) eliminate the home mortgage limit altogether since, to the extent that we have a single national limit, it operates unevenly and inequitably among various states in metropolitan areas, (7) follow the past procedure of periodically raising the home mortgage limit, as has been done also with the FHA mortgage limit. This would suggest raising the home mortgage limit for Federal savings and loan associations by $15,000, the same increase as recommended by Secretary Harris for FHA-insured mortgages, to a new maximum $70,000. In the attached analysis we also note the need for a higher mortgage limit for the Federal Home Loan Mortgage Corporation consistent with any increase in the home mortgage limit for Federal savings and loan associations.

Finally, we have answered the questions with regard to a possible increase in the property improvement loan ceiling, the removal of multi-family housing from the 20 percent of assets category, and permitting savings and loan associations more liberal powers to provide interim construction financing. In each case, we agree that changes are needed to provide Federal savings and loan associations with greater flexibility in lending powers so that they can better serve the needs of housing and consumer needs.

Sincerely,

GARTH MARSTON.

CALIFORNIA FEDERAL,
February 18, 1977.

Hon. ALAN CRANSTON,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR ALAN: This letter is to bring to your attention a situation that has developed which is of paramount importance to federal savings and loan associations in California as well as the rest of the United States.

An urgent need has materialized for seeking your assistance and support to change the $55,000 minimum limitation on loans originated by federal savings and loan associations secured by single family dwellings and some 2-4 family units which are subject to the general 20 percent of assets category provided in Section 5(C) of the Home Owners Loan Act of 1933 (12 U.S.C. 1461 et seq.). State regulated savings and loan associations in California do not have a comparable limitation so that they are not restricted as to the dollar amount of loans which may be made of $55,000 and over.

Present interpretation of Section 5(C) requires that the entire amount of each loan of $55,000 and over be considered in the general 20 percent of assets category. Initially, as a stopgap measure, it would be helpful if only the excess over the limitation be counted.

Exhibit "A" attached hereto depicts new housing price trends in both the United States and Southern California. On August 22, 1974, Section 5(C) was amended to increase the subject limitation from $45,000 to $55,000. Median new housing prices in the United States have increased from $39,000 in the third quarter of 1974 to $48,300 in the third quarter of 1976; a rise of 23 percent in two years. During the same period of time, the median new housing prices in the Los Angeles/Long Beach area have gone from $48,267 to $71,100, an increase of 47 percent.

With a normal 20 percent down payment, the loan secured by the median California $71,100 new housing property is $56,880, which means that loans securing one-half of California new housing market already exceed the $55,000 limitation. As the graph so eloquently portrays, the rising California price trend is steeply pulling away from the more normal U.S. trend line.

Assuming, for the sake of argument, that $55,000 was appropriate in August of 1974, and that mortgage amounts will rise commensurately with prices, a 23 percent increase nationwide would bring this figure to $67,650, and a 47 percent increase for California would bring it to $80,850. The steep California trend line would suggest $100,000 as being a more realistic minimum to cover the next two-year period.

California Federal Savings, the largest federal association in the nation, originates approximately one billion dollars of loans each year. Average loan amount securing existing single family properties at California Federal Savings has increased from $35,039 in December, 1974, to $52,669 in January, 1977—a striking 50 percent. In meeting the lending demand in California, we make many millions of dollars of loans of less than the average of $52,669. At no time do we concentrate on merely satisfying the upper end of the single family market of $55,000 and over. When considering the 50 percent increase in the average loan, the $55,000 minimum limitation would seem to be more properly pegged at $82,500. Again, with the anticipated steep price escalation continuing as the economy picks up steam, $100,000 would appear to be appropriate, and within a short period of time, it may even again become restrictive.

Many federal savings and loan associations, including California Federal Savings, may soon be precluded from making loans of $55,000 and over in California, and where state savings and loan associations are free to make such loans, a disturbing competitive imbalance will be created in the California housing scene. If this happens, it will severely hamper recovery of the housing industry where many jobs are needed in California to spur the economy.

To summarize, it is recommended that Section 5(C) of the Home Owners Loan Act be amended to provide:

(1) That the $55,000 limitation be eliminated entirely, or, if this is found not acceptable,

(2) That the $55,000 minimum limitation be raised to $100,000 with only the amount of a loan in excess of $100,000 being subject to the limitations of the general 20 percent of assets category, and, in addition,

(3) That California be added to Alaska, Guam and Hawaii as areas within which the subject limitations may, by regulation of the Federal Home Loan Bank Board, be increased up to 50 percent of any minimum.

Your assistance in this matter is urgently requested.

Sincerely,

BOB.

FEDERAL NATIONAL MORTGAGE ASSOCIATION,
February 18, 1977.

MS. CAROLYN JORDAN,
Assistant Council, Committee on Banking, Housing and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR CAROLYN: I want to follow up on our conversation earlier today regarding the proposal to increase FNMA's conventional limit above the present $55,000 figure, which was set in the 1974 Housing Act.

Our proposal, as we both understand, is part of a package and I certainly would not want to try to move the FNMA proposal by itself.

Regarding the justification for our increase, our economic data indicates that from September 1974 through December 1976 the median national sales price for new housing was up 26.8 percent; for existing homes it was up 20.4 percent. On the other hand, the Consumer Price Index (CPI) rose "only" 15 percent. Based on this data, FNMA's conventional ceiling of $55,000 set in 1974 should have been $68,000 as of the end of calendar 1976.

Quite apart from what has happened is the thought of what may happen in the next year or two. Again, our economists along with a number of forecasters feel that housing prices will rise over the next couple of years at an annual rate of 10 percent. This compares with an anticipated 5 percent rise for the CPI. The reasons for the more rapid rise in housing prices are based on the strong demand that is foreseen for single family houses, the continual increase in construction costs, increased costs of land, and so forth. Accordingly, any limit on conventional lending that the Congress might set now or in the next several months must look at least somewhat to the future.

Another point and one that I am sure you are aware of is that the $55,000 conventional ceiling in California and also in other areas, including the Northeast is simply "out of the market."

There are several other points that could be made in support of our proposal to increase our conventional mortgage ceiling, but perhaps one more will suffice. There has been an increase in business between the savings and loans and FNMA. If the savings and loans were to make a substantial volume of mortgage loans in excess of $55,000 they would be incapable of selling those loans either to FNMA or to FHLMC.

To illustrate the point, the following are some of the Federal savings and loan associations in California with whom we now do business:

Home Federal Savings and Loan Association of San Diego.

San Diego Federal Savings and Loan Association.

Western Federal Savings and Loan Association (in Los Angeles).

Glendale Federal Savings and Loan Association.

Garden Grove Federal Savings and Loan Association.

Civic Federal Savings and Loan (in San Francisco).

First Federal Savings and Loan Association of Ridgecrest.

First Federal Savings and Loan Association of Hollywood.

United Federal Savings and Loan (in San Francisco).

Republic Federal Savings and Loan (in Altadena).

Beverly Hills Federal Savings and Loan Association.

Consequently, to provide a secondary market for these higher prices savings and loans if and when authorized, it will be necessary at the same time to increase the FNMA and FHLMC limits as well.

Let me know if you need any further information.

Sincerely,

ANDREW I. HICKEY, JR.,
Director of Legislative Affairs.

SAN DIEGO FEDERAL,
San Diego, Calif., April 7, 1977.

Hon. ALAN CRANSTON,
U.S. Senator, Senate Office Building, Washington, D.C.

DEAR SENATOR CRANSTON: We just obtained the enclosed data showing the average purchase price of homes in major metropolitan areas for the period of January-February, 1977. This information is also being sent to Jerry Patterson, John Rousselot and Mark Hannaford.

As you can see, the three major SMSA's of California rank 1, 3 and 5 in the nation as to newly built homes and 2, 3 and 4 as to previously-occupied homes. I believe this data supports the urgent need for California to have relief as to the $55,000 issue. As a minimum it would seem that California could be added to Guam, Hawaii and Alaska under 5c so that the Federal Home Loan Bank Board could increase the $55,000.

The data also leads a strong argument for the Washington, D.C., area as that area is 1st in average purchase price for previously-occupied homes and 7th for newly built homes.

I look forward to seeing you at the reception for Mark Hannaford on the 17th.

Sincerely,

JAMES C. SCHMIDT,
Executive Vice President and Managing Officer.

AVERAGE PURCHASE PRICE OF SINGLE-FAMILY HOMES PURCHASED WITH CONVENTIONAL MORTGAGE FINANCING IN MAJOR METROPOLITAN AREAS

SMSA means a Standard Metropolitan Statistical Area; SCSA means Standard Consolidated Statistical Area, which consists of 2 or more SMSA's

NOTICES OF HEARINGS

S. 695—AMENDMENT OF THE DEFENSE PRODUCTION ACT OF 1950

Mr. PROXMIRE. Mr. President, the Committee on Banking, Housing, and Urban Affairs will hold hearings on May 19, 20, and 23 to consider S. 695, an amendment to the Defense Production Act of 1950 which the senior Senator from Indiana and I recently introduced. The hearings will also consider amendment No. 192 to S. 695 as introduced by Senator ABOUREZK.

S. 695 would inhibit conflicts of interest in Federal procurement by temporarily prohibiting the employment of any former Government official by any company over which that individual had exercised procurement authority. The bill would also establish a Conflict of Interest Review Board to advise individuals on the applicability of this legislation.

I believe that this is one of the most important pieces of legislation to come before the Congress this year. I have long believed that many of the Federal Government's widely publicized problems in the procurement of goods and services could be ameliorated if self-interest could be removed as a factor in purchasing decisions. I believe that this legislation would go a long way toward accomplishing that end.

The committee has scheduled 3 days of hearings to hear witnesses from the Congress, the executive branch, citizens' organizations, and industry groups. We want to make sure that all points of view are represented at these hearings. Any person interested in testifying should contact Mr. Leon Reed at 224–2337.

VETERANS HEALTH CARE MEASURES

Mr. CRANSTON. Mr. President, the Veterans' Affairs Subcommittee on Health and Readjustment plans to hold public hearings on Wednesday, April 27, to consider S. 1189 and three veterans health care measures—H.R. 3695, H.R. 5027, and H.R. 5029—passed by the House of Representatives on April 4.

The hearings will begin at 9:30 a.m. in room 318 of the Russell Senate Office Building.

Persons wishing to testify at the April 27 hearings should notify Michael Burns, program director of the Committee on Veterans' Affairs, at 224–9126, by Monday, April 2.

ADDITIONAL STATEMENTS

EDITORIAL BY WCSC-TV IN CHARLESTON, S.C.

Mr. THURMOND. Mr. President, on April 15, 1977, WCSC-TV in Charleston, S.C., broadcast an editorial of particular merit. Commending President Carter and the Congress on cancellation of the tax rebate proposal, the editorial challenges us to take affirmative action to encourage the private sector and to guarantee the preservation of free enterprise in America.

Mr. John M. Rivers, Sr., who authored this editorial, is an outstanding leader in the television industry. Using broadcast editorials to good advantage, he takes the initiative to inform WCSC's viewers on vital issues of the day. Mr. Rivers is a fine citizen, able community leader, and patriotic American businessman.

Mr. President, in order that I may share Mr. River's editorial with my colleagues, I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

EDITORIAL

The hope we express about Congress with a president who may sign unwise legislation would become more responsible and responsive to the will of the Nation seems to be taking place. We are pleased to see President Carter cancel the eleven billion dollar tax rebate. The objection of the spenders proves the move to be right. Opposition in Congress convinced the President the rebate is not needed and will in fact hurt the economy.

However, the President must do more than talk to have the private sector start moving again. Hostile Government bureaus, consumers groups, Congress, and the President must assure investors the Government will not take over and free enterprise will be allowed to work

The President and Congress must impress the business world they mean what they say about free enterprise. The spenders say what have you done for me today? Business wants to be left alone to do its job.

EFFECTS OF HIGHER ENERGY PRICES

Mr. ABOUREZK. Mr. President, the Congress soon may move to consideration of an energy policy which has a major component higher prices. These prices are intended to encourage conservation, but there is every reason to believe, if we look back at the effects of fuel price increases amounting to 50 to 100 percent in 1974 alone, and then look at consumption rates today, it is obvious that higher prices do not make people change their energy use patterns.

Where higher prices are felt, the result is deprivation, not conservation. High prices and severe weather produced some of the highest fuel bills on record this past winter, yet people are not responding by buying insulation or new appliances—they have all they can do to stretch their incomes to cover the new year-round debts that they incurred during the winter. Some of them will never be able to pay. An article in the Wall Street Journal describes very clearly the effects of expensive fuel on people's behavior, and the description should be instructive as we work on energy questions in the coming months.

Mr. President, I ask unanimous consent that the article be printed in full in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UTILITY, FUEL-OIL FIRMS BATTLE NEW HEADACHE: SURGE IN OVERDUE BILLS

(By Bernard Wysocki Jr.)

Companies that supplied heat to homes in the frigid Northeast and Midwest last winter are currently getting the cold shoulder from their customers.

Record numbers of residential fuel users aren't paying their oil, gas and electric bills. The overdue bills are bigger bills than ever, because of higher fuel prices and greater consumption during the cold spell. As spring sets in, utilities and fuel-oil dealers are beginning to yearn for their money.

Moreover, their problems could be worsened by President Carter's energy plan, under which oil and natural gas prices—and heating bills—would rise even further; more families would have trouble paying. In addition, utilities would have to help customers install and finance insulating materials and other costly energy-saving devices; in effect, utilities would turn into contractors and bankers with even more exposure to customer bad debts.

But the severe winter is the current culprit in the utility-bill crunch.

FIRMS COLLAPSE IN NEW ENGLAND

In New England, some 25 to 30 fuel-oil concerns recently have gone out of business because they couldn't collect their bills, according to the New England Fuel Institute in Boston. "And between Oct. 1, 1976, and the end of March 1978, we estimate that 200 dealers will give up the ghost because of accounts receivable and financing problems," says Charles H. Burkhardt, executive vice president of the 2,200-member trade group.

In the Midwest, natural gas suppliers face a mountain of customer debt. At Wisconsin Gas Co. in Milwaukee, for example, overdue bills total $7.6 million, up from $4.7 million a year ago. Some utilities, like Niagara Mohawk Power Corp. in Syracuse, N.Y., have tapped the money markets to ensure an adequate flow of cash.

More customers soon will begin to suffer too. State-imposed or state-encouraged "moratoriums" on fuel shutoffs expired this month in nearly 20 hard-hit states. Many homes could lose gas or electric service. The numbers are staggering: In Milwaukee, 22,000 gas customers have bills so far in arrears that they face disconnection, and 200 already have been cut off; in Cleveland, about 100 gas customers a day have been losing service since disconnection crews began making the rounds a week ago. Nationwide, perhaps hundreds of thousands of customers face disconnection, according to a survey by a U.S. Senate subcommittee staff.

AWAITING CRITICISM

As a result, utilities are braced for a barrage of criticism from politicians, consumer groups and labor unions as soon as the massive shutoffs of gas or electricity start. But the companies insist that they have to act. "The shutoff is a tool, and if we can't use it, a group of people aren't going to pay," says Darrell Dunlap, consumer credit manager at East Ohio Gas Co., Cleveland.

The bad-debt problem isn't a new one for utilities. As prices have surged over the past few years, growing numbers of customers—especially the poor and elderly—have found it harder to pay. Also, some people have turned delinquent out of protest. Using Federal Power Commission reports from more than 100 utilities, Electrical World, a trade publication, calculates that uncollectible bills soared to more than $170 million in 1975 from about $80 million in 1973.

But last winter's extreme cold magnified the problem. The FPC estimates that it cost the average residential gas customer $323 to heat his home, up from $238 the previous winter. In some parts of the country, the dollar increase was even bigger; in the Middle Atlantic states, the average gas bill rose to $512 from $369, the FPC says.

Utility men say soaring levels of unpaid bills will help lift utility rates even higher. "All you people who pay your bills, you're going to have to pay" for delinquencies, warns East Ohio's Mr. Dunlap. Says a Wisconsin Gas Co. official: "The last time we went for a rate case, we asked for several million dollars in rate increases to absorb these bad debts."

SCRAMBLING TO COLLECT

Meanwhile, companies are scrambling to reduce residential accounts in arrears, with some success. (A number of utilities say they haven't noted any increase in commercial and industrial bad debts, however.)

Recently Cincinnati Gas & Electric Co. sent out a small army of employes to hand-deliver notices to several thousand customers; it warned them of imminent disconnection if they don't square their accounts. A company spokesman says a horde of late-paying customers showed up at the credit office, and the utility suspended hand-deliveries until the traffic slowed down a bit. Then, on April 4, it resumed hand-delivery of shutoff notices. Between April 2 and last Thursday, the company disconnected 1,100 customers, it says.

Other utilities also have adopted a get-tougher policy with customers that they view as undesirable.

"We continued shutoff practices throughout the winter—in a very careful manner," says Robert Stewart, executive vice president of Michigan Consolidated Gas Co. The poor were spared, he says, but "the cheaters, the crooks, the fellows who stole" gas were disconnected when the company had evidence of intentional freeloading. Mr. Stewart credits the policy with holding down bad debts last winter, although the amount in arrears still rose $7 million, or 40% from last year, he says.

Nevertheless, shutting off the heat is a big headache for the companies. It's expensive: One gas-utility official estimates it costs $15 to disconnect and another $15 to reconnect. Such expenses add up when disconnections hit the tens of thousands. Besides, in some states, including Ohio, utilities can't charge customers directly for disconnecting or reconnecting service.

Moreover, utilities generally lose their chance to collect overdue bills once they disconnect a customer, and some customers who do reconnect do it under an assumed name to escape all charges. The result is that companies' "charge-offs"—bills written off as uncollectible—are skyrocketing. East Ohio charged off $3 million in 1976, up from $2 million in 1974.

Shutoffs pain the companies for other reasons. For example, they offer solid turf from which politicians can tee off. Utilities, says Sen. Howard Metzenbaum (D.-Ohio), "are insensitive to consumer problems, and they wind up requiring government action.... As a former businessman, I am urging utilities to show some compassion and reason, and I think they might help the attitude of people toward them."

Congress is trying to help the cash-strapped pay their debts and avoid disconnection. Sen. Edmund Muskie, Democrat of Maine, recently proposed a $200 million program to help poor people pay their bills. Both houses of Congress passed the measure, and now it is in a House-Senate conference committee. But supporters say the Carter administration turned thumbs down when the proposal first came up, so its future is in doubt.

Local politicians, too, are quick to criticize utilities. Recently the Cleveland City Council voted 33 to zero to ask the Public Utilities Commission of Ohio to extend its ban on shutoffs to May 1 from April 1. The request was denied.

Shutoffs, in fact, are a public-relations nightmare in general. "We've had some hostile confrontations" with customers, says David Talbott, public-relations chief at East Ohio. These days, he also has to fend off requests from television reporters seeking to be on the scene when a disconnection crew arrives at some customer's doorstep.

OTHER TACTICS SOUGHT

So some utilities are looking for alternatives to simply cutting off fuel supplies. Many have devised "deferred payment plans," which can be a godsend to hard-hit consumers like Vanderbilt Simmons, a 58-year-old laborer at Republic Steel Corp.'s Cleveland Works.

In the past "my bills never got higher than $85 or $90 a month," moans Mr. Simmons as he sits here among dozens of other people at East Ohio's credit office. But this year, the February-March bill to heat his eight-room house was $217, and Mr. Simmons says he can't pay it all at once. "I just don't want them to cut me off," he says nervously.

But five minutes later, Mr. Simmons walks away from the clerk's desk a happier man. East Ohio agreed to stretch out his payment over six months. His back bills plus future payments will be $68 a month through the summer

Not everybody's problems are so easily solved. Helen Williams, a short, round welfare recipient, is angry. She is at the East Ohio office clutching a $219 gas bill—plus a $272 electric bill from Cleveland Electric Illuminating Co.—and asking the room at large, "Who's stealing the money? Where is the money going?"

Mrs. Williams is upset because an emergency $329 check from the Welfare Department won't cover both bills, which she ran up over several months in heating her 10-room house on Cleveland's declining near west side. She lives there with four children and a grandson. Mrs. Williams walks to the clerk's counter and pays her $219 gas bill. "I don't know what we're going to do" about the electric bill, she says.

FUEL-OIL DEALERS' WOES

Fuel-oil dealers say they, too, have instituted deferred payment plans or have stepped up efforts to get customers on a year-round budget billing system. One reason: Many fuel-oil companies consider themselves more vulnerable to bad debts than are utilities

Gas disconnections often mean a family can't cook: electrical shutoffs mean they can't see at night or watch television. But fuel oil typically just heats a home and by April, the threat of no more oil isn't serious in most parts of the U.S. A few extra blankets can solve the problem until fall.

"We've had an exceptionally warm March" says Robert Fawcett, a Boston fuel-oil dealer. "Rather than send a partial payment, customers put (the big bill) in a drawer and forget about it."

Too, customers can leave a fuel dealer holding a big bill and shop around for another supplier next winter. "There's only one Brooklyn Union Gas Co. There's only one Con Edison," says William Vallely, credit manager at Kleen-Heet Oil Co., Brooklyn, N.Y. "But they can look in the Yellow Pages and there are 150 to 200 fuel-oil companies."

INDIANA FARMERS' VIEWS ON FARM AND FOOD POLICY ISSUES

Mr. LUGAR. Mr. President, Mr. Bob F. Jones, a professor of agricultural economics at Purdue University, has teamed with Kerry K. Litzenberg, his graduate research assistant, to complete a survey that is relevant to the Senate's discussion on national farm policy.

During the second week of November 1976, these capable researchers sent 1,500 Indiana crop and livestock producers a survey form dealing with questions and issues about agriculture and food. Of the 1,500 surveys distributed, 609 were returned as usable survey instruments. These 609 producers represent approximately one-half of 1 percent of the 105,000 farm units in Indiana.

In that most Senators have not enjoyed the opportunity to participate in Agriculture Committee discussions of these complex and vitally important issues, I believe this survey provides important input into the Senate's deliberations on farm legislation and policy.

I ask unanimous consent that a summary of the findings be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

INDIANA FARMERS' VIEWS ON FARM AND FOOD POLICY ISSUES

WHAT IS A FAIR PRICE?

The respondent was given no guidance on this question but was left to his own determination of what he considered a fair price to be.

As a farmer, what do you think would be a fair market price in 1977 for the following products? Answer only for the products you produce:

	Survey average price	Range of prices	Average price received December 1976	Number answering
Corn [1]	$2.79	$1.50–$5.00	$2.23	531
Wheat [1]	3.73	1.50–6.35	2.37	410
Soybeans [1]	6.66	3.00–15.00	6.64	460
Hogs [2]	44.27	25.00–60.00	36.40	290
Choice steers [2]	47.86	33.00–65.00	39.96	316
Milk (grade A) [2]	10.08	4.25–15.00	10.20	80

[1] Per bushel.
[2] Per 100 lb.

Prices received by Indiana farmers at the time of the survey as reported by the USDA were below prices they considered the fair price, except for soybeans and milk. The divergence between a fair price and the actual price was greatest for wheat.

RECOMMENDED TARGET PRICE LEVELS

Producers were asked to make their recommendations for establishing target price levels for 1977.

The 1973 Agricultural Act set up a system of target or government prices for feed grains, wheat and cotton. Listed below are the national target prices established for 1976. To the right, put in your recommendations for target prices in 1977:

		I recommend for 1977:			
	1976	Average	Range	Average price received December 1976	Number answering
Corn	$1.57	$2.16	$1.00–$5		475
Wheat	2.29	3.02	1.50–6		432

Recommended levels were substantially above 1976 target prices. The 1976 level had been adjusted upward from the initial 1973 level by formula contained in the law. The formula did not, however, take into account the large production cost increases which occurred from 1973 through 1975.

RECOMMENDED LOAN RATES

Producers were also asked to make their recommendations for loan rates for 1977.

Listed below are the national average government loan rates for 1976. At the right, put in your recommendation for loan rates on these crops for 1977:

		I recommend for 1977:			
	1976	Average	Range	Average price received December 1976	Number answering
Corn	[1] $1.50	$1.95	$1.25–$3.50		468
Wheat	[1] 2.25	2.74	1.50–5.00		424
Soybeans	2.50	4.01	2.00–8.00		419

[1] As of October 1976.

The recommended increase for loan rates was similar percentagewise to the increase for target prices. This may indicate producers understand how target prices and loan rates should work. The suggested level for loan rates may indicate producer views of the price level which will keep U.S. prices competitive in world markets.

BASIS FOR ESTABLISHING TARGET PRICES

Producers showed a strong preference for basing target prices on cost of production.

If the target price system is to be kept in new farm legislation in 1977, on what basis should target prices be established? (check one)

	Percent
Start with current target prices, adjust each year for changes in prices farmers must pay for production items, including labor and interest rates	50
Use an average cost of production for the major producing area including average land costs	37
Use the parity principle of equal purchasing power for farmers calculated from the 1910–14 base period adjusted for recent changes	9
Other	4
Total responses	526

Although advocates of price supports tied to parity still continue their position, only nine percent of respondents in this survey thought the parity concept should be used

as a basis for establishing new target price levels.

CONGRESSIONAL ACTION ON FARM LEGISLATION

Producers were given several options as to what they thought Congress should do about future farm legislation.

The Agricultural Act of 1973 is due to expire at the end of 1977. What do you think Congress should do about future farm legislation in 1977?

	Percent
Keep the present law as it is—extend it for another period of years	6
Let the law expire; go back to earlier price and income support laws	3
Revise the 1973 Act by raising target and loan prices closer to costs of production, but keep it in its present form	59
Eliminate all government price and income support programs	22
Other	2
No opinion	10
Total responses	586

The majority favored the concepts contained in the 1973 Act with target prices and loan rates closer to costs of production. Although some farm spokesmen imply a majority of producers favor elimination of all government price and income support programs, this survey shows only about one in five favor their elimination.

ACREAGE SET-ASIDE PROGRAMS

In view of changed world food conditions producers were asked about their attitude toward use of set-aside acres in the future.

Acreage set-aside programs were in effect in 1973 and earlier years. Based on what has happened since 1973, how do you feel about acreage set-aside programs? (check one)

	Percent
The set-aside program should be available to use if needed	42
Set-aside programs should not be used	38
Instead of set-aside acres, give farmers a chance to store grain from a specified acreage under a government-storage program. Such grain could not be sold unless supplies were short and prices rose above a certain point	16
Other	4
Total responses	562

Opinion was almost evenly divided for and against use of the set-aside principle. The alternative of storing the production from a specified acreage was favored by 16 percent of the respondents. The bill introduced by Senator Bellmon, Oklahoma, contains an alternative to set aside very similar to the storage alternative stated here.

ROLE OF GOVERNMENT IN AGRICULTURE

	Percent					
	Strongly agree	Agree	No opinion	Disagree	Strongly disagree	Total responses
Check below how you feel about each statement:						
Let farm market prices move up and down without direct Government interference to guide farmers in their production decisions	38	42	7	11	2	568
To stabilize farm and food prices and supplies, the Government should hold some grain reserves. It should buy when grain prices are low and sell when they are high	7	27	10	27	29	561
The Government should continue to use tax revenues to keep farmers' prices and incomes from dropping to low levels during times of large supplies	15	39	14	23	9	559

Opinion was strongly in favor (80 percent) of letting market prices move up and down without direct government interference in the market. Yet, in a previous question only 22 percent favored elimination of all government price and income support programs. Fifty eight percent of the respondents were opposed to government-held grain reserves as a means for stabilizing farm and food prices. But 54 percent favored government use of tax revenues to support prices and incomes during times of large supplies. Apparently respondents see only the price depressing side of grain reserves and not the price supporting aspect when stocks are being accumulated.

USE OF TAX FUNDS FOR FOOD ASSISTANCE

	Percent					
	Strongly agree	Agree	No opinion	Disagree	Strongly disagree	Tota responses
Check below how you feel about each statement:						
The Government should use tax funds to help buy food for our people with low incomes	8	43	12	25	12	5702
The food stamp and other Government food assistance programs in this country help strengthen U.S. farmers' markets	4	33	21	29	13	566
In recent years under Public Law 480, our Government has distributed about 5 percent of our farm and food exports to low income countries for credit at reduced interest or as gifts. With the present world market, we should discontinue all such export assistance	10	31	19	32	8	567
We should provide food aid only to countries suffering from disasters such as drouth, floods, or earthquakes	16	49	6	26	3	576

A majority (51 percent) agreed that tax funds should be used to help buy food for people with low incomes. Several respondents raised questions about what constitutes low income. Only 37 percent agreed that such food subsidy programs strengthen U.S. farmer's markets. This indicates respondents either don't know about research results which show expenditures on food stamps increase food expenditures by about one-half to two-thirds the total amount expended or don't believe the results.

	Percent					
	Strongly agree	Agree	No opinion	Disagree	Strongly disagree	Total responses
Check below how you feel about each statement:						
The Government should not restrict farm and food product exports under any circumstances	21	33	10	31	5	565
The Government should not restrict farm and food product imports under any circumstances	6	15	12	51	16	554
Export agreements with Japan, Russia, and Poland to supply a certain amount of our farm and food commodities have been made during the past year. Check how you feel about these:						
(a) We should not make any export agreements; let each country buy as they need the commodities and as we have them available	22	48	8	19	3	549
(b) We should agree to sell Japan all that it wants	13	33	13	35	6	533
(c) The agreement that requires Russia to buy at least 6,000,000 tons of grain every year, and allows them to buy more, is in the best interests of farmers	11	49	17	17	6	537
(d) We should set up export agreements with all major buyers of our farm commodities to assure a steady market for our farmers and stable supply for our customers	19	54	9	16	2	562

CHARACTERISTICS OF FARMERS RESPONDING

The survey was designed to be a random survey which would be representative of producers within the state. All age groups were included.

Farms were of all sizes, but the average was somewhat higher than the state average reported from other sources. Producers belonged to a number of organizations with Farm Bureau membership predominating.

CONCLUSIONS

The approach to price and income support taken in the 1973 Act appears to be acceptable to a majority of producers. A minority of producers desire elimination of all government price and income support programs. But the majority would like to see target prices and loan rates increased to provide a greater degree of protection than is contained in the 1973 Act. Producers appear to recognize the problems associated with getting loans set so high as to make it difficult for U.S. products to enter export markets. Opinion is divided on future use of set aside acres. Opinion is strongly against government ownership of grain under a grain reserve program.

The section of the survey covering attitudes toward trade and export agreements generated the largest amount of contradictory opinion. Producers apparently resented export controls or anything that looked like export controls. They would accept agreements if they would provide upward stability to export markets.

Although future farm programs cannot be based solely on producer opinion, this type of information should be useful in formulating future farm policy. To be effective, programs have to be acceptable to a majority of producers as well as consumers.

More indepth analysis of the survey data is in process and will be presented in a subsequent report.

EDUCATIONAL NEEDS OF RURAL WOMEN AND GIRLS

Mr. CLARK. Mr. President, the National Advisory Council of Women's Educational Programs recently completed an extensive study of the ability of Federal education programs to adequately serve women living in rural areas.

Their report—"Educational Needs of Rural Women and Girls"—indicates that the Federal education programs need to be refocused to assure that rural women and girls receive the same level of benefits as their counterparts living in urban areas.

The council held hearings in four cities—Madison, Wis.; Stockton, Calif.; Santa Fe, N.Mex.; and Boone, N.C.

The report notes that there is no standard definition of "rural" and there certainly can be no generalizations about the profile of rural women. Witnesses at the hearings included farm women, migrant workers, rural black women, Native Americans, Native Alaskans, women of Spanish origin, and women from Appalachia.

From such a diverse group came a wide range of interests, opinions and needs, but the report concludes:

There was also reflected, in the four sessions, a commonality of concern, to the extent that these issues emerged as the central ones: personal growth and recognition; political participation and legal rights; health education and health care; child care, early childhood and special education; counseling and career development; elementary and secondary education; and preservation of rural values.

From this, it can be seen that the needs and concerns of women and girls living in rural America closely parallel those of women living in the more-populated urban areas. But, as is true with many Federal programs, we have not yet reached the rural women to the same extent as the urban women with education programs.

I recommend this report to my colleagues. It presents a good outline of the areas that need attention in order to assure that rural women receive full benefits of Federal educational programs.

I ask unanimous consent that the section entitled "Highlights and Recommendations" be printed in the RECORD.

There being no objection, the section was ordered to be printed in the RECORD, as follows:

HIGHLIGHTS AND RECOMMENDATIONS

HIGHLIGHTS

The United States may be among the most urbanized nations in the world, but rural life is still the way of life for nearly one-third of the country's people—or 66 million individuals. The total number of rural females—who are the subject of this report—is about 34 million.

Like the overall American population, the rural population is ethnically and culturally diverse, as well as geographically dispersed. It may be useful to think of these definable (but not necessarily discrete) sub-groups: Farm, Rural Black, Rural Spanish-origin, Migrant, Native American and Native Alaskan, Appalachian.

While rural America is not categorically poor, there is some correlation between rural life and low income—to the extent that the rural poor constitute 40–50% of the nation's impoverished. And, in general, rural residents have a higher incidence of social problems and receive a lower per capita share of the Federal dollars designed to meet those problems than does the rest of the population.

With respect to the educational needs, little attention is being directed to rural girls and women—by either rural educators and advocates for rural development, or women's education advocates and providers.

Such specific attention is critically needed. Assumptions have been made that males and females benefit equally from efforts to improve the quality of rural life, and that rural and urban women benefit equally from the recent national concern with women's status. The Council's investigation shows both these assumptions to be unfounded.

Lack of specific program concern for the educational needs of rural women is matched by—and thus obscured by—a lack of concern in data gathering. Public statistics with specific categories for rural women are virtually nonexistent.

The educational needs articulated by the rural women involved in the Council's investigation relate to the broadest possible range of social issues—from health care to political involvement to the preservation of rural values and regional pride.

Because the rural population is an isolated population, there is as much concern with the system by which educational services are delivered as there is with the content of those services.

In spite of both geographic spread and the great diversity of culture, ethnicity, age, family circumstances, economics, and educational attainment represented by the rural women involved in the Council's investigation, there is a striking similarity of perceived need. The message brought to the Advisory Council by the rural women was essentially this: rural women want to speak for themselves and have their voices solicited and listened to; they want to be recognized as significant and contributing members of their families and of society at large; they want to have the opportunity to become independent persons, to control their own lives, to have a role in the formulation of public policy, and to share somewhat equitably in the fruits of our society.

The educational needs highlighted so eloquently in the Council's investigations are great, because rural women, by definition, live in sparsely settled or isolated areas where educational delivery costs are high and income is generally low. The needs are also great because they are the needs of women and girls who are viewed and treated primarily as wives and mothers, and whose need to understand and be a part of the larger political and economic world is still virtually unrecognized by those around them.

The Council is aware that education alone, even in its very broadest sense, cannot solve the problems of rural females. Educational efforts addressed seriously to these problems can, however, examine and highlight the problems and can direct resources—formal and informal, public and private—toward removing fundamental causes of inequity.

RECOMMENDATIONS

The National Advisory Council is mandated to report to the President, the Congress and specifically the Assistant Secretary for Education. Therefore the formal recommendations presented here are those addressed to the Federal government. Throughout the entire report, however, there are suggestions and proposals whose implementation relies on the initiative and involvement of individuals at many levels of our public and private sector institutions. Such participation is vital to the attainment of educational equity for rural women and girls.

One overriding factor to be considered in the implementation of any recommendation is the need to recognize the positive elements of rural life and not to attempt to impose urban lifestyles upon rural women and girls. In addition, rural women and girls must be given a voice from the beginning in the planning and implementation of projects affecting them.

1. The National Advisory Council on Women's Educational Programs recommends to the President and Congress that a Federal rural education policy be established which is designed to meet the special problems of isolation, poverty and underemployment that characterize much of rural America. Such a policy must be consciously planned to overcome the inequality of educational opportunities available to rural women and girls.

This is not a new recommendation. Numerous recommendations have been made to the Office of Education concerning an education policy for the rural areas but only a few have been implemented. Almost one-third of the population of the country lives in rural areas—yet rural residents receive relatively little attention from the Federal education establishment. In setting a Federal education policy for the rural areas, the government needs specifically to address the question of education equity for women and girls.

2. The Council recommends that the Office of Management and Budget set and enforce a policy that data collected on beneficiaries of all Federal programs shall be reported by sex, by minority status, and by urban/rural or metropolitan/non-metropolitan areas, based on a standard definition.

Evidence that research on the impact of HEW programs on women is minimal and on rural women is nonexistent is found in the Department's own Report to the National Commission on the Observance of International Women's Year. The survey collected no data on rural women.

Until the population of rural women, which is significant and whose expressed educational needs are many, is identified in

data gathered by departments, and until the effect of public spending on the lives of this population is taken into account, rural women and girls will remain invisible and disadvantaged.

3. The Council recommends that the Secretary of Health, Education and Welfare ask the Census Bureau to incorporate in the Agriculture Census questions on rural women, their educational attainment, their employment for wages, and their employment in home and farm work; and that the Secretary of HEW ask the Department of Agriculture to incorporate in surveys questions about the economic contributions of women's work in agricultural production and homemaking, and questions on the economic and social conditions of non-farm rural women.

In the course of the Council's study on rural women it became evident that neither the Census Bureau nor the Department of Agriculture collects adequate information about rural women. In addition to customary figures on numbers, age categories and educational attainment—which themselves are insufficiently reported—information which accounts for the realistic contributions of rural women (paid and unpaid) is essential to the formulation of educational programs that speak to their actual needs.

A major recommendation of the World Plan of Action adopted by the United Nations as its Mexico City Conference during International Women's Year is applicable to the United States. It calls for a "scientific and reliable data base to be established and suitable indicators developed which are sensitive to the particular situation and needs of women as an integral part of a national and international program of statistics. All census and survey data relating to characteristics on individuals and to household and family composition should be reported and analyzed by sex."

4. The Council recommends that the Departments of Health, Education and Welfare, Agriculture and Interior (Bureau of Indian Affairs) undertake coordinated research programs to understand the special educational needs of rural women in their culturally, geographically and economically diverse settings, so that appropriate programs can be developed to fulfill the policy proposed in Recommendation 1 above. The findings of such research should be widely disseminated.

The paucity of available research, as well as the close interrelationship of the multiple needs of rural women, led the Council to this recommendation. The value of a coordinated agency approach to issues for which all three Federal departments have some responsibility is obvious. The information and implications of the resultant findings will only have an influence on the intended beneficiaries when they are widely known and understood.

Virtually no research or even statistical data could be located on Asian-American women. Other cultural and ethnic populations of rural women fare only slightly better. Participation of representatives of these various groups in the design of research efforts is highly advisable.

5. The Council recommends that the Department of Health, Education and Welfare, through the Office of Education, undertake a vigorous campaign to inform the public about legislation, services and programs which can assist in eliminating sex bias and sex-stereotyping in education, and in that campaign, pay special attention to the problems of reaching rural women.

In all areas, the Council has found widespread ignorance of Title IX, the basic anti-sex discrimination statute. Community groups and parents need to know the requirements of this law, the rights of students and employees under it, and what citizens can do to monitor compliance.

They need to know also the availability of technical assistance through the Institutes and General Assistance Centers funded under Title IV of the Civil Rights Act of 1964. Information about other programs administered by the Office of Education—such as vocational education, career education, and the Women's Educational Equity Act—which provide funding potential for programs to overcome sex bias, should also be widely disseminated in ways that reach beyond the usual channels of state and local education agencies. Material written for lay audiences should be distributed to the media and to groups such as parent-teacher associations, women's organizations, community action programs, and religious, senior citizen and youth groups, so that citizens can stimulate their officials to take advantage of new legislation and resources available through the Federal government.

6. The Council recommends that the Department of Health, Education and Welfare, through the Office of Education, fund a program of innovative uses of broadcast (both open and closed circuit) as a delivery system of educational services to rural women, and further recommends that those successful innovations be additionally funded and replicated throughout the country.

Because of the inherent isolation of most rural women, traditional educational delivery systems are either impractical or too costly to provide. This is especially true of late entry and continuing education programs. Around the country there are many examples of interesting and valuable uses of broadcast, both open and closed circuit, that should be further encouraged and developed. In most instances these individual programs are not geared especially for women. With proper funding and support these programs could be assessed, adapted to meet the educational needs of rural women, and carried to all areas of the country.

7. The Council recommends that the Secretary of Health, Education and Welfare review and amend the criteria by which project grants and contracts are awarded, and modify the guidelines and procedures governing applications, so that rural women and girls in greater numbers can qualify for Federal support of their programs and be the actual beneficiaries of them.

The application process for project proposals has become so technical and complex that successful fulfillment of requirements is a highly professional task. Most rural women have neither the expertise nor sufficient access to resources to qualify for grants or contracts. Their opportunity to qualify for programs intended to benefit them could be made realistic by simplification of the process.

Project guidelines that emphasize "innovative" or "pilot" demonstrations work inevitably to rule out continuity or replication elsewhere of valuable projects. It has been the Council's observation that maximum utility of many extremely useful programs across the country has been thwarted by this policy.

Finally, intended beneficiaries should be consulted or involved in the planning of proposals and in many cases should be direct recipients of grants. All too often the Council learned of programs which on paper were to assist groups who in fact were scarcely touched at any stage. Where feasible, on-site investigations prior to the award of grants, and the utilization of rural women as proposal readers, would help assure the integrity of proposed programs.

8. The Council further recommends that any programs receiving Federal funds which set prerequisites of minimum enrollment as a condition for providing courses recognize the difficulties in sparsely populated areas of meeting the same numbers standard that may be reasonable in more urban settings.

Although the Council recognizes that a lower or flexible requirement for enrollment in a course is likely to increase costs, it nevertheless believes that rural people should not be precluded from participation in educational offerings because distance and low population density limit the number applying at any one time. Several instances of this problem were brought to the Council's attention during the consultations.

9. The Council recomends to the Secretary of Health, Education and Welfare that whenever Federal resources are used to support educational guidance and counseling programs at teacher training institutions, state departments of education, and individual schools, specific attention be directed to the multiple needs of rural women and girls.

Rural girls and women need far greater exposure than they now receive to non-sexist, non-traditional occupational/career guidance information. They also need increased opportunities to become acquainted with women actively engaged in occupations/professions, both traditional and non-traditional. They would benefit from some kind of accessible "one stop" information clearinghouses which monitor programs and other resources, and which might be utilized in addressing their various counseling needs. Teachers and school counselors should be provided preservice and in-service training to make them aware of their own attitudes about both rural girls and women and the expectations which rural women and girls have. Some systematic procedure should be instituted for keeping teacher training institutions and school administrators and counselors informed both of current regulations and current non-sexist teaching and counseling materials.

ENERGY

Mr. DOMENICI. Mr. President, in President Carter's energy message last night, he stressed our ultimate dependence on the sun for energy and urged that an increase in solar energy research be effected. I am in total agreement with this view.

One aspect of solar energy which, in my judgment, holds considerable promise in meeting at least a portion of our future energy needs, is bioconversion. Simply stated, bioconversion is the release and utilization of solar energy which has been previously captured and stored by living plants.

I would like to call to the attention of my colleagues two relatively novel aspects of bioconversion of which I have recently become aware. Dr. Eugene White, of Penn State University, proposes that forest and mill wastes be converted, by known technology, to charcoal. This material, which has a higher heat content than coal and is essentially sulfur-free, could be produced from virtually any type of wood waste. Dr. White suggests that charcoal, used as a coal supplement, might help burners of high sulfur coal to meet emission standards and to stretch their coal supplies. He estimates that in Pennsylvania alone some 100 million tons of charcoal are potentially available.

Another scientist, Dr. K. L. Lessman of New Mexico State University, indicates that many species of plants contain hydrocarbons, and with appropriate

research these species could form the base of a domestic petrochemical supply. In a recent review he describes a plant called crambe, which could be grown widely in arid regions of the Southwest, providing both a valuable cash crop and a future petroleum source.

Although bioconversion can never supply a major portion of our energy needs, it does represent one element of an integrated national energy supply strategy which I believe deserves our serious attention.

Mr. President, I request unanimous consent that the articles by Drs. White and Lessman be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

The Pennsylvania State University

NEWS RELEASE

(Prepared by Mary S. Neilly)

Our forests offer a valuable, renewable, and easily available alternative energy source that can be harvested without touching healthy, desired trees, says Dr. Eugene W. White, professor of solid state science at The Pennsylvania State University.

Dr. White proposes that salvage, cull, and thinning operations be carried out in our existing forests, then that the resulting waste material, along with wood wastes from lumbering and pulpwood operations, sawmills, and wood-using industries be converted to charcoal and the charcoal blended with coal to obtain a less polluting fuel for coal-burning power plants. Also the charcoal could be used alone as an essentially sulfur-free fuel.

Dr. White describes his proposal in an article, "Wood Charcoal as an Extender or Alternative for Coal: An Immediately Available Energy Source," in the January issue of "Earth and Mineral Sciences," a monthly bulletin of Penn State's College of Earth and Mineral Sciences.

As a fuel, wood charcoal is superior to coal in many ways, Dr. White explains. Not only is it produced from a renewable resource, but it has a higher heat value and lower ash content than coal and contains very little sulfur. It retains over 65 percent of the heat value of the wood from which it is made, but weighs only 30 percent as much. It would probably need to be compacted to make it less bulky to transport, but this isn't a major problem because it is easily crushed.

Pennsylvania, which produces more than 72 million tons of coal per year, has numerous coal-burning power plants which, Dr. White believes, could burn blends of coal and charcoal. Blending the two, he notes, would have the effect of stretching coal supplies while raising the coal's heating capacity and lowering its sulfur content. This would mean that the many high-sulfur portions of coal seams now being left unmined could be utilized.

Dr. White uses Pennsylvania, which accounts for three percent of U.S. forests, as an example around which to develop his argument that our forests can yield large amounts of otherwise useless wood for charcoal.

Pennsylvania has over 17 million acres of land. He estimates that a third of the live woody material on this land is cull—material that should be removed for thinning purposes as a matter of good forestry practices. This waste, he says, represents a fuel reserve of about 330 million tons. Since a typical yield of charcoal is about one-third the weight of the wood from which it is made, this would indicate a potential short-term charcoal supply in Pennsylvania alone of over 100 million tons.

Then, once the backlog of this live material that should be removed for the sake of good forest management is depleted, Dr. White believes that at least five million more tons of charcoal per year could be realized from new cull growth, logging and sawmill residues, and other wood wastes. Not taken into account in these calculations are the dead trees—standing and fallen—in the forests which Dr. White sees as a still further major reserve.

He looks ahead to the establishment of energy plantations for charcoal-fuel production. New developments in tree farming that use sewerage effluent as fertilizer, he says, could yield as much as 15 tons of wood for charcoal per acre per year on a five-year rotation. For each million acres put into plantations, he envisions a yield of wood equal to about five million tons of charcoal per year.

No major new technology would seem to be needed to begin producing charcoal as a significant energy source, Dr. White reports, although new nonpolluting plants would have to be built if large tonnages were to be produced.

What about the cost of producing the charcoal? Dr. White points out that coal with a heating capacity of 13,000 Btu. per pound (essentially same as wood charcoal) now costs electricity producers about $26 per ton. For an equivalent heating capacity in fuel oil, the cost would be about $52. He believes charcoal could be produced—at least from mill wastes—for less than the $26 per ton that its equivalent in coal now costs.

Additional economic benefits from the use of charcoal would be the valuable byproducts of its production such as creosote and methanol (wood alcohol), an excellent fuel in its own right. From the production of 100 million tons of charcoal, Dr. White says about two billion gallons of methanol could be realized.

By using modern wood-harvesting and chipping techniques, he estimates that the costs of wood feed for mobile charcoal plants could run as little as $5 per ton. The cost of the heat-treating process that converts the wood to charcoal should not exceed about $5 per ton, he believes.

On a national scale, he says, "it would not be at all unrealistic to develop an annual charcoal production to supply an amount of energy equivalent to the present oil imports within the next two or three years. This would be an energy source equivalent to some six times the current nuclear power production."

After completing the study on charcoal that he describes in the article, Dr. White reports that he decided to look into the availability of mobile charcoal production equipment that would be suitable for Pennsylvania lumber producers, who typically operate in a five-to-ten-mile radius, to use to convert wood chips and sawdust into charcoal.

He could find no such equipment being made commercially so he and two friends have designed, constructed, and tested a prototype mobile machine which they believe has demonstrated its practicality for use by sawmill operators in Pennsylvania forests.

It is nonpolluting, of simple design, operable by a minimum of personnel, equipped to collect the distillate byproducts, and could be built commercially within a price range that sawmill operators are accustomed to paying for equipment.

On the basis of this success, Dr. White says he is confident that it would be economically realistic to proceed with production of charcoal from the vast supplies of wood waste materials from our forests and mills for the purpose of developing a cost-competitive energy source.

(Copies of the bulletin containing Dr. White's article may be obtained free of charge by writing: Editor, "Earth and Mineral Sciences," 110 Mineral Sciences Building, University Park, PA 16802.)

CRAMBE AS A RENEWABLE SOURCE OF PETROCHEMICAL RAW MATERIAL

(By K. L. Lessman)

There is a part of the impending energy problem, due to a predicted petroleum shortage, that is not widely appreciated. Petroleum is the basic raw material of an organic chemical industry that provides us with such valuable products as lubricants, surface coatings, plastics, synthetic rubber, and waxes. About 7% of all petroleum consumed in the U.S. is used in the chemical industry and projections are that materials produced by this industry will grow in importance in coming decades.

Although a single solution to world energy problems would be ideal, it seems more realistic to believe the ultimate solution will be multi-faceted and may partially require a number of contributing sources of petroleum substitutes. An excellent example is crambe oil, a prospective agricultural commodity, expressly aimed at industrial uses, and presently producible at up to 2½ barrels per acre per year even on marginal lands. Moreover, such a source of petrochemical raw material would represent a continuously renewable resource. In addition, chemical research has demonstrated several new products that can be made from crambe oil. Outstanding among these products (and the amount of oil that would be used to produce enough of them to satisfy projected markets) are nylon 1313 (80 million lbs.), plasticizers (50 million), and sperm oil replacement (50 million). Predictable increases in a number of established miscellaneous uses bring an early prospective market of 250 million lbs. per year. Therefore, crambe could meet a portion of our national needs via the petrochemical industry if an adequate and dependable supply of the seed oil were assured as a renewable domestic resource.

Oil free crambe seed meal (50% of seed weight) contains a good quality protein and may be used as a high value supplement in cattle feed, thereby helping to ease immediate demands on proteins with wide applicability. If research shows the thioglucoside constituent (9–11%) removable from the meal, either during oil extraction or by breeding, the resulting superior protein would have a more universal utility. However, a joint agronomic, genetic and industrial research effort is needed to determine crambe's productivity as a field crop for New Mexico and similar areas of the Southwest to allow a reasonable oil price and an increase in the confidence of manufacturers and producers in its constant and reliable availability.

VD: THE NEGLECTED EPIDEMIC

Mr. ABOUREZK. Mr. President, I want to call to the attention of the Senate an article which appeared in the Washington Post on Sunday, April 17. This article titled "VD: The Neglected Epidemic" was written by Phyllis Franck and Diana S. Hart.

Mr. President, this article discusses what I think is a very important and neglected problem in the country today. The Center for Disease Control has confirmed that there exists major, nationwide epidemics of syphilis, gonorrhea, and other sexually transmitted diseases. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

VD: THE NEGLECTED EPIDEMIC

(By Phyllis Franck and Diana S. Hart)

Last fiscal year, 1,011,014 cases of gonorrhea were reported to the U.S. Public Health Service, an increase of 254 per cent since 1965 and the highest number since the PHS started keeping such records 55 years ago.

PHS officials estimated there were another 1.7 million unreported new gonorrhea infections last year—a projection based on the results of national surveys revealing extensive failure by private physicians to report the cases they treat.

There were 76,736 cases of syphilis reported to the PHS during FY 1976, and it is estimated that at least 360,000 more untreated cases occurred in the United States last year—a projection derived from national health surveys in which random samples of the population were tested for the disease.

More cases of gonorrhea are recorded each year by the PHS than all other reported communicable diseases combined, including chicken pox, mumps, TB, measles, syphilis and several others. Syphilis has repeatedly ranked third among "reportable" communicable diseases in the United States, and although it leveled off slightly last year, it continues to be exceeded in incidence only by gonorrhea and chicken pox.

This information is found in the "VD Fact Sheet," a little-noticed federal report which quickly dispels any notion that venereal diseases no longer pose a serious public health problem. Though not yet off the press, the FY 1976 edition of the Center for Disease Control (CDC) publication confirms there are major, nationwide epidemics of syphilis, gonorrhea and several other sexually transmitted diseases, according to CDC officials.

"Gonorrhea and syphilis are at unacceptably high levels," is how Dr. Ralph Henderson, until last month chief of the federal VD control program and now with the immunology staff of the World Health Organization, characterizes the situation.

Epidemiologist Gavin Hart, M.D., of the Harvard School of Public Health, agrees that there is a serious VD problem in the United States and says the word "epidemic" does not adequately convey its current scope. "Hyperendemic, meaning there is a constant presence of a disease or infectious agent in a given geographic location, at persistently high levels," he suggests, is a more accurate assessment.

The new government report reveals that complications of untreated syphilis and gonorrhea are costing the American public many times more annually than the amount being spent by the federal government in an effort to control these diseases. Pelvic inflammatory disease, for example, a frequent complication of untreated gonorrhea which often leads to sterility, affected some 22 million women last year, accounting for 1.2 million hospital days and costing society some $229 million. Likewise, the institutional care of people suffering from syphilitic psychosis cost taxpayers $60 million last year.

By contrast, the fiscal 1976 budget for the control of syphilis and gonorrhea was $18 million, and the National Institutes of Health's Allergies and Infectious Diseases Institute, which is responsible for research into communicable diseases, spent $4 million last year for all sexually transmitted diseases. Despite overwhelming evidence from a federal agency warning of a serious public health situation, appropriations to combat the national VD problem have been declining.

"No one would have allowed this to happen with measles or polio," Henderson says, pointing out that the full impact of venereal disease goes far beyond syphilis and gonorrhea. Scientists are finding that a multitude of other infections and infestations from bacteria, viruses, insects and fungi are transmitted sexually and are taking their toll, both physically and financially, on society. As many as 20 have been cited by scientist King Holmes, director of the Center for VD Research at the University of Washington.

Over the last decade, scientists in America and abroad, recognizing the limited connotation of the term "venereal" (from Venus, the goddess of love), have been adopting the expression "sexually transmitted diseases," or STDs, to describe this spectrum of conditions.

BIG THREE OF VD

What are these diseases and how "unhealthy" are they? Chancroid, lymphogranuloma venereum and granuloma inguinale, together with syphilis and gonorrhea, once were considered the five traditional venereal diseases. The first three are now rare in the United States, but genital herpes, a peculiar virus related to the one causing cold sores, along with the latter two, are the contemporary big three of VD. The increasing prevalence of herpes, plus its known link to birth defects and other possible medical consequences, have resulted in escalating concern about this disease. While CDC estimates are admittedly "very low," it believes that at least 300,000 new cases occur in the United States each year. Projections by other medical sources indicate 10 to 20 million adult Americans have genital herpes.

Trichomoniasis (an estimated 2.5 million new cases annually), non-gonococcal urethritis, or NGU, (an estimated 2.5 million new cases) and venereal warts (an estimated 700,000 new cases are other sexually related ailments now being monitored by the Center for Disease Control. Still others, for which no data is available from the center, are nonspecific vaginitis, yeast infections, strains of infectious mononucleosis and scabies. The role of sexual contact in the transmission, especially among homosexuals, of hepatitis B and several forms of dysentery is also just beginning to be considered.

"The toll of all of these infections is high," the National Institute of Allergies and Infectious Diseases (NIAID) states in its new public information pamphlet. In seriousness, they range from Phthirus pubis, commonly known as "crabs," to such insidious illnesses as syphilis, gonorrhea and genital herpes.

Except for infections caused by the herpes virus, for which medication can do no more than relieve localized symptoms, many of the sexually transmitted diseases can be overcome with some form of treatment. However, acute medical complications may result if treatment is neglected.

Gonorrhea, if untreated, can lead to sterility in men and women. It is also the most frequent cause of infectious arthritis in the United States and, in exceptional cases, can result in meningitis, NIAID says. NGU may lead to blindness. Hepatitis can cause severe liver damage. Though advanced syphilis is declining, this degenerative disease, when untreated, leads to mental illness, blindness, heart diseases and death. Complications from primary and secondary syphilis affect the newborn infants of women who are infected while pregnant.

In fact, the NIAID booklet shows that the most significant characteristic shared by a majority of the STDs is their potential for damage to fetuses and the newborn. Risks included miscarriages, premature and stillbirth, serious urogenital infections, mental retardation, blindness and other congenital defects.

At least five of these diseases are "directly responsible for the death and/or lifelong disability of an estimated 100,000 babies and young women of child-bearing age annually," Sam Knox, national program director for the American Social Health Association, a small, California-based information and educational organization which is the closest thing to a VD lobby, said recently in testimony before a Senate appropriations subcommittee.

"NO ONE IS IMMUNE"

According to PHS figures, sexually transmitted diseases are most prevalent in large urban areas and among 15–30-year-olds. Specifically, 20–24-year-olds are at greater risk of contracting both gonorrhea and syphilis than any other age group, 15–19-year-olds are the second highest risk group for gonorrhea and 25–29-year-olds are the second highest risk group for syphilis.

"Accurate socio-economic data is not available," departing VD control chief Henderson points out, "but no one is immune. So-called 'nice' people are as susceptible as anyone else. These and other STDs are present in every socal strata and ethnic group."

Homosexual males have become a particularly high-risk group for several STDs and are thought to account for as much as one-third of all reported syphilis cases.

According to Henderson and other epidemiologists, prostitution does not appear to be an important factor in the spread of STDs in the United States today.

Why are the STDs at epidemic levels? This is an extremely complex question and there are a variety of answers. Some say that the "new morality" is responsible. Data indicate that sexual activity is taking place with greater frequency among all age groups both within and outside of marriage. This fact does not fully explain the epidemic, however. The "portability" of the diseases in a highly mobile society, plus the lack of natural immunity to many of the diseases (that is, the fact that being cured doesn't prevent reinfection), are contributing factors. Modern birth control methods—the pill and the IUD, unlike the condom—offer no protection against VD. (A recent study has shown that some creams and jellies used with diaphragms do offer limited protection.)

The elusive gonococcal organism is presenting a particular challenge to epidemiologists because most women, and some men, do not experience symptoms until the disease is well advanced. If these unknowing carriers continue to be sexually active, they will pass it on to others, who in turn may infect others, and so—like a chain letter with a sinister message—the disease progresses.

Disease detection is also difficult. There is a culture test for gonorrhea, but the fastidious gonococcal organisms will grow only in carefully controlled laboratory conditions. And even under optimum circumstances, the test does not detect between 10 and 20 per cent of cases, according to control experts.

BETTER THAN NOTHING

Whatever the shortcomings of modern diagnostic tools for gonorrhea, they are better than none at all. Yet screening is not routinely provided for this or any other STD by urologists, gynecologists and most private practitioners. Patients are therefore obliged to reveal personal information about sexual activity in order to obtain medical care, and thus may be inhibited from seeking diagnosis and treatment.

In addition, private physicians, who treat about 80 per cent of all VD cases, rarely ferret out and treat sexual partners of infected patients. And failure by an infected individual to inform any sexual partners of the need for treatment is another problem.

The national gonorrhea rate for FY 1976 was 478.1 cases per 100,000 population, according to the new VD Fact Sheet. However, six cities reported rates exceeding 2,000—Atlanta with 3,083 reported cases per 100,000

population, followed by Baltimore, San Franciso, Washington, Richmond and Memphis. The syphilis rate for FY 76 was 11.8 cases per 100,000 population. But four cities—San Francisco, Washington, Charlotte and Atlanta—reported rates exceeding 75 cases per 100,000 or about seven times the national average. All cities over 50,000 reported some incidence of gonorrhea, says Joseph H. Blount, chief federal statistician for VD.

Despite laws in all states requiring the reporting by doctors of confirmed gonorrhea and syphilis cases to health authorities, the chronic problem of underreporting by private physicians results in "weighted" data. Public health clinics, family planning agencies and hospitals routinely report confirmed cases. But because a preponderance of their patients are low-income individuals, the impression is created that VD is basically a "lower-class" problem.

Other factors can influence the federal data. For example, some epidemiologists believe that intensified case-finding efforts by public health workers in recent years, plus improved reporting procedures, have resulted in the upward statistical trends.

But statistician Blount does not agree. Blount admits these efforts have accounted for some increases but believes there is overwhelming evidence that the data reflect actual increases rather than improved reporting. Emphasizing this point, he explains that, long before any intensified public health efforts were launched, there were 10 to 15 per cent increases annually of reported gonorrhea cases. Blount points out that six states do not have laws or regulations requiring laboratories to report positive syphilis or gonorrhea test results to public health authorities.

APPROPRIATIONS CUT

Despite the magnitude of the national VD problem, it appears the federal government is not being sufficiently responsive. Public health officials are expressing alarm and frustration over a lack of adequate financial support, and many believe the stigma surrounding these diseases is still a major obstacle to an enlightened and effective public policy.

Funding cuts have diminished an already slim budget for the national VD control effort. The Center for Disease Control's present $18 million appropriation for syphilis and gonorrhea control reflects a 40 per cent reduction since 1975, excluding inflation.

Scientists say they still have much to learn about the organisms causing gonorrhea and syphilis if effective immunoligical agents are to be developed. Important research into other STD organisms is also needed. While the NIAID research program in sexually transmitted diseases has grown from $130,000 in 1971 to about $6 million this year, this is considered a minuscule amount for scientific research in an area affecting the health of millions of Americans. The Defense Department's small VD research program was eliminated by Congress six months ago. "Our VD research program, touted to be the best in the world, is actually little more than a token effort," Sam Knox has testified.

Prior to 1972, there was no federal control program at all for gonorrhea. The total VD budget—directed solely at syphilis—was slightly more than $6 million. That year, when new reported gonorrhea cases had already exceeded 800,000, Congress appropriated an additional $16 million for its control, bringing CDC's budget to $22.3 million for both diseases.

In 1975, $28 million was appropriated. But by 1977, after new reported gonorrhea cases passed the million mark, Congress had slashed the program to $18 million. A 1971 report by a presidentially appointed national VD commission recommended that federal appropriations of $43.3 million would be required by 1977 to carry out adequate control programs. This recommendation, like most others in the report, has been ignored.

The House and Senate have just passed a supplemental appropriations bill that includes an extra $7 million for VD control for FY 77 only. If approved by the President, it would bring the budget to $23 million for the current fiscal year, which ends September 30. The proposed increase would be derived by transferring funds from the swine flu program.

EDUCATION IS KEY

What would it take to make sexually transmitted diseases a top national health care priority? Both federal and non-federal epidemiologists agree that educating the general public and legislators at all levels of government about their dangers is the key, as is changing the view, still widely held, that these diseases are deserved punishment for promiscuous behavior.

"If we could somehow destigmatize them, half the battle would be won," Henderson says. "Other illnesses have been stigmatized in the past. Diabetes, epilepsy, TB, even cancer were at one time thought to afflict only 'bad' people. VD, however, is tied to sex, which adds another dimension. With STDs, everyone take a giant step backwards and says, 'Me? Not on your life.' "

In the highly competitive congressional appropriations process, both public interest group pressure and the social acceptability of the cause are crucial. But, as one Hill staffer asks, "Who wants to be the public champion of VD? That role is about as attractive to a politician as getting the disease."

Attempts by the White House since 1972 to eliminate "categorical" health programs such as VD caused numerous congressional logjams. As a result, the law authorizing the existence of the federal VD control program almost expired last year but was finally renewed for an additional three years by congressional health subcommittees. This delayed action on funding by the appropriations committees.

In the past, the federal government was not entirely unresponsive with regard to VD. The existence of a national problem was first acknowledged during World War I when syphilis was observed to be a major cause for draft rejection. In 1918, Congress passed legislation creating a VD division in the Public Health Service. In 1938, when reported cases of syphilis at all stages reached nearly half a million, Congress passed the National VD Control Act, providing federal funds for state-run syphilis control programs.

With no miracle drug to counteract syphilis in its contagious stages, the objective of the early effort was to spot infected individuals through blood tests and to track their sexual contacts. To prevent late complications, people with syphilis were placed in rapid treatment centers on regimens of arsenic therapy.

After the mid-1940s, when penicillin proved effective in curing the disease, the incidence of syphilis dramatically declined. Between 1947 and 1957 primary and secondary syphilis dropped from 106,000 cases to only 6,200 new reported cases nationwide.

RATES STAY HIGH

Believing the problem solved, Congress drastically reduced the federal effort and interest in sustaining a national syphilis control program was lost. But optimism about penicillin as a panacea was ill advised.

By the late 1950s, infectious syphilis was increasing again. In 1961, with 125,262 new reported cases of the disease at all stages, Congress initiated a 10-year eradication plan, providing limited funds to state health agencies to combat the disease. Inflation, however, soon eroded most of the program's impact. Despite these efforts and the existence of tools—blood tests and penicillin—to combat the disease, infectious syphilis rates have remained almost consistently at the high 1961 level. And some epidemiologists believe that erratic federal funding contributed to its resilience at that time.

The most alarming increases of gonorrhea began in 1961 when there were more than 265,000 new reported cases. By 1969, this had nearly doubled. Yet it wasn't until 1972, when new reported cases reached 800,000, that a national gonorrhea control program was launched. Dr. Paul Wiesner, new federal VD control director, says the disease itself is partially to blame for this neglect. It wasn't until the late 1960s that scientists perceived the non-symptomatic nature of gonorrhea. "Then it took time to discover a culture medium on which the gonococci would grow with relative ease so we could test for the disease. That didn't happen until 1968," Wiesner says. "As usual, there was a lag between the technical discovery—the Thayer-Martin test—and legislative action."

Today gonorrhea is presenting a new set of problems. Over the past three decades, the PHS has increased the recommended dosage of penicillin required to cure the disease from 200,000 to a colossal 4.8 million units. Now virulent new strains which are totally resistant to the drug have been identified in the United States and 11 other countries.

The current federal VD legislation permits grants to supplement state and local health department efforts. At the local level, federal money is used only for technical assistance, data gathering and analysis, case-finding and follow-up activities—such as interstate referrals—and for some educational activities. Federal money is not available for direct diagnostic or treatment services.

It appears the Center for Disease Control is making good use of this limited federal control support aimed at gonorrhea and syphilis. In FY 76, the center claims its funds aided in testing 9.1 million persons for gonorrhea (of whom 4 per cent were positive) and some 42 million for syphilis (2.5 per cent positive). Last year, syphilis leveled off slightly and gonorrhea showed the smallest increase in 14 years.

"Now, with less money," says Wiesner, "we will have to narrow our targets a great deal." In the past, investigators tried to locate all possible sexual contacts of infected persons. "Now," says Wiesner, "we will simply have to issue warnings and hope infected people take the initiative themselves."

Declining funding has made it difficult for states and cities to plan ahead. Washington and Atlanta have problems typical of other urban areas with high rates of syphilis and gonorrhea—limited facilities, long waiting lists (time is critical in VD) and not enough local money.

Denver's program, which has a good deal of local support, may not suffer as badly. "Operating under a unified, countywide health care system in which hospitals, VD clinics and neighborhood outreach programs all report back to one manager is also helpful," explains Dr. Frank Judson, director of the city's disease control, who says he spends 60 per cent of his time on VD.

SEARCH FOR VACCINES

In addition to the quest for improved diagnostic tools, research scientists, many control experts and private physicians agree that a primary aim of VD research should be the development of vaccines against the diseases. A few private drug companies are doing work in both these areas, but their financial investment is limited.

Since 1972, congressional appropriations

committees have urged NIH to expand its VD research program, but have not earmarked specific budget increases for it. The bulk of VD research, the responsibility of the National Institutes of Allergy and Infectious Diseases, is conducted through small grants to medical schools, principally the University of Washington, Harvard, Baylor College of Medicine and Cornell University Medical Center.

Though NIAID calls VD research "a special emphasis area," its budget allocations do not reflect this priority status. VD garners less than 4 per cent of NIAID's research funds and less than one-fifth of 1 per cent of NIH's $2.5 billion annual budget.

Medical science is still a long way from adequate solutions to the problems posed by sexually transmitted diseases, and even if vaccines were now available, current attitudes toward VD might well inhibit implementation of a national vaccine program. In the meantime, traditional health care measures—early identification of infections and early treatment—must suffice. But such efforts will have to be expanded in order to be effective.

Family planning clinics, for example, which are often the initial and primary point of medical contact for about 4 million sexually active women in the United States each year, are not able to receive direct federal VD control grants because the law limits eligibility to state health departments.

Private physicians must be better trained to diagnose, treat and counsel patients regarding sexually transmitted diseases. It has also been suggested that treatment of patients with sexually transmitted diseases be better integrated into teaching hospital settings.

Public education in all aspects of human sexuality by schools, religious organizations and community groups is vital. Operation Venus, the national VD hotline (800–523–1885) is one step toward public enlightenment, as is the effort of the National Planned Parenthood Federation, which has named April national Family Planning and VD Awareness Month for the third year in a row. Sweden has experienced a remarkable decline in gonorrhea since its national "kondom" campaign was initiated six years ago. Yet in the United States, 11 states still have laws prohibiting or restricting public display of condoms.

There is also the matter of personal behavior. "Let's face it," Denver's Judson says, "if two people who don't have VD have a single, monogamous relationship, they won't get it. The broader the scope of sexual contacts, the more likely one is to catch something. This is not to moralize. But everyone should be aware of what can happen and how to treat a problem if it develops."

FUTURE SOURCES OF ENERGY: THE NEGLECTED ALTERNATIVE

Mr. PERCY. Mr. President, the costs and risks of expanding our output of energy are much higher than we once thought. This conclusion has recently been underlined by the report of a distinguished group of scientists, engineers, and economists assembled under the auspices of the Mitre Corp., to evaluate U.S. energy policy. In its report, the Mitre committee took a pessimistic view of the health and environmental costs associated with increased use of both coal and nuclear power, formerly considered our cheapest and most acceptable sources of future energy.

In considering alternative sources of energy, we have too long neglected the safest, cheapest, and, often, the easiest means of providing power for new uses—energy conservation. Although it may sound glib to assert that saving energy today is the best way to have more for the future, the underlying point is sound. By substituting efficient for wasteful uses of fuel and by curtailing unnecessary energy consumption, we can free enormous amounts of energy for other needs. In lieu of conservation efforts, we would have to build more nuclear reactors, strip mine and burn more coal, or further increase our dependence on foreign suppliers of crude oil in order to replace this wasted energy. Clearly, conservation would not involve possible hazards of nuclear reactors, certain environmental degradation associated with burning certain types of fuel, or the constraints on our foreign policy imposed by excessive dependence on imports.

The advantages of conservation energy over the exploitation of virgin energy sources are many. In contrast to exhaustible energy, which once consumed is gone forever, conservation practices usually result in permanent or at least long-term savings. The effect of such efforts is also multiplied beyond the energy saved by the final user. All of the energy used to extract, refine, and transport it to the point of end use is also saved.

Mr. Phillip J. Mause, Washington counsel for the environmental defense fund, testified on January 25, 1977, before the Federal Energy Administration on Indiana Natural Gas Co.'s proposed construction of a synthetic natural gas plant. His testimony represents an excellent example of how the philosophy behind conservation energy can be applied. Mr. Mause feels that synthetic natural gas should not be brought on as a supply source until all less expensive conservation measures designed to make more gas available are exhausted. He hit the nail on the head when he pointed out that—

Indiana could find cheaper gas in the ceilings and factories of its consumers.

Mr. Stewart Udall, former Secretary of the Interior and longtime conservationist, has often written on the problems of energy production and conservation. In a column appearing in the March 30, 1977, issue of the New York Times, he cogently summarizes the errors of past U.S. policy in this field. He stresses that no matter what energy supply strategy we choose, our main interest should be conservation.

What can we as legislators do to promote this worthy cause? This question is addressed in the General Accounting Office report of January 1977, entitled "National Energy Policy: An Agenda for Analysis," which discusses the courses of action open to the Federal Government. This document should be of great help to us in formulating an energy policy for the 1980's and 1990's.

Mr. President, I ask unanimous consent that Mr. Udall's column, Mr. Mause's testimony, and chapter 2 of the General Accounting Office report be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 30, 1977]

PUTTING THE SPRING INTO ENERGY

(By Stewart L. Udall)

WASHINGTON.—For at least two decades, United States energy policymaking has been dominated by super-optimism and erroneous assumptions. Now a brutal winter has exposed our mistakes and has sent a second warning that our predicament is indeed serious. This is a propitious time to question the old politics and re-examine the old assumptions, for one advantage of any new Administration is that it has a fleeting opportunity to make a fresh start.

In the spirit of President Carter's "new beginning," here are some unsolicited suggestions for his Administration's energy planners.

1. Don't underestimate the value of our remaining petroleum. It is the most versatile, cheapest energy we will ever have. Our paramount national policy should be to stretch its use and make it last as long as possible. We should do this with full awareness that there are no meaningful substitutes in sight for this irreplaceable resource. The terrible truth is that this country runs on oil and our supplies of this precious commodity are running out.

2. Don't operate on the Nixon-Ford assumption that the energy problem can be solved by increases in petroleum production. Higher prices to producers (through decontrol) will result, at best, in only marginal increases in output. The central reality is that the end of our petroleum is in sight—and, in all likelihood the biggest oil fields have already been found. Some natural-gas producers are already conceding in private that even if their prices are decontrolled, it will be very difficult to achieve significant increases in total output of our gas fields.

3. Don't waste time contemplating the collapse of the Organization of Petroleum Exporting Countries' cartel. Cartels thrive on shortages, and if Saudi Arabia fulfills its intention to limit its total output (as we should prudently assume it will do) global crude oil production will soon be at its peak. For us the big question about OPEC oil is, How long can we continue to spend over one-third of our foreign earnings on this one resource?

4. Don't waste time searching for painless conservation remedies. There aren't any. The lesson of last winter is that shortages affect everyone—and energy conservation won't work unless everyone makes some sacrifices.

5. Don't shrink from imposing a stiff gasoline tax to stanch out worst energy hemorrhage—the auto joyride. United States auto owners know that at least 25 percent of their auto travel is unnecessary. They will change their habits and cooperate if their leaders assure them that some of the revenues from such a tax will be returned to the public through the kind of tax reform advocated by President Carter, and the rest will be earmarked for better public transportation so people can reduce the use of their cars.

6. Do give a high priority to tax laws and public policies that reward thrift and encourage efficiency. Recycling is one area where huge savings can be made, so why not give incentives to industries that recycle raw materials and urge Congress to enact an antithrowaway-bottle-bill similar to Oregon's?

7. Do encourage small technologies that offer a quick payoff: In the next decade, simple things like wood stoves, solar panels and efficient machines will be far more important than breeder reactors. And cast a cold eye on energy projects that require huge amounts of capital, produce high-cost energy for consumers—and provide few jobs.

8. Use your ingenuity to persuade the

economists and budget planners to give the energy issue the priority it deserves. They too have consistently misjudged the seriousness of the energy crunch. Don't they realize that a 25 percent reduction in auto travel will reduce our annual payment to the OPEC monopoly by $20 billion, which consumers can then spend on other things that are urgently needed.

And finally, bear in mind that the next crunch will undoubtedly involve things like gasoline rationing. The President seems to grasp the realities. Give him the bold options—this is the kind of issue where only he can lead the country.

TESTIMONY OF PHILIP MAUSE

My name is Philip Mause. I am Washington counsel for the Environmental Defense Fund. Although my primary educational background and professional experience have been in law, I also have a Masters in Public Policy (resulting from participation in a program which concentrated on the application of micro-economics to public policy issues) from the John F. Kennedy School of Government at Harvard University; and I have testified from time to time on economic matters in various forums.

The Environmental Defense Fund is a national organization of some 45,000 members which is staffed by lawyers and scientists. It is our objective to bring the best scientific analysis to bear upon the important resource and environmental questions our society faces. In this connection, we have retained some of the world's leading economists—for example, Dr. Ralph Turvey, Dr. William Vickrey, and Dr. Charles Cicchetti—to help us develop a coherent, environmentally sound, and practically relevant policy toward the energy problem which threatens not only our environment, but also our economic stability and national security.

Our focus has been the section of our energy economy which has been traditionally regulated—primarily gas and electric utilities—which account for nearly 50 percent of the American energy market. This regulated section has also been the center of great political controversy and consumer anxiety in recent years.

Our work in this area has led us to the conclusion that our nation faces a cruel dilemma—one which, if ignored, virtually assures that any attempt to resolve the current combination of shortage, price escalation, and environmental deterioration will only lead to new, and more spectacular, failure. This dilemma is that—as a general rule—the prices charged to consumers for the energy output of the regulated sector are lower than—and frequently dramatically lower than—the costs associated with new sources of supply. These prices are vitally important because they serve as the economic signals and incentives for conservation measures and investments in consumption—reducing improvements in end-use efficiency.

The disparity between these prices and the costs of new sources of supply results in an economically inefficient mix of investments—a mix disastrously biased in the favor of increasing dependence upon OPEC oil, built-in inflation, environmental degradation, and accelerated depletion of our own national energy resources, and biased against investments in greater end-use efficiency. A combination of originally well-motivated, but currently questionable, price regulation and systematic inattention to the demand consequences of regulatory policy has resulted in a structure which makes a sensible national energy policy impossible unless basic reform is implemented.

Another key problem is the bias in the investment market created by an assured rate of return for investments in new supply ventures as contrasted with the riskiness of investments in end-use efficiency. This bias is especially strong in the case of low income residential customers and marginal small commercial customers of utilities whose access to the credit market is severely limited.

This case exemplifies some of the worst aspects of the dilemma. The petitioner, Indiana Gas Company (hereinafter "Indiana"), proposes to add a source of natural gas at a cost far in excess of the price which currently confronts most of its consumers when they decide to use somewhat more or somewhat less gas. Common sense and analysis of other utilities indicate that Indiana could find cheaper gas in the ceilings and factories of its consumers if it employed price signals and other measures designed to encourage conservation and efficient end-use.

Our position is that both the application and the draft environmental impact statement are inadequate as a matter of law. FEA Special Rule Number One requires at least an attempt at the incremental pricing of SNG—this application does not even give lip service to the requirement. In our view, Indiana should not only be required to submit a plan and assurances from the applicable regulatory authorities that the gas will be priced incrementally; it should also be required to implement an aggressive program of end-use conservation to ensure that SNG is not brought on as a supply source until all less expensive conservation measures designed to make more gas available are implemented.

We view the draft environmental impact statement ("DEIS") as inadequate as a matter of law. The recent case of *Aeschliman* v. *NRC*, 9 ERC 1289, 1290–95 (D.C. Cir. 1976), holds that the consideration of conservation as an alternative must be addressed in any impact statement analyzing a new energy supply source. The draft's failure in this area is complete. The company's current rate structure is not even disclosed. Conservation and pricing alternatives which have been developed by FEA itself are not even mentioned, much less analyzed. The DEIS's failure in these areas is so serious that FEA is under a legal obligation to prepare a new DEIS which deals with this vital issue. Only after the issue is first addressed in a DEIS can the comment system envisioned in the National Environmental Policy Act function as intended.

Let me address our concerns with more specificity.

I. MARGINAL COST PRICING

It is an axiom of micro-economics that efficient resource allocation is achieved by setting the prices of various goods equal to their marginal cost.[1] Although "marginal cost pricing" often is made to sound academically arcane, it is easily understandable as a matter of common sense. In this case, if the gas produced at the proposed SNG plant will cost, say $3.25 per mcf, then every additional mcf a customer saves, or uses, results in a decrease, or an increase, of $3.25 to Indiana's, and our society's, costs. If a customer has a way of saving gas (by fuel switching, insulation, furnace retrofit, pilot light replacement, or otherwise), at a cost of, say, $2.50 per mcf of gas saved, then our society will be better off if this customer spends $2.50 to save an mcf and therefore saves society $3.25. In fact, conservation investments are beneficial all the way up to $3.24, and nine mills. The only way to give the consumer the incentive to make these desirable conservation investments is to charge him the marginal cost of the gas saved by the potential conservation measures—$3.25. If he is charged, say, $1.50 instead, then unless he is public-spirited—or in the case of a corporate executive negligent in protecting his shareholders' interests—he will not spend $2.50 to save an mcf of gas.

Because consumers make many separate decisions—setting thermostats, using hot water, etc.—the price signal is generally a less cumbersome mechanism for ensuring that desirable conservation investments occur than is the alternative of placing government inspectors in all of our factories, schools, and homes. However, imperfect consumer information and failures in other markets (for example, the consumer credit market) sometimes make direct government intervention desirable.

Because of the importance of the correct application of this common sense axiom, it is useful to analyze its relevance at some length here. In some quarters, it has been suggested that "incremental" pricing of natural gas is achieved by charging the cost of new sources of gas to low priority users of gas who would have been curtailed were the new source not developed. Technically speaking, this is not correct. Economic efficiency is only achieved when all users of natural gas pay the marginal cost. This is because it is desirable for all users—not just low priority users—to have the incentive to use less gas as long as the cost associated with the reduction in consumption is less than $3.25. As the next section of this testimony will demonstrate, there are enormous opportunities for savings on the part of high priority customers at costs of well below $3.25. These savings are unlikely to occur unless the price is set to give the correct incentive.

It should also be emphasized that marginal cost pricing is not simply—or even primarily—a strategy to induce fuel switching. Enormous reductions in consumption can be achieved by most industrial customers of gas utilities by investments and changes in procedure designed to achieve greater end-use efficiency. Only yesterday, the business section of the New York Times contained a story illustrating savings of roughly 30 percent by some large users.[2] These investments will be delayed, however, unless rate structures are reformed to guarantee that the customer who reduces his consumption experiences a reduction in his gas bill in an amount equivalent to the value of the gas saved.

The combination of the price regulation of natural gas production and the enormous cost associated with most new sources of natural gas have resulted in a situation in which charging the marginal cost to every customer for every unit of gas consumed would result in a windfall of excess profits for most distribution utilities in the United States. We do not advocate the creation of such excess profits. Instead, we believe there are a number of measures that can be taken to improve the situation consistent with a fair, but not excessive, rate of return for the utilities.

If excess profits would result from across-the-board marginal cost pricing, we advocate the following measures—some to be considered as alternatives in the DEIS, others to be required as conditions to the requested allocation:

1. A tax on the consumption of natural gas sufficient to raise the price to the level of marginal cost. This should certainly be

---

[1] *See* Alfred E. Kahn, "The Economics of Regulation," vol. I, John Wiley & Sons, New York, 1970. At p. 65: "The central policy prescriptions of micro-economics is the equation of price and marginal cost. If economic theory is to have any relevance to public utility pricing, that is the point at which the inquiry must begin."

[2] *See New York Times*, Monday, January 24, 1977, at pp. 35, 39.

an alternative addressed in the DEIS.[3] Only after a more complete analysis of its legal and economic ramifications, can FEA determine whether it should be a condition of the approval of this allocation;

2. The revision of rate structure of Indiana to increase the incentive to conserve. In the District of Columbia and in Wisconsin, "flat rates" have already been instituted to replace the system of volume discounts and declining block rates which, in essence, bribe the customer to use more. Additional measures should be required as a condition of approval of the allocation request. If necessary to create marginal cost based incentives to conserve gas, FEA should require: the abolition of customer charges or "minimum bills"; the institution of inverted or "progressive" rates; and the development of rates under which any use in excess of a certain percentage of use during an historical base period is priced at marginal cost. It is impossible to be more detailed at this point because of the failure of either the DEIS or the application to provide the necessary information concerning current rates and sources of revenue. As a first step, Indiana should be ordered to present a rate structure reform proposal which guarantees that each customer receives the correct marginal cost signal when deciding to use somewhat more or somewhat less gas.

3. An aggressive conservation program by the utility—described in more detail in the next section of this testimony.

II. ENERGY CONSERVATION

FEA has recently announced its analysis of a proposal which EDF has long advocated. This proposal [4]—announced at a public meeting on January 12, 1977, by William Rosenberg, Assistant Administrator for Energy Resource Development—would allow a distribution utility to make investments—in furnace retrofit, automatic thermostats and insulation—on the customer's side of the meter. EDF has advocated this proposal as one of a number of measures necessary to reduce the bias in favor of costly supply ventures and against investments in improving the efficiency of the end-use of gas.

In analyzing the effects of this program upon Michigan Consolidated Gas, independent consultants hired by FEA estimated that average annual use of gas by heating customers could be reduced by roughly 40 percent. The cost per mcf of gas saved through implementation of the program is estimated at $1.00 for the insulation, $1.37 for the furnace retrofit, and $1.56 for the automatic thermostat.

While these figures are estimates and would undoubtedly be somewhat different for Indiana, they suggest that both the application and the draft environmental impact statement are incomplete without an analysis of this type of program—especially when it is already being analyzed and developed by FEA itself.

Gas made available by investments in efficient end-use is not only cheaper than synthetic natural gas—it has other advantages as well: (1) environmental externalities are minimized;[5] (2) dependence upon OPEC is reduced, rather than increased; (3) there is no danger that the source of gas will be "down" during a period of intense demand; (4) feedstock is not drawn away from other, essential, uses; and (5) perhaps most importantly, the gas can be on line immediately, as soon as the first dollar is invested—not two, three, or more years from now.

A conservation strategy does not mean freezing in the dark. The key to conservation is the intelligent use of pricing and other regulatory measures to generate investments in increasing the efficiency of end-use of our energy resources—in preserving existing consumer amenities at a much lower use of our energy resources. In the residential sector, the history of bad habits developed during times of cheap energy suggest that pricing strategies alone may not be sufficient to bridge the current gap in information. Thus, a program such as the one described in this section is an essential part of a strategy aimed at ensuring the efficient end-use of our nation's energy resources.

CONCLUSION

It is time to stop the head-long plunge down the road to greater dependence upon OPEC and accelerated depletion of our own resources. The conservation alternative must be considered and, when found to be economically superior, required as a condition of costly new supply ventures such as this one.

In our view, both the application and the draft environmental impact statement provide insufficient analysis and background material to allow FEA or the intervenors in this case to support this petition. There is virtually no discussion of the rate structure alternatives in the petition. The conservation program—a program analyzed in another division of FEA—is not discussed at all. Our comments on the draft environmental impact statement will deal—in greater detail—with the serious deficiencies in that document.

In summary, we recommend denial of this application unless and until:

1. Indiana's rate structure is revised to guarantee that each customer who reduces his consumption experiences a reduction in his bill equivalent to the marginal cost of the gas saved; and

2. A conservation plan—along the lines of the plan analyzed by FEA and described in this testimony—is implemented by Indiana.

Thank you.

CHAPTER 2: HOW CAN THE FEDERAL GOVERNMENT ENCOURAGE ENERGY CONSERVATION?

Some experts still believe the Nation's energy dilemma can be resolved almost exclusively by developing new sources of domestic energy. For the next 10 years, and probably beyond, however, conservation actions appear to us to be the best and most cost-effective way to "produce" new energy. It is also increasingly clear that beyond 1985, conservation must continue to be made a cornerstone of U.S. energy policy to insure that the Nation fully considers energy efficiency.

Conservation has one basic advantage which has not received much emphasis. In many cases conservation actions result in permanent or at least long-term energy savings. Further, the savings are multiplied beyond the actual energy saved at the point of end use. All of the energy needed to get it to the end uses is also saved. If conservation actions are not taken, then more energy must be produced each year to meet the inefficient energy uses.

There are basically three kinds of conservation actions:

Eliminating energy waste through belt-tightening or leakplugging actions. Simple actions include turning down the thermostat and observing the highway speed limits. Complex actions include demand-management approaches, whereby electric utilities can discourage consumers from wasting energy.

Developing more efficient energy-use systems. These include developing more efficient automobile engines and more efficient industrial systems.

Changing lifestyles and living patterns to reduce energy use, but still achieve the same social and personal objectives. These include living closer to work and using forms of communication which eliminate the need for travel.

To date, most energy savings are coming from belt-tightening actions. Much less has been done on the more complex actions, which promise the biggest payoff in long-term energy savings.

With the oil embargo, the Federal Government started showing genuine interest in energy conservation, particularly as it realized that energy from most new domestic sources would take at least a decade to develop.

Current Federal energy conservation activities have a dual focus creating an economic, social, and political atmosphere that encourages conservation actions and developing new technologies to increase the efficiency of energy-use systems.

The first activity includes (1) setting energy performance standards (e.g., for new automobiles and buildings), (2) requiring specific reductions in government energy use as an example to the Nation, and (3) providing tax credits and other financial incentives for various conservation actions. Most of these programs were included in recent legislation, particularly the Energy Policy and Conservation Act and the Energy Conservation and Production Act.

The Energy Conservation and Production Act of 1976 includes a number of ambitious conservation programs, such as developing energy performance standards for new buildings; weatherizing housing for low-income families (a $200 million program); demonstrating energy conservation measures and renewable energy resource measures in existing housing (also $200 million); and improving electric utility rate designs (an FEA program).

Despite these new Federal programs, there is sharp disagreement about what the Federal Government ought to be doing in energy conservation. Should the government rely mainly on voluntary conservation actions, or should it institute mandatory conservation measures?

GAO's basic task will be to evaluate these Federal energy conservation programs, and, in doing so, consider the proper balance between voluntary and mandatory conservation actions.

PAST AND CURRENT EFFORTS

To date, GAO has looked at Federal Government actions to reduce Federal inhouse energy consumption and to influence defense contractors to reduce theirs.

We are now evaluating energy conservation actions in private industries and at State and local levels. So far, our findings indicate that much more needs to be done, and can be done, to increase energy savings. Our findings are also identifying other areas in need of study.

FUTURE EMPHASIS

We believe the following questions are most in need of answers:

1. How effective are the energy conservation programs enacted by the Congress in maximizing energy conservation? The programs under this legislation deal very specifically with energy conservation in the residential and commercial sectors and efforts of public utilities to better manage energy demand.

2. Will essentially voluntary programs be enough to get industry to conserve energy? Industry uses about 40 percent of the energy in the United States. Existing Federal programs will establish targets for energy conservation and require key industries to report on their successes in meeting the targets. The toughness of the targets and the industries success in meeting them will help

---

[3] An agency must consider alternatives beyond those which the agency itself may effectuate—*Natural Resources Defense Council* v. *Morton*, 458 F.2d 827 (D.C. Cir. 1972).

[4] *Conservation Investments by Gas Utilities Be Considered a Gas Supply Option* (Preliminary Analysis), by William G. Rosenberg, Asst. Administrator, Energy Resource Development, Federal Energy Administration, Dec. 17, 1976.

[5] Under *Environmental Defense Fund* v. *Mathews*, 8 ERC 1877 (D.D.C. 1976), an agency is not only required to address environmental and resource conservation considerations in an impact statement, it is also required to weigh them in the balance when making its substantive decisions.

determine the need, if any, for mandatory standards.

3. Will existing energy performance standards for new automobiles adequately encourage energy conservation in the transportation sector? Transportation accounts for about 25 percent of total energy use and is the only major area where opportunities exist for significant energy savings. Achieving these savings requires changing the automobile's basic engine and body design, using alternative transport methods (buses, special lanes, etc.), and using the most energy efficient transport methods for particular purposes. This could mean, for example, that short airline routes might be discouraged in favor of train or bus service.

4. Are institutional barriers likely to inhibit our ability to conserve energy? A major unresolved question is whether reducing our energy growth rate will also result in reducing our economic growth rate. Many studies indicate that in the recent past, energy growth and economic growth have gone hand-in-hand. Other studies argue that energy growth and economic growth can be successfully decoupled. The question has not been satisfactorily resolved, and it must be if we are to lower energy growth rates substantially.

In addition, there is a whole range of questions regarding the degree to which changes in building codes, utility rate structures, and other areas will be accepted.

5. Is the government doing all it can to encourage inhouse energy conservation? If the government does not set the pace, can it expect the private sector to follow? Past GAO work has shown that much more can be done to conserve energy at government installations. Such work should be continued. The Department of Defense has a 6 year, $1.35 billion energy conservation investment program which we are examining. Opportunities also exist for government leadership in developing total energy systems and in designing new buildings to maximize conservation savings.

Other questions deserve consideration and will gain importance in the future, including:

1. How adequate is current information on potential savings from various energy conservation actions and on the incremental cost of taking such actions? The government has yet to undertake broad studies assessing the whole range of energy conservation opportunities. Assessments of this type are needed, together with information on the incremental cost of each action, so that analysis can be made of the trade-offs between taking such actions and increasing energy supply.

2. To what extent is energy efficiency being considered in choosing among various energy supply options? Energetics (energy accounting) is not yet an exact science, but it offers the potential for helping us choose the most efficient way to use available energy supplies. Indications are that energetics does not receive much consideration in the government's decision-making process.

3. Has the Federal Government developed adequate energy conservation contingency plans? The Federal Energy Administration is required to develop a variety of energy conservation contingency plans, including gasoline rationing, which can be placed quickly into use if there are future embargoes.

4. Can the Federal Government help upgrade the efficiency of electric power stations by reducing the substantial (17 percent) heat losses to the atmosphere? What are the potential energy savings from using energy parks, including generating power from more than one fuel (such as a combination of coal and solid waste conversion)? Burning fossil fuels is often an extremely inefficient way to produce energy for many end uses. The opportunities for improvement in this area appear substantial, but there are questions regarding the adequacy of Federal efforts to bring about such improvements.

5. Is it possible to reduce the energy growth rate below 2 percent, or perhaps even to zero? Leading government officials, including the Administrator of FEA, are beginning to talk about setting a national goal of 2 percent annual energy growth. Others, in energy think-tanks and elsewhere, are assessing the potential for achieving zero energy growth by the turn of the century. Some, in fact, argue that we will achieve it whether we want to or not. They see this issue as whether we will plan for such a future or wait for it to appear as a crisis.

EFFECT OF BUDGET COMMITTEE CUT OF $500 MILLION IN COMMUNITY DEVELOPMENT FUNDS OF APPLIED ENTITLEMENT CITIES

Mr. PROXMIRE. Mr. President, the Budget Committee, in proposing Senate Concurrent Resolution 19, decreed that $500 million would be cut from the Community development block grant funds for fiscal year 1978.

Unfortunately, this action was taken while the legislation was pending before the authorizing committee; namely, the Banking, Housing, and Urban Affairs Committee, and before the Senate Appropriations Committee had made its recommendations.

We have a proposal before the Banking Committee to authorize $4 billion in community development funds, a most welcome proposal by the administration and one which would help virtually every major city in the country.

EVERY STATE AND EVERY ENTITLEMENT CITY CUT

The most likely cut if the Budget Committee's position prevails is $500 million from the entitlement cities—those cities who are entitled to community development funds by law. I have asked the Department of Housing and Urban Development to provide me with a breakdown of how the $500 million cut would be made city by city if distributed under the formula for entitlement cities. They have provided me with that information.

I ask unanimous consent that the computer printout showing the cuts not only by State, but city by city be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered. (See exhibit 1.)

Mr. PROXMIRE. Mr. President, the letters HH mean "hold harmless" which is a designation for cities who would have lost funds under the formula in previous years but were kept at existing levels while old program funds, mainly the model cities funds, were phased out.

The cut proposed by the Senate Budget Committee—and I emphasize again it was done without any detailed examination or hearings on the particular subject—would affect every State and the major cities in every State in an adverse way.

That fact alone, I believe, indicates that the committee acted without being aware of the full consequences of its actions.

HOUSING STARTS AFFECTED, TOO

There will be an amendment proposed on the floor to the budget resolution to restore these funds and to restore the 75,000 units of new housing which the Senate Budget Committee also stripped from the bill.

In each case the funds are in the President's budget and approved by the Office of Management and Budget.

The Senator from Alabama (Mr. SPARKMAN) will place in the RECORD today a State-by-State breakdown of the decrease in housing starts and the decrease in potential jobs which the Budget Committee cuts would bring about.

Not only is the $500 million in community development funds at stake but also 75,000 new housing starts and 150,000 jobs in the construction industry where unemployment is now over 14 percent or double the national average.

I commend the city-by-city list of community development fund cuts to the attention of every Member of the Senate since his State is affected in an adverse way.

FORMER PRESIDENT FORD SPEAKS OUT ON THE WAR POWERS RESOLUTION

Mr. GOLDWATER. Mr. President, last week, former President Gerald R. Ford gave what I consider to be the clearest explanation of the numerous practical problems which are inherent in the law Congress foolishly enacted, known as the War Powers Resolution. His forum was the University of Kentucky where Mr. Ford delivered the first John Sherman Cooper lecture on April 11.

As the theme of his address, Mr. Ford chose a subject which was much at the

forefront of the attention of our former colleague, Senator Cooper, the issue of what is the proper balance of powers, particularly in foreign policy, between the executive and legislative branches of Government. This discussion naturally led into an analysis of the War Powers Resolution, which is an unparalleled effort by the Congress to assert for itself ultimate control over the making and carrying out of foreign policy.

As only a person who has been in the high office of the Presidency and confronted the day-to-day crises of that position can know, former President Ford reveals in his talk the numerous frustrations he and his assistants encountered in trying to comply with the spirit of congressional directives under the War Powers Resolution. For example, the resolution contains a requirement that the President must consult with Congress before ever committing U.S. combat troops abroad. Now, Mr. Ford asked, what does the resolution mean by "consultation?"

Does this mean advance notice and discussions with a dozen or so congressional leaders? Does it mean that all members of certain committees must be consulted and that their advice is able to bind the entire Congress? Or does it mean that the President must contact and consult with each and every Member of the House and Senate?

Although he did not personally concede that the War Powers Resolution was legally binding on the President on constitutional grounds, Mr. Ford describes how he did make a serious effort to inform and talk with numerous leaders of Congress whenever an important Executive action was about to be taken involving foreign affairs. As a practical matter, it only makes commonsense that the President would, whenever possible, seek to take Congress into his confidence and receive its advice and hopefully its support before taking important steps.

But, Mr. Ford points out, this is far different from the detailed information and time limits imposed by the War Powers Resolution. He relates how during the *Mayaguez* crisis, the consultation requirements of the resolution imposed almost impossible time demands upon senior officials who were at this same time acting as his advisers in a fast-moving situation.

Another specific example Mr. Ford tells us about is his efforts to contact key congressional leaders during the evacuation of Danang. Not one of these Senators or Congressmen were in Washington to be contacted. Nine were outside the country, and 12 were in widely scattered States.

Mr. President, Mr. Ford spells out several reasons why the narrowly drawn consultation provisions of the War Powers Resolution impose impractical and unwise burdens on the Executive. He also correctly points to what the ultimate result of the War Powers Resolution will be, and that is a constitutional confrontation between the President and the executive when the time arrives that Members of Congress who are consulted collectively disagree with the President on an action he considers essential. In this situation, it is clear that the resolution asserts for Congress powers which would make it superior to the executive branch.

Here is where the safety of the Nation and its people and freedoms would be put in peril. For in time of crisis, former President Ford states: "Decisiveness is everything."

There are checks and balances: there are limits upon the actions which any officer or institution of Government can take under our Constitution. But it is essential that any policy differences between Congress and the Executive involving defense of the Nation must be resolved, in the words of former President Ford:

As matters of policy, rather than escalating them into constitutional confrontations.

Mr. President, there is talk from some quarters of strengthening the War Powers Resolution. The persons who advocate this, generally academics, feel Congress should define more tightly what the President can and cannot do involving the use of military forces. I would suggest that these individuals read each line of former President Ford's statement so that they may benefit from the insight of one who has sat in the Oval Office during moments of true crisis. After reading Mr. Ford's statement, I feel certain that many objective persons will reach the conclusion that the War Powers Resolution should be repealed, rather than amended.

In order to share this excellent statement with colleagues, I ask unanimous consent that the text of former President Ford's address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY GERALD R. FORD

It is an honor and a very special privilege for me to deliver the first John Sherman Cooper Lecture at the University of Kentucky.

To know John Sherman Cooper is to know one of the finest statesmen this country and the Commonwealth of Kentucky have ever produced.

For almost half a century, he has served the Nation with the highest distinction—as a legislator and judge here in Kentucky, as a soldier under General Patton, as a delegate to the Untied Nations and a founder of NATO, as Ambassador to India and East Germany, and as a United States Senator.

A few days before he retired from the Senate in 1972, the Congressional Record was filled with his tribute. From both sides of the partisan aisle, the sentiments were the same.

Integrity, vision, compassion, wisdom, honor—these were the words his fellow Senators used to describe their friend and define their loss on his retirement.

His magnificent record in foreign affairs, both in the Congress and in the executive branch, his sponsorship of the Appalachian Regional Development Program, his statesmanlike influence on his fellow legislators—all of these help form the legacy of John Sherman Cooper.

As a serious, constructive student of government, and as an able lawyer, Senator Cooper also devoted much of his time and thought to the search for a proper balance of powers—particularly in foreign policy—between the executive and legislative branches of government.

This fascinating, frustrating search is as old as our Constitution, with roots much deeper in the history of governments.

It has at various times concerned the Roman Senate and Caesars, the English King and Parliaments, and others fully as much as it concerns American Presidents and the Congress in our time.

The Framers of our Constitution, well schooled in the history of governments and deeply influenced by such political philosophers as Polybius and Montesquieu, recognized the need for separate powers as checks and balances among the executive, legislative and judicial branches.

They gave the Congress the power to coin money, collect taxes and appropriate funds; to regulate commerce; to establish courts; to raise and support an army and navy; to declare war; and to make all laws necessary and proper for executing the powers of government.

The President was assigned the powers of Commander-in-Chief of the army and navy; the appointment of ambassadors, judges and other public officials; the veto of congressional legislation; and the power to convene the Congress in special session.

With powers thus divided, neither branch was intended to dominate the other.

Yet each has established a clear dominance at different stages in our history.

In 1885, a young Woodrow Wilson published his doctoral dissertation on the subject of "Congressional Government." He concluded that the Congress was the dominant branch of government, and that the President was "nothing but an ineffective figurehead."

He advised that "we think less of checks and balances and more of coordinated power," and that we achieve that coordinated power through "the encouragement of Presidential leadership."

Nearly a century later, following the Presidencies of an older Woodrow Wilson, two Roosevelts, a Truman, an Eisenhower, a Kennedy, a Johnson and a Nixon, Presidential leadership does not seem to need much encouragement.

But the question remains: how should the powers of the executive and legislative branches be coordinated, especially in the field of foreign policy?

I address this question tonight as one who has been honored to serve at both ends of Pennsylvania Avenue over the past 28-plus years.

As a Member of Congress, I sometimes wondered if the Presidents with whom I served weren't going too fast in making important decisions and commitments for the Nation.

I wondered if the White House didn't isolate them too much from public opinion and from the free expression of competing views.

Later, like many of the modern Presidents, I occasionally felt a certain impatience with the painstaking, deliberative process that is the heart and soul of the legislative branch.

The pace of this modern age has been so fast, its problems filled with such urgency, that the parliamentary rules and customs so deeply rooted in tradition often seem antiquated, petty and agonizingly slow when viewed from the Oval Office.

So the problems of coordination can be troublesome, and they are magnified a thousand fold when foreign policy is involved.

In the years just following World War II, while two junior legislators named Cooper and Ford were learning their way around Washington, there was a remarkable degree of national consensus about the role America should play in the world.

We held the noble conviction that since

we alone had emerged virtually unscathed by the destruction of war—since the war had in fact made us the most formidable military and economic power on earth—we had a special responsibility to build a new and better world from the ruins of the old.

We knew, too, that we had been dragged into two world wars we did not want by the collapse of the world political system in 1917 and 1941, and that we could not sit by and let that system collapse again.

This national consensus was made possible by such men as Arthur Vandenberg, my own political mentor, who championed bipartisanship in foreign affairs and helped cement with President Truman a common bond of purpose in international relations between the legislative and executive branches of government.

Working together, it was an easy and rewarding task to guide public opinion and mandate government resources for such monumental efforts as the Marshall Plan, the Point Four program, and NATO.

Consensus was also made possible by the recognition of a growing threat from the Soviet Union. In that early post-war era, the Soviets under Stalin were consolidating their power and authority over the nations of eastern Europe.

They were also probing for footholds in the Middle East, first in Iran and Turkey, and later in many other parts of that region.

No one knew how far their aggressive designs might reach, and none denied that if the Soviet march were to be stopped, the United States would have to assume the active leadership of the free world.

The nations which had guided European diplomacy for centuries no longer had the power to do so, especially before the massive threat of Soviet expansion.

These goals for a new and better world, and these challenges of the Cold War, established a foreign policy consensus that endured well into the 1960's.

It is the Presidential drama of this period we remember best: Eisenhower pledging to go to Korea; the dramatic summit conferences; Kennedy's courage in the Cuban missile crisis.

But underlying every Presidential initiative was a broad foundation of support in the United States Congress.

Even in the case of Vietnam, the SEATO Treaty was approved by the Senate, 82 to 1, in 1955, and the Gulf of Tonkin Resolution was passed in the Senate, 88 to 2, and in the House of Representatives, 414 to 0, in 1964.

But as that frustrating war went on year after year, our national unity was shattered, and with it the essential foreign policy coordination between President and Congress.

Old assumptions were challenged. Longstanding commitments were called into question. Bipartisanship in foreign affairs gave way to deep divisions within the two parties themselves.

Members of Congress who came to oppose the war would also come to oppose the Presidents who prosecuted the war.

In the end, they would argue that the Presidency itself had grown too powerful, that a usurpation of powers by the President from the Congress was chiefly to blame for our disillusioning involvement in Vietnam.

These concerns found legislative expression in the War Powers Resolution of 1973.

This resolution claimed for the Congress unprecedented power in the conduct of foreign policy, at the same time holding the President in strict account for his own actions in international affairs.

The resolution required that "the President in every possible instance shall consult with Congress" before committing U.S. combat troops abroad, and that the President report in writing within 48 hours to the Speaker of the House and President Pro Tem of the Senate on any commitment or substantial enlargement of such troops.

It also required that after such forces are introduced, the President "shall consult regularly with the Congress" until forces "are no longer engaged in hostilities or have been removed.

A second major section of the resolution provided that any such troop commitment must be terminated within 60 days, unless Congress has declared war, specifically authorized the commitment, or has been unable to convene because of an armed attack on the United States.

The legislation also specified that, by the passage of a concurrent resolution, the Congress can direct the President to remove U.S. forces before the 60-day period expires.

"No more Vietnams" was the theme sounded over and over in the debate on this War Powers Resolution.

John Sherman Cooper, seeing only tragedy in Vietnam and knowing that it would, indeed, be dangerous to have too much power concentrated in any one branch of government, was a co-sponsor of this resolution.

But he did not agree with one of its underlying themes, that, in his words, "the executive has taken from the Congress its powers."

He reminded his colleagues that "the Congress, particularly since World War II, has not only acceded to, but has supported" executive requests for congressional authority "to use the armed forces of the United States, if necessary, in hostilities."

"These are settled facts of history," he said. "We can change our course but we cannot revise and rewrite history."

While debate on the resolution was underway, a new and distressing chapter in American history was being written across the front pages of the Nation's newspapers.

Day after day, new allegations of excessive and misused presidential power were being unveiled. The scandal of Watergate became a national obsession.

It was in this highly-charged atmosphere, in the boiling passions of Vietnam and Watergate, and in defiance of President Nixon's veto, that the Congress finally passed the War Powers Resolution.

The debate was framed by constitutional issues. As Eugene Rostow has noted, "the battle cry of 'constitutional usurpation' quickens the blood of every Congressman, indeed of every American. We find it easy to conclude that whatever we dislike intensely must therefore be unconstitutional, as well."

But as John Cooper's good friend in the Senate, George Aiken of Vermont, has written, the War Powers Resolution was "largely a political effort . . ., an attempt to amend the Constitution by congressional resolution."

The arrangements which the Constitution makes for the conduct of foreign policy involve a complex interplay between the legislative and executive branches.

Congress is given the power to declare war, and to raise an army and navy. The Senate is given the additional power of advice and consent in the ratification of treaties and the appointment of ambassadors and other officials, including the Secretaries of State and Defense.

The President is made Commander-in-chief and head of state. By fundamental definition, the chief executive is also given the power to execute American foreign policy.

It was not intended that these powers be consolidated in the interest of efficiency, but rather that they be separated in the interest of democracy.

Coordination between the two branches was obviously to be encouraged. The brilliant system of checks and balances which the Founding Fathers devised was not meant to breed constant, paralyzing confrontation between the President and Congress of the United States.

But as former Undersecretary of State George Ball testified in hearings on the War Powers bill, the resolution "represents an attempt to do what the Founding Fathers felt they were not wise enough to do."

It seeks by simple legislation to codify the military powers of the President, spelling out exactly what he can and cannot do, and how, and under what circumstances, to defend the United States and its citizens from international danger.

The Resolution also grants to the Congress powers which tend to make it superior to the executive branch, as in the provision that Congress may order the withdrawal of troops within 60 days by a concurrent resolution not subject to Presidential veto.

Where are the constitutional checks and balances of this system?

The resolution also requires consultation with Congress in military emergencies.

Of course, consultation by the President with congressional leaders is a wise and normal feature of our constitutional and political life.

No President with common sense would dream of neglecting this aspect of his obligation. But can it be mandated by law? And what does it mean?

Can the President satisfy the law by having breakfast with three or four or a dozen leaders he decides are the key people?

Does the law mean that the leaders of both houses, and key members of relevant committees, can speak for or bind the Congress?

Finally, there is a question of how closely this resolution would involve the Congress in the actual execution, as opposed to the general direction, of foreign policy, particularly in times of crisis.

Does the consultation provision require the approval of the Congress before executive action is taken? What if the President and Congress disagree? Which of these separate but equal powers would prevail in such a confrontation?

These arguments of dubious constitutionality can be more than matched by other arguments of workability.

The United States was involved in six military crises during my Presidency: the evacuation of U.S. citizens and refugees from Da-Nang, Phnom Penh and Saigon in the spring of 1975, the rescue of the Mayaguez in May, 1975, and the two evacuation operations in Lebanon in June, 1976.

In none of those instances did I believe the War Powers Resolution applied, and many Members of Congress also questioned its applicability in cases of protection and evacuation of American citizens.

Furthermore, I did not concede that the Resolution itself was legally binding on the President on constitutional grounds.

Nevertheless, in each instance, I took note of its consultation and reporting provisions, and provided certain information on operations and strategies to key Members of Congress.

Let me stress that in my Administration it was customary to communicate with the leaders of Congress when an important executive action was about to be taken, particularly involving foreign affairs.

It is my view that when the President as Commander-in-Chief undertakes such military operations, he would inevitably take the Congress into his confidence in order to receive its advice and, if possible, insure its support.

This type of consultation makes common sense and certainly strengthens trust be-

tween the executive and legislative branches. But it is to be distinguished from the detailed information and time limits imposed by the War Powers Resolution.

The role of the President in these critical situations is clearly defined. As Commander-in-chief and Chairman of the National Security Council, my job was to concentrate on resolving the crisis as expeditiously and as successfully as possible. As you would expect, it is a full-time job.

When the situation permitted, as in the case of the Mayaguez, I consulted personally with the bipartisan leadership in the Cabinet Room. However, the nature of most of these crisis situations was such that the consultation process with the legislative branch had to be delegated to others, primarily my congressional relations staff at the White House.

In the interest of absolute accuracy, a summary of actions I proposed to take or had taken was drafted by the National Security Council staff. This summary was reviewed by senior officials at the Departments of State and Defense and at the White House.

This careful attention to detail was essential but it was also time-consuming for senior officials who were at the same time acting as my advisers in this fast-moving situation.

The summary often went through two and three drafts to ensure as nearly as possible that there would be no mistakes, no confusion of highly sensitive information.

Once the consultation process began, an inherent weakness of the War Powers Resolution from a practical standpoint was conclusively demonstrated.

When the evacuation of DaNang was forced upon us during the Congress Easter recess, not one of the key bipartisan leaders of Congress was in Washington.

Without mentioning names, here is where we found the leaders of Congress: two were in Mexico, three were in Greece, one was in the Middle East, one was in Europe, and two were in the People's Republic of China. The rest we found in twelve widely scattered States of the Union.

This, one might say, is an unfair example, since the Congress was in recess. But it must be remembered that critical world events, especially military operations, seldom wait for the Congress to meet. In fact, most of what goes on in the world happens in the middle of the night, Washington time.

On June 18, 1976, we began the first evacuation of American citizens from the civil war in Lebanon. The Congress was not in recess, but it had adjourned for the day.

As telephone calls were made, we discovered, among other things, that one Member of Congress had an unlisted number which his press secretary refused to divulge. After trying and failing to reach another Member of Congress, we were told by his assistant that the Congressman did not need to be reached.

We tried so hard to reach a third Member of Congress that our resourceful White House operators had the local police leave a note on the Congressman's beach cottage door: "Please call the White House."

When a crisis breaks, it is impossible to draw the Congress into the decision-making process in an effective way, for several reasons.

First, they have so many other concerns: legislation in committee and on the floor, constituents to serve, and a thousand other things. It is impractical to ask them to be as well versed in fast-breaking developments as the President, the National Security Council, the Joint Chiefs of Staff, and others who deal with foreign policy and national security situations every hour of every day.

Second, it is also impossible to wait for a consensus to form among those congressional leaders as to the proper course of action, especially when they are scattered literally around the world and when time is the one thing we cannot spare. Again, we should ask what the outcome would be if the leaders consulted do not agree among themselves or disagree collectively with the President on an action he considers essential.

Third, there is the risk of disclosure of sensitive information through insecure means of communication, particularly by telephone. Members of Congress with a great many things on their minds might also confuse what they hear on the radio news in this day of instant communication with what they are told on a highly classified basis by the White House.

Fourth, the potential legal consequences of taking executive action before mandated congressional consultation can be completed may cause a costly delay. The consequences to the President, if he does not wait for Congress, could be as severe as impeachment. But the consequences to the Nation, if he does wait, could be much worse.

Fifth, there is a question of how consultations with a handful of congressional leaders can bind the entire Congress to support a course of action—especially when younger Members of Congress are becoming increasingly independent.

A survey reported by Congressional Quarterly last November indicated that an overwhelming majority of the Congress believed the legislative branch had an inadequate role in the international crisies I have mentioned.

Sixth, the Congress has little to gain and much to lose politically by involving itself deeply in crisis management.

If the crisis is successfully resolved, it is the President who will get credit for the success. If his efforts are not successful, if the objectives are not met or if casualties are too high, the Congress will have seriously compromised its right to criticize the decisions and actions of the President.

Finally, there is absolutely no way American foreign policy can be conducted or military operations commanded by 535 Members of Congress on Capitol Hill, even if they all happen to be on Capitol Hill when they are needed.

Domestic policy—for housing, health, education, or energy—can and should be advanced in the calm deliberation and spirited debate I loved so much as a Congressman.

The broad outlines and goals of foreign policy also benefit immensely from this kind of meticulous congressional consideration.

But in times of crisis, decisiveness is eveything—and the Constitution plainly puts the responsibility for such decisions on the shoulders of the President of the United States.

There are institutional limitations on the Congress which cannot be legislated away.

Yet since the Mayaguez incident, there has been talk of putitng more teeth into the War Powers Resolution, intensifying congressional participation in actual crisis management.

There have also been attempts to introduce the Congress into sensitive negotiations with foreign nations.

The Jackson-Vanik Amendment to the Trade Act of 1972, in effect proposed to liberalize emigration from the Soviet Union by legislative decree, had precisely the opposite effect.

The Congressional restrictions on military assistance to Turkey after the latest Cyprus crisis prove how determined—and how wrong—the Congress can be, and how cumbersome diplomacy by rigid legislative dictate can be.

Where, then, does the balance of powers lie?

It cannot lie in a constant rivalry for power. As Professor Rostow has written, this "would tend to convert every crisis of foreign policy into a crisis of will, of pride and of precedence between Congress and the President."

Nor, obviously, does the balance lie in the dominance of one branch of government over the other.

The Constitution makes that plain enough, and our own history proves it.

The Reconstruction Congresses of the 1860's and 1870's—ignoring, thwarting, even impeaching a President, and dealing with the American South as a defeated, occupied enemy—inflicted wounds on this Nation that took a century to heal.

Woodrow Wilson refused to involve the Congress in his plans for a League of Nations—and saw his noble dream crushed on Capitol Hill.

The balance must lie, instead, in a frank recognition of the basic strengths and weaknesses of both the executive and legislative branches of government, in the institutional capabilities and limitations imposed by the Constitution and by common sense.

As I said in my State of the Union address earlier this year, "in these times, crisis cannot be managed and wars cannot be waged by committee; nor can peace be pursued solely by parliamentary debate.

"To the ears of the world, the President speaks for the Nation. While he is ultimately accountable to the Congress, the courts and the people, he and his emissaries must not be handicapped in advance in their relations with foreign governments. . . ."

The notion that the President must sometimes use the armed forces of the Nation on his own ultimate responsibility comes hard to Americans because we are, and have always been, deeply concerned about democratic control.

But this power has been recognized as necessary—even as inescapable—since the earliest days of the Republic.

Pirates attack our ships off the coast of Tripoli—and we must respond. The Soviet Union blockades Berlin or places missiles in Cuba—and we must respond. An American ship is seized off Cambodia—and we must respond.

And if the nightmare danger of nuclear attack becomes reality on some dread future day—we must respond.

For such challenges, which vary from year to year and generation to generation, there is no substitute for Presidential leadership. But there is always democratic control in the electoral process, and in legislative action, as we know from Vietnam.

The bitter experiences of Vietnam and the national atmosphere in the last decade have encouraged, I believe, too much tampering with the basic machinery by which the United States Government has run successfully for the past two hundred years.

We must not abandon the wisdom of the ages in the passion of a moment.

If we have disagreements of policy, let us resolve them as matters of policy, rather than escalating them into constitutional confrontations.

Tragically, in recent years, the bases of trust, cooperation and civility between the legislative and executive branches of our government have been eroded.

In their place, there has been an attempt to build new and permanent structures on the shaky ground of mutual suspicion.

This is no way for the government to serve the American people. It is, instead, the sure way to division at home and danger abroad.

What we need, as Wilson said, is "more coordinated power."

We need to seek once again a common ground on which the President, the Congress and the American people can proudly and firmly stand through crisis and calm.

We must decide again, as a Nation, what is important to us, what goals we will set, what dangers we will risk, what burdens we will bear, in our dealings with the wider world.

The Congress has the responsibility to do now what it does best—debate these great issues, openly, freely and thoroughly—and help us find a new path on which we all may travel together.

The new Administration—free of the burden of war, unfettered by mistakes of the past—has an historic opportunity to lead America to a new age in foreign policy; an age in which the goals and commitments we hold precious as a Nation may be fulfilled through the quiet, beneficent strength that commands respect and invites cooperation.

All this will not be easy. The world is very different now than it was thirty years ago. We are different, and our problems and aspirations more complex.

But we are still Americans who love our country, who cherish peace and freedom in the world.

Let us in the months ahead open a constructive dialogue among the American people, the Congress and the President, leaders past and present, so we can preserve the bulwark of our strength—the Constitution—and find the mechanisms to combine with the spirit that has made America what it is today—free and dedicated to a better world for all peoples.

NEWSWEEK ARTICLE PRESENTS DISTORTED PICTURE OF ALL VOLUNTEER FORCE CONDITION

Mr. PROXMIRE. Mr. President, the March 28 issue of Newsweek magazine contained an article entitled "the New-Look Army" dealing with the current condition and performance of the All-Volunteer Army. I am calling this article to my colleagues' attention because in my opinion it was written in a much more pessimistic tone than the current condition of the AVF warrants.

Four points of the article are worth mentioning because each presents only one side of the issue.

Point one: The article correctly points out that the normal standards by which to judge military recruit quality—aptitude-test scores and the number of high school graduates—indicate armed services quality is holding steady or climbing. The article also quotes Army Secretary Clifford Alexander, Jr., stating that the AVF is considered by top generals to be "the best Army they have seen."

But then the article turns around and criticizes Army quality on the basis of three isolated incidents during a Fort Benning training exercise for Army recruits, thereby leaving the impression that the Army's new enlistees are hapless buffoons. To believe this image of our newest military recruits is to believe a great distortion of the facts.

The facts are that 69 percent of today's armed services enlistees possess high school diplomas, as compared to 68 percent in 1964 and 61 percent in 1974. Aptitude-test scores for the Defense Department recruits indicate that lowest category scorers have decreased while middle-range category scorers have increased.

Point two: The Newsweek article leaves one with the impression that the Army is in trouble because of the increased percentage of blacks in the military. The magazine showed one picture of a black soldier placed above a cutline that asks "cannon fodder?"

Again, the Newsweek article has distorted the true situation in the military. It is true that blacks are enlisting in greater percentages than ever before, but this trend should not be classified as a problem because military variations from the national percentage racial composition statistics have no clear meaning. These statistics simply show that more blacks are taking advantage of the benefits the Army has to offer.

The greater numbers of blacks in the military has also meant more black officers, thereby improving morale and status of blacks in the military. The Newsweek article itself point out that military incidents of racial violence have declined from 59 to 3 since 1973. Finally, with an army that is more than 3 to 1 white, it is doubtful possibility that blacks are being used as "cannon fodder" for the better-off whites. The blacks, as well as whites, after all are volunteers not conscripts.

Point 3: Regarding the cost of the AVF, the Newsweek article cites a Senate report which stated it would cost $29 billion to raise current force levels to Vietnam-era manpower levels. I presume the article was referring to the King report on the AVF, which also said that the true cost of the AVF "is not recoupable through a return to the draft."

The article discusses the personnel cost problem facing the military, but it does not even mention some possible policy changes that could remedy the problem without drastic steps such as a return to the draft.

Point 4: According to the Newsweek article, recruiting is difficult for the Army because of antimilitary sentiment spawned by the Vietnamese conflict. The magazine should also have noted the great effect the AVF has had in diminishing this negative attitude.

Gen. Bernard W. Rogers, Army Chief of Staff, was quoted in a Washington Post article supporting the All-Volunteer concept because people in the military now are well motivated and performing well. General Rogers cited these statistics to prove his point: Desertion is down 60 percent; absent without leave is down 48 percent; jail population is down 45 percent and violent crimes are down 17 percent.

A 1976 U.S. News & World Report study showed that today's young people have a much more positive attitude toward the military and some colleges have been able to reestablish ROTC programs. In the military itself, more than two-thirds of the personnel agree with the AVF concept, while 18 percent disagree. A 1976 study at Fort Knox, the Nation's third largest military installation, showed an overwhelmingly more positive attitude toward the military on the part of enlistees as compared to draftees. To illustrate their point, Fort Knox officials indicated that the AWOL rate dropped from 36.6 to 13.4 per thousand soldiers in the period from 1972 to 1976.

The All-Volunteer Army, like any Government program, does face problems. But these problems are solvable, unlike the Newsweek article would lead one to believe. With relatively minor military policy changes, such as the cutting of military frills, the controlling of grade-creep inflation, the increased use of women and the raising of reenlistment quotas, we can maintain the AVF as an effective national military force.

Mr. President, one final comment might provide a greater insight into my reasoning for calling attention to this Newsweek article. The article criticized the current condition of the AVF because "few Americans today enlist out of patriotism or a yen for the military life." I wonder if either of those sentiments was present during the draft?

I ask unanimous consent that the Newsweek article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE NEW-LOOK ARMY

(By David M. Alpern and Tony Fuller)

A disheveled, rain-soaked recruit stumbles through the inoculation line at the Army's Fort Dix training camp. He mumbles incoherently and waves his arms. "Hey you, dummy, get outa here. I say get outa here!" bawls an angry sergeant—only slightly less disgusted with the young G.I. than with the new-style Army that accepted him in the first place. "He don't even speak English," the veteran noncom complains. "I had one come through the other day, he had open-heart surgery. And there was another with metal pins in his legs. Sergeants may always bitch, but I've been in the Army sixteen years and this is the worst I've ever seen, I swear."

From boot-camp firing ranges to Congressional hearing rooms to the corridors of the Pentagon, the nation's four-year-old experiment with all-volunteer armed forces is the target of tough questions and mounting criticism. Is it really working? Does it cost too much? Can it stand up to combat? A recent Gallup poll indicated that Americans by a clear 54–36 margin opposed any return to military conscription. But the problems of a voluntary force are serious enough to start politicians talking about the draft once again, and President Carter himself said last week that he had an open mind on the subject. "This is something that is constantly under assessment," he told the town meeting at Clinton, Mass. "If I consider as President that a restoration of the draft is necessary for the security of our nation, I will not hesitate one day to recommend it to the Congress."

Even high Pentagon officials who continue to tout the all-volunteer force—AVF in military jargon—concede that its prospects are hazy. The program "is working as of now . . . but I'm less certain about the future," said Gen. George S. Brown, chairman of the Joint Chiefs of Staff, at recent Senate hearings on AVF's troubles. Some critics complain about the fast-rising wages and pensions required to attract and retain personnel—already 58 percent of the Defense Department's $98 billion budget. Others cite a decline in "quality" of incoming troops and the growing proportion of blacks in the service—now 22.2

per cent of the Army, twice the black representation in the population at large. Prof. Charles C. Moskos Jr. of Northwestern University, a specialist in military sociology, worries that ghetto youth will become "cannon fodder" and asks: "What kind of a society excuses its most privileged members from defending it?"

More bothersome are demographic trends that indicate that there simply may not be enough young volunteers available in future years to maintain the armed forces at their authorized level of 2.1 million—800,000 in the Army alone. Army Reserve and National Guard units are already nearly 100,000 men short of full strength. In a crisis, one Senate report estimated, it would cost "an astonishing $29 billion" to raise current force levels to those of the Vietnam era. And with the Selective Service System reduced to a single vestigial office in Washington, it would take four months just to get the first of a new crop of draftees into basic training.

THE QUESTION OF QUALITY

Until recently, AVF was doing quite well. Launched by President Nixon in 1973, after sentiment against the war in Vietnam made the draft politically untenable, the system has managed to attract enough recruits to active duty—in part because of high civilian unemployment. Aptitude-test scores run higher than in the larger, draft-fed Army of the Vietnam era. The number of high-school graduates—another index of quality—also held steady through 1975 at 62 per cent, though it has now dropped to a worrisome 45.5 per cent. In recent combat exercises, some units of the new Army have excelled. The 101st Airborne Division successfully airlifted 3,000 men, 348 helicopters and 2,500 trucks to Germany in one NATO operation. The "almost unanimous" assessment of top generals, says Army Secretary Clifford L. Alexander Jr., is that "this is the best Army they've seen."

But the view from the field is not always so self-congratulatory, especially in the training camps where the newest recruits are stationed. "We just don't get the quality any more," said Sgt. George Griffin recently as he watched a squad of infantry trainees at Fort Benning, Ga., display antics worthy of the Keystone Cops. One man took careful aim with his M–16 rifle and buried its muzzle in the dirt. Another—against orders—peeked over the window ledge of a building under attack and got clouted in the head by an "enemy" grenade. And a third took cover behind a pine tree so scrawny "it could be split by a peashooter," the sergeant groaned.

MORE WASHOUTS, LESS TROUBLE

Complaints come from almost all levels in the chain of command. "Some of these guys you can explain things to 50 times, yell and scream, and they still don't understand," says Col. Ross Franklin, a staff officer at Fort Benning. "We can train all the goddam cooks you want, but when it comes to [handling] some of these [sophisticated] weapons it's a different story." A Senate study found that 37 per cent of all military recruits are now mustered out as unwilling or unfit before their first hitch is over, as against 25 per cent four years ago.

Quick exits, however, cut the number of troublemakers. The result has been a drop in reported cases of drug abuse (from 17,000 two years ago in the Army, for example, to 15,000 today) and in incidents of racial violence (59 in 1973 against only three last year). "I get a guy who says, 'I can't stand whites,' I just wash him out," reports Col. Jack Farris, who runs infantry training at Fort Benning.

The number of blacks in Army green has more than doubled since 1964. Minorities, including Hispanics, constitute almost 30 per cent of today's Army. "It will be a black man's Army and black men will have to fight the wars," griped black Pfc. Gregory Young recently in a mess hall at Fort Campbell, Ky. But Army Secretary Alexander, himself black and a National Guard veteran, argues that the shifting racial balance is less a problem for the military than an indictment of the society that it serves. "There still is discrimination out there—in case anyone has forgotten," he says, flatly ruling out the idea of imposing racial quotas on recruits in the future.

Few Americans today enlist out of patriotism or a yen for the military life. For some it is simply the last refuge from a bad civilian scene. "My girl's old man wouldn't let me see her and I almost slugged the guidance counselor at school," said Bobby (Munch) Croyts, 17, a Pittsburgh high-school dropout at Fort Dix. "The Army ain't as rough as the street," explained fellow recruit Juan Hernandez, 17, of Cleveland. Many more are attracted by increasingly generous pay and allowances. A private with two years' service receives $6,915 a year, up to $5,400 in Federal matching funds for education after discharge and the prospect of a pension that provides half pay after twenty years' service (chart). "I went downtown to Newark and there was a longer line at the Army office than at the welfare office," recalled recruit Carl Walker, 18, at Fort Benning.

A SINKING SHIP?

Life in the volunteer Army is a mixture of old and new. Much-heralded experiments involving long hair and barracks with semi-private rooms are fading away. And old-fashioned alcoholism is now as great a problem as drug abuse. But with more men entering at age 17 and 18, rather than in their 20s, a summer-camp air often prevails and sergeants complain about "baby-sitting." Stress on the financial rewards of military service also has stirred interest in unionization—a potential threat to discipline, Defense Secretary Harold Brown warned last week—although supporters say their main concern is wages and benefits.

Pay has already risen sharply—193 per cent in the lowest enlisted grade between 1964 and 1973—and the cost of providing such competitive salaries is drawing yelps from Capitol Hill. Georgia's Sen. Sam Nunn complains that AVF is a "sinking ship that is becoming increasingly costly to keep afloat." Rep. Les Aspin of the House Armed Services Committee warns that the escalating cost of military pensions ($34 billion a year by 2000, he says) could eventually produce "a New York City type of fiscal problem." Pentagon leaders reply that Congress itself wanted to raise military pay scales, even before AVF was born. Still, recruiting is costly and the Pentagon is planning an $86.6 million advertising campaign this fiscal year, up from $68.6 million in 1976. Gen. Bernard W. Rogers, Army chief of staff, said last month that it might take up to $750 million in special benefits to bring the undermanned reserves up to strength.

Part of the Pentagon's recruiting problem is the anti-military sentiment spawned by Vietnam. "I've had men spit on," reports recruiting Sgt. Reginald Burton. A more serious concern for the future is purely demographic. Martin Binkin of the Brookings Institution estimates that the number of men turning 18 will have dropped 15 per cent by 1985 and 25 per cent by 1992. If this happens, he calculates, one of every three qualified and available men would have to volunteer just to maintain the present force level—an unlikely prospect if the economy improves.

What are the alternatives? One suggestion is to lower the required strength of the armed forces, or the standards for enlistment. "The services discourage recruitment of high-school dropouts because up to 40 per cent are washouts," says Aspin. "For every ten [they] refuse, they are losing six potentially successful servicemen." He also proposes taking men with lower IQ scores, arguing that "they need a certain proportion of low-IQ recruits to do jobs that present little challenge."

Another idea is to take in greater numbers of women and give them a broader range of assignments. Already, women account for 6.6 per cent of all volunteers in the Army—up from 1.1 per cent in 1970—and the women are drawing all but the most dangerous combat assignments. "The bottom line on that is whether we're ready to see women coming home in body bags," says one top general. "I don't think we are."

PEOPLE ARE TALKING

Finally, there could be a return to the draft in some form. Senate Armed Services Committee chairman John C. Stennis concedes that such a move would be politically impossible now, but he predicts that the public will eventually see it as the most practical way to get a credible military force. "It's a process of a year or two, but more and more people are talking about it," Stennis says. Senator Nunn has proposed a Vietnam-style lottery to choose recruits equitably, or a mandatory period of national service that would permit men to choose between military duty and Peace Corps, Vista or other public-service work.

Such a program could cost up to $50 billion, however, and critics, including Sen. William Proxmire of Wisconsin, argue that it would be a "nightmare" of administrative and disciplinary problems. Less costly and controversial might be a draft for the reserves only, with less than six months of active duty—a suggestion outlined last month by Army Chief of Staff Rogers. None of these solutions is ideal, but the evidence suggests that AVF will need help from somewhere before very long.

WHAT A G.I. GETS

Salary: $6,915 a year, including housing and food allowances.[1]

Vacation: 30 days a year.

Health Benefits: Free medical and dental care.

Pension: Half pay after 20 years, 75 per cent after 30.

Education: For every dollar a G.I. saves for education, Washington contributes $2, up to $5,400.

Fringe Benefits: No sales tax at post exchanges; discounts on food, housewares and other items.

DROUGHT IN SOUTH DAKOTA

Mr. ABOUREZK. Mr. President, as you know, last year South Dakota experienced a terrible drought, the effects of which will be felt for many years. On Tuesday, April 12, the Washington Post ran an article by William Nye Curry which discusses the impact of the drought on South Dakota farmers and communities. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE DROUGHT OF '76: FARMERS IN SOUTH DAKOTA'S HYDE COUNTY WILL FEEL THE IMPACT FOR YEARS TO COME

(By William Nye Curry)

HIGHMORE, S.D.—It is hard to imagine, what with the rainwater in the drainage ditches and the standing pools in low-lying spots, that Highmore has undergone severe drought.

But the freshet of rainfall that graced this central South Dakota cattle community last

---

[1] A married private with two years' service.

month gave the thirsty fields almost as much water as they received in all of last year's dry, disastrous growing season—about four inches. So bad was the drought of 1976 here that not one of the 311 farmers in Hyde County was unaffected and not a single spear of seven different crops was harvested.

Though the March moisture has eased conditions—the region needs continued rain to get through this summer—the impact of the nation's worst drought since the 1930s will be felt here for the next three, five, maybe 20 years.

The grasslands were grazed to a gray stubble, the remnants in some cases not even covering the brown earth, as cattlemen desperately sought to feed their livestock. Re-establishment of those now-desolate pasturelands will take several years, even with good rainfall.

Worse, the breeding herds that produced the livestock sold for income each year have been thinned, even liquidated, in cost-cutting moves by farmers faced with high feed cost and low sale prices. One, Don Faulstich, 42, reduced by one-half the 200-head breeding herd that had taken him 10 years to establish.

And millions of dollars in low-interest, 20-year federal disaster loans must be repaid. Some $4 million to $5 million already has been loaned to about 55 Hyde County farmers, and more loan applications are pending. Not to mention other drought-incurred losses: Sam Dancey spent $184,000 wintering some of his cattle in North Dakota and Wyoming and hauling expensive feed in from as far as 650 miles away for the remainder; Merle Ankrum sold his entire herd of 100 cows and 100 calves for $425 a pair (a cow and her calf), even though he had borrowed $500 to $600 from the bank against each pair.

"I don't know how long it's going to take to recover," said Faulstich. "We've got the worst coming. Our cattle herds are down, and that's how we make our living."

How they are down. On Feb. 1 there were 22,150 head of cattle in Hyde County, barely one-third of the 66,000 head of Feb. 1, 1976, according to the tax assessor's office.

"The economy of this county is cattle," said Bill Paynter, the county extension agent, and that dependence is weighing heavily now. Hyde County taxes its cattle and the county's public schools face a $150,000 tax loss—one-fifth of the school budget—as a result of the herd reductions. Plans for a vocational-agricultural addition to the high school have been postponed.

Cattlemen all over America have been cutting their herds—slaughter in 1976 reached a record—because of low prices that do not cover farm costs. But in no state were herds reduced to the extent of those in drought-hit South Dakota—almost 19 per cent, from 4.5 million head on Jan. 1, 1976, to 3.65 million on Jan. 1 of this year. No county in South Dakota cut back like Hyde.

Merle Ankrum cut back all the way. A county commissioner, Ankrum, 46, has lived in Highmore all his life. He has 1,400 acres of grass and farmland and raises cattle. He gets them to 750 pounds or so and sells them to feeding operations in other Midwestern states. That is the normal pattern here since the area does not grow enough corn to fatten cattle to the 1,100- to 1,200-pound slaughter weight.

"I held on until July of last year" Ankrum said "and went clear out rather than go out and start buying feed." He sold the 100 pair at $425 a pair despite the money borrowed against them and the $200 in production cost in each calf. He didn't think cattle prices would cover the high cost of the feed he would have had to buy to winter the herd, feed he would have raised himself were not for the drought.

Moreover, Ankrum was anxious to save his haystacks, carried from 1975, for a spring herd of 150 Herefords he bought for $150 each two months ago. He describes the 350-pound cattle as "still a little green," or underweight.

Ankrum says he lost $35,000 farming last year and now has $120,000 borrowed against his livestock, machinery and the equity in his land. A disaster loan application is pending.

Faulstich won't say exactly what it's cost him, only that in the past three years, drought, low prices and high costs have reduced the net worth of his farming operation—assets against liabilities—"by six figures." He has 2,150 acres and lives a half-mile from where he grew up. Two years ago, after 11 years of farming, he had a breed herd of 215, carefully selected, culled and bred to bear each year's money-producing calf crop.

He has kept the 100 best.

That means fewer calfs to sell until the herd is rebuilt, and thus less income—the general and long-term agony facing Hyde County.

"If [cattle] prices had been good, we could have afforded to buy feed" rather than reduced herds, Faulstich said, "but costs and prices—there just wasn't the economic justification. The effects are going to last for some time."

"We've used our pastures awful hard," Carl Ashdown was saying as his old blue pickup rattled by a bare field containing wisps of dead vegetation. "The way we got 'em so short, they're ate down to nothing."

The dugout waterholes are low—two feet where they should be 12- to 18-feet deep. "It's got to keep raining," he said over a timpani of automotive rattles, "there is no question about it." Ashdown estimated it would take three to four years to re-establish his 2,300 acres of grasslands.

Ashdown, 45, works 3,300 acres with his 38-year-old brother Leslie. The farm has been in the family for 30 years.

Ashdown says yearly calf sales normally bring the farm $64,000, but last year the total was $25,000.

Ashdown says he and his brother have decided to stay with it this year. They managed to break even last year by selling off cattle and cutting expenses—doing little things like building farm equipment rather than buying it. But if things don't improve, they'll sell everything but the land, get jobs and wait for better times.

They hope to avoid the ultimate debt, borrowing against their land. That's what many others here have done, borrowed money against their investments to get cash to stay in business.

There is the sentiment here, too, that unless cattle prices rise to offset increasing costs, surviving the drought will have been for naught. "It doesn't do any good to raise a crop if you can't cover the costs," said extension agent Paynter. "A lot of people are in financial trouble."

"It's a disaster either way," says Ankrum. If prices don't change, "we might just as well have another drought."

Conceding that federal disaster loans are crucial to Hyde County farmers now, Faulstich wondered about the long-term effects of more debts and interest payments. "We need it to get through, but I wonder in the long run if it might just do us in," he said. His disaster loan application is pending.

PROPOSED ARMS SALES

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask unanimous consent to have printed in the RECORD the notification I have just received.

There being no objection, the notification was ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 77-21, concerning the Department of the Air Force's proposed Letter of Offer to Greece for aircraft estimated to cost $161.0 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF, Director, Defense Security Assistance Agency, and Deputy Assistant Secretary (ISA), Security Assistance.

Attachment.

TRANSMITTAL NO. 77-21

(Notice of proposed issuance of letter of offer pursuant to section 36(b) of the Arms Export Control Act.)

(i) Prospective purchaser: Greece.

(ii) Total estimated values:

Major defense equipment[1]	$128.5
Other	32.5
Total	161.0

[1] Included in the U.S. munitions list, a part of the international traffic in arms regulations (ITRA).

(iii) Description of articles or services offered: Eighteen (18) F-4E aircraft and support.

(iv) Military department: Air Force.

(v) Sales Commission, fee, etc. paid, offered or agreed to be paid: None.

(vi) Date report delivered to Congress: April 19, 1977.

TV AND CHILDREN'S VALUES

Mr. HASKELL. Mr. President, in a column which appeared last month in the Phoenix Gazette and other newspapers, Allan C. Brownfeld has summarized much of the important discussion of the impact of television programing, especially violent programs, on children.

A study of the University of Pennsylvania's Annenberg School of Communications indicated that the amount of violent action on TV has reached its highest point on record. This and other studies confirm that children's attitudes and perceptions are especially influenced by such programing. Three studies funded by the National Institute of Mental Health have linked TV violence to aggression in young people. One very encouraging vote is that certain people within the television industry itself, including the Screen Actors guild, have

begun to protest TV's "emphasis on violence and the degree of violence portrayed."

I recommend Mr. Brownfeld's interesting column, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

STUDY FINDS TV GIVES CHILDREN FALSE SET OF VALUE STANDARDS

(By Allan C. Brownfeld)

Two thirds of American's children harbor fears that "somebody bad" will get into their homes. In fact, a study indicates that nearly a quarter of American children actually fear certain television programs, and heavy TV watchers (four hours or more a day) are twice as likely as other children to say they often become frightened.

The survey was sponsored by the Foundation for Child Development and conducted by Temple University's Institute for Survey Research. Foundation President Orville Brim Jr. notes that "It's the first time in history" that children's attitudes have been surveyed so thoroughly.

The report deals at length with the negative impact of television. In addition to accentuating fears, TV also seems to narrow many children's range of thought. When children were asked to name a famous person they would like to emulate, most responded with the names of television personalities (Cher, Marie Osmund, Elvis Presley) or athletes (O. J. Simpson, Muhammad Ali). Fewer than 7 per cent selected a national political figure, and fewer than 2 per cent picked persons from fields such as the arts, writing, science, or medicine.

According to Nicholas Zill, project director for the study, children are affected by what he calls the "vulgarity, materalism and greed" of television programming and advertising.

The negative effects of television upon the American society are many. In the short run, however, its repeated depiction of violence may be the most dangerous. In 1976, violence on network television increased and reached its highest level in almost 10 years. In a study recently released by researchers at the University of Pennsylvania's Annenberg School of Communications it was shown that the number of violent incidents shown on TV rose from 8.1 per hour in 1975 to 9.5 per hour in 1976. The amount of "violent action" measured rose "to the highest point on record," the survey said. It was also noted that children were "especially vulnerable" to a TV view of the world as a hostile and dangerous environment.

So serious has the problem of violence become to the nation's mental health that Dr. Richard Palmer, president of the American Medical Association, has asked 10 major corporations to stop sponsoring violent shows. The list is almost the same as the 10 advertisers found to be the worst offenders. Dr. Palmer points out that television has been quick to raise questions of social responsibility with industries that pollute the air and suggests that violence on TV and its potential for distorting children's perceptions of the world may be a worse form of pollution.

At its Philadelphia convention, the AMA held a symposium on the effects of TV violence on children. Four research papers were presented which linked TV violence to youthful aggression. Three of them were funded by the National Institute of Mental Health.

Even from within the television industry voices have been heard which are critical of the nature of much current programming. Paddy Chayevsky, a former TV writer and author of the movie "work," which is about the TV industry, states that "Television coarsens all the complexities of human relationships, brutalizes them, makes them insensitive. We've lost our sense of shock, our sense of humanity. That is the basic problem of television."

Also from within the entertainment industry, a resolution deploring excessive violence in TV programming was passed in January by the board of directors of the 32,000-member Screen Actors Guild. The resolution states that violence in entertainment shows has become a "staple component" of television fare. It has the potential of increasing aggressive violence among viewers, stated the resolution, and while stressing that "degrees of violence exist in our society" it states that what is disturbing is "the emphasis on violence and the degree of violence portrayed."

Still another group expressing concern is the National Association for Better Broadcasting which has proposed that measurements of the amount of violent programming on television be made a part of the license renewal process. Frank Orme, executive vice president of this group, testified before a House Communications Subcommittee hearing on license renewals. He challenged a statement by Federal Communications Commission Chairman Richard Wiley, who said that the government can do no more in reducing TV violence: ". . . it is simply not true that the government of the United States can do no more. . . . Among us all, we have to decide whether we must accept ourselves as a desensitized and partially brutalized society in which violence and sadism are socially tolerable . . ."

Looking for a governmental solution, however, may miss much of the real cause of the problem. Television provides so much violent programming because it is violent programming that Americans seem to want to watch. Business sponsors those shows which attract viewers. Parents, evidently, care little about what their children watch. The Temple University study indicated that more than half of the children surveyed are allowed to watch television whenever they want, and a third said they are permitted to watch whatever they want. It is clear that the TV industry is irresponsible in this respect, and that business is irresponsible in sponsoring such shows. The average American who watches these shows, however, is equally at fault—and this is a more difficult problem to deal with.

THE GENOCIDE CONVENTION—TOO LONG WITHOUT ATTENTION

Mr. PROXMIRE. Mr. President, for over a quarter century we have neglected to positively act on the Genocide Convention. Although the treaty has long been in force among the signatory nations, the United States still refuses to ratify the agreement. There is no acceptable excuse for our inaction on a treaty so important.

Twenty-five years is a long time. Long enough for arguments to be heard, problems explored, objections to be met. The treaty's critics, whatever their particular concern, have been answered many times over.

Proponents of the Genocide Convention certainly far outnumber those opposed to it. Presidents Eisenhower, Kennedy, Johnson, Nixon, and Carter have issued statements urging adoption of the Convention. The Foreign Relations Committee has issued several favorable reports, the most recent in April 1976, dealing with the treaty. The language of this last report leaves little room for uncertainty!

The Committee, therefore, earnestly recommends to the Senate that, subject to the understandings and declaration, the Senate give its advice and consent to ratification of the Genocide Convention by an overwhelming vote. Respect for the feelings of mankind, expressed by the 82 ratification to date, should lead to no less.

I wholeheartedly concur with the recommendations of the Foreign Relations Committee. Once again, I urge the Senate to ratify the Genocide Convention without further delay.

APPROPRIATIONS NEEDED FOR FISH AND WILDLIFE HABITAT IMPROVEMENTS

Mr. CHURCH. Mr. President, recently, I joined with Joseph Greenley, director of the Idaho Department of Fish and Game, in requesting funds for the improvement of fish and wildlife habitat. For many years, the Western State's fish and game agencies have managed the fish and wildlife on the public domain, while the Forest Service and Bureau of Land Management have been responsible for the habitat. So far, at least, the Federal Government has not been keeping up its end of the agreement.

According to Mr. Greenley, the wildlife portions of the Forest Service and BLM budgets "have been so small as to have been virtually meaningless in terms of on-the-ground accomplishments compared to their other programs such as timber and livestock management."

Both Mr. Greenley and I strongly support the Carter administration's budget which requests $26 million for wildlife management purposes for the Forest Service, and $8 million for the Bureau of Land Management. If this request is approved by Congress, it means that some $3.1 million would be available for wildlife habitat improvement in Idaho in fiscal year 1978.

I ask unanimous consent that my testimony before the Interior Appropriations Subcommittee and the testimony of Mr. Greenley be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR FRANK CHURCH

Mr. Chairman, I appreciate this opportunity to testify before your subcommittee in conjunction with the Idaho Fish and Game Department in support of appropriations for fish and wildlife management under the Sikes Act.

As Joe Greenley, Director of the Idaho Fish and Game Department has already told the Committee, the monies included in the President's Fiscal Year 1978 budget for wildlife management purposes can be well spent in Idaho. I hope the Committee will support the Administration's request for these funds.

Two thirds of the State of Idaho is under Federal jurisdiction; 20.3 million acres of land are managed by the Forest Service, and 12.0 million acres by the Bureau of Land Management. It is important for these agencies to begin the necessary work to reverse the shrinking wildlife habitat which is forcing sharp reductions in game herds in Idaho and throughout the West. Unless we start to improve the food and cover on which wildlife populations depend, we may see the extinction of certain important herds. There is widespread agreement among all interested parties that Idaho's deer, elk, moose, antelope, bighorn sheep, and moun-

tain goat populations can be greatly aided by habitat improvement and rejuvenation.

For example, in the early 1900's large forest fires in Northern Idaho burned millions of acres of land. The brush which grew up to replace the burned material provided magnificient elk forage. The indigenous elk herd increased dramatically from a small group to one of the largest herds in North America by the 1950's. However, today according to Fish and Game Department figures, the elk population has declined to about one-half its size during that peak period. It appears that this decline is most closely related to the shortage of suitable forage on low level slopes which serve as winter range for the elk. Probably our best chance for restoring some of this lost forage is through the cooperative plan developed by the Fish and Game Department and the Forest Service. This plan would be funded by the Sikes Act appropriation which you are considering.

Another important part of this cooperative plan relates to anadromous fish. Since the construction of the many hydroelectric dams on the Snake and Columbia Rivers, Idaho's annual salmon and steelhead runs have suffered drastic reductions. Through a broad-based effort, which has my full support, a variety of agencies are working to bring the fish runs back to their traditional levels. Programs which would be initiated under this budget request would provide substantial help, by removing migration barriers and hazards, improving spawning areas, and developing rearing ponds on the headwater drainages.

In addition to the two portions of this plan which I have discussed, the Fish and Game Department would cooperate with both the Forest Service and the Bureau of Land Management to improve gamebird habitat to increase pheasant, chukar partridge, and grouse populations.

Mr. Chairman, in summary I would simply note that a very large portion of Idaho's population hunt or fish on our public domain lands. These two activities provide a big share of the State's economic income. It is critical to provide these long overdue funds to assure adequate fish and wildlife habitat. I hope you can support this request.

STATEMENT OF JOSEPH C. GREENLEY, DIRECTOR, IDAHO DEPARTMENT OF FISH AND GAME

Mr. Chairman, Members of the Committee, we appreciate this opportunity to testify in support of the Bureau of Land Management and Forest Service appropriations of $8,000,000 and $26,000,000 respectively for wildlife management purposes under PL 93-452, commonly known as the Sikes Act Amendment.

As one of the "public land" states of the west, our specific interest is for those portions of the appropriations designated for programs in Idaho which are approximately $600,000 for the Bureau of Land Management and $2.5 million for the Forest Service.

Our state has been endowed with a rich variety and abundance of fish and wildlife. Based on the number of licenses sold plus the senior citizens and youngsters who hunt or fish with no cost, we estimate that nearly one-half of our population plus sizable numbers of nonresidents utilize the lakes, streams, forests and foothills of Idaho for hunting and fishing. Our responsibility to these citizens rests under that section of our State Code which states that all wildlife is the property of the State and shall be managed so as to provide continued supplies of such wildlife for hunting and fishing.

As the agency responsible, we long ago came to the realization that the "continued supplies of such wildlife" were dependent not so much on the hunting and fishing regulations we might establish but upon the land. Lands which provide wildlife's food, water and shelter requirements produce good wildlife populations and lands that do not have suitable conditions for wildlife do not produce wildlife.

About two-thirds of Idaho is public land under Forest Service and Bureau of Land Management administration and this two-thirds of our land produces most of the deer and elk and practically all of the scarcer big game species such as moose, antelope, bighorn sheep and mountain goat. These public lands are also important to the production and hunting for the bulk of Idaho's chukar partridge, forest grouse and sage grouse. Public lands along water courses provide access to areas for waterfowl hunting, and the remaining tracts in and adjacent to privately owned farming areas are extremely important to our pheasant populations.

The proportion of our water area on public lands is also approximately two-thirds of the total surface acreage of water in Idaho. Of further significance is the fact that these lands form the headwater drainage for most of our streams and these watershed values extend their effect beyond the boundaries of the public lands to almost all Idaho waters.

Thus, with half of our people concerned and two-thirds of our total land area and two-thirds of our water involved, the effect of public lands on our wildlife resources and to our citizens is of extreme importance. As the agency in charge of managing wildlife, our concern with the management of these public lands is obvious.

In common with other state fish and game agencies in the west, we have an understanding with both the Bureau of Land Management and the Forest Service that we are responsible for managing the wildlife and they are responsible for the habitat. Both of these federal agencies also have a charge under their multiple use directives to provide for wildlife in their programs. However, the funding for wildlife in their budgets has been so small as to have been virtually meaningless in terms of on-the-ground accomplishments compared to their other programs such as timber and livestock management.

The possibilities under the Sikes Act Amendment to provide funds specifically for wildlife programs is the best opportunity we have yet seen to correct this chronic shortcoming in Bureau of Land Management and Forest Service multiple use management.

Under terms of this act, both agencies have developed in cooperation with the Idaho Department of Fish and Game, a broad cooperative agreement and plans for specific habitat improvement projects for which funds are now being requested. In Idaho the top priority program under the Bureau of Land Management is to improve the food and cover and manage the extremely critical isolated tracts of public land which remain scattered throughout the irrigated farm lands of southern Idaho. These small tracts are the last remaining islands of native vegetation surrounded by highly developed agricultural lands. Habitat on these tracts, although attractive to wildlife, is generally far below its potential. Improvement in management under the requested funds could multiply the effectiveness of these lands by supplying the missing ingredients that wildlife, and pheasants in particular, lack on the surrounding farmlands.

Another Bureau of Land Management program is for the nationally renowned Birds of Prey Natural Area along the Snake River to provide better protection for the various species of raptors including potential transplants of the endangered peregrine falcon.

The top priority Forest Service program in Idaho is to restore badly deteriorated habitat for the northern elk herds. This situation relates to the wildfires which burned millions of acres of conifer forests in the early 1900's. The shrubs which replaced the trees provided optimum forage and the elk expanded from a small nucleus to one of the largest herds in North America by the 1950's. Today, the elk population has declined to about one-half of its peak numbers.

The causes of the decline appear to be most strongly related to declines in the forage especially on low elevation slopes which serve as winter range. The brush fields which replaced the trees that were burned by wildfires now produce less than one-third the elk food they did twenty years ago because under natural succession, unpalatable plant species have reseeded on many areas and have crowded out forage plants. In some cases, shrubs have grown so tall that elk cannot reach the palatable terminal portions. Very few acres of winter range have been improved by naturally occurring wildfires since a large burn in 1934.

In an attempt to reverse the downward trend in food production, our Department, the University of Idaho and the Forest Service began experimenting with controlled burning to improve these elk ranges in the mid-1960's. Studies documented an increase in forage and elk use on areas that were burned during the spring and fall months, two seasons when fires could be effectively controlled. As a result of the beneficial effects obtained by this method, our Department and the Forest Service have financed burning of 41,000 acres to date. Since about 300,000 acres (5 percent of the total national forest land in the area) are in need of rejuvenation, the acreage burned has not even kept pace with the continuing decline of forage that is occurring on nonburned ranges.

It appears that the best hope for restoring northern Idaho winter ranges to their potential for supporting elk lies with funding under the Sikes Act Amendment.

Another major program under the Forest Service request, is for anadromous fish. Idaho runs of salmon and steelhead have suffered drastic reductions for various reasons related to their long migrations through the Salmon, Clearwater, Snake and Columbia Rivers. Many agencies and programs are attacking this problem on the lower rivers. Programs under this budget request would remove migration barriers and hazards, improve spawning areas, and develop rearing ponds on the headwater drainages.

Additional Forest Service programs are for: inventory, planning and habitat improvements to benefit endangered or threatened species; planting and seeding on key ranges for various species of big game and upland birds; closure of un-needed roads to provide sanctuary areas; and evaluating the impact of phosphate mining on wildlife habitats. Other programs involve improvement of stream and reservoir habitats for resident species of fish, and inventory, planning and habitat management for upland birds, furbearers, waterfowl and nongame species.

The Idaho Department of Fish and Game has assisted in the planning of these projects and we view these requested appropriations as an essential beginning toward correcting the long-standing inequity in funding programs of the Bureau of Land Management and Forest Service, and vital to the restoration and future well-being of important wildlife populations.

With half of our citizens using our wildlife and two-thirds of our State in public lands, stronger wildlife programs by the federal land management agencies is of extreme importance.

Thank you for the opportunity to testify. We respectfully urge your favorable consideration of the requested appropriations.

PANAMA CANAL: EXCAVATION, 1881–1915, STRESSES MAGNITUDE OF MAINTENANCE PROBLEM

Mr. HELMS. Mr. President, the splendid record of the Panama Canal

Company in keeping the Panama Canal open and safe for traffic has caused many Americans to underrate the complexity of the operations involved. Just because the canal has been running smoothly, some advocates of the giveaway of the Panama Canal tend to minimize the skills necessary to keeping the canal open.

Such skills include both management skills and technical skills. They involve questions of judgment of experience. For their proper exercise they require independence and freedom from political interference. The Panama Canal Company organization has, over the years, created a unique cadre of skilled workers, both United States and Panamanian, who have functioned as a team for the proper operation of the canal.

Thus, in attempting to solve the diplomatic issues involved in the treaty negotiations, some critics downplay the fact that the canal organization is an organic unity that could be mortally wounded if the present management is disrupted. Indeed, the attitude of the State Department has already grievously affected the morale of the Canal Company employees. If the mere threat of a giveaway has had a deleterious effect, how much more so would a new management situation, subject to outside political influence and corruption, affect the canal's operation? Only a major power can guarantee that the canal will continue to function efficiently.

The problem of maintenance, for example, illustrates only one facet of the complexity of operations.

When testifying before a congressional committee during the construction era of the Panama Canal, Chief Engineer George W. Goethals, in response to a Member's question as to when the Panama Canal would be completed, replied, "The canal will never be completed." By this he meant that the time would never come when more work would not be necessary for its efficient maintenance, operation, sanitation and protection.

The truth of Goethal's statement is well illustrated by the record of the canal's wet excavation. More than twice as much material has been dredged from the canal since 1915 than was excavated during the entire U.S. construction period.

Among the problems that require continuous dredging are silting, bank sloughing, erosion, and land slides, all of which reduce channel depths. Siltation is increasing as a result of the urbanization of parts of the Gatun Lake watershed.

In regard to the protection of the crucially important watershed of Gatun Lake, it is interesting that this danger was apparently forseen long ago by Gen. Clarence Edwards, while in command of the U.S. Army on the Isthmus. He actually made the recommendation that the boundaries of the Canal Zone be extended to include that entire watershed of the Chagres River. In the light of later events, it is unfortunate that his recommendations were not followed.

As to slides, it is still possible for such bank disturbances to close the canal. Meeting this danger requires eternal vigilance on the part of canal engineers and geologists, and timely preventive measures. With completion in 1970 of the enlargement of Gaillard Cut from 300 to 500 feet, the summit level channels have a minimum width of 500 feet. This improvement was an important step toward the major modernization of the existing canal as provided in measures now before the Congress under existing treaty provisions and on which over $171,000,000 has already been expended.

In a recent article, Maj. Robert L. Herndon, Corps of Engineers, U.S. Army, summarizes the history of excavation in the Panama Canal, 1881–1975, both dry and wet. A reading of his article shows with startling data the magnitude of the "maintenance problem" that only a great and powerful nation can support. It also serves to reveal the naiveté of proponents of the giveaway of the Panama Canal to a small, weak country on the verge of a financial collapse.

Just as predicted by Colonel Goethals, Major Herndon concludes that in the future the canal will require increased excavation to maintain it as one of the world's safest waterways and to increase its capacity.

Mr. President, as the article by Major Herndon is timely as well as illuminating, it should be of interest to all Members of Congress seeking reliable information on the problem of maintenance of the Panama Canal, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DREDGING IN THE PANAMA CANAL

(By Maj. Robert L. Herndon)

The successful completion of the Panama Canal by the United States stands as a milestone of engineering achievement. Yet, the United States engineers did not originate the dream of an interoceanic canal nor did they turn the first shovel towards its construction. The French, under Comte Ferdinand de Lesseps, were the first to excavate along the route of the present canal. In the 22 years the French spent in Panama, they excavated over 78 million cubic yards of earth and rock. As a result of minor alignment changes and the required rehandling of much of the original excavation material, only 30 million cubic yards excavated by the French proved to be useful to the construction of the present canal. It was estimated that 7 million cubic yards of this were removed by French dredges.

The two types of dredges used by the French were the ladder, or endless-chain bucket dredge, and the suction dredge. Of the 51 pieces of dredging equipment acquired from the French Company, only seven were rebuilt and placed in service by American forces. All of the rebuilt French dredges survived the American construction period with the exception of a ladder dredge which sank in 1911.

AMERICAN CONSTRUCTION DREDGING

To the seven rebuilt French dredges, the American construction forces, under Col. George W. Goethals, added 16 dredges and a variety of support equipment. This equipment was divided between the Atlantic and Pacific divisions where all dredging was performed prior to late 1913. On October 10, 1913, President Woodrow Wilson pressed a button installed on his desk at the White House and sent a signal that detonated eight tons of dynamite which breached the Gamboa Dam and flooded the cut through the continental divide. The dredges then entered the cut for the final work phase.

By December 1914, a total of 115,720,000 cubic yards of material had been excavated by dredges for the construction of the canal. This amounted to approximately 47 percent of the total material excavated by Americans. Over twice as much material has been dredged from the Panama Canal since 1915 than was excavated during the entire U.S. construction period. This is attributed to the maintenance dredging required to remove the siltation in the channels, the large slides that still plague the canal, and construction dredging for channel improvement projects.

MAINTENANCE DREDGING

The Panama Canal requires continuous dredging to maintain the navigable depth. Siltation, bank sloughing, erosion, and landslides all decrease channel depths. An average of 2.25 million cubic yards of material is removed annually to maintain the current bottom elevation. Siltation from the watersheds contiguous to the canal provides the greatest bulk of the material encumbering the channel. Over 5.7 square miles of channels, harbors, and anchorages are subjected to as much as 1½ feet of silt accumulation per year. One foot of siltation over this area amounts to 5.9 million cubic yards of dredge excavation. Siltation is increasing as Panama develops and urbanizes the previously forested areas on the Gatun Lake watershed. Bank erosion is also a major concern due to the erosive action of wakes from larger vessels and the increased hydraulic wash from the tugs that are required to maneuver these vessels safely. This will necessitate additional maintenance dredging in the future to maintain the current depth.

TABLE 1.—TOTAL EXCAVATION OF THE PANAMA CANAL INCLUDING CONSTRUCTION, MAINTENANCE, AND AUXILIARY

Project	Period	Dry [1]	Wet [2]	Total [1]
French canal	1881–1903	59.8	18.3	78.1
American canal	1904–7	8.6	4.4	13.0
Do	1908–14	121.7	111.3	233.0
Total construction excavation	1881–1914	190.1	134.0	324.1
Cut widening (300 ft to 500 ft)	1918–70	13.5	37.2	50.7
Maintenance dredging	1915–75	.6	459.3	459.9
Grand totals	1881–1975	204.2	630.5	834.7

[1] Excavation times 10^6 yd^3.
[2] Excavation (dredging) times 10^6 yd^3.

Much of this maintenance dredging has been necessitated by the infrequent but massive slides in the Gaillard Cut. During construction, landslides were one of the principal concerns of canal officials. There were 22 slides during the dry excavation of the Gaillard Cut ranging in size from 3,300 cubic yards in the Pedro Miguel slide to over 9 million cubic yards in the West Culebra slide. Approximately 25 million cubic yards, or 25 percent of the total removed by steam shovels in the dry from the cut, were excavated from these slides. Since the introduction of water into the Gaillard Cut, 32 slides have occurred, the largest being over 36 million cubic yards in the 1914–1915 East Culebra/Zion Hill slides which completely closed the canal for seven months. Because of the quantity of large boulders and rock in these slides, suction dredges were of little use in excavating the material. Canal authorities anticipated this problem and acquired three 15-cubic-yard dipper dredges in 1914–1915 to excavate the encroaching material. Dipper dredges are still the primary means of removing material from the cut.

Slides even today could close the canal. The most recent slide occurred on October

10, 1974, in Culebra Reach—the largest slide in 41 years. Over 600,000 cubic yards of earth and rock were displaced over 200 feet, thus restricting the channel to 300 feet. The Panama Canal dredging fleet immediately began clearing the slide and in 3 weeks had removed over 183,000 cubic yards of material and had cleared the channel prism to a width of 437 feet. Subsequent dredging restored the channel to its full 500-foot width.

CANAL IMPROVEMENTS

In 1918, only four years after the opening of the Panama Canal, the Dredging Division began widening Gaillard Cut. From 1918 to 1951, the dredges removed 16 million cubic yards of rock and soil in cutting off spits and bends in the cut to assist navigation. After World War II, it became apparent that the 300-foot Gaillard Cut channel would soon become inadequate for the growing volume and size of commercial ships.

From 1952 to 1970, excavation contractors and the Dredging Division removed 35 million cubic yards of material in widening the 8.5-mile-long Gaillard Cut from 300 to 500 feet. The total program from 1918 to 1970 included removal of 50.7 million cubic yards of material.

The Panama Canal Company is presently involved in a channel-deepening program. In August 1974, the Dredging Division officially reached elevation 40 feet Precise Level Datum (PLD) within the center 300 feet of the channel in the Gaillard Cut and Gatun Lake, which means ships have 45 feet of water with the lake at elevation 85 feet PLD. The Dredging Division then initiated a major dredging program which will lower the channel to elevation 37 feet PLD. This additional 3 feet of depth will allow for silt accumulation and dredging or surveying inaccuracies resulting in less frequent maintenance dredging. It will increase the possibility of allowing deeper drafts for transiting vessels than has been previously acceptable. This additional depth will also provide extra water during the annual dry season for either lockages or the generation of hydroelectric power by permitting Gatun Lake to be drawn down to elevation 80 feet PLD without further restricting drafts on transiting ships.

The introduction of large Panamax class ships (so classified because their dimensions are the maximum the Panama Canal's locks can accept on routine transits: 950 feet by 106 feet by 40 feet) has accentuated a maneuverability problem as these ships pass through the restricted channels. To increase the safety of these ships, a program has been initiated to improve the conditions which contribute to difficult passage. This involves widening certain confined reaches of the canal and relieving restricted turns, thereby increasing the level of safety for vessels negotiating these turns. The majority of the widening improvements will involve dredging.

The most recent widening effort was to improve the San Pablo-Tabernilla Curve. This 67-degree curve is the largest change-of-course turn in the canal. The work involved removing the material from the inside apex of the curve by both suction and dipper dredging which widened the turn to 2,500 feet at the point of intersection. This project was completed in February 1975.

Gamboa Reach, presently 500 feet wide, was the second project in the canal-widening safety program. Gamboa Reach, at the north end of the Gaillard Cut, is a meeting point for ships requiring a "clear-cut" transit. A "clear-cut" vessel is of such large size and limited maneuverability to require one-way traffic through the Gaillard Cut. Because of the queuing of these vessels to enter Gaillard Cut and the meeting of vessels at this juncture, the 3.1-mile-long reach is to be flared at both ends to 800 feet and the channel widened to 650 feet. The initial phase of this project is scheduled for accomplishment in late 1976 and the completion of the entire project in 1978.

Other projects included in this safety-oriented program are the widening and realigning of Mamei and Bohio Curves. These two areas form the only reverse curves in the Gatun Lake portion of the canal. Maneuverability through these curves is further encumbered by the presence of several small islands adjacent to the channel prism which create complicated hydrodynamic forces on transiting vessels which can cause a vessel to uncontrollably shear across the channel. A study and computer simulation of this confined channel phenomenon are being conducted by the Panama Canal's engineers and consultants from the Swedish State Shipbuilding Experimental Tank in Goteborg, Sweden. Based on the preliminary findings, a tentative design has been prepared for alleviating the major maneuverability encumbrances in Mamei Curve. Improvements on this curve are scheduled for 1979.

DREDGED MATERIAL DISPOSAL

As material is dredged from the canal, it must be disposed of rapidly and efficiently. Positioned throughout the length of the canal are dump areas for the deposition of dredged material. Many of these dumps are located in Gatun Lake, a sufficient distance from the canal prism to preclude resilting of the canal. Several dredge dumps are located on the banks of the canal in diked areas. Due to the accumulation of dredged material in these land dumps over the years, the freeboard on the confining dikes has gradually disappeared. As a result, the Panama Canal Company will upgrade and maintain the dikes so that the impoundment of the dredged material will be of sufficient time to allow the solids to precipitate prior to the water overflowing the spillway.

The material dredged from Panama Canal waters is uncontaminated by industrial and agricultural pollutants. Therefore, the disposal of the material in land and water dumps has not generated the adverse environmental impact prevalent in other areas of the world. Sixty years of observation plus a recent study by consultants on the environmental effects of dredging and disposing of spoil material have indicated that the effects of such operations on this largely man-made environment are benign.

DREDGING FLEET

In 1913, the Panama Canal's dredging fleet was centralized under one division and headquartered at Paraiso, near Pedro Miguel Locks. In September 1936, the Dredging Division relocated to Gamboa, at the north end of the Gaillard Cut on the east bank of Gatun Lake, in order to have the reserve dredging fleet north of any serious slide that might occur in the Gaillard Cut. Gamboa is the geographic center of the canal and thus the logical center for dredging operations. With the dredging dumps used in dipper dredge operations located in Gatun Lake and the equipment moored at Paraiso, such equipment would have been useless if a slide had interrupted traffic through the cut.

The present Panama Canal dredging fleet consists of two large dredges, a clamshell dredge, and a drill boat. The U.S. *Mindi* is a cutterhead suction dredge capable of moving 1,200 cubic yards of earth per hour. She is operated an average of eight months each year in maintenance and capital improvement projects. The *Mindi* is employed primarily in the Gatun Lake channels, the ocean approaches, the harbors and anchorage areas, but is occasionally used to sweep the Gaillard Cut. The *Mindi* is 295 feet long, 50 feet in beam, and can dig to a 72-foot depth. She was built in 1942 and is scheduled to be repowered with diesel-electric engines and modified with the addition of a ladder pump in 1978.

The U.S. *Cascadas* is a 15-cubic-yard steam-powered dipper dredge with a normal production expectation of 500 cubic yards per hour. The *Cascadas* was built in 1915 and, despite her age, remains a reliable and productive member of the dredging fleet. She is operated an average of four months each year in dredging blasted rock and earth, primarily from Gaillard Cut. Both of these dredges are operated 24 hours per day, 7 days per week when they are in service.

A contract was awarded in 1976 for a new 15-cubic-yard diesel-electric dipper dredge to replace the inoperable and decommissioned dipper dredge U.S. *Paraiso* which has been out of service since 1971. When the new dredge is delivered in 1977 it will greatly increase the efficiency of operations and provide the Panama Canal with added dredging capability which is critical in clearing slides. It will also provide a back-up dipper dredge for slide clearance, which is required when one dredge is out of service during a major maintenance period.

Dipper dredges are dependent upon scows to transport the dredged material from the digging site to the dump area. The Dredging Division operates a fleet of nine 1,000-cubic-yard, bottom-dumping scows. A new series of hydraulic, self-dumping 1,500-cubic-yard scows is scheduled to begin replacing the old scows in 1978.

The crane barge/clamshell dredge U.S. *Goliath*, which is equipped with a 7½-cubic-yard clamshell bucket, was built in 1969 and is the most recent addition to the dredging fleet. She is primarily used for removing large boulders and small shoals in the Gaillard Cut and also provides a floating heavy-lift capability of up to 90 tons.

The drill boat U.S. *Thor* is a diesel, pneumatic-powered drill platform capable of mounting up to four drill towers. The *Thor* is employed in subaqueous drilling and blasting. Such blast fracturing is required in rock areas in order for the dipper dredge to excavate the material. The explosive currently used in these underwater blasting operations is 60 percent ammonium nitrate gelatin dynamite. Water-gel explosives are being tested to determine if they are adaptable to the underwater blasting operations in the canal. The most efficient and economical rock breakage in the Gaillard Cut is achieved by drilling on 9-foot-by-9-foot centers and using a powder factor of 1.5 pounds per cubic yard.

Supporting this dredging fleet is a variety of tugs, launches, work floats, and lighter barges. The frequent movements of this support equipment and the continuous operations of the dredges and drill boat proceed without interference to transiting vessels.

CONCLUSION

In the future, the Panama Canal will require increased dredging to maintain the channel depth. Additional dredging will be required by the channel-improvement projects necessary to maintain the Panama Canal as one of the world's safest waterways and to increase the canal's capacity. The current dredging fleet has a record of successfully completing such projects. When augmented with a new dipper dredge, the new self-dumping scows, and a repowered and modified suction dredge in 1978, the dredging fleet will increase its efficiency and emergency capability for maintaining one of the most economically critical and militarily strategic waterways in the Western Hemisphere.

SOLAR POWER FROM SATELLITES

Mr. KENNEDY. Mr. President, I would like to call my colleagues' attention an articles from the February 1977 issue of Physics Today, entitled "Solar

Power From Satellites." This article was written by Peter E. Glaser, vice president of Arthur D. Little, Inc., and a renowned expert on solar power.

In light of the President's new energy plan, it seems especially timely that we consider prospective new energy sources.

The article discusses the potential for obtaining energy from solar collectors placed in synchronous orbit. This source of energy would be safe and environmentally clean; and given the trend in energy prices, this exciting new technology may prove to be economic as well.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOLAR POWER FROM SATELLITES

(By Peter E. Glaser)

(Figures not printed in the RECORD)

Various alternative energy sources have been proposed in the last few years, many of them figuring in the pages of Physics Today. The recognition that no one of these energy sources will, by itself, meet all future power needs, together with the large uncertainties inherent in the achievement of full potential for each of them, has led to what might appear the most daring proposal so far: large-scale solar-energy conversion in space with a satellite solar-power station located in synchonous orbit around Earth—that is, at an altitude of 22,300 miles above the surface.

The satellite power station could use one or more of several methods to convert solar energy to electricity on a nearly continuous schedule. This electricity could be fed to transmitting antenna in the satellite, and the antenna would direct a microwave beam to a receiving antenna positioned in a direct line of sight on Earth. There the microwave energy could be reconverted safely and efficiently to electricity and fed into conventional power-transmission networks. With additional satellite systems, power could be delivered to almost anywhere on Earth.

Technical and economic feasibility studies of such systems already indicate that they could provide an economically viable, and environmentally and socially acceptable, option for power generation on a scale substantial enough to meet a significant portion of future world energy demands.

Solar-energy conversion in synchronous orbit has many advantages over ground-level conversion. These include:

A satellite in synchronous orbit is exposed to between four and eleven times the solar energy available in those areas on Earth that receive copious sunshine.

The solar energy in orbit is available nearly continuously—the only "blackout is at short periods around the equinoxes when the satellite is in shadow for a maximum of 72 minutes each day (near midnight at the receiving antenna site, when power demands are lowest). Averaged over a year, shadowing by the Earth results in only a 1 percent energy reduction compared with continuous irradiation.

Zero gravity and the absence of wind and rain at the satellite's location would permit the building and use of structures with large area and light weight. The vacuum of space makes unnecessary the evacuated enclosures around microwave generators and other components that are required on Earth.

Because the satellite is synchronous orbit (or, more precisely but less familiarly, "geostationary" orbit) would be stationary with respect to points on Earth, the microwave beam could be directed to receiving antenna sites conveniently close to most major power users—so substantially reducing the length of transmission lines.

The environmental effects of the proposed system are expected to be within acceptable limits. All waste heat associated with solar energy conversion and microwave generation could be rejected to space; no waste products would be generated; the microwave beam densities could be designed to meet international safety standards, and the thermal pollution entailed in the reconversion of microwaves directly to electricity at the receiving antenna would be about one-quarter that of conventional power plants. Furthermore, the receiving antenna would be substantially transparent to solar radiation and open enough for rain to reach the land below it, thus providing opportunities for multiple land use.

Following the original broad concept of the satellite solar-power station, about eight years ago, detailed feasibility and design studies are currently in progress at NASA. Jet Propulsion Laboratory, Boeing, Econ and Rockwell. The industry team working with Arthur D. Little, Inc. had responsibility for different segments of the design: Grumann Aerospace Corp. for structure and transportation; the Raytheon Company for microwave components, and Spectrolab Inc. for solar cells. Details of individual contributions will be found in the acknowledgement note at the end of this article.

Two artist's impressions of the design concept now taking shape at the hands of this team are shown in figure 1 and on the cover of this issue of Physics Today. The current position is that, while the broad outline of the design is beginning to be defined, many options remain within the major areas. Let us look now at the state of development of the technology within each of these major areas, and the options that have been considered.

CONVERTING SOLAR ENERGY IN SPACE

As originally conceived, the satellite solar-power station could use any of several current options for solar-energy conversion [1]—thermionic, thermal electric, photovoltaic, and others that may be developed in the future. Photovoltaic energy conversion, however, appeared to be the most useful starting point because of the widespread experience with solar cells in the space program. The current "baseline" design uses this approach. There are other advantages, too, to the selection of photovoltaic conversion: ERDA's National Photovoltaic Program has as its objective the development of low-cost, reliable photovoltaic systems; and the reduced maintenance requirements of the passive photovoltaic process (as compared to active conversion processes) should lead to increased reliability during the desired 30-year operational lifetime of each solar-power station.

The alternative methods include thermal-electric conversion, where focused solar energy operates a heat engine.[2] Lightweight solar concentrators could focus solar radiation into a cavity receiver, where the heat could be absorbed by a circulating fluid or a gas (say helium) and transmitted to a heat engine, which would in turn drive an electric generator. For reasonable operating efficiencies the overall system would need radiators to reject waste heat to space.

The potential of such a system, particularly one with a Brayton-cycle engine, is sufficient that it is being investigated as an alternative solar-energy converter for the satellite power station.[3] The difficulties however, appear to be formidable, particularly with the need to provide a large waste-heat radiator (about 1 square kilometer in one design) and with the design of the solar concentrators (about 50 square kilometers to drive 48 turbogenerators with an output of 14,000 MW in space).

TRANSMITTING THE POWER TO EARTH

Power generated within the satellite solar-power station could conceivably be transmitted to Earth, 22,300 miles below, either by a microwave beam or a laser beam, or simply by using mirrors to focus sunlight down to Earth.

Of these options, the microwave method alone uses achievable, demonstrated technology to obtain high efficency in generation, transmission and rectification. In addition, it promises to satisfy environmental requirements and safety considerations. The mass production of more than one million microwave devices, serving an annual market of half a billion dollars in the U.S. alone, indicates the degree of commercialization of the technology.

Among the optional transmission methods, the laser beam is not acceptable because of the low efficiencies associated with the conversion of electricity into laser power and to eventual reconversion of laser power into electricity, and because of optical limitations. The absorption of laser beams by the atmosphere and by clouds would reduce the overall efficiency even further, to an unacceptable level, and the risks involved to the general public should the beam-direction control system fail are too great. The third option, concentrating sunlight with mirrors placed in synchronous orbit to overcome the diurnal variation of solar energy on Earth, is equally unacceptable—in part because of the large area of mirrors that would be required in orbit for a reasonable concentration factor at a location on Earth, and in part because of the losses from absorption in clouds. In addition, serious ecological problems might arise from an interference with the diurnal cycle if this scheme were employed.

THE CURRENT DESIGN CONCEPT

The design study to be described here represents the present stage of evolution of a series of theoretical, technical and economical studies—which are still in progress. This design [4] uses silicon solar cells in combination with solar reflectors to convert solar energy into electricity, and it has the potential for large-scale power generation, delivering from 2,000 to 15,000 MW to Earth. The lower end of this range represents a satellite power station that could be used to meet incremental capacity demands, and the upper end one that would eventually replace conventional power plants.

Present silicon solar cells are about 200 microns thick and have efficiencies up to 15%. The current design uses silicon cells mounted on rigid substrates with cover glasses bonded to the solar cell for radiation shielding. Flexible substrates with printed circuits to which solar cells can be soldered or welded are being developed for other space applications and may prove superior.

The efficiency of silicon solar cells has been steadily increasing, due to such techniques as shallow diffusion to increase uv response, non-reflecting solar-cell surfaces, antireflective coatings to improve uv resistance, reduction of current-conductor size to increase the active area, and doping to reduce the degradation of performance induced by energetic solar radiation. The best present-day technology suggests a weight-to-power ratic of about 14 kg/kW, but projections based on improvements expected in the next ten years indicate that 1.4 kg/kW may be achievable. These figures are for designs that incorporate solar concentrators with reflective-film mirrors coated to divert solar radiation onto the cells and filter out undesirable portions of the solar spectrum.

Exposure to the space environment will

Footnotes at end of article.

degrade the silicon solar cells logarithmically, with about 6% of the original efficiency being lost after the first five years. For the thirty-year lifetime of a satellite power station, calculations suggest that one per cent of the cells will be affected by micrometeorite impacts.

The present stage of evolution of satellite solar power station design studies is represented in figure 2. This shows two solar collector panels, each 5.92 km × 4.93 km, together producing a power output of about 9300 MW (resulting in an effective power output at the receiving antenna on Earth of about 5000 MW). Rigidity of this double array is provided by a central mast 100 meters in diameter and a stiffened skeletal structure running through the assembly. Between the two panels is a microwave transmitting antenna; the panels will face the sun continuously while the microwave antenna rotates once each day (with respect to the panels) to face the receiving station. Only the rotating joints necessary for antenna orientation are "active" in what is otherwise a passive satellite.

The entire structure is subject to thermal stresses and distortions induced by thermal gradients during the equinoctial eclipses when the satellite passes through Earth's shadow. The longest eclipse duration is 72 minutes. For such a large structure, oscillations caused by this thermal exposure could be a problem. Fatigue effects might shorten its service life. Structural-design approaches that would minimize the effect have been identified, but more detailed evaluation of the problem is still necessary.

Obviously the satellite must remain fixed in its geostationary orbit at all times, despite the orbital perturbations (some of which are identified in figure 3) that threaten to move it from the desired spot. Ion engines, possibly fueled by argon, will be needed to keep the power station in the appropriate orbit and to maintain orientation of the solar panels towards the sun and the microwave antenna towards the receiving antenna on Earth. The quantity of propellant required for this stationkeeping and attitude control is around 50,000 kg per year.

The total mass of such a power station (delivering 5000 MW at the receiving antenna) amounts to 18.2×10^6 kg, not including consumables. Most of this mass, 12.4×10^6 kg, is in the solar arrays with the transmitting antenna adding 5.5×10^5 kg and the remainder being made up by the control system and the rotary joint. The weight/power efficiency ratio of 3.6 kg/kW is remarkably low, compared with that of terrestrial systems, and demonstrates the advantages to be gained by placing the solar energy conversion system in synchronous orbit.

MICROWAVE POWER TRANSMISSION

Free-space transmission of power by microwaves is a relatively new technology, but it has advanced rapidly and can already show system efficiencies of 55% including the interconversion between dc power and microwave power at both terminals.[5] Figure 4 is a block diagram of the system designed for the satellite solar-power station,[6] with the efficiency goals of each stage.

For converting the dc voltage output from the solar cells to rf power at microwave frequencies either an Amplitron or a klystron may eventually be selected. The Amplitron [6 7] is a cross-field amplifier with a cold platinum cathode operating by secondary emission to achieve very long life. The Amplitron requires 20kV dc voltage. The weight of the unit can be low enough for this satellite application if special materials are used in its construction—samarium cobalt for the permanent magnet and pyrolitic graphite for the space radiators. The specific weight and cost of the Amplitron are optimum at a frequency in the industrial microwave band 2.40–2.50 GHz and at a power output around 5 kW.

The klystron, a linear beam device, differs from the Amplitron in being a high-gain device with an efficiency only modestly high (70–80 percent), in contrast to the low-gain Amplitron efficiency of perhaps 90 percent. Klystrons have low noise properties, whereas the Amplitron's noise behavior is still unknown in this application.

In terms of cost and weight, the klystron is both more expensive and heavier than the Amplitron. But fewer and higher-powered klystrons (such as solenoid-focussed units with outputs greater than 50 kW instead of the conventional low-powered, permanent-magnet-focussed klystrons) could simplify the orbital assembly task.

Space is an ideal medium for the transmission of microwaves; an efficiency of 99.6% is thought to be possible for propagation from the point where the beam leaves the transmitting antenna to a point above the upper atmosphere. To ensure high efficiency in transmission for the lowest cost, the geometric relationships between the two antennas [7 8] indicate that the transmitting antenna should be about 1.0 km diameter and the receiving antenna about 10 km diameter.

The transmitting antenna is designed as a circular, planar active phased array, divided into a large number of subarrays, each approximately 20 meters square. Much emphasis has been placed in the design study [9 10] on the phasing control system to ensure high efficiency, good pointing accuracy and safe operaiton of the microwave beam.

Absorption, refraction and scattering effects in the ionosphere are expected to be negligible at the low microwave power densities being considered.

Down on the ground the receiving antenna will be, according to the current design study, an array of elements to absorb and rectify the incident microwave beam; in each element will be a half-wave dipole, an integral low-pass filter, a diode rectifier and a bypass capacitor. The dipoles will be dc-insulated from the ground plane and appear as rf absorbers to the incoming microwaves. The design study shows the dipoles spread about 0.6 wavelength apart, arranged in a triangular lattice about 0.2 wavelength from the ground plane. This distance can be adjusted (within limits) until there is a good match between the specific dc load impedance and the incoming microwave beam. This match can approach 100 percent; reflection losses of less than 1 percent have been achieved experimentally. Tests on the entire "rectenna" element in its current state of development show an efficiency of 90 percent.

The power density at the receiving point will always be a maximum at the middle of the beam, decreasing with distance from the center. The overall size of the receiving array will be determined by the radius at which the collection and rectification of the power becomes marginally economical. It can be made 80 percent transparent, so that the land underneath could be put to other uses. Heat generated during the rectification stage (in Schottky barrier diodes made from gallium arsenide material) will amount to less than 15 percent of the incoming microwave radiation—a source of thermal pollution lower than that of any known thermodynamic conversion process.

The JPL Venus antenna site at Goldstone, California was the location of tests [10] in Summer, 1975 of a 24-square-meter array of microwave rectifier elements constructed according to this design study. The transmitting antenna for these tests, an 86-foot-diameter dish, was about one mile from the receiving array. At a radiated frequency of 2388 MHz, incident peak intensities of up to 170 mW/cm² yielded as much as 30.4kW of dc power output from the array. This represents a combined collection and rectification efficiency under these conditions of more than 82 percent.

TRANSPORTATION, ASSEMBLY, MAINTENANCE

So far we have discussed efficiency and economics only for a satellite power station fully assembled, in working order and "on station" in its geostationary orbit. But obviously the components have to be transported from Earth to that position, they have to be assembled into the operating array, and the working power station will presumably need maintenance from time to time during its 30-year life. The costs of these operations will clearly have a great impact on the economic feasibility of the project.

As currently foreseen, transportation will be a two-stage process—one stage to low Earth orbit and a second delivering partially assembled components into synchronous orbit.[11] The first stage, as presently considered, will utilize either a modification of the space shuttle, which is already well along in its development, or a new heavy-lift launch vehicle. The cost for a modified space shuttle capable of lifting payloads of 80,000 kg to low Earth orbit is projected to be $200–400 per kilogram; with a specially designed heavy-lift launch vehicle these costs could fall to $40–120 kg (figure 5).

Each complete satellite power station will need from 60 to 100 individual flights of heavy-lift launch vehicles. The limits on lifting capability may be set more by the available volume than by the weight-lifting performance of each flight; although some deployment of prefabricated structures (such as the transmitting antenna) at low Earth orbit is desirable, there is a limit to the amount of folding and compressing that can be achieved.

After assembly in low Earth orbit the satellite power station could be lifted to synchronous orbit by ion propulsion. The many challenges inherent in the development of a low-cost, heavy-lift space transportation system for this stage are currently being explored.[12]

To assess maintenance costs before experience is gained with a working satellite power station is obviously difficult depending as it does on a knowledge of the reliability of the entire system. The costs can be reduced by using a large number of identical components (for example, the solar cells) for redundancy. Also the cost of performing repairs must be compared with the "cost" of delaying repairs and accepting potential loss of revenue. The eventual goal, of course, is the evolution of a completely maintenance-free system.

One option that must be considered under the general heading of "assembly" is that certain components could well be actually manufactured in space.[13] For example, silicon crystals suitable for solar-cell manufacture could be grown in the space station from purified silicon produced on Earth, thereby obviating degradation during passage through the Van Allen belt. Fabrication and assembly of structural components could be done in orbit from appropriately prepared flat-rolled stock.[14] These and other similar techniques would ease the transportation problem because the materials would be lifted into orbit in their most compact form, so reducing the number of orbital flights required. NASA's present study [15] of the role of space stations is the logical first step in the establishment of such space manufacturing activities.

ENVIRONMENTAL IMPLICATIONS

The benefits of this (or, indeed, any) large-scale power generation system must be weighed against potential dangers to human health, destruction of valued natural resources, and intangible effects that might influence the "quality of life." Failure to take these steps is demonstrated by the difficulties met by such counter-examples as the supersonic transport aircraft, nuclear power, and interstate highways.

Footnotes at end of article.

The major social costs of environmental impacts of the satellite solar-power stations appear to lie in: resource allocations (land management, energy requirements for both construction and operation, etc.); environmental degradation (waste heat disposal, interactions with the upper atmosphere, environmental modifications, etc.), and public safety (long-term exposure under normal operations, effects on communications, safety under accident or abnormal situation, continuity of power generation and effects of interrupted operations, etc.).

Specific examples of environmental impacts are:

Waste heat released at the receiving antenna site could be limited to 16 percent of the rectified power, which is, as stated above, much less than from alternative power-generation methods.

Land despoilment. Land use per power station would be about 270 km²; but as stated earlier the receiving antenna would be about 80 percent transparent to sunlight, impervious to rain, and no barrier to the productive use of land beneath it. There need be no microwave radiation beneath the antenna, and transportation of supplies to the site (and maintenance operations) would be infrequent compared with conventional power plants. Offshore locations could be considered as antenna sites.

Resource consumption. The materials necessary for construction are largely those in plentiful supply, such as silicon and aluminum. Each satellite power station would need less than 2 percent of the yearly supply of critical materials, such as platinum, available to the U.S.

Energy consumption. The energy required to produce the materials for power-station construction and the propellants to place each satellite into orbit would be regenerated in about three years of operation.

Atmospheric pollution. Space vehicles using liquid-hydrogen and liquid-oxygen propellants are expected to add primarily water vapor to the atmosphere. Heating of the atmosphere would be very small.

Ionospheric interactions. At a microwave power density of 20 mW/cm² or less within the beam no interactions are expected with the ionosphere. Changes in electron density caused by power densities greater than 20 mW/cm² and frequencies higher than 2.45 GHz, however, need to be investigated for possible effects on other users of the ionosphere.

Microwave exposure can be controlled by providing suitable enclosures for the maintenance crew working on the receiving antenna. Beyond 10 km from the beam center the microwave power density would meet the lowest international standards for continued exposure to microwaves. If the microwave-beam pointing system were to fail, the coherence of the beam would be lost, the energy dissipated, and the beam spread out so that the energy density would approximate communication-signal levels on Earth. The effects on birds and on aircraft flying through the beam are projected to be negligible, but they should be experimentally determined.

Radiofrequency interference by the fundamental microwave frequency and its harmonics, turn-on and shut-down sequences, random background energy and other superfluous signals emanating from the microwave-generation devices could be controlled by filters, choice of frequency and narrow-band operation. The effects on radioastronomy, shipborne radar and communication systems will need to be determined before specific frequency allocations can be made. It appears very possible, for example, that amateur sharing, state-police radar, and high-power defense radar will suffer substantial interference if 3.3 GHz is chosen as the fundamental frequency.

ECONOMIC IMPLICATIONS

The results of investigations[15] made to compare the economics of the satellite solar-power station with those of the other alternatives show that an operational 5000-MW power station would cost about $7.6 billion, or about $1500 per kilowatt. Figure 6 shows the breakdown of this total. Note that the largest cost element is for space transportation, which indicates that improvements in efficiency and in weight reductions would be significant.

For an operational life of about 30 years the cost of power at the bus bar would be 27 mills/kWh. Expected life-cycle revenues will be about $35 billion for each satellite power station, while operating costs will amount to $4.2 billion for the same period.

Of course the development program will be expensive—say $20 billion for the power-station technology and another $24 billion for the transportation system and related matters—but these costs would be repaid if 60 satellite solar-power stations were operating by the year 2014 (assuming that the cost of generating electricity by alternative means averages 35 mills/kWh). This number of satellite power stations would provide at least 10% of incremental installed generation capacity in the U.S.

Figure 7 compares the range of projected generation costs for fossil-fueled and terrestrial solar-power systems with those of the satellite solar-power system. A 5000-MW operational satellite power station will be cost-effective with fossil fuels at the projected bus-bar cost of 27 mills/kWh. Between 1995 and 2025, coal prices are projected to rise by as much as 5% because of increased production costs and the additional cost of pollution-control equipment. The relative price rise of oil is expected to be more pronounced; indeed, it is unlikely to be available at any price after 2000 for large-scale power-generation purposes.

The development program for this project, by any measure a major program ranking with nuclear fission and fusion or satellite telecommunications in scale of effort, will demand careful planning. The best route appears a three-phase program: a first phase of technology verification, largely carried out on Earth, and culminating in an orbiting test facility; a second stage leading to a prototype system (say 200–750 MW), and finally the mass production of full-size units with the goal of at least a hundred 5000–MW stations by 2025.

Since the concept was first proposed in 1968, academic, industrial and government groups in the U.S. and abroad have been assessing the feasibility of the satellite solar-power station. These studies find the concept to be promising, both technically and economically, and environmentally acceptable. They also find that critical developments in technology needed for the satellite power stations would be useful contributions to other worthwhile developments in space and on Earth—and, conversely, developments already being studied for advanced space-transportation systems, solar energy conversion systems, and other related programs could be of help to satellite power-station technology.

This undertaking, because of its magnitude, worldwide implications on energy availability and potential for the industrial use of space, could benefit many countries. Agreements on such matters as frequency assignments, launch sites and receiving-antenna locations would then become areas of international concern, and decisions would need to be made in the common interest as we look forward to a new era of worldwide energy resource development.

(I am most grateful for the support by NASA during the early investigations of the satellite solar-power station and the valuable comments and suggestions provided by its technical staff at the Johnson Space Flight Center in Houston, Texas and the Marshall Space Flight Center in Huntsville, Alabama. I particularly valued discussions with William Lenoir, who headed the Satellite Power Team investigations at NASA. The evolution of the concept would not have been possible without major contributions by the following members of the satellite solar-power station industry team: R. Kline, of Grumman Aerospace Company; O. Maynard and W. Brown, of the Raytheon Company, and G. Ralph, of Spectrolab, Inc. I thank my associates at Arthur D. Little, Inc., for their suggestions and contributions, which helped define the challenges that will have to be met to realize the potential of the satellite power station, and the support provided by my company during the evolutionary period.)

(This article is an adaptation of a talk presented at the annual meeting of the Optical Society of America, in Tucson, Arizona, in October 1976.)

CONCURRENT RESOLUTION PASSED BY THE SOUTH CAROLINA LEGISLATURE SUPPORTING A NEW NATIONAL CEMETERY FOR SOUTH CAROLINA

Mr. THURMOND. Mr. President, on January 18, I introduced S. 321, a bill to provide for the establishment of a national cemetery in the State of South Carolina to be situated at or near the city of Columbia.

As indicated in my remarks on that date, the existing national cemeteries in our State are practically filled and are poorly situated to serve the needs of South Carolina's veterans population. A new cemetery facility in the Columbia area would be centrally located in the State and would serve the greatest burial needs of our State's 383,000 veterans.

In some locations, there appears to be a lack of common support for veterans cemeteries. This is not so in South Carolina. Not only do our Senators, Congress, veterans, cities, and towns want a new cemetery, but the people want it, along with the individuals who represent them at the State level of government.

As a gesture of popular support for this cemetery, on March 17, five outstanding Senators in our State legislature, Senators Heyward E. McDonald, Hyman Rubin, Alex Sanders, John A. Martin, and Isadore E. Lourie, introduced a concurrent resolution in the South Carolina Senate which memorializes the Congress to act favorably on S. 321. This resolution was passed by both Houses, and copies were dispatched to the President and Members of the Congress.

Mr. President, I ask unanimous consent that a copy of this concurrent resolution be printed in the RECORD at the conclusion of my remarks. I also ask unanimous consent that a copy of an editorial which appeared in the State paper of March 23, 1977, and which supports the establishment of a new cemetery in our State be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CALENDAR No. S. 339

A concurrent resolution to memorialize Congress to enact S-321 which provides for the establishment of a national cemetery in the State of South Carolina at or near the city of Columbia.

Whereas, on January 18, 1977, Senator Strom Thurmond introduced a bill in the United States Senate designated as S-321 which provides for the establishment of a national cemetery in the State of South Carolina at or near the City of Columbia; and

Whereas, at the present time there are three hundred eighty-three thousand veterans in South Carolina and seventy percent of these live within a hundred-mile radius of the state capitol in Columbia, the proposed site for the new national cemetery; and

Whereas, South Carolina needs additional burial space to meet the present and future needs of our State's veteran population; and

Whereas, veterans who have served their country and who wish to be buried in a national cemetery should have that privilege offered to them in a cemetery as close as possible to their homes. Now therefore,

Be it resolved by the Senate, the House of Representatives concurring:

That the members of the General Assembly hereby memorialize Congress to enact without delay S-321 which provides for the establishment of a national cemetery in the State of South Carolina at or near the City of Columbia.

Be it further resolved that copies of this resolution be forwarded to the President of the United States, each United States Senator from South Carolina, each member of the House of Representatives of Congress from South Carolina, the Senate of the United States and the House of Representatives of the United States.

[From the (S.C.) State, Mar. 23, 1977]

FOR THOSE WHO SERVED

Economy is the watchword in Washington these days, at least with respect to federal programs and procedures which have no sizable constituencies. It is with some reluctance, therefore, that The State suggests congressional consideration of a proposal which may require several million dollars as an initial outlay.

We refer, however, not to a new program but to the implementation of a continuing program of vital concern to all American families which have been associated with military service. In short, our interest lies in the possibility of Uncle Sam's establishing a national cemetery in the vicinity of Columbia. (Fort Jackson is a location which comes readily to mind, in the interests of both economy and convenience.)

At present, there are more than 380,000 veterans living in South Carolina, about 70 per cent of them within 100 miles of Columbia. Since the state's two national cemeteries, small installations at Florence and Beaufort, are filled, a new site is needed if the nation is to provide burial facilities for those veterans who are entitled to that recognition.

There is no question as to the need of additional cemeteries, not only here but throughout the nation. And the problem facing the Veterans Administration is where to authorize additional cemeteries as funds are made available by Congress. There is talk of providing an additional cemetery in this region. South Carolinians are hopeful that the location will be chosen within the state.

Indeed, bills by Sen. Strom Thurmond and Rep. Floyd D. Spence, now pending in Congress, would authorize a cemetery for the Columbia area. And a concurrent resolution endorsing such federal legislation is pending in the General Assembly under the sponsorship of the Richland delegation in the state Senate.

In the private sector, Columbians Henry J. Winn Jr. and C. H. Jennings are using their best efforts to secure a cemetery for this area. They subscribe wholeheartedly to Senator Thurmond's contention that "veterans who have served their country and who wish to be buried in a national cemetery should have that privilege offered in their own state.

If, as seems indicated, the Veterans Administration plans to establish another cemetery in the Southeastern region, let us hope that South Carolina's claim will be considered—and accepted.

NEW NATURAL GAS RECOVERY METHODS AND COAL GASIFICATION PROJECTS AT MORGANTOWN, W. VA., OFFER HOPE IN ENERGY CRISIS

Mr. RANDOLPH. Mr. President, the administration's legislative proposals on energy presented to the Congress last night perhaps leave something to be desired by all of us. I personally believe his proposals on how to increase coal production and greater utilization of coal as a primary energy resource are a somewhat disappointing.

President Carter's program does not include a comprehensive plan for synthetic fuels development. Coal conversion for heating and electric power alone cannot achieve the goals of self-sufficiency we must achieve. There must be increased emphasis on new technology and new utilization of coal, particularly in the production of synthetic fuels to augment or supplant our dwindling oil and natural gas supplies.

On Saturday, April 16, I spent several hours at the Morgantown Energy Research Center at Morgantown, W. Va., reviewing their programs and soliciting comments relative to our serious energy crisis. I was extremely impressed by the wide scope of projects, all of which offer relatively short-term and dramatic contributions to our energy deficiencies Many of these programs reflect my continued advocacy of fossil energies expressed over the last 30 years. I shall report to Dr. James Schlesinger, President Carter's energy chief, that:

First. Morgantown is leading in the work of obtaining natural gas from the Devonian shales. These are very tight shales which until recently have been bypassed by the major natural gas companies because of their relatively low production. However, the States in the Appalachian Basin, Michigan Basin, and Illinois Basin have tremendous gas reserves which provide local self-help potential. Some of the longest lived gas wells in the United States are Devonian. The Morgantown program is an integrated resource determination activity involving many State geological surveys, universities, and gas companies. My own personal experience has been that gas can be obtained just about anywhere you drill in these areas; hence, we must accelerate our work in better, more efficient extraction and convey the results to potential users.

Second. Another program under research and development at the center is fluid-bed combustion. I announced a year ago ERDA's intention to build a large test unit which would serve as a cornerstone for the implementation of direct coal combustion in an environmentally acceptable manner. In addition to ongoing laboratory research, ground will be broken this summer for a 6 megawatt component test unit at a substantial cost on the West Virginia University Medical Center campus. Such efforts should be greatly accelerated since they offer attractive near-term technology. Not enough resources are available in support of direct combustion of coal. This must be remedied.

Third. Morgantown has a low-Btu gasifier being renovated on an accelerated schedule to provide the means and technologies to support the large low-Btu gasification program of ERDA. This work includes cleaning the gas streams to be environmentally acceptable and also addresses critical mechanical problems associated with direct coal conversion.

Fourth. Another vital program under-

way here involves extracting methane from coal seams. In the Appalachian area the deep coals contain much pure methane gas which requires ventilation to insure safe mining operations. Programs at the laboratory are underway on a modest scale to essentially remove this methane prior to mining operations, providing a source of gas for consumption and at the same time improving the safety of the mining operations. The work is being sponsored by the Conservation Division of ERDA, and builds on the work by the U.S. Bureau of Mines. The project is challenging and, if successful, will provide a ready source of methane gas in the Appalachian area.

My colleagues are aware of my longtime concern for the Federal Government's recognition of the importance of coal to the United States. In 1944, for example, while a Member of the House of Representatives, I cosponsored with Senator Joseph O'Mahoney of Wyoming, the Synthetic Liquid Fuels Act. The enaction of this legislation led to the creation of what is now the Morgantown, W. Va., Energy Research Center, and similar research facilities across this Nation.

The Morgantown Energy Research Center has considerable strength and pursues active programs which I believe gives it preeminence in the following areas:

Natural gas (which includes methane from coal);

Underground coal gasification of Appalachian coals;

Indepth knowledge and active programs to make coal conversion and utilization processes environmentally acceptable; and

Direct coal combustion

I was impressed by the programs and enthusiasm manifested by the people at the Morgantown Energy Research Center. This center must be placed in a position to make major contributions to help solve the Nation's energy crisis. I shall urge that adequate resources be made available to utilize and expand the capabilities of the center.

RECENT SPEECH ON SMALL BUSINESS BY SENATOR NELSON

Mr. PACKWOOD. Mr. President, under the leadership of my distinguished colleague, Senator NELSON, the Senate Small Business Committee has embarked on a vigorous program of committee hearings and new legislative proposals. With these actions, the committee has begun cutting through the thicket of regulations, discriminatory taxes, and paperwork requirements entangling small businesses.

In the Small Business Committee and in the Finance Committee, where I also serve with him, Senator NELSON has time and time again pressed for fairness and equity toward the small business community. Perhaps more than any other individual, Senator NELSON has proven himself a highly effective defender of the individual entreprenuers and independent businesses of this country. An indication of this can be seen in a measure which Senator NELSON recently sponsored—Senate Resolution 105, calling on President Carter to convene a White House Conference on Small Business—which passed the Senate unanimously. I suggest that this resolution reflects the growing public support for strengthening America's locally owned businesses. Some credit for that support can also go to Senator NELSON, whose public statements on small business have been eloquent and forceful.

Mr. President, I would like to call the Senate's attention to a recent such statement by Senator NELSON. It is a speech he delivered in his home State of Wisconsin, to the Whitewater Area Chamber of Commerce. I commend it to the Senate as an apt summary of the dilemmas and potentials of small business.

I ask unanimous consent that the speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR GAYLORD NELSON

Almost ten centuries ago, in the year 999, people all over Europe began hiding in caves and forests. They were sure, because their soothsayers had told them so, that the world would end in the year 1000. Everyone knew that a number as significant as 1000 was bound to mean a turning point in history. From all indications, however, it was a pretty normal year. But soothsayers ever since have been constantly predicting new turning points. A few years back, a man convinced a group of people to follow him into the Ozark Mountains to wait for the Second Coming, which he freely predicted for 1975. As far as I know, it didn't happen. But those folks in the Ozarks may still be waiting.

Although it's nearly impossible to predict a turning point in history, it's almost as tough to identify one while it is actually going on. If a boy who hid in a cave in 999 witnessed, as an old man, the Battle of Hastings, it's unlikely he would have thought of it as a turning point in English history. If those who celebrated our bicentennial last year had been around in 1776, probably most of them would have said the Declaration of Independence was an event of local or national significance. Few would have called it a turning point in the history of thought. It was just that, though. The Declaration of Independence asserted our freedom from Britain, of course, but it did much more. For the first time in history, the right to take part in governing was asserted in the name of a whole people. "When in the course of human events," Jefferson wrote, "it becomes necessary for one people to dissolve the political bands. . . ."

After 1776, the notion that participation was the exclusive rights of kings and nobles went into a steep decline. Indeed, the American constitution created legal mechanisms to assure that economic differences which did exist would not lead to political inequalities based on wealth.

When Jefferson was asked to discuss the qualities of the ideal citizen, he singled out for praise the independent farmer-businessman. Jefferson felt that these kind of entrepreneurs contributed much to a society. As pioneer business people, they participated in economic life, learning self-confidence, developing their imaginations and providing an active spirit a new nation needed. In short, they formed a stable social foundation.

That foundation grew. When the French observer de Tocqueville toured the United States in the 1830's what caught his eye was not the massive new canals and turnpikes being constructed by a new country, but what he called "the multitude of small undertakings"—the hardy entrepreneurial activities.

An economic system that welcomed newcomers attracted waves of immigrants, and America was enriched in countless ways. Along with individual rewards like economic self-sufficiency and feelings of personal worth went public rewards like job opportunities and economic development. Technical innovation blossomed. The cotton gin, the steam engine, the telegraph, the harnessing of electric power, the electric light, the automobile, electric refrigerators, stoves, vacuum cleaners, air conditioners, toasters, power steering, jet engines, photocopy machines, FM radios—and the list goes on—all were the work of individual entrepreneurs and small business. They were developed by people whom our economic system encouraged to use their ingenuity to adapt the laws of nature for the benefit of mankind.

Recently, however, our highly productive individual enterprises have been threatened by a spate of takeovers by big business. Big corporations have become very skilled at circumnavigating antitrust laws, and mergers are gathering momentum. Particularly in the last two decades, the giant corporations have consolidated horizontally and vertically, spanning diverse geographic areas and product markets. Dollar losses in one geographic area or product line have been cross-subsidized by profits from others In some entire areas of the economy, prices no longer reflect costs or competition. Secure in their huge shares of various markets, the corporate giants have even flaunted falling demand by raising prices—as we've recently seen with sheet steel. So production falls, workers are laid off, and economic havoc ensues.

Without the discipline of a free market, a vortex of mergers, acquisitions, stock transfers, tax loopholes and tender offers—that's an irony, "tender offers"—have come together to sweep away one small business after another. Ownership of this country's productive capacity has steadily narrowed. In 1948, the 200 biggest corporations controlled less than half of the manufacturing assets. Today, they control almost 70 percent of those assets. A massive change has taken place in just 30 years.

Concentration in the economy has powerful social consequences. Businesses acquired by the big corporations have their top management, and sometimes their entire workforces, pulled out of smaller communities and packed off to already overcrowded urban centers. And absentee owners, like absentee landlords, generally don't keep up the property. Study after study has shown that towns dominated by absentee-owned companies show numerous signs of civil neglect when compared to towns with owner-managed companies. Gary, Indiana, is a good example. It's one of the richest towns in America, but its absentee owners have turned it into a prize example of urban decay and pollution. You can bet Gary would look a lot different, though, if the boards of directors of the big steel companies had to live there. Moving management out means cuting off trade with local suppliers, local banks, and local advertising. It initiates a destructive cycle.

All of this may show that the conglomerates have bad digestion, but it hasn't affected their appetites. During one recent seven-year period, one conglomerate, ITT, absorbed 54 domestic and 55 foreign companies. The domestic acquisitions alone were valued at over $2½ billion. These international Goliaths control empires on which the sun never sets. They dwarf the size and power of most sovereign nations. Many, like the oil companies, control their own supplies and distribution, and try to drive independents out of the market. And many, such as the oil companies, now flood the media with expensive

ad campaigns depicting themselves as civic-spirited defenders of private enterprise—the very system they assault daily through their public power. Phillips Petroleum recently spent over a million dollars running a TV "image" ad promoting American free enterprise. Then they spent another quarter million urging other corporations to be good citizens by underwriting a repeat of the ad campaign. Meanwhile, Phillips was being fined on charges of price-fixing and making illegal campaign contributions.

Abuses of our competitive process have decreased our economic efficiency—lengthening recessions and keeping inflation high. These kinds of abuses have brought government regulations into the marketplace. But regulations designed for big business are fiercely resisted by their teams of lawyers and accountants. So the heaviest regulatory burden ends up falling right back on small business. The regulatory burden is becoming so heavy it's now a part of the whole trend of shutting small business out of the marketplace.

Loss of participation in the marketplace would bring on many of the consequences Jefferson warned of. It would put economic power beyond the reach of the majority. It would surely disrupt our smaller cities and towns. But worst of all, it would remove the incentive for people with new products and processes to enter the marketplace.

The ancient Greeks had a myth about ships that set out to sea. They believed that if a ship ventured very far, two giant rocks called Scylla and Charybdis would crash together in an attempt to smash the ship between them. Today small business is forced to navigate between the twin rocks of big business and big government. Many small businesses are smashed between those rocks.

What those of us in the government can do to help is to create a climate of taxes, paperwork requirements and regulations which is favorable to small business. We have made some progress. Last year we increased the estate tax exemption from $60,000 to $425,000 for a spouse. We increased that estate tax exemption to $175,000 for an heir. We increased the surtax exemption and the capital reserve exemption, and held onto our tax cuts for small business through a tough Senate floor fight. So we've begun correcting the loopholes which allowed major corporations to pay taxes at the rate of about 22 percent while small businesses were paying about 48 percent.

We're looking for ways to reduce the $40 billion a year paperwork burden, too. One change we recently made stipulates that all new laws affecting small business must include a "paperwork impact statement." Now Congress will know before it votes on new programs just how much paperwork they will create. We've also found shortcuts around some paperwork. For example, the IRS used to require that form 941 be filed every quarter. Starting in 1978, it will be reduced to one filing a year. This will save millions of dollars and eliminate a stack of paper two miles high.

Regulations are being simplified, too. We were able to reduce one 16-page pension notice to 5½ pages. But the laws are still too complex. The IRS regulations alone take up over two feet of shelf space. And the Occupational Health and Safety manual first distributed to small businesses contained over 330 pages of regulations, including 30 pages on ladders.

A lot of these verbose regulations could have been greatly simplified if small business had just been consulted in advance. So we're pushing to get a better voice for small business within the Federal Government. We've insisted on having small business advocates placed in the procurement offices. We've strengthened the program of federal set-asides for small business. We passed legislation to increase small business' role in energy development. Thanks to efforts like these, federal buyers, especially in the Pentagon, are farming out more procurement dollars to small business.

Another area we're trying to clean up is the whole product liability insurance mess. The number of product liability suits has soared from 50,000 ten years ago to over a million last year. Average awards have skyrocketed 686 percent in eight years. In the ensuing insurance industry panic, many small businesses have been denied product-liability coverage. Many others have been faced with catastropic premium increases. So we've introduced a bill to have the Small Business Administration offer back-up coverage to insurance companies that agree to provide reasonably-priced product-liability insurance for small business.

But product-liability is a complex problem. Like so many small business problems, it touches the administrative, executive, judicial and legislative processes of government. We need united government action on a broad front to combat these problems.

These pressures on small business add up to an almost unpublicized but highly significant turning point in economic history. We're going to have to decide very soon which way American business will head. This country was built on a solid base of individual enterprise, individual inventiveness, and innovation. This system of entrepreneurship has been constantly tested, strengthened and refined in the toughest of all arenas, the free competitive marketplace.

For more than two centuries, the vitality of this system has been constantly renewed and refreshed by infusions of new blood from millions of people who had new ideas, hopes and desires for self-expression through the creation and management of their own independent farm or business or enterprise.

If in fact we are at a turning point in history, as I think we may well be, then which way shall we turn?

If independent entrepreneurship is an important concept from an economic, social and cultural viewpoint, what should we do to strengthen it? What questions should we be asking, and what answers should we be seeking?

First, what is a small business? How can we define it?

Each of us might define it differently in statistical terms. We would probably all agree that sole proprietorships, 10 employees, 50, 100, 200 or 500 employees is a small business. Most of us, including myself, would probably agree that 1,000, 1,500 or 2,000 employees and more is still a small business. Beyond that, it is difficult to draw the lines precisely between small, medium and large business. In any event, exactly where those lines are drawn does not go to the heart of the matter. When we talk about small business we are talking about independent small business. We are talking about local ownership, local management, and local control. We are not talking about subsidiaries or branches of large conglomerates and major corporations no matter how small the branch or the subsidiary.

Small business, so defined, provides 52% of all employment in the United States; it provides 48% of the business output; and it provide 43% of the gross national product. Small business, so defined, includes 97% of all American business.

Yet small business is besieged with outside pressure. When the Small Business Committee investigated tax laws, we found a discriminatory structure where small businesses were paying twice as high a rate on the average, as big business.

We found small businesses unable to raise capital, despite sound management and excellent growth prospects. We found the kind of anti-competitive practices by large corporations that I've mentioned. We found laws that almost compel mergers instead of strengthening business independence. We found oppressive and unnecessary local, state and federal regulations—many of them overlapping—tangling up small entrepreneurs. We found massive, redundant paperwork requirements, three-fourths of which could be eliminated. We found government contracts 80 percent dominated by big business. We found government research 90 percent controlled by big business.

The first big step we need to take is to develop a heightened public awareness of the dilemma of small business.

Professor Irving Kristol wrote in the Wall Street Journal that the small business person has become an "invisible figure"—

"No one is leading a crusade against him, and . . . no one really wants to. He is merely being chided, harassed, ruined and bankrupted by a political process that takes him for granted and is utterly indifferent to his problematic condition."

Another author recently added:

"[the independent entrepreneur's] . . . elbowroom is being narrowed down; his chance to exercise initiative, courage, and energy which are the characteristics of true "enterprise" are diminished. The small man's enterprise is being increasingly frustrated."

Our first order of business must be to give these issues national attention. At the urging of the Small Business Committee, the Senate has now called for a White House Conference on Small Business.

Since the last such Conference in 1956, the status of small business has not been evaluated on a government-wide basis. We need this Conference so we can provide a national forum of high visibility—a focal point—where the small business community can work with experts from around the country in setting up an agenda for concerted action to aid small business. The Conference will evaluate the problems facing small business at the national level, at the state level, and at the local level. The Conference objective will not be to subsidize or shelter small business, but to create a climate in which our native inventiveness can flourish.

The Conference will point out the barriers to entry into small business and the struggles required to stay in business. It will help get rid of handicaps facing independent business—like tight capital and credit markets, unfair competition from big business, and excessive government regulation. But perhaps the most important initiative the Conference will take is to call America's attention to the importance of small business—its innovativeness, its efficiency, its community orientation, and its advantages as a fulcrum for increasing nationwide employment. That's what we need right now—a national dialogue on strengthening America's owner-managed enterprises and a visible reminder that there's more to America's business than the Fortune 500. What's important is not only to improve the climate for individual initiative, but to get people thinking about it and talking about it. Then we can initiate the most lasting process of change—grass-roots change.

Predicting turning points, as I said before is a risky undertaking. But perhaps we are beginning to see, in the broad outlines of our economic development, a choice that will soon confront us. It's fundamentally a choice between the big and the small. It's a choice with many dimensions—a choice between family farms and corporate agribusiness, between renewal of our countryside and suicidal overcrowding of our cities, between craftsmanship and rote work, between community-oriented businesses and multinational conglomerates, and between governmental policies which favor some of these choices over others.

By helping small business, we would be

doing more than preserving jobs and communities. We would be preserving and reasserting the precious right of participation in the marketplace.

Our turning point, when it comes, won't occur at a single place in a single moment. There probably won't be a certain document or a certain person at the center of it.

No, the turning point will come instead through the efforts of thousands of individuals who want to restore faith in institutions that are small enough to have a human face. In a thousand small ways, the momentum for this re-direction is growing and involving more people. That is our best hope, really. For the singular beauty and promise of our country is contained in the notion that all may take part in its turning points.

A CASE STUDY DEMONSTRATING THE NEED FOR REFORM OF AIRLINE REGULATION

Mr. KENNEDY. Mr. President, the Aviation Subcommittee of the Committee on Commerce, Science, and Transportation is currently considering legislation to substantially reform regulation of the airline industry.

On April 7, Senator CHARLES PERCY, Republican, of Illinois, testified before the subcommittee. He is a cosponsor of S. 689, the Air Transportation Regulatory Reform Act of 1977, which Chairman HOWARD CANNON and I introduced. This bill would expand route and fare flexibility in the airline industry and permit more firms to enter the market.

Senator PERCY's excellent testimony analyzes Illinois as a case study in airline regulation. He considers the strengths of the interstate, regulated carriers in the State relative to the intrastate, unregulated carriers. The facts speak for themselves: Illinois, like the Nation as a whole, stands to benefit significantly from less regulation. High air fares, overcrowded airports, low industry profits, energy waste, and Government domination are difficulties which S. 689 addresses. Senator PERCY said:

Excessive and outmoded government regulation is retarding growth in the airline industry. Whatever justification there once was for regulatory paternalism, it exists no longer.

Mr. President, Senator PERCY uses hard facts to outline the difficulties with the current airline regulation scheme. His remarks will be valuable as the Carter administration and the Congress move forward to revise our policy in this area. I ask unanimous consent that his remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR CHARLES H. PERCY

My remarks stem from a deep-seated belief that too much of the federal government's interference in the airline marketplace is unnecessary and counterproductive. And the airlines are not unique. Throughout the economy, government has meddled and befuddled. Allow me to compliment this Subcommitee, and you personally, Mr. Chairman, for the daring leadership and persistence which you and Senator Kennedy, and Senators Pearson and Baker have bipartisanly demonstrated in this area.

These hearings represent one prong of an intensive effort in the Congress to strike a new balance between the regulated, the regulators, and the consumers of an important regulated service—passenger air travel. A second prong is S. 600, the Regulatory Reform Act of 1977, which attempts to ensure major reform of all federal regulatory agencies. It imposes a strict timetable and discipline by which, over a period of eight years, the President would submit to the Congress every two years comprehensive reform plans for designated sectors of the economy. Together with Majority Leader Robert Byrd and Senator Abe Ribicoff, I introduced this legislation. There are now 33 Senators co-sponsoring the measure, with hearings now scheduled for late-May. (Attached to my statement is a summary description of S. 600.) The intensive review being given to federal airline regulation by this Subcommittee—and by Senator Kennedy last year—serves as an ideal model for the type of review that all regulatory programs can and should receive under S. 600. It is only through such efforts that government regulation will be withdrawn where it fails to serve the public interest, and made more effective where it does serve the public interest.

Excessive and outmoded government regulation is retarding growth in the airline industry. Retarded growth harms the long-term interests of airline management, investors, and airline employees. And, most importantly, regulation is starting to price air travel out of the reach of too many Americans. For example:

United Airlines estimates that on its flights of an hour or more, the average household income of the pleasure traveler is $25,400 and the average household income of the business traveler is $33,660. Contrast that with an average family income in this country of less than $15,000.

A 1974 Gallup poll showed that 76 percent of the population had not flown in the previous year and that 45 percent had never flown. It is little wonder that 85 percent of all intercity travel is by private automobile.

In Harlingen, Texas, where low-fare service has been made available as a result of a less restricted state regulatory climate, air travel has mushroomed in the last two years, in an area with the lowest per capita income in the nation;

In virtually every instance where less restrictive regulation has flourished—whether in California, Texas, or the charter markets—lower-fare service has surfaced and grown. Virtually every serious study on the subject—whether by government agencies, economists, or professional consultants—confirms the hard evidence. The latest systematic study by GAO showed, for example, that trunk air fares are from 22 to 52 percent higher than they might be under less government regulation of rates and entry.

Government regulation has tended to turn commercial airplanes too often into limosines in the sky, used frequently by the expense-account traveler but too little by median-to-lower income Americans. Without any doubt, we offer the finest airline service in the world. But today it is restricted, due primarily to cost factors, to only one-fourth of our population.

Whatever justification there once was for regulatory paternalism, it exists no longer.

Loosening government's stranglehold on air transportation is a national priority. The GAO estimated that air travelers are paying an unnecessary $1.4 billion each year as a result of overregulation. Some airline management has grown comfortable with the CAB sitting as kind of a "super board of directors" for its operations; but the fact remains that overregulation is choking off corporate innovation and the freedom to compete, and is jeopardizing the viability of dynamic private industry.

This morning, I hope to present a perspective on airline regulation by pointing to Illinois as a case study. At the crossroads of the nation, Illinois is a hub in the nation's air transport network and a microcosm of the problems besetting air regulation today. Airline regulation has not worked well for Illinois' small communities or its large cities.

What will less airline regulation mean for Illinois?

Some trunk carriers say that their revenues from high fares set by the CAB will be raided by new carriers charging low fares on large-city, relatively dense routes. As a result, the argument goes, profits will decrease on the large-city routes where passenger travel is heavy, and service to smaller communities paid for by these profits will be reduced or eliminated.

The evidence does not support this argument. The large trunk carriers, with CAB approval, have been steadily pulling out of medium and small-sized Illinois communities since 1940:

In Springfield, the state capital, with an area population approximating 180,000 persons, an airline (Chicago & Southern) that has since merged with Delta halted service in 1940, and American cut off service in 1962;

In Peoria, Chicago & Southern halted service in 1949, TWA in 1960, and American in 1962;

In Quincy, TWA pulled out in 1954, and Braniff in 1959;

In Moline, Braniff ended service in 1955;

In Rockford, Braniff ended flights in 1955;

(A local service carrier, North Central, pulled out in 1961.)

In Bloomington, Chicago & Southern never exercised its authority to schedule flights;

In Clinton and Dubuque, Iowa, used by many Western Illinois residents, Braniff suspended flights in 1955.

In short, the trunk carriers currently make few small-town flights. They cannot discontinue service where it does not exist.

Mr Chairman, at this point, I would like to submit for the record, a CAB review of 199 trunkline service suspensions and deletions from 1949 to 1965, and a table entitled "Replacement Commuter Air Carrier Service on Certificated Carrier Routes," dated March 31, 1976, which documents 92 additional trunkline terminations.

Equally important, in the dense markets, overscheduling eats up the high-fare revenues so that there are no excess profits to redirect to small-town service even if the trunklines wanted to serve those points as a charitable operation.

Not only are airlines too rigidly regulated under current law but, in addition, direct federal subsidies for small town service are ill-designed and inadequately supervised.

Today, Ozark Airlines receives annually $2.1 million in federal subsidies to fly to nine airports serving Illinois residents. Nationwide, local service airlines receive $76 million in federal subsidies. Current law specifically prohibits the Civil Aeronautics Board from mandating schedules or type of equipment used on subsidized routes. All that the airline must do is provide two daily flights into the subsidized city. Under CAB rules, the airline can schedule milk runs or nonstops, and it is not required to route subsidized flights to any specific point. The airline can charge fares 30 percent higher than it could otherwise—not only on subsidized routes, but on non-subsidized routes as well.

These guidelines on the use of federal subsidies have left many Illinois cities with insufficient air service—or no air service at all Bloomington has no air service to Chicago for 33 hours each weekend When Ozark employees were on strike for two months in 1973, the 350,000 citizens of metropolitan Peoria were left with no air service at all.

Less than adequate air service is common throughout Illinois. For example:

ROCKFORD SERVICE

Rockford is the third largest metropolitan area in the state with a population of 272,-

000, and is the second largest machine-tool manufacturing center in the country. It is currently served exclusively by only four arrival and four departures daily, on Ozark, which receives an annual federal subsidy of $269,601 for the service. Rockford officials believe the city merits increased service. The city applied in 1974 for an adequacy of service investigation by the CAB. The Board denied the request and the city appealed to the federal courts, which then ordered the Board to reconsider. In January of this year, the Board again refused to assign the Rockford petition to an administrative law judge for an investigation.

CHAMPAIGN-URBANA SERVICE

Ozark receives no subsidy for its sole-carrier service to and from Champaign-Urbana. Yet, under CAB rules, the carrier is permitted to charge up to 30 percent higher fares there, because it receives subsidies for other points on its routes. As a result, the fare to Chicago is $38 compared with a $30 charge for the same distance between Grand Rapids and Chicago, where there is competition between North Central and United Airlines.

MATTOON-CHARLESTON SERVICE

The Mattoon-Charleston residents in east-central Illinois are forced to plan trips to Chicago with the degree of care required for international travel. The airport manager said reservations must be made two weeks in advance because of the large number of boardings in Bloomington, the next city along the route. Yet, under CAB regulation, $283,940 in subsidies is authorized for service to Mattoon.

PEORIA SERVICE

Under the CAB route freeze, Peoria was the largest metropolitan area in the nation without competitive air service. That ended less than six weeks ago. Under prior sole-carrier service by Ozark, overbookings occurred frequently. West Coast travelers generally had to backhaul the 130 air miles to O'Hare, thus tacking at least two hours onto their trip, and a higher fare, while adding to air traffic delays at the world's busiest airport.

In June 1973, Continental applied for one-stop Los Angeles and nonstop Chicago service from Peoria. Because of the route moratorium, the CAB delayed a decision until September 1976, when it awarded the route application, in part as a result of the efforts of this Subcommittee and my own office.

On February 28, 1977, the first day of service, Ozark dropped its fares by 24 percent to match Continental's coach fares.

To its credit, Ozark has moved to provide additional air service out of Peoria. It received Board approval to fly nonstop to Detroit, Denver, and Minneapolis. It has also applied for new nonstop service to Atlanta, which I believe is warranted. I also support Ozark's application to fly nonstop from Detroit to Rockford.

The problems of air regulation in Illinois today are not limited to medium-sized to smaller communities. Consider the plight of Chicago:

O'Hare is the busiest airport in the world. Consequently, there are often long delays in take-offs and landings. The FAA estimated last year that O'Hare accounted for 26.5 percent of all delays in the country, the highest by far of any airport. Some 67 million gallons of fuel were wasted in 1976 as planes idled their engines on runways or circled overhead, waiting for the opportunity to take off or land. That amount of fuel could have serviced all of Pan American's international operations for the month of January, 1977. Direct operating costs to the airlines due to delays at O'Hare were estimated at $44 million by the FAA. And, some 4.6 million passenger-hours were spent waiting on account of delays.

Meanwhile, Midway Airport, located 20 minutes by taxi from Chicago's Loop, is hardly used. It was virtually abandoned by certificated carriers after the opening of O'Hare.

But, in the late 1960's Chicago embarked on a $12 million project to resurrect Midway by renovating the terminal in anticipation of shifting some shorthaul flights from O'Hare. Because of too few flights, and the lack of a complete connecting schedule—which is especially important in Chicago were almost one of every two air travelers connects—passenger use of the shifted flights was extremely low. The energy crisis of 1973 provided the impetus for the airlines to pull virtually all of their flights out of Midway. Currently, only Delta provides passenger service out of Midway, and only to the extent of two weekday arrivals and two departures.

Without the introduction of new carriers, the problem of overuse of O'Hare and severe underuse of Midway will, in all likelihood, never be solved.

These are some of the problems of today's regulated airline system. In contrast, let us consider the status of the unregulated, intrastate, Illinois airlines.

Britt Airways, a commuter airline, has proven that the public will respond to frequent, dependable service. Britt first entered into a service agreement in 1968 with Allegheny Airlines to assume—without a subsidy—its $86,000-a-year subsidized service to Danville, Illinois. Britt tripled the number of flights and the number of monthly passengers soared from 350 in 1968 to 2,600 in 1977. In September 1976, Britt took over—again without subsidy—the $225,000 annually-subsidized Ozark service into Galesburg and Sterling-Rock Falls, Illinois. It increased the number of flights by 150 percent and the number of passengers tripled in less than six months. Britt's revenues have provided it with a 22 percent return on capital, compared with the industry average of 3.6 percent. President Bill Britt has told staff, "We don't want government subsidies." He promises to serve any point in Illinois that would lose service on account of airline deregulation. His promise is based on hard-headed business sense—small town service can be profitable.

Air Illinois presents another success story of an unregulated carrier. In January 1972, the carrier began intrastate service between Carbondale-Springfield and Chicago's lakefront airport, Meigs Field. It charges fares 12 percent below Ozark and offers a 16 percent discounted youth fare below its already low fares. However, Air Illinois wishes to become CAB-certificated because it says that, under current rules, unregulated carriers are handicapped in filing joint fares with certificated airlines and in applying for federally-guaranteed loans for equipment.

Not only does Illinois have efficient commuter and intrastate operators, but it may be the launching site for an experiment that could drop air fares dramatically. Two new carriers have applied to link Midway Airport with some 14 cities at fares of up to 53 percent below existing fares. They promise sufficient frequency to meet the requirement for successful operations detailed in a recent, authoritative industry-government analysis.

That the CAB is now seriously considering the entry of new carriers must be considered a significant victory for the proponents of less regulation. This is in the face of so many lost battles: since 1950, nationwide the CAB has received 80 applications to enter scheduled trunk service from firms outside the industry; it has granted none.

The benefits to be derived from approval of the low-fare Midway service would include:

First, fare savings of 24 percent during the day and 53 percent at night and on weekends. The flight from Chicago to Detroit, which now costs $39, would drop to $15 at night and on weekends. Moreover, an estimated 5.2 million *new* passengers could be attracted by the new Midway service, according to one of the applicants. New passengers would come from would-be automotive travelers and from those who cannot afford to fly. (Texas International is one of the first carriers to provide a 50 percent reduction on off-hour interstate flights, similar to the Midway proposals. It reports enthusiastic public response with planes now averaging between 80 and 100 percent loads, compared to what had been 30–35% loads. The airline believes these new passengers are not diverted from other flights. But Texas International—a CAB carrier—only learned this lesson after watching a non-CAB carrier, Southwest Airlines, charge low fares, attract new customers, and earn handsome profits.)

Second, economic benefits to Chicago would most certainly follow from a successful low-fare operation. New business would revitalize the economically strapped area around Midway. Millions of tourist dollars would be pumped into the city's economy from Midwesterners attracted by these low fares to Chicago's outstanding museums, art galleries, theaters, and restaurants.

Third, congestion could be relieved at O'Hare, making it a more efficient airport and a more desirable transfer point. And passengers traveling to Chicago would have a choice of airports, just like travelers to Dallas, Los Angeles, the San Francisco Bay Area, and metropolitan Washington, D.C. and New York.

Fourth, it would stimulate more traffic from small communities whose citizens would want to take advantage of the low-fare service in the 14 markets.

I strongly support the concept of the Midway low-fare service, especially in view of the prior refusal of certificated airlines to service Midway. While it would be improper for me to favor any one applicant, I would urge the CAB to process the matter expeditiously and not restrict any new carrier in such a manner that it is prevented from being profitable.

I have attempted to capsulize the airline situation in Illinois. There, as in the rest of the country, we have outgrown the 1938 law establishing the Civil Aeronautics Board. The time has come to reform our regulatory system, a process already begun by the CAB itself under the chairmanship of John Robson.

Less regulated airlines often charge as little as half the price of regulated carriers over comparable distances with comparable flight times, while attracting new air travelers. A freer market, when properly functioning, ensures the lowest prices, the best service, and reasonable profits. And it costs the taxpayer nothing! Regulation has given us none of these benefits, and positively thwarts low prices.

By 1990, it is estimated that the airlines will require $65 billion in capital investment. The present industry return-on-investment of 3.6 percent simply will not attract the capital required. Fuel and labor costs are rising constantly, with no end in sight. There are only two ways the airlines can meet these costs: revitalized, profitable, consumer-satisfying service, or a government dole. Everything possible should be done to ensure that the first course is followed.

Therefore, I believe that the best provisions of S. 689 and S. 292 should be included in the final legislation reported out of this Committee. S. 292 has a particularly good section on modernizing regulation of air freight services, for example. In general, however, I believe S. 292 gives the CAB too much discretion over its own reform and insufficient direction as to how, when, and where to achieve competitive goals. If John Robson were remaining as chairman of the CAB and if a strong pro-reform majority could be guaranteed for the next 40 years, then, per-

haps, that would not bother me as much. As a matter of principle, however, I believe that laws should be fashioned to fit situations, not the character of the people who will be administering them. We do not know who will be taking Mr. Robson's place, but we do know that the John Robsons of this world are a rare breed. We must, therefore, write free pricing and market entry into the law. The more disciplined timetable and precise provisions of S. 689 appear to me to be the preferable approach. And, as a former businessman, the certainty associated with the provisions of S. 689 is far more desirable than the uncertainty of both S. 292 and current regulation. Congress should tell the airlines and its underwriters what the rules will be. Airline management and investors will be better off if we do.

S. 689, in my mind, is also preferable because it comprehensively addresses the two issues that will either make or break airline regulatory reform: easier entry into the industry and greater fare-setting flexibility. Both are needed, because without the real threat of increased competition, air fares will not be set at the lowest competitive level anticipated by proponents of reform.

Particularly appealing and relevant are the proposed criteria in S. 689 for approval of new entries, which emphasize innovation, efficiency, and a significant reduction in fares. Other S. 689 provisions that tend to promote competition include the issuance of certificates for unused route authority to any qualified carrier that applies for them, and the proposed granting of one to four new routes each year to qualified airlines. In the pricing area, S. 689 establishes maximum and minimum fares, while S. 292 appears to permit the CAB to continue to tightly regulate fares.

It is very important that carriers be allowed to lower fares significantly without CAB interference. The best protection against so-called predatory pricing is vastly liberalized entry provisions and enforcement of the antitrust laws. If a regulatory price floor is to be included in the legislation, the approach should be progressive enough to allow new and existing airlines to lower their prices to the levels we know from experience are both profitable and practical. For instance, the Texas and California intrastate carriers cut fares by up to 50 percent compared with the 20 percent fare reductions proposed by the CAB-regulated carriers.

There are other aspects of S. 689 which I view with favor. These include giving the CAB more adequate time to find substitute service when a carrier suspends service, granting the Attorney General the authority to investigate potential antitrust violations, and a detailed plan to expedite the handling of CAB business.

It is for these reasons primarily that I have decided to co-sponsor S. 689. I am pleased that this plan for airline regulatory reform has received substantial support from organizations and individuals representing widely divergent backgrounds. So too, from President Carter.

On the question of direct subsidies for air service, neither of the principal bills before the Subcommittee appears to provide for optimum service to smaller communities that would otherwise go unserved. It is my understanding that S. 689 was purposely left vague on this point so that these hearings would be a forum for detailed subsidy proposals. On the other hand, S. 292 establishes yet another new certification procedure, again involving government intercession, for carriers wishing to receive subsidies to fly into smaller communities. There is little mention of the future role of unsubsidized commuters that have so successfully served many smaller communities. Is free enterprise once again to be penalized for being efficient? I hope not.

It is imperative that any deregulation plan satisfactorily provide for small town service, but only if a private carrier refuses to provide unsubsidized service to such communities. Subsidies should be a last resort and should not be subject to the abuses found in the current law. At a minimum:

The plan should not provide for a system-wide subsidy. It should be targeted specifically to the city pairings most in need of subsidy;

Fares in non-subsidized cities, such as Champaign and Springfield, Illinois, should not be surcharged to pay for service into subsidized cities along a local carrier's route;

The plan should not only include commuter and local service carriers, but also trunk lines that might want to land short-to-medium-haul flights in smaller cities.

Another issue that must be addressed in the proposed legislation is the possible loss of jobs that may occur as a result of reform. I am of the belief that, if anything, overall employment in the industry will increase as new, innovative low-fare services attract the three-fourths of our population that does not regularly fly. Even under our current regulated system, job security has been elusive. In early 1974, there were 16,000 fewer jobs in the airline industry than in 1973. By 1976, that number dropped to 10,000.

But, we are cautious. We are concerned about small towns, and airline management, so let us be concerned about employees who may be temporarily dislocated as a result of reform. In the event of any such dislocation, I suggest a program modeled after the federal assistance program for workers dislocated by low-priced imports.

Hopefully, in a deregulated system, trunk airlines would consider renewing service to smaller communities. The airlines could better fill these flights by discounting the fare proportionally for every stop made between the point of origin and the point of destination. For instance, passengers aboard what is now a Kansas City-to-Indianapolis nonstop flight, under such a plan, would be treated to a healthy discount if the plane touched down in Springfield, Illinois. These flights could be profitable as a result of the higher revenue expected from an influx of low-fare passengers and additional fares picked up in the smaller communities. Other free-market innovations might also be tested.

In sum, the umbilical cord tying government to the commercial airline industry must be cut over time. If we are to develop better service to smaller communities, lower fares throughout the industry, an air network responsive to the felt needs of its travelers, and the reality of healthy, unfettered competition—phased deregulation, using at least the principles specified in S. 689, is both necessary and proper.

Principal Provisions of the Regulatory Reform Act of 1977

(Introduced by Senators Charles H. Percy (R-Ill.), Robert C. Byrd (D-W. Va.), and Abraham Ribicoff (D-Conn.) for joint referral to the Committee on Government Operations and the Committee on Rules and Administration)

Government regulation has all too often become a burden to consumers, the workingman, American business and to the economy as a whole. Indiscriminate regulation has fueled inflation, stifled competition, and produced mountains of paperwork and red tape. Agency functions tend to overlap. Individual regulations are frequently made without due consideration of the relative costs and benefits involved. And case-by-case handling of matters, in the absence of broad guidelines, produces unreasonable delays and fragmented and incoherent policy, often focusing on trivia while neglecting priorities. Clearly, some regulatory agencies have poorly served the public interest in disregard of their Congressional mandates.

To counter this, the Regulatory Reform Act of 1977 sets forth a discipline for action, to apply both to Congress and the President. Over a period of eight years, from 1979 through 1986, the President would submit to the Congress, by May 1 of each year, comprehensive plans for reforming regulation in four specific areas of the economy, namely:

96th Congress (1979–80): Energy, the environment, housing, occupational health and safety.

97th Congress (1981–82): Transportation and communications.

98th Congress (1983–84): Banking and finance, international trade, and government procurement.

99th Congress (1985–86): Food, consumer health and safety, economic trade practices and labor-management relations.

Each plan would include recommendations for increasing competition, and for procedural, functional, administrative and structural reforms.

To ensure that the impact of regulatory activity is in the Nation's best interest, the President will include in his plan a report on the cumulative impact of federal regulation on the following industry groupings:

Transportation and agriculture industries;

Mining, heavy manufacturing, and public utilities;

Construction and light manufacturing industries;

Communication, finance, insurance, real estate; and trade and service industries.

To provide a wider perspective on these problems, the General Accounting Office and the Congressional Office of the Budget will simultaneously submit comprehensive reports to Congress concerning:

The purposes for which each agency was established;

Significant changes which have occurred in regulated areas; the impact of such changes on the agency's effectiveness; and the continued appropriateness of original statutory purposes;

The net impact of the agency and the degree to which it has achieved its purposes;

The cost-efficiency of the operations of each agency; and

Practical, more efficient, alternative approaches to achieving those regulatory needs which currently must be served.

If the President does not submit a plan by May 1 of the first year, the relevant committees would write and report their own plan(s) in the form of a bill, to become the pending business of both Houses not later than May 1 of the second year.

Should Congress fail to approve comprehensive regulatory reform legislation in the designated area by August 1 of the second year, the affected agencies will lose their authority to make *new* rules (except those essential for preserving public health and safety).

Should Congress fail to pass comprehensive reform legislation by October 1 of the second year, enforcement of *existing* rules of the affected agencies will be suspended (except those essential for preserving public health and safety).

Should Congress fail to enact comprehensive reform legislation by December 31 of the second year, a "sunset" provision comes into play, terminating each affected agency for which Congress has not enacted reform. Responsibility for enforcing health and safety rules would pass to the Justice Department.

After an eight-year respite following the original review period (1979–86), Congress would begin the reform process again (in 1995), and continue such cycle thereafter, examining agencies in the same order unless Congress and the President change the order by law.

This timetable should in no way delay reform efforts already underway, or which may arise in the interim, until the designated year for that particular facet of regulation. Thus, it does not mean that transportation reform must wait until 1981, or consumer safety reform until 1985. Rather, it ensures that if no comprehensive reform has been accomplished by these dates, then the discipline imposed by the bill would come into play. If Congress wants to act sooner, all the better.

DR. ARTHUR KAPLAN ON U.S. FOLLY IN AFRICA

Mr. HELMS. Mr. President, a recent edition of the New York Times carried a letter to the editor from Dr. Arthur Kaplan, of Raleigh, N.C., about the folly of U.S. policy in Africa. Dr. Kaplan is a distinguished citizen of our State capital, who has a long and brilliant career in the teaching of classical languages and culture. It is perhaps this extensive background in the history of Western civilization that gives him the perspective for commentary on the follies of today.

Dr. Kaplan does not hesitate to draw historical parallels with our posture in Africa today. He says:

> Anti-colonialism has been one of the worst traps into which American foreign policy has fallen during this century, and this folly has now been compounded by our meddling in African affairs.

Placing the situation today against what has happened in the past, Dr. Kaplan says:

> Without the "colonialism" of the ancient Greeks, there would have been no Syracuse, no Marseilles, no Constantinople, no Alexandria, etc., nor would Greek civilization have spread to Italy, and the Coast of Asia Minor. Without the "colonialism" of ancient Rome, there would have been no Cologne, no Vienna, no London—nor the spread of Greco-Roman civilization to the Western world.

Finally, Dr. Kaplan cites the fatuousness of statements which characterize the Rhodesian Government as "illegal" and call for "majority rule" in South Africa. I think that this letter will be of general interest to my colleagues.

Mr. President, I ask unanimous consent that Dr. Kaplan's letter from the New York Times, of April 9, 1977, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 9, 1971]

OF AFRICA, THE U.S. AND ANTI-COLONIALISM'S "FOLLY"

To the Editor:

A number of fatuous statements have been made recently by President Carter and some of his appointees. Due to the lack of space, I shall only comment on two: the characterization of the government of Rhodesia as "illegal" and the call for "majority" rule in South Africa.

The government of Rhodesia, presumably is "illegal" because that country unilaterally declared its independence from Great Britain and thus "legally" is still a British colony. However, how is the government of Rhodesia any more "illegal" than that of the U.S.A., which also unilaterally declared independence, some time ago?

There is a lot of prating nowadays of "majority" rule for South Africa, but why is nothing said about the glaring lack of this political commodity in the dozens of other African countries with which we are blithely trading and to which we have given vast sums of foreign aid? In these countries millions of people have been killed and other millions have become hapless refugees by the actions of undemocratic regimes under dictators or some kind of elite "minority groups."

The former Belgian Congo, the former French Congo, Angola, Uganda, etc., etc., are in a sorry state today. This is the result of the hasty decolonizations, under leftist and "liberal" pressures, in many countries whose peoples were not prepared to govern themselves and consequently have fallen prey to Marxist and other types of dictatorships or "minority" rule. "Anti-colonialism" has been one of the worst traps into which American foreign policy has fallen during this century, and this folly has now been compounded by our meddling in African affairs, just as we were previously drawn into the affairs of Southeast Asia, with disastrous results.

Contrary to what we have been brainwashed into believing, there is nothing intrinsically evil in "colonialism" *per se*.

Without the "colonialism" of the ancient Greeks, there would have been no Syracuse, no Marseilles, no Constantinople, no Alexandria, etc., nor would Greek civilization have spread to Italy and the coast of Asia Minor. Without the "colonialism" of ancient Rome there would have been no Cologne, no Vienna, no London—nor the spread of Greco-Roman civilization to the Western world.

In modern times, flourishing cities and industries were built in Africa, sanitation and medical services were introduced, the death rate was lowered and the life span increased, and the standard of living was raised by the various colonial powers. One of the most beautiful little cities in the world is Swakopmund, on the edge of the Namib desert, in what was once German South-West Africa. Several years ago, as I was walking along the deserted main street of this city during the siesta period, a huge black man approached from the opposite direction, bowed and said, "Guten Tag, mein Herr," a vivid survival of German culture in the heart of Africa.

ARTHUR KAPLAN.

Raleigh, N.C., March 31, 1977.

TRANSPORTATION FOR THE RURAL ELDERLY

Mr. CHILES. Mr. President, more than 8 million persons aged 65 or older reside in rural areas. Special Committee on Aging hearings—several of which I have conducted—provide compelling evidence that transportation is a serious problem for the elderly. Financial constraints and physical infirmities eventually force large numbers of the rural aged to give up their private autos. Yet, without adequate transit alternatives, the loss of that car may have far more devastating consequences for these citizens than for their urban counterparts.

The loss of personal mobility can deprive older rural residents of their access to medical care, shopping, and social services. They may become isolated prisoners in their homes, or be forced to abandon their lifelong residences and relocate in unfamiliar towns. Some unnecessarily enter nursing homes, at great financial cost to the Government and psychological damage to themselves.

The United States has yet to develop and implement a comprehensive scheme of transportation services for the rural elderly. All funds allocated for the section 147 Rural Highway Public Transportation project were awarded as of July 1976. While I await the Federal Highway Administration's evaluation of those 2-year demonstration projects, it is my belief that longer funding periods with less abrupt cut-offs are necessary to foster the growth of viable rural transit services.

By May 27, the Department of Transportation will issue its revised design standards for mass transit buses. Even if Secretary Adams mandates full accessibility for the elderly and handicapped, it will take at least 12 years for the full bus fleet to become barrier-free. And, even when that occurs, many of the rural elderly will require door-to-door service on smaller vehicles because of isolated locations and secondary roads. I believe that programs such as the Urban Mass Transportation Act's section 16(b)(2) capital grant assistance program must be continued at adequate funding levels. The Committee on Aging has received reports that the capital set-aside for section 16(b)(2) is about to be slashed in half. If this is true, I intend to examine this matter closely.

Mr. President, the March 28 edition of the New York Times contains an excellent article by Ralph Blumenthal describing the liberating force of rural transit services for the elderly. Mr. Blumenthal makes the telling observation that the poor, the handicapped, and the elderly are often one and the same. He also alerts us that many of these valuable services may be curtailed or terminated when Federal funds expire. A 71-year-old widow served by Missouri's OATS' program—Older Adults Transportation Service—commented that, should OATS cease operating, she would have to "stay home and suffer."

I ask unanimous consent that this article be printed in the RECORD. I hope that my colleagues will read it, and that this Congress, in concert with the Carter administration, can formulate rural transit programs which can put an end to the isolated sufferings of millions of Americans.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RURAL DIAL-A-RIDE SERVICE BREAKS ISOLATION OF THE POOR AND ELDERLY

(By Ralph Blumenthal)

BELVIDERE, N.J., March 24.—Julia Halvey, a widow in her 80's, lives alone in a green trimmed white house behind a purple gate on Mountain Lake Road in the hills outside this rustic county seat near the Pennsylvania border.

She cuts her own firewood, cooks her own meals and seems content to tend her small home crowded with heavy brocaded furniture and tinted family photographs.

But Mrs. Halvey is really a prisoner—locked in by the isolated rural landscape and advancing age. There is no car in the gravel driveway. Buses do not exist in Belvidere. Taxicabs must be summoned from so far away that they charge for the empty trip out. And neighbors? Well, said Mrs. Halvey, "the woman next door who sometimes drove me around got divorced and left, and a man who worked with my husband once charged me six dollars for a ride—and that was a friend of my husband."

Across the nation, millions of elderly, poor and handicapped rural Americans remain

cut off from health care, shopping and other necessities by a lack of public transportation.

Without that mobility, said James T. Barnett, executive director of the Choanoke Area Development Association in North Carolina, "they simply die earlier."

Fortunately for his residents of the region covered by his agency and for people in Belvidere and several score other rural regions around the country, some relief has been provided by federally subsidized transportation programs. Usually they consist of "dial-a-ride" car, van or mini-bus service for the rural needy.

Last October a study commissioned by the Federal Department of Transportation outlined 75 projects initiated under a $500 million rural mass transportation grant program through 1980. The study by the department's Office of Technology Sharing found that, "while some public transportation exists in rural areas, generally it is inadequate."

The plight of the rural elderly, poor and handicapped—often the three are one—emerged in interviews by correspondents of The New York Times in seven selected regions where special transportation programs were under way: Warren and Hunterdon Counties, N.J.; Raleigh County, W. Va.; a Choanoke area in eastern North Carolina; Hamilton, Columbia and Suwanee Counties, Fla.; most of Missouri; Placer County Calif.; and Klamath Falls, Ore.

AN ENCOMPASSING DESCRIPTION

In a description that might apply to all the areas, Eugene Hineman, a 62-year-old former restaurateur now living on Social Security in a rooming house in Foresthill, Calif., said: "This is a quiet, peaceful place, a little bit of a burg at the end of a dead-end street. Nothing at all ever happens except the mail, when you get a little bit of junk. There's no way to get around if you're like me and once you're 60 you're no chicken any more."

"They are virtual prisoners of their land," said Sally Riggs, dispatcher for the Placer mini-bus service used by people like Mr. Hineman. Funded with $160,000 of state sales tax funds, the service, available to those in need who reserve a seat a day in advance, includes six Monday-to-Friday daytime routes through the California gold rush country of Baxter, Colfax, Dutch Flat, Alta, Meadow Vista and Gold Run.

Nearly 80 percent of the 193 weekly riders in the yellow Dodge and Mercedes vans are old people—mostly widows, who are not always poor but who had to give up their cars for physical or financial reasons.

If the service was discontinued, Mrs. Riggs said, "it would be disastrous."

SYSTEM IN FLORIDA

Similar comments came from the north Florida counties midway between Tallahassee and Jacksonville where the Suwanee Valley Transit Authority has been operating three buses on its rural routes at special low rates of 75 cents for one-way trips under 15 miles and $1.25 for longer ones.

"I just wouldn't have any transportation without it," said Georgia Williams, a 74-year-old widow who lives alone in a two-bedroom trailer in Belleville.

Here around Belvidere, about 180 residents a month call to book seats on the 32 sedans, station wagons, vans and small "busettes" of the Pioneer On Wheels program.

In addition to Mrs. Halvey, for example, there is Gertrude Adelmann, a blind widow from Germany who depends on the special free transportation for trips to the doctor, dentist, shops and the bank.

And there are Harry, Mary and Elizabeth Millars, a brother and two sisters all in their 80's, who live in an immaculate white ranch house above Beaver Brook. Mary, who is 88, did all the family driving until cataracts nearly blinded her. Then the Millars briefly engaged an elderly neighbor as driver. But he had had a stroke and "shook all the time," Mr. Millars said.

Now they rely happily on the Pioneer On Wheels program. "Without it," said Mr. Millars, an 84-year-old former bookkeeper, "I don't know what we would do. We might have to move" to a less isolated community, "and at our age to get out of town would be a problem."

DRIVER ADHERES TO CODE

The volunteer who now drives them and other area riders, Edward Neidig, a 79-year-old former trucker, adheres strictly to the program code. He takes no tips—"not even cookies and cake"—and will not even accompany a widow into the house for a cup of coffee on a cold day. "That's to prevent people from talking," he said. "People in the country always have one eye on the neighbor's house."

But like many of the programs, Pioneer On Wheels is in its last year of Federal funding and is scraping around for money to stay alive.

Roxie Fesler, a 74-year-old miner's widow who lives in a coal camp on Lower Tommy Creek in Raleigh County, W. Va., is another isolated rural American. At one time her house belonged to a coal company. But, she said, "they shut down the mines a long time ago" and the coal operators sold the houses when they moved out.

These dying coal camps, nestled in narrow hollows and on steep hillsides, dot the landscape of Raleigh County. Some can be reached only by traveling over packed dirt roads that occasionally wander into a creek bed filled with mud in the fall and spring and ice in the winter.

Mrs. Fesler has diabetes and heart trouble. For treatment she must go to Beckley, the county seat, more than 30 miles away. Some of her neighbors have automobiles, but Mrs. Fesler said that they charged her as much as $7 a trip. Her only income is from black lung miner's benefits and Social Security checks.

So Mrs. Fesler depends on the subsidized bus system run by the Raleigh County Community Action Agency.

EXTENSIVE SYSTEM IN MISSOURI

One of the most extensive rural transport programs in the nation with nearly 100 vehicles, is the Missouri Older Adults Transportation Service, known as OATS, serving 16,000 riders in 90 of the state's 114 counties. Subscribers pay a $6 initial membership and $5 annual dues.

One of the clients is Martha Ploesser of rural Melville, south of St. Louis County. A 71-year-old widow, she has a heart condition that requires her to go regularly to the doctor.

"I don't know what I'd do without OATS," she said. "Just stay home and suffer, I guess."

Not all transportation programs have succeeded. Between September 1972 and September 1973, the Klamath, Ore., Area Transit sought to provide rural busing, but usage was low and the project died.

But other programs have produced dividends beyond their expectations. In Placer County, Calif., Ina Lang, a widow now 72, rode the bus from her home in Foresthill to Auburn almost every Thursday since the service began Jan. 18, 1974. She had a car and could drive, but she wanted to use the bus so she could see and talk with people.

One day shortly after the service began, she met Benjamin F. North, who was from New York. Mr. North was staying at the Forest House Lodge with nothing to do. "He used to ride the bus to have something to do and we met; it was love," laughed the former Mrs. Lang.

Ina Lang married Benjamin F. North, now 74, in January 1975 and they still ride the bus together.

PRESENTATION OF THE DISTINGUISHED SERVICE AWARD TO ROBERT T. STEVENS

Mr. THURMOND. Mr. President, on April 7, 1977, the New York chapter of the Association of the U.S. Army presented its Distinguished Service Award to Robert T. Stevens. As many of my colleagues will recall, Mr. Stevens is a distinguished American businessman—the former chairman of the board of J. P. Stevens—who served as the first Secretary of the Army under President Eisenhower.

In that important position, Mr. Stevens guided the Army through the difficult period of disengagement in Korea. He also was called upon to defend the honor of the Army when it was wrongfully impugned by the late Senator Joseph McCarthy. Both of these exceptionally sensitive and challenging assignments he handled with competence, dignity, grace, and tact.

For these achievements and for numerous others as a private citizen—or, as he describes himself, as a "citizen soldier"—Mr. Stevens richly deserves the AUSA award. At the banquet in the course of which it was presented, he was afforded the opportunity to make some remarks. I have recently read a transcript of these remarks, and I believe they deserve the close attention of my colleagues and of the American public. They represent the informed and well-considered opinions of an outstanding American patriot on subjects of importance to us all.

One of Mr. Stevens' major concerns is that the United States maintain a defense capability second to none. Like a number of us in Congress, he is fearful that the Soviet Union is in the process of surpassing us, and may already have surpassed us, in military might. While recognizing the high cost of reversing present trends, he argues cogently that the costs of being unprepared are potentially far greater.

He also has a timely warning for the complacent on the subject of energy policy. He is not, however, a prophet crying doom. He is convinced that "American ingenuity" can ultimately find the solution to this problem, as it has found solutions to so many others.

It is unnecessary and somewhat presumptuous of me, however, to repeat in my words the views that Mr. Stevens has eloquently expressed in his own. The full text of his remarks is available, and will amply repay the little time and effort it requires to read. That my colleagues may have access to it, and that they may see for themselves the wisdom of its author, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY ROBERT T. STEVENS

Sixty years ago this week, on April 2, 1917, I was standing in a large crowd outside our National Capitol in Washington. Everyone was waiting for the arrival of the President, Woodrow Wilson. Presently, he arrived by car and disappeared inside. He delivered his war speech, which was not long, and then returned to the White House, while Congress

went about the business of declaring war. Eighteen years old, a senior at Andover, I was tremendously interested in the American military history that was unfolding right before my eyes. Four days later war was declared.

I remember a mounted cavalryman calling to one of his buddies, saying, "I wonder what these guys in this crowd are going to look like in uniform." I have never forgotten that remark and made up my mind right then that I was not only going to be in the Army before too long, but also was determined to have a soldierly appearance after appropriate training.

Although unprepared, we got World War I successfully behind us and then found ourselves unprepared again when Hitler overran the Low Countries, thirty-seven years ago. While Britain gallantly held the fort, we began a superhuman effort to prepare for what was to come. By the time I finished a special course at the Command and General Staff School the day before Pearl Harbor, we were on the way to a tremendous mobilization.

Reverting momentarily to World War I, I recall quite vividly my experience, however brief, in the Army and ever since have always considered myself "A Citizen Soldier"—citizen in peace time—soldier in war time. Never did I dream that one day our country might call upon me to become Secretary of the Army in the latter stages of the Korean War.

I recall my first visit with General Eisenhower in his office at the Commodore Hotel here in New York in early December 1952. I had never met him but had been forewarned by Secretary of Defense-desigate Wilson of what was in store. It was a heartwarming experience to visit with the Commander-in-Chief-elect—one of our greatest national heroes and friend of many in this room. Following discussion of the business at hand, I took a one-paragraph prepared letter from my pocket and asked if he would sign it.

The letter was addressed to our third son who, incidentally, is here tonight. At that time he was a private with the 7th Army in Germany, having enlisted for three years. The letter included the following:

"Dear Bill: I thought you might like to know that Mr. Wilson and I have today selected your father to be Secretary of the Army in my administration. (signed) Dwight D. Eisenhower."

It was a typically human thing for Ike to do and son Bill had some real fun when news of the appointment reached his unit, followed by Ike's personal letter.

This is indeed a proud moment for me. I am both surprised and delighted that the New York Chapter of the Association of the United States Army, under the leadership of Colonel Markle, has seen fit to honor me tonight with this prestigious award. It climaxes a long period of either active service in or constant interest in the Army and I look back on it all with a deep feeling of satisfaction. Yes, this includes the experience of Army/McCarthy in 1954. That was a tough go but someone in the civilian leadership of the military had to stand up and be counted. As Secretary of the Army I took on that difficult mission and I shall never regret it or forget how it all began.

The first I heard about real trouble was when General Matthew B. Ridgway, then the Army's distinguished Chief of Staff, came through the door connecting our two offices in the Pentagon and told me of his great concern over a most serious incident that had happened the day before. Senator McCarthy had dealt contemptuously with a combat decorated veteran of the Army in a one-man Senate Committee Hearing in New York. That veteran was told he was not fit to wear the uniform. General Ridgway was deeply, and rightfully, concerned as to the possible effects on service morale.

The issue seemed so clear to me that there could be only one decision. Those of you who may have watched on television know that the role in which I was cast was tough but not heroic in any way. It was doing my duty as I saw it. Joe Welch, the genial lawyer from Boston who represented the Army in the Hearings, called it "a moment in history." Looking back over the years, it seems clear that our country needed the cleansing effect of that moment in history.

I would like to touch briefly on the present defense posture of our nation. It would appear that increasing attention on the part of the American people is being accorded the formidable increases during recent years in Soviet military capabilities. There is no question in my mind but that Americans are willing to spend the funds necessary to safeguard the security of the United States. In my opinion, it is close to the time when, if appropriate measures are not implemented, we will clearly find ourselves behind the Soviets in military capabilities. We may already be in that position.

I would therefore urge that thinking citizens across the nation let the Administration and the Congress know that they want vigorous action on this vital issue. It sometimes evolves that the mood of the American people runs ahead of the Executive and Legislative Branches of our government on key issues. I think the momentum of the Soviet build-up is a case in point and that the vast majority of our citizens will support a defense program designed to insure that the United States does not find itself second to the Soviets in military capability. In this connection we can surely derive very little encouragement from Secretary Vance's recent trip to Moscow to discuss strategic arms limitations.

It is clear that the Soviet Union intends to bargain hard, from a position of strength, and continues to insist upon getting more than it gives. The Kremlin perhaps feels it does not need a nuclear agreement with the United States as a top priority.

Conventional arms have taken on a much greater importance than in the days featuring mainly "massive retaliation." Thus, I am encouraged by what the Army itself is doing in this area, within prevailing budgetary limitations. What is being done is unprecedented in peacetime. This is a major effort to integrate our Reserve forces with our Active Army forces in order to solidify them into a truly combat effective force—a Total Army. For example, our NATO strategy calls for the commitment of twenty some U.S. divisions in time of war. Eight of these divisions are Reserve divisions and four of the Active Army divisions are rounded out by Reserve brigades. This seems very sound because essentially we are doing now in peacetime what we have always had to do hurriedly in wartime.

One major argument that is, of course, everlastingly with us is the argument over costs. Certainly the costs are enormous and as a businessman—and taxpayer they are matters of concern to me. Yet one thing I learned as a businessman was to factor in all the costs of an enterprise. It seems to me that many of those who complain about the high cost of military equipment and the high cost of peacetime preparedness are failing to factor in one essential element.

This element is the potential cost in human lives of military unpreparedness. We have paid this cost too often. We paid it on the battlefields in France in World War I. We paid it at Bataan and at Kasserine Pass in World War II. We paid it in the Pusan Perimeter in the Korean War. And we may pay it again with the lives of young Americans, if we allow ourselves to be unprepared to meet the world problems that we constantly face as a Nation.

There is one relatively new and vital factor in our economy that has an overriding importance to all our Armed Forces, whether Army, Navy, Air Force, Marines or Coast Guard. It is something that all of us who are dedicated to the security of the United States should take an active interest in, to whatever extent we can. That is the energy situation. The fuel for our Armed Forces in wartime and the fuel for American industry back-up, to say nothing of fuel for American homes, looms large as a dangerous factor.

Whatever measures are necessary to minimize this threat should be implemented as soon as possible. At best we will be dependent on foreign petroleum supplies for a long time to come. Last year 45% of our oil was imported with devastating results on our balance of payments. Everyone is affected by this situation but the military and their suppliers must be placed at the top of the priority list. American ingenuity, if supported by government, can, in my opinion, make much faster strides in the solution of this overall problem than is currently being predicted.

A word about personnel. The Army cannot exist as an effective fighting force unless it can attract and retain quality men and women. It has yet to be proved that this can be done without the draft in the long pull. The reserve is under manned right now. I recall the bitter arguments back in the 1930's about whether the Army budget should concentrate on personnel or on modern weapon systems. There was then, as there is now, no easy answer to that dilemma.

General MacArthur, then Chief of Staff of the Army, fought especially hard to retain personnel in the face of budget cuts. It was this personnel—the Marshalls, the Bradleys, the Eisenhowers, and the thousands of experienced officers and NCO's—who enabled America to build the Army from 189,000 in 1939 to the eight million-man force that won World War II on the ground. Today, the Army has support in Congress for maintaining a constant active duty strength of roughly 790,000, while at the same time continuing to develop and field the modern equipment we must have to fight and win on the battlefield.

Allied with this question of cost is the whole area of soldier benefits. Although less tangible than equipment costs, they are, nevertheless, an important factor in soldier morale and well-being. General Ridgway warned of the dangers of the incessant attacks on soldier benefits while he was Chief of Staff and, as Secretary of the Army, this was also one of my major concerns. It remains a major concern today. While many of the budget cutters see this as an attractive area to reduce military spending, soldiers see it as a lack of faith and a lack of support from those they are sworn to defend.

And, while speaking about personnel matters, let me say how pleased I am that the Army has reaffirmed the Honor Code at the Military Academy. In this 175th Anniversary Year of West Point the American people look with pride upon the quality of the officers and leaders the Academy has produced in the past and with confidence as to the leadership it will produce in the future.

I am proud of my long association with the United States Army. As I look at the 187 battle streamers on the Army flag—and reflect that 93, exactly half, of them were recorded during my lifetime alone—I am tremendously proud of the Army's vital contribution to America's peace and security. But, the Army can be no better than the support it receives from the American people.

Today, the Army needs our help, it needs our help in supporting its efforts to improve

the combat readiness of the Total Army—Active and Reserve. It needs our help in supporting its efforts to improve the quality of the forces including recruiting and the retention of quality men and women. It needs our help in supporting its efforts to maintain a first class quality of life for our soldiers.

I know the Army has my support. I am sure it has yours as well.

Again, thank you for this extraordinary award. It will long be treasured in our family.

Thank you.

S. 270; PUBLIC PARTICIPATION IN AGENCY PROCEEDINGS

Mr. KENNEDY. Mr. President, in a very short time, the Judiciary Committee will begin markup of S. 270, the Public Participation in Federal Agency Proceedings Act of 1977. This legislation is designed to facilitate increased citizen participation in agency proceedings and in court actions for review of agency decisions, and to promote agency responsiveness to the needs and concerns of the public.

A recent article on this bill published by the Newspaper Enterprise Association has recently come to my attention, and I am going to request that it be printed in the RECORD so that my colleagues and members of their staffs will have an opportunity to read it. I believe that it succinctly and accurately encapsulates the arguments that have been advanced by various interests on both sides of the debate over this legislation. In addition, it aptly characterizes the motivations of Members of Congress who have long argued for adoption of citizen participation programs.

The article mentions the numerous objections which have been raised by certain business and industry groups that enactment of S. 270 would cause enormous delays in an already ponderous regulatory process. This was an issue that was considered at length in the hearings on this legislation conducted by the Subcommittee on Administrative Practice and Procedure during 1976 and 1977. I believe that the issue of delay is one of the greatest myths plaguing this bill, and should forcefully be laid to rest.

In the first place, agencies have always had at their disposal a range of remedies to deal with participants in their proceedings who use delaying or obstructionist tactics. S. 270 does not change this. In addition, the bill makes clear that persons receiving compensation under this program who cause delay or who otherwise obstruct proceedings may have their awards rescinded or may be compelled to repay funds they have already received.

Second, studies have shown that citizen participation in agency proceedings is almost never a cause of delay. In fact, several witnesses at both the Senate and House hearings on this legislation testified that the bill will actually speed up the regulatory process. It will insure that better administrative records are made at the agency level, thereby making it far less likely that a court will overturn an agency decision for procedural unfairness. It will also promote greater public acceptance of agency decisions in which citizens can have a role in formulating. This, according to several Federal judges who testified before our subcommittee, will reduce the likelihood of appeals to the courts to reverse unfavorable agency decisions. Thus enactment of S. 270 may have the effect of actually decreasing judicial workloads.

Among the recent studies dealing with the issue of delay are the following:

First. A 1974 study by the Atomic Industrial Forum, which found that the presence of intervenors on behalf of all interests—public as well as private—accountings for only about 2 percent of the total delay in nuclear plant construction proceedings. As former AEC Commissioner William Doud has stated:

> In general, regulatory delays, including intervention, are not the principal sources of delay. In fact, legal challenges by intervenors account for an extremely small number of delays.

Second. A 1976 study by the Council on Environmental Quality of 6 years of experience by 70 Federal agencies with the environmental impact statement process under the National Environmental Protection Act—NEPA. This study concluded that the initial problems of delay in the process have greatly diminished, and that there has been almost no delay in the implementation of agency projects even when environmental impact statements are challenged in the courts.

Third. A 1972 report of the Association of the Bar of New York stressed the following point on the issue of delay in electric power interventions:

> The word "delay" itself implies a particular viewpoint on the problem. Unless one believes that utilities alone should weigh electric power and the environment, the time needed for some regulatory consideration is time well spent if it improves the quality of the final decision.

Fourth. Hearings conducted in 1976 by the Subcommittee on the National Science Foundation of the Senate Committee on Labor and Public Welfare produced important testimony on the impact that Federal funding for "public interest science" would have on agency proceedings. Witnesses felt that such a "science for citizens" program would actually expedite proceedings. They noted, for example, that opponents of a nuclear reactor facility are usually concerned about safety, but are forced to raise other issues—such as thermal pollution or small routine releases of radioactivity—because they do not have access to technical assistance. With funding for such technical advice, they would be able, in many cases, to satisfy themselves as to the safety of proposed plants or to identify issues which could be resolved.

Third, and perhaps most significantly, the citizen participation program in FTC rulemakings that was established by the 1975 Magnuson-Moss Act has not caused any delays in that agency's proceedings. According to Chairman Collier of the FTC, who testified before the Administrative Practice and Procedure Subcommittee in February:

> None of the delays in our rulemaking proceedings are in any way attributable to this program.

Finally, as to the concerns which have been expressed that S. 270 would stir up litigation in the courts, and would thereby cause further delays in implementing agency decisions, I think it is important to remember that litigation has also had the effect of reducing overall delay in agency processes.

For example, to insure vigorous enforcement of the 1972 Water Pollution Control Amendments, the National Resources Defense Council brought suit when the EPA missed 14 consecutive rulemaking deadlines in the first few months after the act was passed. The lawsuit resulted in a court-ordered schedule for publishing EPA's regulations.

Other lawsuits have had similar effects in speeding up agency decisionmaking processes. They have forced accelerated proceedings in the areas of discharge of industrial pollutants, solid waste disposal guidelines, and effluent guidelines for timbering central point sources.

To sum up, Mr. President, I think it is fair to say that not only has public participation not been a cause of any significant delay in agency proceedings, but that there is also good reason to expect that increased participation will actually accelerate the ultimate termination of many proceedings. In this respect, enactment of S. 270 will help to achieve the goal of genuine regulatory reform which is high on the agendas of so many of us in this Chamber.

I hope that my comments today will help to set the record straight on the issue of S. 270 and delay in agency proceedings. It disturbs me to hear these charges being raised time and again, when all available evidence points to the contrary.

Again, Mr. President, I commend the article by Ms. Angle and Mr. Walters to the reading of my colleagues, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GOVERNMENT OF THE PEOPLE?

(By Martha Angle and Robert Walters)

WASHINGTON.—Countless nationwide surveys conducted in the past five years have shown that the vast majority of the American people are cynical, distrustful and suspicious of the federal government which is supposed to represent their interests.

A typical public opinion poll, taken last year, shows that citizen alienation has reached the point where two-third of those questioned agree with the statement: "People like me don't have any say about what the government does."

Those same respondents, by a margin of almost 3-1, say they believe "that the government in Washington is pretty much run by a few big interests" rather than "for the benefit of all the people."

At a time when most citizens believe they have no voice whatever in shaping the federal decisions which directly affect their lives, a little-noticed bill in Congress with the unwieldy title of "The Public Participation in Federal Agency Proceedings Act of 1977" may be an idea whose time has come.

Co-sponsored by Sens Edward M. Kennedy D-Mass., and Charles McC. Mathias, R-Md., that measure would allocate $10 million in federal funds annually to reimburse concerned citizens, their lawyers and their expert witnesses for the time and effort required to fully participate in the policy-making process.

The funds would pay for the expenses incurred by senior citizens, community groups, consumers, the poor and other segments of society which traditionally have been unrepresented in rulemaking, ratemaking and licensing procedures conducted by government departments and regulatory agencies.

It's no surprise that the legislation is opposed by the special interest groups which for decades have been able to get what they want from government agencies by marshaling large, well-financed and often unopposed teams of lawyers, "experts" and "consultants" to argue their case.

The most outspoken critics of the bill have been the nuclear power industry and public utilities. Typical of their attitude was the approach taken during hearings on similar legislation last year by William H. Cuddy, a Hartford, Conn., lawyer.

Appearing as a spokesman for the Northeast Utilities System, a holding company whose subsidiaries provide electric and gas service in Connecticut and Massachusetts, Cuddy said he had never participated in a regulatory agency proceeding in which a citizen group had made "any significant contribution to what I would regard as the overall good."

This year, George Gleason, executive vice president of the the American Nuclear Energy Council, said he feared that the federal reimbursement probably would go to "very wealthy groups backed by multimillionaire philanthropists."

Unstated in those arguments was the distaste the nation's power companies have developed for citizen groups which challenge their proposed rate increases and the hostility the country's nuclear energy establishment has for members of the public who discover geologic fault lines in the earth directly beneath proposed sites for nuclear power plants.

The more sophisticated industry critics of the legislation argue that it would unnecessarily complicate and delay ratemaking and rulemaking proceedings, but numerous federal judges and regulatory agency commissioners have testified that participation by citizen groups often enhances and speeds up the process.

Some of the country's most active citizen, consumer and environmental organizations already are participants in the process. But the cost of participating in a regulatory agency proceeding often is $100,000 or more, and those groups have limited resources to draw upon.

The time has come to open the doors even wider, destroying what Kennedy describes as the popular image of "government decisions always made in Washington by faceless bureaucrats canting legal mumbo-jumbo and following arcane procedures."

THE DEATH OF COTESWORTH PINCKNEY MEANS

Mr. THURMOND. Mr. President, Cotesworth Pinckney Means, a distinguished South Carolinian and a former colleague of mine in the South Carolina State Senate, died on Sunday, April 17, 1977, at the age of 87. In consideration of our old friendship, and of his exemplary character and career, I wish my colleagues to know something more about him.

Mr. Means once said of himself, "The port is my life." By "the port" he meant the port of Charleston, S.C., his lifelong home. To the maintenance and improvement of the port of Charleston Mr. Means gave almost seven decades of concentrated and productive effort.

After attending college at Georgia Tech, where he was a wrestler and a member of a championship football team, Mr. Means joined his father's export business in Charleston. It was at this time that he began to amass the knowledge of waterfront lore which was to prove so valuable to him, and to the public, years later.

He became interested in politics, and was elected to the Charleston City Council in 1924. As a councilman, he served on the port utilities commission, which is no longer in existence.

In 1935, he was elected to the South Carolina State Senate. Thus, he was representing Charleston County in this body while I was representing Edgefield County. I well remember his commanding presence in the Senate chamber, and his affability at all times and in all places. I also remember his rare knowledgeability, especially in matters pertaining to commerce. In the course of his Senate career, which lasted until 1943, he spearheaded an investigation into the decline of water-borne commerce at Charleston.

As a result of this investigation, the State Ports Authority was created in 1942. Logically enough, Mr. Means was one of the first members of the authority, and soon became its chairman and general manager. These positions he held until 1962.

The 20-year period during which Mr. Means headed the SPA was one of continuous growth and progress for the port of Charleston. Largely, thanks to his leadership, the commercial decline that had prompted the Senate investigation was reversed, and Charleston resumed its historic place as one of the leading port cities of the Nation.

If you visit Charleston today and walk along the waterfront, you will see hubbub and commotion everywhere. The port facilities are modern, and they are in constant use. They constitute an impressive and enduring monument to the foresight and the dedication of C. P. Means.

I do not want to leave the impression that Mr. Means was a one-dimensional man. Besides his devotion to the port of Charleston, he had a deep interest in music, and served as choir director at St. Philip's Protestant Episcopal Church for 30 years. In a different kind of musical enterprise, he founded the Charleston Chapter of the Society for the Preservation and Encouragement of Barbershop Quartet Singing in America. He also wrote for the Charleston News and Courier.

Nor did he neglect his family and friends. He endeared himself to all who came to know him with this loyalty, his generosity, and his congeniality. Although he died full of years and full of honors, he will not be mourned any the less for that reason. His death leaves a vacancy in a multitude of hearts in his city and State.

Mr. President, at the time of the death of Mr. Means, an article appeared in the Charleston News and Courier which gives additional information on the life and accomplishments of C. P. Means. This article is well worth the attention of my colleagues, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the News and Courier, Apr. 18, 1977]

PORT'S GUIDING HAND, C.P. MEANS, DIES

Cotesworth Pinckney Means, former chairman and general manager of the South Carolina State Ports Authority (SPA) and former state senator from Charleston County, died Sunday at a local hospital.

Funeral arrangements will be announced by Connelley's.

Mr. Means was born Nov. 18, 1889, in Charleston, a son of the late Robert Martin Means and Mrs. Mary Barnwell Pinckney Means. He attended Charleston schools and Georgia Tech, where he distinguished himself in athletics as a heavyweight wrestler and member of its championship football team. In 1909 he joined his father in the export business of R. M. Means & Son of Charleston.

He was elected to Charleston City Council in 1924 and served until 1932. While on city council he was a member of the old Port Utilities Commission and the Police Commission. He was state senator from 1935 to 1943 and during those years asked for an investigation into the "shrinkage of water-borne commerce through the Port of Charleston."

As a result of the investigation, the SPA was established in 1942, with Means as a member and then as chairman and general manager. He first worked for no salary and was paid $3,600 annually from 1950 to 1957. In 1958 his pay was upped to $12,000. He returned much of the increase to the authority in the form of gifts.

He retired as head of the SPA in 1962 after 20 years of service during which the shipping industry in Charleston was revitalized.

It was later said that Means built the port "brick by brick."

During his tenure as SPA head he had insisted that the port become self-supporting. In a "Report to Citizens of South Carolina" on April 3, 1961, while still SPA chairman, Means wrote: "For 15 years ever since the authority began owning and operating port terminals a small handful of private interests have been securing almost all the cash profits accruing from the new commerce produced by the authority, while the general public, which owns and finances the entire ports program of construction and operations, has received next to nothing."

He held that stevedoring, shipping agencies and others who earn their money on the waterfront were being unnecessarily subsidized by the taxpayer. "Why should the taxpayer grow poor by making these people rich?" he asked.

Even after his retirement, Means kept up with happenings on the waterfront. "The port is my life," he once said.

He also was a guest editorial writer for The News and Courier and an active handball enthusiast. A Mason and a member of St. Philip's Protestant Episcopal Church, where he directed the choir from 1924 to 1954, Means was also founder of the Charleston Chapter of the Society for the Preservation and Encouragement of Barbershop Quartet Singing in America.

Surviving are: his widow, Mrs. Fannie Davis Lucas Means of Charleston; a son, Thomas L. Means of Glen Cove, N.Y.; a daughter, Mrs. Henrietta Means Walton of Alexandria, Va.; a brother, Robert M. Means of Charleston; two sisters, Mrs. M. M. deMerell of John's Island and Mrs. Horry F. Prioleau of Charleston; and four grandchildren.

HIT US HARD, PLEASE, MR. CARTER

Mr. HOLLINGS. Mr. President, in the April 18 issue of Newsweek, columnist George Will demonstrated very cogently the virtues which have won him a Pu-

litzer Prize. "Hit Us Hard, Please, Mr. Carter," is concerned with the energy problem and with the problems attending any proposed energy solution. It is a column based on fact and informed by sound commonsense and considered judgment. Mr. Will is a realist, and his realism gives us a welcome and refreshing perspective on this topic about which so much has been written and yet so little has been said.

Mr. Will understands the fortuitous conditions which have attended, and perhaps even sustained, the brief life of liberal democracy. Whether such Government can perpetuate itself in the harder times which surely lie ahead is a very real question. I, for one, think we can do it. But, as Mr. Will so forcefully demonstrates, the challenge can only be met by the kind of straightforward, hard-hitting leadership that in times of past crises has called for the inner strengths of the American people. We have adjusted to profound change before, but it has always taken a citizenry united in appreciation of the problem and in the willingness to sacrifice and work and overcome. "April 20 will be an important day in the history of popular government," says Mr. Will. "What Carter says will be evidence of a free people's willingness to be farsighted, to be governors of rather than governed by appetites. To be, in a word, mature." What President Carter says—and, I would add, what we as a people do with what he says.

Mr. President, I commend this column to the widest possible audience, and for that reason I ask unanimous consent that it be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

HIT US HARD, PLEASE, MR. CARTER

(By George F. Will)

President Carter, who knows the hymn, has been sowing in the morning, sowing seeds of kindness, sowing in the noontide and the dewy eves. Since January 20 he has spent more than 7 hours talking gently to the nation on radio or television, helping the nation feel more comfortable with him than it felt when rendering that equivocal election result. But now come the unkindest of cuts. Carter has promised, with characteristic panache, that on April 20 he will give the nation an energy policy as serious as its energy problem. He says the policy may cost him the sheaves of popularity he has harvested in the last three months.

There have been three presidents in the three and a half years since the Arabs did this nation the favor of making the energy crisis visible. President Nixon, who had other worries, invoked the chimera of "energy independence." President Ford opposed a stiff tax on gasoline to cut demand: "I was interested in a poll that was published today which indicated that 81 percent of the people don't agree with the various people who are advocating this. I think I'm on solid ground." But all ground seems solid when your ear is to it, and as Churchill said, it is hard to look up to "leaders" seen in that position. Carter seems prepared to *govern*. He knows popularity is capital that cannot be banked forever. After hearing Carter on energy, the nation may feel that someone big has hit it hard with something heavy.

ENERGY: A MALTHUSIAN PROBLEM

The energy crisis is, basically, an oil crisis. It is a pure Malthusian problem, the exponential growth of demand against an exhaustible supply of an indispensable commodity. To state the problem is to comprehend the essence of Carter's policy: conservation. In the short run, it is cheaper to save oil than to produce it. In the medium run, no practicable incentives will cause production to increase as fast as demand will increase unless governments cut demand. And in the not-so-long run, all production incentives will collide with the exhaustion of recoverable reserves.

Among major industrial nations only the Soviet Union is currently self-sufficient in energy. The U.S. cannot meet essential energy needs from sources secure from military or political interdiction. So the stabilizing power of the non-Communist world is vulnerable to production decisions made by a few Saudi leaders. They have a $20 billion trade surplus. They have no economic reason to increase the pace at which they exchange oil of increasing value for paper of decreasing value.

Weak governments, afraid to compel conservation, have printed too much money in order to prevent standards of living from declining as a result of the export of purchasing power to oil-exporting countries. Fragile countries have borrowed enormous sums rather than allow energy costs to curtail development. The result is inflation. And producing countries will not cheerfully expand production of a wasting asset in exchange for currencies of wasting values.

DEMAND VERSUS CAPACITY

In the 1950s the world consumed more oil than had been consumed in all history In the 1960s it did again. Today the non-Communist world uses 50 million barrels a day, the Communist world 10 million. Saudi Arabia has the only substantial capacity for increased production: in a few years it could go from 10 million to 20 million barrels a day. But world demand growing at 5 per cent annually would slurp up such a Saudi increase in four years. Mankind has used 360 billion barrels. There may be 1.5 trillion left. But even if use grows only 2 per cent a year, oil will be gone in less than 50 years, and severe shortages will begin much sooner.

Carter's energy ace is James Schlesinger, a man of somewhat cumbersome architecture, slow in movement but quick in comprehension. He has a smile like pale February sunshine, and precious little to smile about, considering that soon businessmen, environmentalists and people who own houses or automobiles may want to tear him into thin shreds and scatter him across the Potomac to teach him a lesson. His recommendations (more dirty strip-mined coal, more nuclear plants, higher prices) will be democratically disagreeable.

The policy must influence billions of decisions by millions of Americans, and exhortations to voluntarism will not suffice. This is, in part, because there is no current shortage and there will be a conspicuous surplus when Alaskan oil begns flowing this summer. But the main reason why conservation demands determined governmental action—the coercion of regulations, taxes and rising prices—is that conservation must conflict with two cherished American values, comfort and convenience.

Less than half of U.S. energy is used in the production of goods and services. Most of it is used in individuals' consumption, especially in furnaces, air conditioners and, of course, automobiles.

Through the ages there have been essential commodities the demand for which is relatively "price inelastic." That is, demand dropped only slightly even when price rose steeply. Salt was one such commodity. Today gasoline is another because automobiles are essential for so many cherished things like Sunday drives, cross-country vacations, low-density suburban living. It is politically risky to start using government to revise the American Way of Life. But it is irresponsible not to.

Americans tend to misplace reality; often they lose it at the movies. I suspect that movies like "Giant" shaped American attitudes about the limitlessness of oil. You may remember Jett Rink (James Dean) poking around in dusty Texas earth and striking oil in his own backyard. Soon he had something like Spindletop drenching him with oil.

LIBERAL DEMOCRACY'S DILEMMA

But in 1972 a Texas official said of the Texas oil fields. "This old warrior can't rise any more." The familiar word is depletion and it may mean the end of a lot that is familiar. The consumer civilization of the postwar period was made possible by $2-a-barrel oil. For a century—about half the life of liberal democracy—we have been passing through what scholars call an "energy bubble" of cheap oil. Viewed against the vast backdrop of history, this experience has been highly unnatural.

Liberal democracy is government that rests lightly upon people. It has existed rarely, and only during the two centuries of rapid economic growth in the West. It probably has been made possible by that growth, by the belief that a rising tide raises all boats, a belief that dampens the worst social conflicts. And viewed against the backdrop of history, our experience of liberal democracy has been, as Saul Bellow says, "brief as a bubble."

April 20 will be an important day in the history of popular government. What Carter says will be evidence of a free people's willingness to be far-sighted, to be governors of rather than governed by appetites. To be, in a word, mature.

THE DEATH OF C. LANEY TALBERT

Mr. THURMOND. Mr. President, on Wednesday, March 30, death overtook one of the most durable, influential, and highly respected political figures in the State of South Carolina. C. Laney Talbert, a member of the South Carolina House of Representatives from 1942 to 1946 and Richland County supervisor from 1950 to 1975, passed away in Columbia at the age of 69.

I had the privilege of knowing Laney for more than 50 years. Indeed, he was one of my students when I was teaching school in Edgefield County shortly after graduating from Clemson in 1923. It is a deep personal loss to me to lose such a longstanding and close friend, and I wish to put on record my admiration for his character and achievement.

An Edgefield County native, Laney Talbert spent almost his entire life in public service. Starting as a member of the Eau Claire town council in 1938, he moved on to become a member of the South Carolina House in 1942. Between 1946 and 1950, he worked as an official of the South Carolina Department of Corrections. All of these posts he filled with distinction. It was as Richland County supervisor, though, that he made his greatest mark in public life.

The job county supervisor, which he first won in 1950 and held continuously until it was abolished in 1975, gave him responsibility for the county jail, prison camps, convalescent home, farm-to-market roads, and public works. His wide-ranging duties would have overtaxed the strength of most men, but for Laney Talbert, work and recreation were one and the same. His deep and lifelong

commitment to helping people, particularly the weak and the underprivileged, made him seemingly invulnerable to long hours and tedious routine.

In his six terms of office, Laney Talbert won the personal friendship of an astonishingly large percentage of his constituents, and the respect and confidence of many more. The general esteem which he enjoyed is apparent in the day of mourning which the Richland County council declared in his honor. It is even more apparent in recent remarks by his political rival of many years, Richland County Treasurer Tom Elliot:

We always loved each other and always respected each other. . . . Even when our different factions were warring against each other, he and I always laughed about it and got along fine.

In short, Laney Talbert brought dignity and prestige to the profession of politics. He also brought a rare exuberance which endeared him to even the most resolute of opponents.

A legion of friends and acquaintances are now grieving the loss of this outstanding man and citizen. I extend sincere condolences to all of them. I extend special condolences to members of his family, although I realize that they have sustained a blow which no words can soften. These include his wife, Mrs. Mary Catherine Power Talbert of Columbia; his daughter, Mrs. James Yager of New Orleans; his sons, C. Laney Talbert, Jr., of Columbia, and S. Watson Talbert of Camden; his sisters, Mrs. Paul Kerr of Chapin and Mrs. Helen T. Hunter of Charlotte; his brother, Leroy B. Talbert of Columbia; and his 12 grandchildren.

I hope that, in this hour of affliction, they will be able to find some consolation in the honored name Laney Talbert leaves behind. Against such a name, neither age nor illness has power.

Mr. President, at the time of the death of Laney Talbert, two articles appeared in the State newspaper of Columbia which contain more details of his life and career than I have been able to recount. In order that my colleagues may have access to this additional information, I ask unanimous consent that these articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Columbia, S.C., State, Mar. 6, 1977]

C. LANEY TALBERT, FORMER RICHLAND SUPERVISOR, DIES

C. Laney Talbert, a former state representative and Richland County supervisor, died Wednesday from cancer at Providence Hospital. He was 69.

He served six terms as county supervisor, beginning in 1950. He retired from that post in 1975. He served in the S.C. General Assembly from 1942–1946. He was considered one of the most powerful politicians in the Columbia area.

As county supervisor he had jurisdiction over the county jail, the convalescent home, the farm-to-market road program, public works and the prison camps.

"He was a dynamic person with the ability to approach a problem and in so doing give consideration to everybody who had the problem," said W. D. "Son" Grimsley, Talbert's political ally and friend.

"He did favors for many, many people in this county and helped many people who couldn't help themselves," said Richland County Treasurer Tom Elliott.

Talbert served out his political term despite legislation in 1972 to abolish the supervisor's job and strip him of most of his powers.

The latter years of his political clout were colorful, with battles between his faction and the political clique led by Elliott.

In spite of their political differences, Elliott said, "We always loved each other and always respected each other. There was never any ill feeling between us personally.

"Even when our different factions were warring against each other, he and I always laughed about it and got along fine," he said.

Richland County politicians said Talbert was close to the people, hardworking and economical.

"He was the only man I've ever known in public office who always returned a telephone call," said Sheriff Frank Powell. "I'd see him up in his office until 10 or 11 p.m., returning calls from every Tom, Dick and Harry who wanted to talk to him."

Richland County Administrator Robert G. Mauney said Talbert was "instrumental in laying the basic foundation for the modern county government which we're building on today."

Former County Councilman S. Hunter Rentz said, "A lot of people really loved the man. They really looked to him for guidance. His death represents the death of a previous political era."

Born into a family of politicians in Edgefield, Talbert was the son of the late Thomas Garrett Talbert, a state senator, and Camilla Parker Talbert.

While serving as Richland County superintendent, Talbert hired the first black employe in the county to serve in a responsible position. He also hired the first black captain for the Richland County Department of Public Works.

His first political service was on the Eau Claire Town Council from 1938 to 1942, when he was elected to the S.C. House of Representatives. He served two terms in the House.

He was a purchasing agent for the S.C. Department of Corrections from 1946 to 1950. Later, as supervisor, he served as the first chairman of the Richland County Board of Administrators.

He was a member of the First Baptist Church, where he was a member of the Baraca Sunday School Class. He was a member of the Eau Claire Masonic Lodge, the Jamil Shrine Temple and was a charter member of the Eau Claire Exchange Club.

Surviving are his widow, Mrs. Mary Catherine Power Talbert; a daughter, Mrs. James Yager of New Orleans, La.; two sons, C. Laney Talbert Jr., of Columbia and S. Watson Talbert of Camden; two sisters, Mrs. Paul Kerr of Chapin and Mrs. Helen T. Hunter of Charlotte; a brother, Leroy B. Talbert of Columbia and 12 grandchildren.

Plans will be announced by Talbert-Shives Funeral Home.

Richland County Council has declared Friday a day of mourning for Talbert. All county offices will be closed and county employes will be given the day off. Council also asked that flags in the county as well as those in the city be flown at half mast.

[From the Columbia (S.C.) State, April 1977]

C. LANEY TALBERT SR. RITES TODAY AT 11 A.M.

Services for C. Laney Talbert Sr. will be at 11 a.m. today at the First Baptist Church, conducted by the Rev. Edwin Young and Father W. L. Gatling. Burial will be in Elmwood Cemetery.

Pallbearers will be W. D. Grimsley, Billy E. Taylor, Frank A. Graham Jr., Lewis Scott, Lewis Cromer, Dr. W. L. Williams, Aubrey E. Stroman, Lonnie B. Nelson, W. Edgar Helms and Wylie Koon.

Mr. Talbert, 69, a former state representative and Richland County supervisor, died Wednesday.

Talbert-Shives Funeral Home is in charge.

THE SIX HORSEMEN OF THE REGULATORY REFORM APOCALYPSE

Mr. KENNEDY. Mr. President, Civil Aeronautics Board Chairman, John E. Robson, testified before the House Aviation Subcommittee on April 18 on the subject of regulatory reform of the air transportation system. Mr. Robson strongly supported legislation to lessen Federal regulation in order to lessen the barriers to entry into the industry and to introduce price competition among interstate airlines. Senator HOWARD CANNON and I introduced S. 689, the Air Transportation Regulatory Reform Act of 1977, earlier this year. That bill would accomplish the goal of less regulation and more competition. As many of us know, those airlines opposing reform have raised a number of arguments that do not withstand analysis. Chairman Robson—who came to the CAB 2 years ago—has examined those arguments and points out that none of these arguments holds up under the light of commonsense and facts. Chairman Robson's statement addresses the myth that current regulation supports air service to small communities, the unsupportable contention that moderate and responsible reform will jeopardize employment and a number of other questions concerning reduced Federal regulation of the airlines. I urge my colleagues to examine Chairman Robson's statement and ask unanimous consent that it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

INDIVIDUAL STATEMENT OF JOHN E. ROBSON, CHAIRMAN OF THE CIVIL AERONAUTICS BOARD

(Hearings on aviation regulatory reform before Subcommittee on Aviation, House Committee on Public Works and Transportation, April 18, 1977)

Mr. Chairman, Members of the Committee, my purpose is to underscore the important points of Board consensus on the need for aviation regulatory reform and try to place in perspective areas where the emphasis of individual Board Members might differ.

Based on its independent analysis, the Civil Aeronautics Board has twice in the past year recommended to Congress that regulation be fundamentally redirected so that the domestic commercial air system will increasingly rely on competitive market forces rather than government regulation.

The Board has urged that Congress accomplish this basic change explicitly through amendment of the present law and has submitted for consideration legislation to effect this statutory revision.

We have pointed out that the natural concomitants of a genuinely competitive air system—while substantially beneficial on the whole to both the public and private sectors—can possibly be painful at times to individual entities. I urge that such possibilities not serve as the reason for Congress to shrink from making the regulatory change the Board recommends. Rather, they should be examined as factors in determining how that change should be implemented.

I believe the case for regulatory reform is compelling. I do not mean just tinkering with the law to bring about improved procedures. I mean a basic reduction in the role of government in the economic decisions of the airlines.

A competitive air system does not mean a surfeit of actual competition. It means that there will exist sufficient actual competition and a realistic threat of new competition. In this environment airlines will be economically required to provide air services at the prices and quality the traveling and shipping public needs and wants and carriers will have continuing incentives to meet the levels of efficiency and innovation which will enable them to do so.

Over the years the present protective system of regulation has induced costly inefficiencies through over-scheduling, over-capacity, competition in frills, equipment races and in other areas. It has not provided the environment or the incentives for basic price competition. Because of these inefficiencies, and the regulatory system's insulation of labor-management bargaining, neither the airline investor nor the consumer has fully reaped the potential benefits of the industry's enormous past productivity gains and growth. Nor has regulation produced a financially strong airline industry. These characteristics of the present regulatory structure are not speculative. Their existence was detailed in the Board's testimony on regulatory reform given to this Committee last spring and has been documented by others.

The favorable economic environment during which the airlines grew up, the air system saw its greatest development, and when regulation seemed to work pretty well, has dramatically changed. This extremely favorable economic climate and the rapid technological advances of the past tended to obscure inherent problems in the regulatory system and mask the errors of the regulator and the carriers. Now an adverse environment of rising costs, moderate traffic growth and sluggish productivity gains has replaced the economic pattern that was just the reverse. A regulatory system designed for a different economic era and a then developing, new industry should be changed to meet the conditions of the present and the future.

The future of regulation under the current structure faces serious difficulties, many of which are detailed in the Board's testimony. In my view, the long-term prospects for the public and the industry under the existing regulatory system are not good.

Of course, it is not possible to re-create the United States elsewhere on the globe and test with microscopic accuracy how every individual element of the aviation world would behave or be affected in an air system reliant on competitive market forces. However, the empirical evidence we have supports the conclusion that excellent, attractively priced safe air transportation, which is profitable to the carrier, can be provided without tightly protective economic regulation. Moreover, convincing empirical evidence or analysis to the contrary has not been presented.

I would respectfully observe that year in and year out Congress acts on many issues—including the imposition of far-reaching regulation—where the economic and public stakes are as great or greater than aviation regulatory reform and the empirical and analytical base is less. I do not mean to suggest that careful consideration should not be devoted to the issue of reducing airline regulation. But if absolute certainty and a perfect empirical base are conditions to Congressional action, will you ever be able to act on this or countless other vital matters?

The opponents of regulatory reform have widely prophesied what might be styled the "Six Horsemen of the Regulatory Reform Apocalypse": abandoned service; capital starvation, possible carrier failure; employee hardship; excessive industry concentration; and destruction of the U.S. air system. I fully respect their right to present their case. But it is worthwhile addressing their arguments directly because I do not believe that they hold up well under close scrutiny.

Abandoned Service. I think we should put aside excessive concerns over service to America's small communities—those where certificated jet service is truly uneconomical because of low levels of traffic. A subsidized small community service program is a key element of every regulatory reform proposal. A small community program such as the Board's will not only protect and improve air service to small communities now receiving subsidized service, it will extend service to points which are today cut off from the national air network. And it should do so more economically from the taxpayer's standpoint than is possible under today's antiquated subsidy law.

Insofar as carriers dropping non-subsidized service to allegedly unprofitable points, the fact is that the carriers have already stopped serving most of them. Since 1950, certificated service has been deleted by the Board at 248 points, a net reduction of 36 percent. Moreover, the airlines now have considerable flexibility to leave and enter individual city-pair markets and reduce their level of service without any regulatory approval. The carriers are today voluntarily serving the various points on their systems because passengers use the service and it is generally profitable for the airlines. If, as they sometimes claim, a carrier is willingly performing money-losing service at particular points, I suggest that is a matter which might be clarified for its shareholders. And there is no rational basis to substantiate the view that regulatory reform will reduce the need or desire of people for air travel from and to these points or the economic incentives of carriers to provide air service to meet those needs and desires.

Capital Starvation. Will alleged uncertainties stemming from regulatory reform "turn off" the financial community? The fact is that the financial community's general dissatisfaction with the airline industry goes back long before regulatory reform was seriously considered. Just last month a leading insurance company airline lender testified in the Senate that, "The financial results over the past twenty years are not acceptable" and that, "The industry's investment returns have consistently been substantially below comparable returns for most major U.S. industries." But the important additional point is that, even during the recent difficult years for the airline industry as a whole, carriers perceived as well managed and profitable have been able to obtain the capital they needed—just as is the case with firms in unregulated sectors of the economy where most U.S. capital is loaned and invested. There is no reason to believe that well managed, profitable carriers will be barred from funds in a less regulated environment. I might observe that the probability of regulatory reform legislation is probably as high now as it has ever been. But despite this alleged element of uncertainty, the carriers, because of their recently improved financial position, have been able to secure in the past eight months $2.73 billion of financing for aircraft and other purposes from various sources, including the equity markets.

The financial past of the airline industry has not been good. What about the future? Here are some recent observations from respected airline industry security analysis:

"The long-term financial strength of air transportation will ultimately rest on the extent to which Government, at all levels, reduces its control over the industry." (Wainwright Securities Inc., March 10, 1977.)

". . . If the industry is to avoid atrophy into a low growth rate, regulated utility . . . the best way is through competitive experimentation. . . . The industry need not fear an easier entry policy provided that the transitional phase is gradual, the entry and exit rules are predictable, and the carriers are efficient operators." (Merrill, Lynch, Pierce, Fenner & Smith, October 18, 1976.)

It is difficult to see how initial uncertainties which some allege will result from regulatory reform can create more difficulties for the industry with the financial community than has been the case in the past—or any greater volatility than the current system where regulatory policy is so heavily dependent on the changing identity of Board Members.

Possible Carrier Failure. We should first recognize that the airline business is complex and emphasize that the existing carriers are experienced and skilled. They have demonstrated that they can tighten their belts and achieve greater efficiency when they have to. A more competitive environment should underscore these incentives. There is today among the existing carriers substantial variation in break-even load factor, a key measure of efficiency. This suggests that there is room for improvement by carriers which are currently less efficient than others. I should point out, too, that even the chief executives of those carriers strongly opposed to regulatory reform have, under questioning in the recent Senate hearings, expressed confidence that they do not fear a competitive environment and would expect to do well in it.

It is true that the rigors of a competitive environment can work financial hardship on individual firms which are not efficient or are poor competitors. That is the case in the vast majority of American businesses. It is also the fact that financial hardship has beset airlines under the present regulatory system. Only two years ago a number of carriers—including some of the largest—were in financial extremis. And in the past, there have been a number of carriers which teetered on the brink of bankruptcy and were salvaged only by merger with another airline. None of the regulatory reform proposals would preclude the merger route in similar future circumstances. But the important points are that the present regulatory system offers no guarantee against carrier bankruptcy, has not produced a financially strong industry, and, in my view, enhances the risk of serious financial difficulty in the long term.

If Congress desires to guarantee the existence of each individual entity and interest in the present system—whatever its level of efficiency and at whatever cost to the traveling and shipping public—you must take an entirely different direction that the Board suggests.

Employee Hardship. Airline labor has generally prospered during the historical growth of the regulated air system. And there is no basis to expect that they cannot continue to prosper in a more competitive system. Indeed, we should expect that the number of jobs in the industry will expand as the demand for air travel increases under regulatory reform. Individual corporate executives almost uniformly express confidence that their respective airlines will do well in a competitive environment—a confidence their employees should have no reason to reject.

Other than such rights as may be in their collective bargaining agreements, airline employees currently have no protections against the effects of a carrier bankruptcy or when an airline deletes or suspends service at a point or in a city-pair market on its system, or when it reduces the number of flights.

No one is proposing either to interfere with airline labor's right to organize and bargain or to tamper with employee rights under

labor agreements. And I assume that regulatory reform legislation will preserve the Board's present powers to impose labor protection provisions in airline mergers and route swaps.

But let us concede that some less efficient carrier could not successfully compete under a more competitive air system and its employees suffer. It strikes me that Congressional concerns over the welfare of these existing job holders are not best addressed by declining to make changes in the regulatory structure which will substantially benefit the great majority of working men and women and the public as a whole. Rather, they are best dealt with by providing a gradual transition which will give the carriers and their employees time to adjust to a new way of life, or, if Congress wishes, by providing statutory labor protections financed with public funds.

Industry Concentration. Would a more competitive regulatory regime lead to excessive concentration of the industry and the survival of a few monopolistic airlines? There is no persuasive data or empirical evidence to support that thesis.

In the first place, 40 years of protective regulation has persevered, and perhaps enhanced, the level of industry concentration. In fact, the greatest growth and least concentration has occurred in the commuter carrier industry which is essentially unregulated. In 1938, 21 trunk carriers were certificated for the 48 States. Today there are 10. Of the 17 supplemental carriers which have been certificated, 7 remain. And of 32 local service carriers certificated over the years, the remaining 10 today serve about 8 percent of the 48-State market. So, despite the tremendous growth of commercial aviation, the existing system of regulation has certainly not expanded the number of significant participants or reduced concentration.

Second, the airline industry does not show the characteristics which induce economic concentration. There are no economies of scale. In fact, the Board's and other analysis show the contrary in that the largest carriers have higher unit costs than medium-sized and smaller carriers.

Third, entry barriers to the industry are relatively modest and the basic assets of the business—aircraft—are mobile. The airline industry is not like steel or automobiles where massive, immobile fixed investments are required.

Finally, there is no reason to expect that, even with greater freedom under regulatory reform, the larger carriers will suddenly reverse their fundamental, long-term investment and marketing decisions—to standardize their fleets with large aircraft and concentrate on larger, longer-haul markets—and seek to invade medium and small markets where smaller and better suited aircraft fleets and distinct marketing efforts have made the local service carriers and small trunks tremendously efficient and effective competitors. Just as the commuter carriers have geared their equipment and operations to specialize primarily in small markets, the specialization of the trunks and the local service carriers in the markets they now serve does not suggest, however well financed any of them may be, that either will reverse the direction of their fleet investment or change the basic nature of their operations in an attempt to devour the other.

Destruction of the System. Mr. Chairman, it is frequently suggested by opponents of regulatory reform that Federal regulation sustains the air system. That is simply not the case and it is imperative that Congress recognize this fact as it deliberates regulatory reform. The only reason the airlines are in business is because people all over America need and want to travel by air. No decision of the Civil Aeronautics Board has ever required anyone to buy an airline ticket. No regulatory action has ever made anyone get on an airplane. If a tidal wave washed away the Board, just as many people would need and want to fly. And, if for some reason people ceased needing and wanting to travel by air, there is no action the Board could take which would restore that lost business to the carriers.

It is natural, I suppose, that those opposed to regulatory change will pooh-pooh the potential benefits and stress the "horribles." The Board has been honest in identifying potential problems. But, for the reasons discussed above, I do not believe that the possible problems warrant overemphasis or that they overcome the persuasive case for regulatory change.

Two final points in the Board's testimony should be addressed.

First, the task of reform requires clear statutory direction from Congress and the tools to do the job. It would be unfair to leave the Board with its presently ambiguous mandate and cumbersome procedures and implicitly ask it to effect the basic long-term changes we have recommended. The carriers and their employees, the financial world, airport operators, communities and the Board should know what direction aviation regulation is supposed to go. Otherwise you leave fundamental regulatory policy to the vagaries of the appointment process and the courts.

You will be told that basic regulatory reform can be achieved without any change in the present law. I urge you to reject this because it is at heart an argument for no change. Those who do not want a more competitive air system will fight change under the present law through procedural delay and in the courts. And those who say they are willing to see a genuinely competitive air system created under the current law surely cannot object to Congress making that change explicit and providing the necessary tools to get the job done.

You will also have to weigh carefully the question of how much discretion is left in the regulatory agency to implement your mandate for reform. I am one regulator who does not underestimate the demands and difficulty that the presence of such discretion places on the Board. Each of the five Members will always have differing perspectives. Even the Board's testimony today, while unified in its central recommendation, is a substantial compromise of differing emphasis and tone. So you must recognize that the greater the degree of discretion left in the Board to implement the transition to a market-regulated system—out of concern for caution and flexibility—the less will be the clarity, certainty and expedition of that transition.

Mr. Chairman, it is my sincere hope that Congress will enact meaningful aviation regulatory reform legislation. In my view it offers the best prospect of maintaining a privately-owned, financially healthy, efficient and innovative air system which will be fully responsive to public needs. I think it offers the best chance of avoiding the difficulties which have beset other regulated transportation industries. I appreciate that change is difficult. But it can, in my opinion, be accomplished responsibly and effectively and with the preservation of the good features of our present air system.

ROUTE 72 BRIDGE

Mr. HOLLINGS. Mr. President, on April 14, 1977, the South Carolina General Assembly passed a concurrent resolution urging the U.S. Corps of Engineers to build a four-lane bridge connecting Georgia Route 72 and South Carolina Route 72 adjacent to Elbert County, Ga. It is felt that the future growth and prosperity of this region of Georgia and South Carolina depends in part on these highways and that a four-lane bridge is needed to adequately handle the traffic on these routes.

On behalf of the senior Senator from South Carolina (Mr. THURMOND) and myself, I ask unanimous consent that this resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

A CONCURRENT RESOLUTION

To urge the United States Corps of Engineers to build a four-lane bridge connecting Georgia Route 72 and South Carolina Route 72 in the area of the Richard B. Russell Dam and Reservoir project; and for other purposes

Whereas, currently Georgia Route 72 and South Carolina Highway 72 meet at the boundary of Georgia and South Carolina adjacent to Elbert County, Georgia; and

Whereas, the construction of the Richard B. Russell Dam and Reservoir project on the Savannah River will inundate portions of these highways; and

Whereas, the future growth and prosperity of this region of Georgia and South Carolina depend in part on these highways; and

Whereas, a four-lane bridge connecting these highways will be needed in the near future to adequately handle the traffic on these routes to ensure the continued growth and prosperity of this area of Georgia and South Carolina. Now, therefore,

Be it resolved by the House of Representatives, the Senate concurring:

That the General Assembly, by this Resolution, hereby urges the United States Corps of Engineers to construct as part of the Richard B. Russell Dam and Reservoir project on the Savannah River a four-lane bridge connecting Georgia Route 72 and South Carolina Highway 72.

Be it further resolved that copies of this Resolution be forwarded to the United States Corps of Engineers, to the members of the South Carolina Congressional Delegation, to the Georgia Department of Transportation and to the South Carolina State Highway Department.

(This concludes additional statements submitted today.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER (Mr. BURDICK). Is there further morning business? If not, morning business is closed.

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977

The PRESIDING OFFICER. Under the previous order, the hour of 1 p.m. having arrived, the Senate will now resume consideration of the motion to recommit H.R. 3477, with instructions, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill H.R. 3477, to provide for a refund of 1976 individual income taxes, and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

The PRESIDING OFFICER. Time for debate on this motion is limited to 1 hour equally divided and controlled by the Senator from Louisiana (Mr. LONG) and the Senator from Arkansas (Mr. BUMPERS), with a vote thereon to follow immediately thereafter unless a motion to table is made.

Mr. BUMPERS. Mr. President, I yield myself as much time as I may use.

Mr. President, I have observed one thing about the U.S. Congress in the very short time I have been here. Unless one is willing literally to get his brains kicked out on an issue he believes in very strongly several times, and keeps coming back, he is not likely to be very effective.

I found that tenacity is, perhaps, the greatest quality needed to be an effective Senator. In the past 2 years on many occasions, I have been defeated, and have come back with the same proposition over and over again. Ultimately, I have been able to prevail in a few things.

Unfortunately, on the issue at hand this will not be possible. Once the Senate adopts this particular proposal to increase the investment tax credit from 10 to 12 percent and the so-called jobs incentive provision, and assuming that this or something similar to it sticks in the conference with the House, there will not be an opportunity to come back and present it again.

If my position is correct, and the position of those who have joined me, such as the distinguished Senator from Massachusetts (Mr. KENNEDY) is correct, 6 months from now it will not do any good to come back to this body and say, "See, I told you so," because the law will be on the books; the business groups in this country that will take advantage of this will have already begun to take advantage of it.

So I am a little saddened because I strongly suspect the floor manager has more than enough votes to defeat this motion, and all I can do is repeat what I said in the beginning.

When the President, on whom we depend to give us at least some guidance—and I am not suggesting that the executive branch or the President is the fountain of all wisdom—but when the President, I think very courageously, dropped the tax rebate provision the other day, he did it for the very best of reasons, not the least of which is that the economy is recovering at a very fast pace, faster than anybody imagined.

The front page story in the Washington Post this morning was that the gross national product for the first quarter of 1977 is twice the rate of growth of the last quarter of 1976. Last month we saw the unemployment rate drop from 7.5 percent to 7.3 percent. The President has been saying that he hoped by the end of this year we could possibly get the unemployment rate down to 7 percent.

I am going to make a prediction, which is always dangerous here, but I am going to predict that by July 1, if not sooner—even possibly by May 1—you are going to see the unemployment rate in this country down to 7 percent. Now, that is an optimistic projection, and I hope I am right for more than one reason, not just because it is a prophecy that will come true, but because it would bid well for the future of the country economically.

So the President said:

> I am dropping the tax rebate because the economy indicates that it no longer is necessary, and I am coupling the drop of the tax rebate with the so-called business incentive of $2.5 billion

which was to increase the investment tax credit and so-called jobs incentive provision.

It was rather widely reported in this country when the President submitted his tax rebate proposal—he never admitted it, of course, but it was widely reported in the country, and I am one who happens to subscribe to the idea—that when he proposed the $11.5 billion rebate that he was going to give to the American people, he added this provision almost as an afterthought so that business could not say, "You have overlooked us."

I do not think he had any enthusiasm for it in the beginning. It is just the same old trickle-down theory. It never has worked and never will work, and most of the people on this side of the aisle have made innumerable speeches about their contempt for the trickle-down theory.

So I was pleased when the President said, "Not only are we going to drop the tax rebate but we are also going to drop this thing for business."

Then, Mr. President, Mr. Carter has said he is single-mindedly devoted to the proposition that this country must start living within its means, and that by 1981 he intends to see that we are living within our means.

He says he takes his campaign promises seriously, and that during the campaign when he said he would balance the budget by 1981 he meant just exactly that. I said, "Congratulations, and I will do everything I can to help you."

I have a resolution pending in the Senate right now which would amend the Constitution to force this Government to live within its means. It is not going anywhere, and I know it is not going anywhere—maybe we will hold hearings on it—but it is an interesting thing to me that there are 20 cosponsors to my resolution from both sides of the aisle. But what a curious enigma it is that when the President himself, the Secretary of the Treasury and the Secretary of Labor all say this $2.6 billion we are talking about here is going to be another waste, the budget-balancers seem to dissolve and vanish into thin air. They cannot be found.

I am also curious, and I am sure the floor leader for the bill will be happy to tell us, how many jobs are going to be created with this provision? I do not want one of those computer models because he himself says he has nothing but contempt for computers. The only thing you get out is what you put in, and there is some merit in what he is saying. But I am curious. How many jobs can we expect to be created under this bill, under this particular provision?

Mr. LONG. Mr. President, will the Senator yield?

Mr. BUMPERS. I yield.

Mr. LONG. The House estimate is there would be as many as 200,000 to 400,000 jobs created.

Mr. BUMPERS. How was that computation made?

Mr. LONG. I assume they made it in somewhat the same way we made ours, by taking some samplings, talking to people, talking to small business organizations interested in the jobs credit and coming up with the best, most intelligent, guess they could make under the circumstances.

May I say to the Senator that in terms of these estimates—I think their method of estimating that is just as accurate as the administration's estimate of how many jobs they were going to be creating with the $50 tax credit or the 2-percent increase in the investment tax credit.

Now, based on the information I have, I think that is a conservative estimate for that approval.

Mr. BUMPERS. I agree with the Senator 100 percent. I just finished saying that the executive branch is certainly not the fountain of all wisdom. I did not agree with their projection on the $50 rebate and, frankly, I do not believe, and we will never have any way of disproving each other, that this provision is about to create anywhere between 200,000 and 400,000 jobs.

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. BUMPERS. Yes.

Mr. LONG. But is it not true if it does not create any substantial number of jobs then the cost will be practically nothing? The cost will be very, very minor.

Mr. BUMPERS. But you have the investment tax credit.

Mr. LONG. The cost will be very, very minor in the event no jobs are created. In other words, if no jobs are created there would be no cost in the provision except for some jobs which would have been created anyway, and in that case the number of new jobs created must be at least 3 percent above the base figure.

Mr. BUMPERS. If somebody elects to replace all of his capital equipment in his plant anyway, he is going to get the advantage of the 2 percent investment tax credit increase.

I shall not continue to belabor that. If we had passed such a provision as this last December, and had it become effective in January, this morning's Washington Post report about the gross national product having doubled since the last quarter of 1976, would have put everybody in a state of euphoria. They would have said, "You know, the U.S. Congress is as wise as a tree full of owls. We put this provision in and look what it has done."

But we did not do it last December, and the economy is moving extremely well by itself.

As a matter of fact, if it continues to move the way it has the first quarter of this year this provision and no other provision will be necessary. The only problem we are going to have is inflation in the next 6 months. But now we are going to put this into place, and I suspect we are, indeed, going to adopt this provision. I think the economy is going to move well, business is going to take advantage of this, they are going to hire more people just as they are going to do anyway and every economic indicator indicates they are going to hire these people anyway because business is good right now.

So we can all come back 6 months

from now and say there is just no telling what would happen in this country if we did not pass this provision giving business this $2.6 billion.

Mr. President, I am not attempting to be perjorative in my position, and I am not deprecating the Finance Committee or anyone else who happens to believe in this.

It is a curious thing to me that the so-called liberals in this body like the jobs credit incentive, and the conservatives like the increase in investment tax credit. We have the little thing to bind in there so it attracts everyone, and it is almost impossible to defeat it. But I can tell Senators if the Senate does not reject my motion today, and we have a chance to vote on it, 6 months from now this motion would be adopted overwhelmingly.

I yield 5 minutes to the Senator from Maine.

Mr. MUSKIE. Mr. President, at the outset may I say that I support the Kennedy-Bumpers amendment for reasons that I hope I have time to discuss in more detail. But before I get to that I shall make some observations from my perspective as chairman of the Budget Committee on this whole exercise.

I supported the idea that we go forward with the consideration of the tax bill this week. The bill was on the calendar. It had been reported, and it seemed a reasonable proposition to finish action on it notwithstanding the President's decision to withdraw from the $50 tax rebate.

I since had some occasion to change my mind about the wisdom of that for reasons I hope I can state briefly.

The complications for the budget process not only in fiscal year 1977 but in fiscal year 1978 are such that what we are risking by considering the tax policy this week not only for this year but for the 1978 fiscal year, is impacting the 1978 budget resolution which is on the calendar without full consideration of all of the implications of that resolution.

Mr. President, at the outset of what I am about to say, I ask unanimous consent to have printed in the RECORD a table which shows the fiscal year 1977 and fiscal year 1978 budget impacts, given different assumptions about the pending measure and its success or failure, about the bill as it stands following Finance Committee action, reflecting the impact of the Matsunaga-Packwood floor amendment which I gather we will consider, and another Matsunaga small business amendment which we will be asked to consider and a combination of those.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

BUDGET SITUATION

[In billions of dollars]

	Budget resolution [1]	Eliminate rebate and business tax cut (adopt Bumpers-Kennedy motion)	Eliminate rebate only; keep business tax cut (reject Bumpers-Kennedy motion)	Adopt Matsunaga/Packwood amendment to increase standard for single persons to $2,400; eliminate rebate; keep business tax cut	Adopt Matsunaga amendment to double employment tax credit; eliminate rebate; keep business tax cut	Adopt both Matsunaga-Packwood standard deduction and Matsunaga employment credit amendments; eliminate rebate; keep business tax cut
Fiscal year 1977:						
Outlays	417.45	414.9	414.9	414.9	414.9	414.9
Revenues	347.7	354.2	353.4	353.2	353.0	352.9
Deficit	−69.75	−60.7	−61.5	−61.7	−61.9	−62.0

	Budget resolution [1]	Eliminate rebate and business tax cut (adopt Bumpers-Kennedy motion)	Eliminate rebate only; keep business tax cut (reject Bumpers-Kennedy motion)	Adopt Matsunaga/Packwood amendment to increase standard for single persons to $2,400; eliminate rebate; keep business tax cut	Adopt Matsunaga amendment to double employment tax credit; eliminate rebate; keep business tax cut	Adopt both Matsunaga-Packwood standard deduction and Matsunaga employment credit amendments; eliminate rebate; keep business tax cut
Fiscal year 1978:						
Outlays	458.8	459.3	459.3	459.3	459.3	459.3
Revenues	395.6	395.9	393.9	393.2	393.1	392.3
Deficit	−63.2	−63.4	−65.4	−66.1	−66.2	−67.0

[1] 3d budget resolution for fiscal year 1977; 1st budget resolution for fiscal year 1978 as reported by Senate Budget Committee.

Mr. MUSKIE. Mr. President, what you see with respect to fiscal year 1978 is this: The deficit that we reported out of the Budget Committee for fiscal year 1978 is $63.2 billion.

If the Kennedy-Bumpers amendment fails, the deficit for fiscal year 1978 becomes $65.4 billion, a rise of $2.2 billion over the budget resolution which is on the calendar.

If the Kennedy-Bumpers amendment passes then the 1978 deficit will be $63.4 billion or $200 million above that in the budget resolution. If we adopt the Matsunaga-Packwood floor amendment to increase the standard deduction, the deficit will rise to $66.1 billion. If there is an alternative to that and we adopt the Matsunaga increased employment credit amendment the deficit rises to $66.2 billion.

So what we may be in the process of doing here is restoring an old habit of this Congress that prevailed for almost 200 years and that is writing congressional budget revenue bill by revenue bill, spending bill by spending bill and abandoning the idea that all ought to be done within the context of an overall budget plan.

I say to you, Mr. President, and colleagues in the Senate, that the $63.2 billion deficit figure in the budget resolution was possible only because the Budget Committee was extremely restrictive on budget spending.

Mr. President, will the Senator yield 2 additional minutes?

Mr. KENNEDY. I yield 2 additional minutes.

Mr. MUSKIE. I expect that there would be pressures in this Chamber to raise functional spending limits to accommodate programs and policies in which Members are interested and we may well yield.

So the $63.2 billion deficit, in my judgment, as a practical matter, looking to the possibilities is a rock-bottom figure. So that our decisions on these business tax cuts and our decisions on the Matsunaga-Packwood amendment will have the effect of increasing the deficit projected in the budget resolution.

I understand, of course, that that deficit number has not yet been adopted by the Senate. I understand, of course, that it is not binding on the Senate. But if we pass any increases in the deficit as a result of our consideration of the tax bill then what we do here, I take it, will be regarded as binding on the Senate when we get to the budget resolution and our first step then if we are to be realistic will have to be to raise the deficit level in that resolution even before we consider the functional spending totals.

The Senate ought to understand that. It is not for me to impose a discipline as a result of those facts except to the extent that the facts themselves may impose a discipline upon Members of the Senate.

Mr. President, will the Senator yield 2 additional minutes?

Mr. KENNEDY. I yield 2 minutes.

Mr. LONG. Mr. President, will the Senator yield for a question on that point?

Mr. MUSKIE. I yield.

Mr. KENNEDY. On whose time?

Mr. MUSKIE. Will the Senator ask it on his time?

Mr. LONG. I shall ask the question on my time.

I understand that the figures I have here are the same ones from which the Senator is speaking and the figures that he will be placing in the RECORD. There are also figures here on the fiscal year 1977 deficit.

Mr. MUSKIE. I have been talking about 1978.

Mr. LONG. The two sets of columns here for fiscal year 1977 start out by showing a deficit, let us say, in the third column of $61 billion, eliminate rebate

only; keep business tax cut, deficit $61.5 billion; is that right?

Mr. MUSKIE. Fiscal 1977, that is right.

Mr. LONG. Does that take into account the fact that the administration has now discovered they are going to have $3 billion of tax collections that they had not previously counted and $7 billion less spending than they had anticipated?

Mr. MUSKIE. No. The reestimates have not yet been made final and not yet been submitted to us nor have they as yet been cranked into the scorekeeping process by the Congressional Budget Office. We are aware, of course, that spending is likely to be less than projected although in the most recent months we apparently are back on track with respect to projected spending, and we still have several months in the fiscal year to go, and there is no way of being sure what the spending picture will be as of October 1.

Mr. LONG. My best information is that as of now we are $10 billion better off as far as the deficit is concerned than the administration had estimated, which was about $61.5 billion.

Mr. MUSKIE. May I say to the Senator that is a very risky judgment to make. If we make that kind of a judgment because it suits our purposes with respect to each spending or revenue bill, we will be abandoning the process. No one really knows why, in fiscal year 1976 in the transition quarter, spending did not measure up to projections. Until we have greater certainty on that point, it would be a mistake to assume it will continue forever. Spending fell below monthly projections in this fiscal year until the most recent month, and then it began to hit the target, and may rise above the target in April, May, June, July, August, and September.

So we ought not to change those estimates except in accordance with the orderly procedures that we have developed in the budget process. The $10 billion the Senator is speaking about the President spent 2 weeks ago, and I heard him spend them, when he went on television and said:

> Because we have got this $10 billion, we ought to send it back to the people in the form of the $50 tax rebate.

But he changed his mind about that, and I suspect that the $10 billion was just a handy argument that he used at the moment.

OMB has not yet officially told us that in their judgment they would at this point officially reduce the spending projections for this fiscal year, which does not end until October 1.

Mr. LONG. Surely the Senator knows that the President made his request for the $50 tax rebate before he knew about the $10 billion.

Mr. MUSKIE. No, that is not altogether true. That is not altogether true, because we knew that in October, November, and December spending was below projections, but we do not project binding spending totals on a monthly basis. It is tough enough to try to control them on an annual basis and a functional basis. As of January 1, some part of the $10 billion was already visible. Some more became visible on January and February. But then the thing began to turn around; and to make the assumption that as of next October 1, spending for the whole year will be $10 billion below projections, I think, is a very risky business and a temptation we ought not to yield to.

Do I still have 2 minutes of time?

The PRESIDING OFFICER. The Senator has 2 minutes remaining.

Mr. MUSKIE. Let me just address the Kennedy-Bumpers motion briefly, if I may.

With regard to the investment tax credit, Mr. President, I make this simple point: We increased the investment tax credit in 1975, I think, from 7 to 10 percent. It did not result in stimulation of investment. Investment has been relatively low ever since. So there is no reason to conclude that increasing it another 2 percent will add to its stimulating effect.

Second, it is quite clear from the record that not all businesses entitled to additional credits can absorb them. There is evidence to the contrary; and adding another 2 percent just adds to their unabsorbable credits.

So, really, when we have taken action to eliminate tax relief for the average citizen, I see no justification for giving this relief, which will go to the most profitable companies, clearly, simply because, you know, we are sort of committed to it.

On the jobs tax credit, Mr. President, in the first place, the tax implications of that credit have been misstated. What is permitted is a credit of $1,050, but that will substitute for $1,050 in wages paid that would be deductible as a business expense. So really the tax advantage to using it, if a company has a tax rate of 40 percent, is only $630, and I just do not believe that $630 is going to be that much of an incentive.

The PRESIDING OFFICER. The Senator's time is expired.

Mr. MUSKIE. The second point I would make, if I could have another minute: The 103 percent threshold militates against slow-growing companies and slow-growing regions, because you have to show that employment is 103 percent of the threshold before the industry can qualify. There is a table that ought to go in the RECORD if it has not already—I think it already has—which shows the discrimination or potential discrimination by regions. My region, for example, would be discriminated against.

But more importantly, Mr. President, companies in my part of the country are not likely to put people to work for a year, even with a Government subsidy, unless their market expectations justify it. They are not going to hire people, keep them on the payroll at a subsidized rate for a year, and then keep them on unless their market expectations justify it.

I have never believed a jobs tax credit would succeed. I do not think this one would, either.

The $50 tax rebate and related payment provisions now have been deleted from the tax bill pending before the Senate. If the bill were passed in its present form, it would fall short by over $10 billion of providing the level of economic stimulus agreed upon for fiscal year 1977 by Congress when it adopted the binding third concurrent resolution less than 2 months ago.

The rebate constituted sound economic policy. I believe its deletion will prove to have been a mistake. The econometric models are virtually unanimous that withdrawal of the rebate will slow economic growth in the remainder of the year. Up to 250,000 jobs may be lost, and unemployment will be higher.

Given the deletion of the rebate, I want, as chairman of the Budget Committee, to place the remaining provisions of this tax bill in the context of the concurrent resolution for 1977 now binding on the Congress as well as the first budget resolution for 1978 recently reported by the Budget Committee. In addition, as a Member of the Senate concerned with the equity, simplicity, and efficiency of our tax system, I want to comment on the impact of the specific provisions of the pending bill in achieving these goals.

The third concurrent resolution for fiscal year 1977 specifically assumed up to $10.6 billion of additional economic stimulus in the form of revenue reductions in the current fiscal year, as well as up to $3.2 billion of additional budget authority and outlays for rebate payments to low-income individuals and recipients of Federal assistance programs.

The first budget resolution for fiscal year 1978 recently reported by the Senate Budget Committee recommends as a target $18.2 billion in net revenue reductions for the coming fiscal year.

I commend Finance Committee Chairman LONG and the members of the Finance Committee for having reported a bill initially consistent with both the binding third resolution for fiscal year 1977 as well as the recently reported first resolution for fiscal year 1978. I recognize the many pressures for additional tax reductions with which the Finance Committee had to contend, and applaud the restraint shown by the committee, particularly with respect to the impact of its revenue decisions on fiscal year 1978.

The subsequent withdrawal of administration support for its own rebate proposal, and the resulting deletion of the rebate from the pending bill, have created the possibility of very substantial leeway on both the revenue and spending sides of the fiscal year 1977 budget. In addition, approximately $500 million of revenue reductions in the pending bill have been shifted from fiscal year 1977 to fiscal year 1978 due to postponement of implementing the reductions in wage withholding associated with the standard deduction rule changes. As a result, only $2.8 billion in fiscal year 1977 revenue reductions now remain in the pending bill.

The net effect of the tax bill with both the withholding postponement and the rebate deletion offset by decreased revenues from the resulting slower economy, is to leave fiscal year 1977 revenues $5.8 billion above the binding budget resolution revenue floor and leave fiscal year 1978 revenues $1.7 billion below the revenue floor recently recommended by the Budget Committee. The latter solely re-

flects the lower economic activity in 1978 from the elimination of the rebates in 1977.

With respect to the spending side of the budget, the deletion of the rebate has reduced anticipated fiscal year 1977 outlays and budget authority by $2.5 and $3.6 billion, respectively. These totals differ from the $3.1 billion direct cost of the payments and rebates in excess of liability due to the impact on trust fund revenues and unemployment compensation. The rebate deletion also would have relatively small indirect effects on the spending side of the budget in 1978, reducing budget authority by $0.6 billion and increasing outlays by $0.5 billion.

Although enactment of the tax bill in its present form with the rebate deleted would permit $5.8 billion of additional revenue reductions in fiscal year 1977 before the binding revenue floor were breached, virtually all realistic tax proposals that would lose revenue in fiscal year 1977 would lose proportionately greater amounts of revenue in fiscal year 1978. This is due in large part to the fact that fiscal year 1977 is now almost half over, and revenue reductions made effective for calendar 1977 thus would be largely reflected in refunds paid out in early 1978.

The fiscal year 1978 revenue reductions provided under the bill now before the Senate are very substantial—$18.4 billion compared to current law. This is almost $1.5 billion more than provided in the House version of H.R. 3477, and almost $2.5 billion more than was recommended by the administration. Thus, virtually all attempts to further reduce revenue collections in fiscal year 1977 to use up the room created by deletion of the rebate would increase the already substantial fiscal year 1978 deficit by proportionately greater amounts. In effect, these additional reductions would have to constitute a conscious decision by Congress to increase the $63.2 billion deficit for fiscal year 1978 recently recommended by the Budget Committee by shifting to 1978 some or all of the economic stimulus lost in 1977 by deletion of the rebate. The Budget Committee will be meeting on Friday to consider the congressional budget in light of the deletion of the debate. I will report to the Senate the views of the committee as soon as possible, so that they may be considered in the context of the deliberations on the pending tax bill.

Having now reviewed the budgetary effects of the legislation as a whole, let me now briefly summarize my views on the merits of the major remaining components of the tax bill.

I oppose the business tax relief option provided in the bill. Both the investment credit increase and the employment tax credit will most likely prove largely ineffective. Moreover, the employment credit would add unnecessary complexity to the tax code and discriminate against regions like New England with relatively low employment growth. Additional business tax relief is particularly unjustifiable in light of the Senate decision to delete tax relief for individuals in the form of the rebate.

I favor the simplification and tax reductions resulting from the proposed uniform standard deductions.

Finally, I favor the extension of the 1977 temporary tax reductions through calendar 1978.

BUSINESS TAX REDUCTIONS

The business tax relief option in the Finance Committee bill provides a text book example of what can go wrong with tax legislation. These provisions are inefficient, discriminatory, and, in the case of the employment tax credit, add unnecessary complexity to the Internal Revenue Code for small businessmen already struggling to comply with the growing mass of Federal regulation.

Although the need for increased business investment is clear, recent experience suggests that increasing the investment tax credit from 10 to 12 percent for 4 years most likely would be an ineffective means of accomplishing this result. Investment has remained relatively low in the past 2 years, even though the investment credit was raised from 7 to 10 percent in 1975. An additional increase in the credit to 12 percent is unlikely to be any more effective.

Moreover, careful analyses of past increases in the investment credit unanimously have found that there is a time lag of at least a year before any measurable increases in investment have resulted. Thus, a further increase in the credit as part of this bill is unwarranted and impractical if the purposes of this legislation are to provide short term economic stimulus and tax simplification.

Tax law changes to accomplish the important goal of increasing investment over the long term more appropriately should, and will, be part of the comprehensive tax reform legislation to be considered later this year by the Congress.

Any further increase in the investment credit only could be fully utilized on a current basis by a shrinking fraction of businesses. Under existing law, the investment tax credit available annually is limited for most businesses to $25,000 plus 50 percent of tax liability in excess of $25,000. Since the credit was increased to 10 percent in 1975, more and more companies are unable to use their full credit potential. Increasing the credit to 12 percent would accentuate this unfairness even further. There is no economic justification for limiting the availability of the credit to highly profitable companies with sufficient taxable income to currently utilize available credits.

The most prominent argument for an increased credit has been that it would constitute an important sign of Government concern over business investment. However, the business community is much more concerned with the outlook for increased market expansion in the coming years as well as the threats of inflation, price controls and regulation. These are the principal detriments of investment psychology, rather than a $2.4 billion annual tax reduction derived largely from an increased investment tax credit.

The Finance Committee bill would permit businesses to elect an employment credit in lieu of the investment credit increase through 1978, after which all businesses would receive the 2-percent investment credit increase through 1980. The employment credit would be 25 percent of the first $4,200 of wages for all employees hired over 103 percent of the previous year's employment level. However, the average effective rate of the credit is much lower—more in the 13 to 15 percent range than 25 percent. The lower rate exists because, to the extent the credit is claimed, the ordinary business deduction for wages paid will be denied. Thus, a business entitled to a $1,050 credit for hiring one new employee would lose $1,050 of deductions for salary paid the employee. If the business has a 40-percent tax rate, the net value of the credit to the employer is $630, rather than $1,050, and the effective rate of the credit is reduced from 25 to 15 percent. A $630 one-time tax credit is simply unlikely to result in any significant new employment when average wage costs are $10,000 per employee.

Because the employment credit would apply only for employment in excess of 103 percent of the prior year's level it would be unavailable to companies struggling in declining markets or regions to maintain employment at current levels. On the other hand, expanding companies that have been increasing employment at over a 3-percent annual rate will receive windfalls that will further improve their competitive position over less growth-oriented rivals.

The high 103-percent incremental threshold will cause a large portion of the employment credit tax reductions to go to businesses in fast-growing sections of the country such as the Southwest, while a disproportionately small segment will go to New England, and the rest of the Northeast. I ask unanimous consent to have a table inserted in the RECORD showing average employment growth on a State-by-State basis over the past decade. It clearly illustrates the discriminatory impact of the 103-percent threshold rule.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

* Based on preliminary 1976 data.

Prepared by the staff of the Senate Budget Committee, using the data of the U.S. Department of Labor, Bureau of Labor Statistics.

Employment figures are those for nonagricultural wage and salary workers.

Mr. MUSKIE. No similar discrimination existed in the administration's original proposal for a 4-percent payroll tax credit which would have been available with respect to all employees—both current and new. Moreover, the payroll tax credit would have been extremely simple for businessmen to apply and for the Internal Revenue Service to administer. By comparison, the Finance Committee employment credit is extremely complex. The provision takes up 25 pages of text in the reported bill. A myriad of complicated rules are provided to preclude abuses of the new credit and to implement the 103 percent incremental base and the so-called 105 percent safety net. The Secretary of the Treasury is expressly required to provide six new sets of regulations concerning the credit, and will probably issue untold additional regulations. All of this will certainly increase employment of lawyers and accountants, but will further deter the use of the credit to stimulate additional employment in any other fields.

STANDARD DEDUCTION CHANGES

In terms of overall revenue reductions in fiscal year 1977 and fiscal year 1978 and in terms of direct impact on individual taxpayers, the standard deduction changes are the most significant provisions in this tax bill. They would reduce revenue collections by $1.5 billion in fiscal year 1977 and $8.2 billion in fiscal year 1978. They would substantially simplify computation of tax returns for all persons claiming the standard deduction—approximately 70 percent of all tax returns. This is a very significant benefit, which must be weighed heavily against offsetting considerations for further study of these proposed changes.

The simplification results primarily from substitution of flat standard deduction levels for single and joint returns instead of the range currently in effect based upon 16 percent of adjusted gross income. The tax reductions result from setting the flat standard deduction levels relatively high, particularly for joint returns.

Substantial changes in the standard deduction are inextricably tied to the tax treatment of personal deductions. The latter are now the subject of intensive review by the Treasury Department as part of the administration's forthcoming tax reform recommendations. While I support enactment of these proposed standard deduction changes at this time, it would not be unreasonable for these changes to be postponed and considered later this year in the context of overall tax reform. Equivalent levels of tax reductions could be provided on a temporary basis through expansion of the temporary general tax credit not in effect—of $35 per personal exemption or 2 percent of the first $9,000 of taxable income.

EXTENSION OF TEMPORARY TAX DEDUCTIONS

I strongly support extension through 1978 of the temporary tax reductions now scheduled to expire at the end of 1977. These extensions would reduce fiscal year 1978 revenues by $7.8 billion. The provisions which would be extended include the alternative general tax credit, corporate income tax rate reductions, and the earned income credit. Extension of these reductions is assumed in the fiscal year 1978 budget resolution recently recommended by the Budget Committee. These reductions will have to be continued in order to offset the adverse impact of inflation forcing taxpayers into higher marginal tax brackets.

Mr. LONG. Mr. President, how much time is charged to the Senator from Louisiana?

The PRESIDING OFFICER. The Senator from Louisiana has used 5 minutes, and has 25 minutes remaining.

Mr. LONG. I said I was willing to yield some of my time for my question. I did say to the Chair that I would be willing to charge the time for my question out of my time. I did not want to charge the time for the Senator's answer. He made a very fine statement, but I do not think that should have been charged to my time, but it ought to be charged to the other side.

The PRESIDING OFFICER. The Senator from Maine has no time, and the Senator from Louisiana said he was willing to use his own time for the question.

Mr. MUSKIE. I say to the Senator from Louisiana that if I had the time, I would be willing to give it back to him, but I do not have it.

Mr. KENNEDY. Mr. President, I ask unanimous consent to give the Senator from Louisiana 5 additional minutes.

Mr. LONG. I object; that is all right. What I say will not bring the Government to an end, and probably will not make it last a day longer, either. So I will content myself with the time I have.

Mr. President, in my judgment the bill before us will be a very badly unbalanced bill. It will be an inappropriate bill. It will be a bill that fails to take into account the least of them all, if we pass what is before us after the so-called Bumpers-Kennedy motion has prevailed.

Let me explain why. This bill would then stand as a bill that would give $6 billion of tax cuts to people who use the standard deduction. It would stand as a bill that would give another year of labor's favorite loophole, the sick pay exclusion. It would stand as a bill that does something for workers who have very good wages working overseas, and do nothing—just zero, zilch—for those poor souls who are out of work in this country.

That is a sad travesty for the Congress of the United States to be perpetrating on the people of this country. If we are going to pass anything, we ought to pass something that is going to help these poor souls who are out of work.

There is a high degree of unemployment among young people. It is especially tragic among young blacks. Here we have this conversation about people who will enjoy the best of America, who will have full civil rights, who will have equal rights as citizens. Forty percent are out of work, many have never had a job in their lifetime, yet there is all this conversation about what America has to offer.

The House of Representatives realized that fact, and considered the urgings of the small business organizations. Here are two organizations which testified: The National Small Business Organization, speaking for 1 million members who would not get any benefit at all out of this bill with the Bumpers motion; and the National Federation of Independent Business, which is probably the largest of all of them, speaking for an even greater number of small businesses in this country. The two of them together speak for the small business community.

They are people who itemize, and who would like to hire these poor souls out of work.

What is in the bill? To help a business provide a job, any kind of a job, for a poor soul who never had a job in his lifetime, a young man who perhaps dropped out of high school at the age of 19 and is now 23, who never had a job for a day, who is frustrated and disappointed, a

hazard to law enforcement in this country, seeking nothing but an opportunity to make an honest living.

What is there for that person in this bill? Zero, if the Bumpers-Kennedy motion carries.

Admittedly, these are not the kinds of jobs that the American Federation of Labor wants to create. Many of these jobs would be minimum wage jobs. Many would pay no more than $3 an hour. But it is still something to restore a man's pride in the event that a man or a woman is able to find a job and become a part of all these things they have heard about, the great American free enterprise system.

Under the motion, all that would go down the drain. That which is in the bill for the least of them all, that which would help the pitiful soul not in a position to pay any taxes but just lucky enough to hold hide and hair together, that which would help them would go down the drain with the Bumpers motion.

Mr. President, it is far better to have a low wage job than no job at all. It is far better to have a minimum wage job than to never have known what it was to bring a paycheck home in one's entire lifetime. The hope of those people who want to be part of this labor force and part of the free enterprise system will be dashed if the Bumpers-Kennedy motion were to carry.

The arguments made by Mr. BUMPERS and Mr. KENNEDY were made in the House of Representatives, at that time they were arguments to keep the 2-percent investment tax credit and to keep the 4-percent payroll credit for the benefit of the business community, hoping they would hire more people. The administration resisted the job credit. How did they make out? This is hard to believe.

Mr. President, can you imagine a new President with his Secretary of Treasury working on the matter, doing the best they could to prompt the arguments against a House committee recommendation, and the House amendment was agreed to as a substitute for the administration proposal by a margin of 341 votes to 74?

If I were the Secretary of the Treasury, I would think at that point I ought to take another look at my hole card. Maybe I was the one who was wrong—when people heard my arguments and the argument of the other side, and having heard both sides of the argument they then proceeded to vote, with those speaking for the majority on the Ways and Means Committee defeating a new President, with his new Secretary of the Treasury, with the able people who support those fine men, by a margin of 341 to 74—5 to 1.

Some think politicians do not get the message. Here was a proposal supported by the small business community, supported by a majority of the Ways and Means Committee, which defeated the administration proposal by a 5-to-1 margin.

Obviously, our counterparts, those able and fine men who serve in the House of Representatives, are thoroughly convinced that the jobs credit would help provide jobs for these young people and for the older people who are seeking employment in this country. They thought it was a far more efficient way to encourage employment and to encourage the creation of jobs than anything in the bill. It fills a void.

It shows that this administration, or at least those of us in the Congress who constitute the majority, with those on the other side who are willing to work with us, I do not want to be regarded as antibusiness. We do not want to be regarded as people who would destroy the free enterprise system. We do not want to be regarded as people who have no faith in the system which has given us the highest standard of living of any nation on the face of the Earth.

No, sir, we would like for the business people of this Nation, small business as well as large business, to know that we think there is still a place for freedom in our economic system, and that we want the business community to hire more people. We want them to take the lead in providing opportunities.

Suppose we knock out everything in here that would provide an incentive for business and pass a $7 billion bill, with labor's pet loophole extended for another year, tax cuts for people who use the standard deduction, but nothing whatever for business and nothing whatever to encourage businessmen to go out and provide employment opportunities to more people? What will that do to business confidence? I should think it would shatter it. That is something which people would like to avoid.

Mr. President, I have spoken at some length of our hopes for creating new jobs and new employment opportunities, with the communications we have had from small business people and some large business people in this country expressing their desire to be a part of the economic recovery of this Nation. We have received communications from a great number of them. I have referred to some of those which I have received.

I am somewhat dismayed, Mr. President, at the statement of the chairman of the Budget Committee. I must say when my friend, the chairman of the Budget Committee, tells us of his concern that if we keep that which remains of this tax measure to stimulate, after the $10 billion are gone he fears for the fiscal integrity of the country. It is only a short time ago that the Senator was supporting $11 billion we were going to loose with the $50 rebate.

Here is a newsletter I was honored to receive, a Senate Budget Committee release, quoting the chairman of the committee expressing his supreme disappointment that the administration is not going to go for the $50 rebate but will save $11 billion. Now we are told by the administration that the budget is $10 billion less than they anticipated when they asked for the rebate.

So we are $20 billion better off than we were, because the administration withdrew its $50 request, or its $11 billion tax cut with the $50 rebate, and they found they have $10 billion they did not know they had around. Here we are, $20 billion better off and suddenly the chairman is upset about something that might cost $10 billion, even though he was ready to spend the extra $11 billion before he knew about the $10 billion that we had left over.

That leads me to remarks about the budget process, the way it has been managed. I know the distinguished Senator from Nebraska feels this way, because I have heard him say as much. If the Budget Committee is against something, particularly its chairman, it looks like the world is going to come to an end if we spend 5 cents, if he is opposed to it. But if he is for it, you can spend $11 billion and that will help everything. We will all be better off.

I think a little bit of a situation of one of our Louisiana fellows who went to west Texas. He was telling about his experience out there. He got into a poker game with some pretty tough hombres. After they dealt some cards around, he bet quite a bit.

He said, "I think I will win. I have a full house. I have aces over kings, and I will win."

The other fellow said, "No, old friend I am sorry, you lose."

He said, "Why? You don't have anything in your hand."

He said, "I know, but that is what they call a phloogie. Look at that sign up there."

It said, "A phloogie beats anything."

"So I win."

So he takes all the money off the table.

I asked this fellow, "I guess you quit playing after that, didn't you?"

He said, "No, I played a while longer. This time I got the same kind of hand. No two cards looked alike and no more than two cards in the same suit, so I bet everything I had left. I showed my hand and the fellow said, 'That is too bad, you lose.' "

I said, "How can I lose? It says right there, 'A phloogie beats anything.' "

He said, "Yes, but look at the sign behind you. That one says, 'Only one phloogie to the night.' "

[Laughter.]

That is about how my dear friend from Maine handles this budget situation. If he is for something, if we are going to go another $20 billion in the red, that is all right, it will all work out just fine and it would be irresponsible not to spend the $20 billion. If he is against it and it costs 5 cents, that is going to bring the country into national bankruptcy. We understand that is how it works and we have learned to adjust ourselves to all that.

I would say, Mr. President, that it is simply a matter of what the Congress wants to do. We have plenty of slack in the budget to do everything we are talking about, a great deal more than we anticipated.

If we want to do something to provide jobs and permit the business community—the single employer, the corner grocery store, the little mom and pop cafe, the dry goods store, the filling station—you name it—the little tire repair shop—if we are going to let the small business community and the business community generally participate in this effort for economic recovery, then, Mr. President, I think we would be well advised to keep in this bill that part of it

which gives it some balance and let the American free enterprise system be a part of this entire effort.

How much time do I have, Mr. President?

THE PRESIDING OFFICER (Mr. METZENBAUM). The Senator has 8 minutes remaining.

Mr. BENTSEN. Will the Senator yield me 3 minutes?

Mr. LONG. I would like to have the Senator's speech toward the close.

Mr. BUMPERS. Mr. President, how much time do I have left?

The PRESIDING OFFICER. There are also 8 minutes remaining on the other side.

Mr. LONG. Would the Senator from Texas be willing to wait for a few seconds to let the other side go forward, then I shall call on the Senator.

Mr. BENTSEN. Yes; I will.

Mr. KENNEDY. Mr. President, this afternoon's Senate vote on the motion to delete the business tax cuts from the fiscal stimulus bill is a test of basic fairness in the attitude of Congress toward the average American taxpayer. As a matter of simple equity, it is unfair for Congress to kill the $50 rebate for the average citizen, and yet retain the handsome tax relief for business.

In effect, if we vote to continue this business tax relief, we will be telling the American taxpayers that individual tax relief has been made dispensable, because of changed economic circumstances, but that tax relief for business remains indispensable. The clear and highly visible message we will be sending to 200 million citizens is that the economy has improved enough to make the $50 rebate unwarranted, but has not improved enough to remove the need for business tax cuts.

This attitude reflects an unfortunate side of the Senate's approach to tax justice—a "let them eat cake" reply to the average citizen's plea for tax relief, a continuation of the longstanding tax policy of "plumbs for business and wealthy taxpayers, but crumbs for the average citizen."

And let there be no mistake about it. What we are talking about is not investment incentives or jobs incentives, but tax relief for businesses—$2.4 billion of it in the present bill each year.

If the truth-in-packaging law applied to Federal legislation, the pending tax bill would be hopelessly in violation. The two aspects of the business tax cuts—the 12-percent investment credit and the new jobs credit—are simply tax relief for business, in spite of the appealing names in which they have been disguised.

The present approach is reminiscent of President Nixon's August 1971 proposal to reinstate the investment credit, which had lapsed in 1969. To improve the image of his business-oriented tax relief proposal in the eyes of the Congress, the President called it a "Job Development Credit." But the "job development" phrase was immediately perceived for what it is—business tax relief in job development clothing.

The same transparent disguise is now cloaking the jobs credit and the 12-percent investment credit in the current bill. There is no credible evidence that either part of this $2.4 billion business boondoggle will have any significant impact on the economy, on jobs, or on investment.

JOBS CREDIT

The jobs credit in its present form is little more than a windfall for Sears Roebuck, J. C. Penney, Montgomery Ward—now owned by Mobil, and other big national service firms. Construction firms may reap massive benefits as the economy returns to health and the construction industry recovers from its recent deep depression; but the benefits will be pure windfalls—having everything to do with the state of the economy and nothing to do with the tax provision.

Also, the 103-percent employment threshold—only firms with 3 percent job growth a year can qualify—is so high that only the most rapidly growing regions of the country will get the full benefit of the windfall. By contrast, in other regions of slower or negligible growth, such as New England—six States averaging 1.5 percent, the Middle Atlantic States—three States averaging eight-tenths percent, and the Middle West—16 States averaging 1.7–2.9 percent, the jobs credit will be of little or no benefit to the vast majority of firms.

The credit is so complex and the incentive level is so low—it provides only $600 in tax relief to a firm that hires a $10,000 worker—that few if any firms will base their hiring decisions on the relief that will be available. Instead, at the end of the year, they will simply ask their lawyers and accountants "how much did we qualify for?" Thus, the credit is little more than a tax rebate for business. And the chances are, if they hired anyone at all, they hired the lawyers and accountants needed to decipher the complexity and hieroglyphics of the law.

In addition, if the jobs credit had some potential significance for reducing unemployment, it is hardly likely that the AFL–CIO and the UAW would be lined up so solidly against it. Yet they have opposed it from the beginning, as a wasteful and ineffective use of Federal funds that provides little or no effective job incentives. To American labor, the jobs credit is rightly perceived as a Trojan horse bearing gifts for business.

THE 12-PERCENT INVESTMENT CREDIT

And the 12-percent investment credit fares no better. The rise from 7 to 10 percent in 1975 produced no perceptible effect on investment. Piling on an additional 2 percent at this time is simply a fresh windfall for the firms that already use the credit.

Nor is the investment credit fair to the hundreds of thousands of businesses of America. As the credit marches higher, fewer and fewer firms find they can take full advantage of it, because of the various limits in the law. Many firms cannot use the credit now at all, because they have already surpassed the limits. Others will receive no benefit from the increase to 12 percent, because they are bumping up against the limits now. According to Treasury estimates, only 68 percent of the eligible investment credits at the 10-percent level for 1977 will actually be claimed on 1977 tax returns. If the credit goes to 12 percent, only 56 percent of the credits would be claimed, as more and more firms become trapped by the limits of the credit.

As the investment credit goes up, therefore, more and more of the credit is going to richer and richer firms. In effect, under the policy before the Senate, the message to business is that the rich get richer and poor go bankrupt. The 12-percent investment credit is a big business bonanza that ought to be abolished.

And who uses the investment credit? The answer is, the biggest corporations in America. The most recent available evidence indicates that two-thirds of the credit goes to the top one-tenth percent of corporations. In 1975, the credit was worth $750 million to A.T. & T. alone. In effect the 12-percent credit will be a fresh tax windfall for corporate giants like A.T. & T., Exxon, General Motors, and U.S. Steel. The waste and inefficiency of the investment credit is also startling. A 1976 Library of Congress study showed that for each dollar of revenue loss, the credit generated only 40 cents of new investment.

In sum, neither the jobs credit nor the investment credit makes sense on economic grounds or on the merits of the provisions themselves. These objections alone should be enough to sink the proposals at this time.

But the overriding objection is the objection based on equity. Fairness to the average American taxpayer requires Congress to treat the rebate and the business tax cuts alike. The rebate has been withdrawn, and the business tax rebate should go as well when the Senate votes.

I withhold the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. LONG. I yield 3 minutes to the Senator from Texas.

Mr. BENTSEN. I thank the distinguished Senator.

I think we ought to clear the record on whether this bill gives tax relief to individuals. We gave a tax cut in this bill to 47 million Americans. That is how many got a tax cut out of this. We also simplified tax returns for 95 percent of individual taxpayers. That is a positive, progressive step to give a break to the American taxpayer.

Let us look at the balance between business and individuals in this bill: $14 billion in tax cuts to individuals in fiscal 1978; $2.4 billion in tax cuts to business and there is a balance on the business side between labor-intensive and capital-intensive companies. That is what we have accomplished and that is what we have brought to you.

The distinguished Senator from Louisiana was talking about high unemployment among young blacks in this country—and it is a tragic number that we are seeing unemployed. If you say to 17-, 18-, 19-, or 20-year-old young people that there is no job, no productive role in society for them to fill, what happens

to them? You do not just put them on the shelf.

You do not just icebox them for 2, 3, or 4 years walking the streets, with nothing productive to do. You pay a long-term social, political, and economic impact in this country. We will pay a terrible price for this. We must find a way to put them back to work and not just in dead end public service jobs.

We ought to be trying to do it through the private enterprise system if we can.

Sure, the employment tax credit is a new idea to this country. But it has been used in some of the European countries effectively. The Secretary of the Treasury said it means that we are going to be hiring some of the lower-income people in those jobs. Absolutely, that is right. We are going to give them a chance to get off welfare, to fill a productive role.

The big problem that we always have in trying to simultaneously fight inflation and unemployment, is that to do something for one, it works the other way on the other.

Here is a chance to help unemployment and inflation at the same time, because as we cut the cost of production in the competitive society it gets passed on to the consumer. But we are putting people back to work in what we hope will be meaningful productive jobs. That is what this has done.

We talk about the investment tax credit. Again, it is saying to people in New England which is the most industrialized part of our Nation, where they have some of the most antiquated machinery and equipment, here is a chance to modernize the machinery, to be competitive in world markets, and to keep people on their jobs.

That is what we are providing and fighting inflation at the same time. That is what we ought to be seeking, and this is what this package has done.

I have supported public works jobs. Do we know how much it costs? Thirty thousand dollars per employee for public works jobs.

There are some other benefits to it. We get long-term, lasting investment for that part of our country, and I support those. I supported the public service jobs, which cost $8,000 to $12,000 per job, because I would rather pay a fellow for working than not working, and we would rather have it that way, too, or the vast majority of them.

But a jobs tax credit is the most economical way of all to create jobs.

I heard earlier in the debate that the first quarter shows a 5.2 percent real growth in GNP. That is great, we do not have to do anything.

The President has projected 5.4 percent real growth in GNP and says that still means 7.1 percent unemployment.

We ought to be attacking that problem, and here is a chance to do it. But not just with money that means increases in consumer spending.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. LONG. I yield the Senator 1 more minute.

Mr. BENTSEN. I thank the Senator.

Let us look back to 1973 and 1974 because some of the same indicators are here now. We have heard that our manufacturing capacity increased from 78 to 82 percent. However, our economy will still develop bottlenecks in some areas, be it aluminum, be it steel, be it electrical products, and then those price increases begin to leapfrog across and we really have inflation.

But now is the time to take that other 18 percent of unutilized manufacturing capacity which is obviously the least efficient or they would not have put it aside, modernize it to make us more competitive so we can compete with the Japanese sending over their TV sets and the Europeans sending over their shoes.

We can go to Mexico and see what is happening there, where we have them paying two or three times as much for an oven, a stove or a refrigerator.

That is not the way to do it. Investment capital and modernization of our capital is the way.

The PRESIDING OFFICER. The additional minute has expired.

Mr. BENTSEN. I thank the distinguished Senator.

Mr. BUMPERS. Mr. President, how much time do the proponents have?

The PRESIDING OFFICER. Two minutes remain for the proponents of the motion.

If neither side yields time, time runs equally against both sides.

Mr. BUMPERS. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, I say to the distinguished Senator from Texas that if the 10-percent investment tax credit will not assist the garment and shoe manufacturers of New England to replenish their obsolete equipment, I do not think any reasonable man thinks 12 percent is going to do it.

I want to repeat an argument made by the distinguished Senator from Maine. He is opposed to it for budgetary constraints. He is opposed to it because of the inequities it works on certain geographical regions of the United States, and because he said a moment ago that it will not create any jobs.

The average manufacturing wage in this country is about $10,000. If we think a corporation which is already in a 48-percent tax category is going to employ anybody to save that $1,015 when all they will save is about $500 or $550, they are not.

This was an afterthought. Everybody knows it was an afterthought.

Finally, Mr. President, I would just as soon vote a rebate for industry. We are saying to the American people, "We are sorry we misled you about the $50, we are not going to give you the $50 rebate, we will save that $11 billion, and now we are going to give big business $2½ billion."

The PRESIDING OFFICER. The Senator's 1 minute has expired.

Mr. BUMPERS. Just 15 seconds.

I would just as soon say to the big corporations of this country, "We will give you the rebate instead of the people."

Mr. LONG. Mr. President, I yield myself 2 minutes.

Mr. President, as to taxpayers' claiming the standard deduction, this bill provides an average of $130 tax reduction per taxpayer who claims the standard deduction. If the Bumpers motion carries, it would do nothing for the people who itemize, just zero.

Everything would have been removed from the bill that is there for the purpose of trying to get someone to create a job and put someone to work.

Here is a wire from the Small Business Association asking that the Bumpers motion be voted down and that we have a strong jobs credit. That organization has a million members.

The National Federation of Independent Business, they are strongly for this. So is every other small business group for doing something to help some businesses, and businesses generally, to put people to work.

This will be an unbalanced bill. It will be regarded as an antibusiness bill if we do not have at least the jobs credit part of it in this bill.

Furthermore, Mr. President, the Senator is seeking to recommit and report back. Anyone who is familiar with that motion knows that is the kind of motion that should not be used if we can do the same thing by amending the bill.

If the Senator wants to strike some part of the bill, he ought to seek to amend it when the time comes, and not seek to make the manager and the committee redraft the bill to make it read the way he wants it to read and to work from there.

The motion to recommit and report back is supposed to mean, if that motion is agreed to, we expect to pass the bill in precisely that fashion and it is supposed to entail an implicit commitment that they are not going to consider further amendments.

It is not the proper motion to make, under the circumstances, and it is not what the Senate should do. What the Senate should do is reject this motion and go ahead and amend the bill, however, the Senate wants, in the orderly, proper, legislative process. Having done so, then the Senate can work its wisdom and vote up or down on its final work when it has properly amended.

I hope very much, Mr. President, that the motion to recommit and report back to meet the views of the Senator from Arkansas will not be agreed to.

Mr. KENNEDY. Mr. President, 45 seconds.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, when this tax stimulus package was put together, there was a coupling effect between the tax rebate for individuals and the tax cuts for business. They stood together at the beginning, and they should fall together now. The President, the Secretary of the Treasury, and the administration's economic advisors have made the judgment that the economy is in a sufficiently improved situation that neither the tax rebate nor the business tax cuts are needed as an economic stimulus. If the tax rebate does not make sense from an economic point of view neither does the business tax cut.

The purpose of this motion is to keep the faith with the average American taxpayer. We cannot take away his rebate, while preserving billions of dollars of tax relief for business.

Mr. President, yesterday I included in the RECORD as part of this debate letters supporting this position from the AFL–CIO, the UAW, and public citizens. On Tuesday, the Senator from Arkansas (Mr. BUMPERS) included in the RECORD a letter from the Secretary of the Treasury supporting this position. Today I have received a memorandum, addressed to all Senators, from the public interest taxpayers' lobby, taxation with representation, and I ask unanimous consent that this memorandum may be printed in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

VOTE NO ON BUSINESS TAX CUTS

H.R. 3477, the Tax Reduction and Simplification Act of 1977 contains $2.4 billion of tax breaks for business which are an abomination when $10 billion worth of tax rebates have been denied to the average American taxpayer.

We urge you to vote against the jobs tax credit and the investment tax credit for the following reasons:

If the economy does not need $10.4 billion in tax rebates for people, neither does it need $2.5 billion a year in tax cuts for business.

The administration is planning a major tax reform and capital formation proposal for next October. Time is needed to come up with proposals which will really work and will not just throw money at a problem.

Both the investment tax credit and the jobs credit only help profitable firms which are expanding anyway, while declining or stable industries will not be helped at all.

Both the jobs credit and the investment tax credit will worsen cyclical variations in the economy by granting the credit during periods of growth and inflation, and denying it during declines.

The jobs tax credit has been attacked by such diverse economists as Walter Heller and Milton Friedman. (See Heller's testimony before the Ways and Means Committee and Friedman's article in Newsweek, April 11.)

As soon as the jobs credit expires, workers will be thrown back into the unemployment pool, generally with no more skills or training than they had before.

The jobs credit is an administrative nightmare for the employer, the IRS, and the courts. Like the World War II excess profits tax, it will cause tens of thousands of lawsuits, clog the courts, and necessitate a major expansion of the judiciary.

The investment tax credit is high enough at 10%; another 2 points will not encourage any more investment. The revenue lost here will make it difficult to have good tax reform and capital formation programs in the fall.

The investment tax credit is so high now that many firms cannot use it to the fullest extent because they have insufficient tax liability. More of the same won't help them.

The investment tax credit is so generous now that 10 major steel companies with total net incomes of over $1.1 billion on average had no tax liability. In fact, most of them got refunds because of carrybacks of excess investment tax credits. (See Tax Notes, April 25, 1977.)

The Treasury Department and the Carter administration oppose passage of the business tax cuts.

ADDITIONAL STATEMENTS SUBMITTED

Mr. HANSEN. Mr. President, I ask unanimous consent that a telegram from the Chamber of Commerce of the United States to Senator LONG, and two letters signed by various trade associations be printed in the RECORD.

There being no objection, the telegram and letters were ordered to be printed in the RECORD, as follows:

APRIL 21, 1977.

HON. RUSSELL B. LONG,
Senate Office Building,
Washington, D.C.

The National Chamber urges you vote against recommittal of H.R. 3477, for purpose of deleting title III. This title important because provides dual business incentive option of either an additional 2-percent investment tax credit or jobs tax credit equal to 25 percent of the first $4,200 wages paid each new employee with no maximum on total credits claimed in 1977–78. Title III recognizes need for stimulating investment in plant and equipment through increase in investment tax credit, and aids structurally unemployed through new hire credit, urge you preserve title III.

HILTON DAVIS,
Chamber of Commerce of the United States.

APRIL 21, 1977.

DEAR SENATOR: The National Small Business Association, and all other leading small business groups, join in urging that you support our highest priority tax goal—a strong Job Tax Credit as proposed by Senators Haskell, Laxalt, Matsunaga and Humphrey.

This measure is the least inflationary, most cost-effective method to fight still high unemployment.

Please bear in mind the House approval by an all regional, non-partisan, non-ideological vote of 341–74. We sincerely hope you will join in an equally strong Senate approval.

Sincerely,

MILTON D. STEWART,
President.

APRIL 21, 1977.

DEAR SENATOR: We believe it is of utmost importance to adopt the business tax proposals in the Senate Finance Committee bill now before the Senate.

It is essential for the promotion of capital investment and jobs, and will benefit both small and large companies.

Mr. WALLOP. Mr. President, several of my colleagues believe that the proposed jobs tax credit will not be effective in getting people back to work. It may be that their hesitancy to support the jobs and investment tax credit is related to a growing hesitancy to seek solutions to economic problems through the private sector. This is an unfortunate trend, especially as we consider how the private sector has provided the dynamism and versatility that has made our economy strong.

Some Senators defend their opposition to the jobs tax credit by saying that the people of the United States wanted a $50 rebate, and without the rebate, there is no reason to grant a jobs tax credit to business. I cannot speak for all of the people of this country, but I am confident in stating that the people of Wyoming want jobs, not rebates, that they want this Nation to remain strong and competitive through investments in new plants and machinery, and that they want and intend to utilize the jobs tax credit.

I have recently received the replies of 117 Wyoming businesses surveyed by the National Federation of Independent Businesses. These Wyoming firms were asked whether they would hire additional workers in response to a job tax credit enacted by Congress. There businesses indicated that they would hire a total of 318 additional workers, which is an average of 2.7 new workers per reply, if the job tax credit were granted.

Most of the businesses that made replies to the survey are small operations, with on the average of less than 10 employees. Thus two additional employees represents a substantial percentage increase for these small businesses. These small businesses are the most competitive and dynamic entities in our economy. They are labor intensive businesses that in the past have not benefited from investment tax credits. It is time to recognize the importance of small business in our economy and make an effort to help them bring people back to work in productive and rewarding jobs.

I think that we should recognize that while public works projects will also help take Americans off the welfare rolls, they will not offer the unemployed the kinds of skills and experience that private sector jobs can provide. The people receive training and skills that will serve them and our economy long after the tax credit has expired. This is not a one-shot stimulus to the economy like a tax rebate, but a long-term investment in human resources from which we will reap rewards far into the future.

For these reasons, I feel that the jobs tax credit serves a useful purpose and will vote to retain it.

The PRESIDING OFFICER. All time

under the motion has expired. The question is on agreeing to the motion to recommit. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. HUMPHREY) and the Senator from Maryland (Mr. SARBANES) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

Mr. STEVENS. I announce that the Senator from Nevada (Mr. LAXALT), the Senator from Maryland (Mr. MATHIAS) and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Texas (Mr. TOWER) would vote "nay."

The result was announced—yeas 20, nays 74, as follows:

[Rollcall Vote No. 102 Leg.]

YEAS—20

Abourezk	Culver	McGovern
Anderson	DeConcini	McIntyre
Biden	Griffin	Metcalf
Bumpers	Hart	Metzenbaum
Chiles	Hathaway	Muskie
Clark	Kennedy	Stevenson
Cranston	Leahy	

NAYS—74

Allen	Goldwater	Packwood
Baker	Gravel	Pearson
Bartlett	Hansen	Pell
Bayh	Haskell	Percy
Belmon	Hatch	Proxmire
Bentsen	Hatfield	Randolph
Brooke	Hayakawa	Ribicoff
Burdick	Heinz	Riegle
Byrd, Harry F., Jr.	Helms	Roth
	Hollings	Sasser
Byrd, Robert C.	Huddleston	Schmitt
Cannon	Jackson	Schweiker
Case	Javits	Scott
Chafee	Johnston	Sparkman
Church	Long	Stafford
Curtis	Lugar	Stennis
Danforth	Magnuson	Stevens
Dole	Matsunaga	Stone
Domenici	McClellan	Talmadge
Durkin	McClure	Thurmond
Eagleton	Melcher	Wallop
Eastland	Morgan	Weicker
Ford	Moynihan	Williams
Garn	Nelson	Young
Glenn	Nunn	Zorinsky

NOT VOTING—6

Humphrey	Laxalt	Sarbanes
Inouye	Mathias	Tower

So the motion to recommit was rejected.

Mr. MUSKIE and Mr. HASKELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MUSKIE. Mr. President, if I might have the attention of our colleagues for about 30 seconds.

The PRESIDING OFFICER. Will the Senate be in order?

Mr. MUSKIE. I shall make an observation about this bill from the point of view of the budget. Senators ought to bear in mind as we proceed the effect of the vote that we just took was to add $2 billion to the 1978 deficit which is projected in the first concurrent resolution for 1978, which is at the desk, so votes like this have the effect of increasing the deficit for a budget resolution we have not yet considered.

Any other tax reductions in addition to those in this bill which carry over to 1978 will add to that deficit. It is the prerogative of the Senate to do that. But I think it ought not to be done blindly. I wish Senators to understand that is the effect, and it may well be that we may have to take the budget resolution back to committee if the results of our actions on this bill accumulate the deficit. When I say this I am not being critical of any Senator's vote on the issue we have just considered. But there are budget implications, and I think Senators ought to know what they are. That is all I wanted to say while a number of Senators are in the Chamber.

Mr. LONG. Mr. President, I shall respond for a moment to the admonition of the chairman of the Budget Committee while Senators are here.

It has been my experience that when the chairman of the Budget Committee favors an amendment the budget problem is never a problem. If it puts us $50 billion in the red—$20 billion, not $50 billion—$20 billion in the red that is something that can be accommodated. But if the chairman is against the amendment, if it costs 5 cents that is going to bankrupt the country.

We recall the experience that we had when we were voting on the Tax Reform Act last year. We were admonished, admonished, and admonished that the Tax Reform Act was going to bankrupt the country, because we were told that it was unrealistic to assume that Congress would ever dare to bring an end to those temporary tax cuts including the $35 tax credit. The reason it was unrealistic so soon was that the chairman of the Budget Committee led the charge to knock out the part that would balance the bill, so that having led the charge to knock out the part that would bring to an end the temporary tax cuts, he made it unrealistic to assume that that would be a balanced bill. Then the chairman himself——

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. LONG. I will yield in a moment.

Then the chairman himself, as well as members of his committee, proceeded to vote for amendment after amendment on that bill that made that a further unbalanced bill to the extent that when the bill was finally voted on as chairman of the committee I offered an amendment to save it that said to the Senate that we ought to try to bring back confidence to a bill that pretty well balanced things out as far as we could. That is what we did do.

So the budget balancing, after all that conversation about ending the budget process, was done in the same old traditional fashion, by the conferees from the Senate, the senior members of the Finance Committee, going to conference with their counterparts from the House Ways and Means Committee to try to work things out the best they could, to meet all the budgetary problems one might anticipate and consider.

We are now in a $10 billion better position than we were, by the administration's own bookkeeping—a $10 billion better position than we were when the chairman was advocating that we vote for the $50 tax rebate, which would have cost $11 billion. So we are $21 billion better off than the chairman anticipated we were going to be. I know he is concerned about 1978, but I would urge him to realize that there are some of us in addition to the chairman who are interested in seeing that this Nation remains fiscally solvent, and we are going to work toward that end. But when you try to tell a Senator he cannot offer an amendment here, that is something this Senator cannot prevent any more than the chairman of the Budget Committee can prevent it.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. LONG. Yes.

Mr. MUSKIE. I do not know what I did to enrage the Senator from Louisiana. All I did was state a simple fact, and as I see it, I have a duty as chairman of the Budget Committee to state facts. I do not try to restrain anyone from offering an amendment, but let the facts speak for themselves. I do not intend to get into another hassle with the chairman of the Finance Committee over what we did last year. I think the Senator has confused his history a little bit, but that is his prerogative.

All I am saying is that in the budget resolution that is not more than 2 weeks old, we had a deficit projected in that budget resolution of $63.2 billion, and that according to the same computation, the addition of the investment tax credit and the job tax credit in this bill would add $2 billion to that deficit.

That is a simple statement of fact. Now, with respect to the $10 billion figure which the President used a week and a half ago to justify the $50 tax rebate, let me say to the Senate as a whole what I said earlier to the distinguished chairman of the Finance Committee when he made the same point, when only four of us were on this floor: The fact is that in fiscal year 1976, with the best estimating that OMB, CBO, and the Budget Committees could make, actual spending in fiscal year 1976 was less than the spending we had projected. The same thing happened in the transition quarter. The same thing happened in this fiscal year in October, November, December, January, and February.

But it turned around in March. There is no basis for anybody to conclude that as of October 1, spending for this year will be $10 billion less than the spending that we projected in the Third Concurrent Budget Resolution which Congress adopted in February. If it is, I would think the taxpayers would be grateful. I do not think the taxpayers would be grateful if we assume that there is $10 billion in that budget that will not otherwise be spent, that we can begin spending now. What we may then face on October 1 is the disappearance of that $10 billion and the addition of additional deficits, because we rationalized with every spending bill or every revenue bill that last month's spending was not up to snuff.

That is the old method. That is the old method that I remember so well. When spending bills come to the floor——

Mr. LONG. Mr. President, who has the floor?

Mr. MUSKIE. Spending bills come to

the floor, and the Senator says, "This is all right, this is within the budget."

How did we write the budget? Bill by bill by bill.

The PRESIDING OFFICER. The Senator from Louisiana has the floor.

Mr. MUSKIE. I am sorry I cannot finish my thought.

Mr. LONG. Mr. President, I would like to finish my statement; then the Senator can have the floor as far as I am concerned. I just want to finish my part of it.

As it stands now, by the administration's estimate, we have $7 billion more money on hand, that has not been spent, than had been anticipated. We have $3 billion more in revenues than had been anticipated. That makes us $10 billion better off.

For the fiscal year we are in, we also have the benefit of the fact that the $50 rebate has been removed. That is $11 billion. That makes us $21 billion better off than we had estimated.

Now, the Senator from Maine now wants to talk about the fact that the bookkeeping might not be exact, the way he would like to see it, come 1978. Well, Mr. President, the President just got through last night recommending a whole host of new taxes, running into at least $25 billion of taxes, that he would like for us to vote by 1978. I think he was optimistic if he thinks we are going to vote the whole $25 billion; but he will not be completely disappointed. We are going to vote some of those taxes which the President recommended last night.

Everyone knows the budget resolution for 1978 is not binding until we vote the second resolution. I have managed tax bills before. I have managed big tax bills before. I have seen Senators put amendment after amendment on the bill, to where someone would wonder whether we were absolutely going to run out of all the money the printing press could print before we finished amending the bill. But by the time the bill went to conference and the differences were worked out between the Senate and the House, the bills have come out with a balance everyone thought we could live with, including the administration.

So I am not concerned to the degree the Senator from Maine is worried that every time we vote for an amendment someone does not agree with, that is going to destroy the country. We may very well have offered on this bill, for example, an amendment to implement the countercyclical program with another $2 billion. We may agree to it, or we may not. But at this point no one can say we are going to spend all the money the President would like to spend, just as no one can say we are going to put on all the taxes the President would like to put on.

But I remember last year, when the chairman of the Budget Committee led a fight to break the budget, we found that it is possible to work out the overall package to bring it within whatever targets we may want to insist on here.

I, of course, welcome the right of the Senator to advise us amendment by amendment with regard to what he thinks this would do with regard to 1978, or any year. But I point out that the Senator has been known to support a lot of things that could break the budget, because he favored the amendments.

I think Senators should, when they think an amendment is a good amendment, vote for it, or if they think it is a bad amendment not vote for it, and let their conscience be their guide.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. CURTIS. I have great respect for the Budget Committee. I think it is made up of eminent gentlemen, dedicated to their task. But after all, they have a very big job. There is a deficit of $50 billion, $60 billion, or $70 billion. We will never bring it into balance by fine tuning or asserting jurisdiction over the tax law. What the country is waiting for is for the Budget Committee to bring in some recommendations to lessen the size of our Government.

How are we going to get rid of a $60 billion deficit? Only by having less Government.

I do not care about what kind of language was in there or what kinds of speeches were made, when the Budget Committee was created.

The fact remains the American people expect that committee to go to the task, look at our expenditures, and bring in a plan to cut them down, even if it reduces the size of Government, even if it takes certain benefits away, even if it discontinues certain programs.

Why do we have a Budget Committee? There was a time when the taxing committees were the appropriating committees. The job got too big so they divided it. Both groups carried on their work without any coordination or without the coordination they should have. Here we have vested in one committee the responsibility of bringing our budget under control.

Every time we have a tax bill there is a catastrophe about every amendment which the Finance Committee seems to have worked on for months.

Even if the will objecting to the Finance Committee prevailed it would not be a drop in the bucket on bringing this budget into balance. This budget can only be brought into balance by less expenditures, less programs, cutting down on some, postponing some, doing away with others entirely. It is either that or go on with the unbalanced budgets.

I know of no one who is realistic, who believes all of these projections that the experts put out that they will have a balanced budget in 1981, 1982, or 1983. That has been said for the last 50 years and we go on adding to our Government.

Last week or the week before last, an unemployment compensation bill was before the Senate. We increased the obligation on the general budget by $1 billion for the next 2 years by transferring an obligation that had been carried by the unemployment tax over to the general budget.

We did not get any help from that mighty force that heads the Budget Committee. I must say, Senator BELLMON joined in it.

We have been on the floor before with bills to reduce.

Mr. President, we cannot go on housing people, feeding people, giving them everything, taking care of all their wants, paying medical bills for everybody over 65 just because they are 65, and then go on adding to the welfare state and pay for it under a private enterprise system. We cannot collect that much taxes.

I hope the Budget Committee will come to the rescue of our country and that they will attack the job that the country expects from them, to cut down on expenditures from the Treasury. After all, this tax amendment we are debating is for the benefit of taxpayers. It is their money. They earned it. I thank my chairman for yielding.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. MORGAN. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. HASKELL. Mr. President, I yield to the Senator from North Carolina without losing my right to the floor.

Mr. MORGAN. Mr. President, I ask unanimous consent that Mr. Harold Edwards and Mr. Robert Jackson, of my staff, be granted the privilege of the floor during the debate and votes on the pending measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATSUNAGA. Mr. President, will the Senator from Colorado yield for a unanimous-consent request?

Mr. HASKELL. I yield.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that Vince Versage, of my staff, be granted the privilege of the floor during the consideration and votes on the pending measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. HASKELL. I yield for a unanimous-consent request.

Mr. BAYH. Mr. President, I ask unanimous consent that Ann Church and Tom Connaughton be granted the privilege of the floor during the consideration and votes on H.R. 3477.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. HASKELL. I yield.

Mr. DANFORTH. Mr. President, I ask unanimous consent that Nancy Altman, of my staff, be granted the privilege of the floor during the consideration of the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. HASKELL. I yield.

Mr. JAVITS. Mr. President, I ask unanimous consent that the following members of my staff be granted the privilege of the floor during the debate on this bill: Charles Warren and James O'Connell, as well as Gary Kuzina, of the Budget Committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. HASKELL. I yield.

Mr. DOMENICI. Mr. President, I ask unanimous consent that Charles Gentry, of my staff, be granted the privilege of the floor during the consideration of the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. HASKELL. Without losing my right to the floor, I yield 5 minutes to the Senator frome Maine.

Mr. MUSKIE. Mr. President, as I have frequently said, and I think it should be repeated at this time, first, I want to assure the distinguished chairman of the Finance Committee and the ranking Republican that try as they may, they will not succeed in intimidating me from doing my job. We have only one discipline in the Budget Committee. I would be amazed if the Senator from Louisiana did not understand that. As a matter of fact, I think he understands it all too well. That is why he responded with such outrage to what I said earlier. We have only one discipline, the discipline of information. If I do not have that responsibility, I do not have any.

Second, the Senator and his colleagues can rail against me as much as they like for using the budget process to serve my own ends. The record will show that I have voted in committee and out to hold down spending on things I was interested in and I will continue to do so.

I believe the record will be an accurate reflection against the charges that the chairman of the Finance Committee has made this afternoon.

Mr. LONG. Will the Senator yield?

Mr. MUSKIE. I want to finish. It will not require 30 seconds.

The third point I make is I cannot see the Finance Committee, its chairman and ranking member, are any different than any other Senator. They would like to see the budget discipline apply to all the others but not to them. That is why the budget process was created in the first place, because on our separate authorizing committees we have a tendency to get committed to particular programs, to particular policies, and we lose the perspective of the whole picture.

We are all fallible on the Budget Committee. We are all members of other committees. We are going to make mistakes, but this mistake we will not make as long as I am chairman. I can be displaced by the Democratic caucus in any caucus, as the Senator from Louisiana well knows.

As long as I am chairman, the Senate is going to get the facts, to the best of my ability. It can accept the facts or not. If the Senator from Louisiana thinks I am going to come to the floor after an action such as we took and say to the Senate, "That has no budget impact," or that these other amendments that are coming up have no budget impact, if the Senator regards that as a proper discharge of the duties of the chairman of the Budget Committee, then he is mistaken.

Mr. LONG. Will the Senator yield?

Mr. MUSKIE. I yield.

Mr. LONG. Let me say if I wounded the Senator's feelings I want to apologize to the Senator because I love him.

Mr. MUSKIE. The Senator has not wounded my feelings.

Mr. LONG. I think the Senator is a great American. I am proud of him. I love him. I am proud to be the Senator's friend, even though sometimes I know I irritate the Senator. He is a great American. Insofar as I may have offended him, I am sorry.

Let me say to the Senator it is my impression, and it does not make all that much difference whether I am right or wrong but it is my impression, that the bill we reported out of this committee was known to the Budget Committee, and the budget resolution at the desk takes into account everything we have in this bill that is sitting here.

Mr. MUSKIE. Would the Senator like me to respond to that?

Mr. LONG. Yes.

Mr. MUSKIE. The bill, when it was originally reported out—and if the Senator will look at the prepared statement I placed in the RECORD today I complimented the Senator and the Finance Committee on its facts when it was reported out—before the withdrawal of the tax rebate, was in full accord with the third concurrent budget resolution.

I know that the Senator made every effort to see that it was. But since that time, the $50 tax rebate has been withdrawn. That has a negative impact on our budget projections. The result is that revenue estimates for fiscal year 1978 are lower than they would have been with the rebate. In addition to that, we must project increases in unemployment compensation benefits and other trust fund benefits for that reason.

The projection is that killing the $50 tax rebate can result in increased unemployment on the order of 250,000 by the end of the 1978 fiscal year. That has to be taken into account in revenue projections and in spending projections.

So, although the tax bill, when it was reported out, met the criteria of the third concurrent resolution and the 1978 resolution, there was a change in circumstances which changed it.

Now, in our haste to move this tax bill along, maybe I too quickly agreed to this schedule before we had fully judged and evaluated the budget implications of what had happened. If I were hasty in that respect, I regret it, but I cannot change that. The bill is here. We have to consider it.

I have no objection, may I say to the Senator, to the Senate voting any way it wishes on these amendments. That is the Senate's prerogative, it is not mine. But the Senate ought to understand when it votes for these things that unless, somewhere down the line, as the Senator suggests, that action is eliminated in conference or elsewhere—and I cannot anticipate that—the budget implications will be thus and so.

That is all I am trying to do, and I think I made that statement unemotionally at the time. I have gotten a little bit heated since because the Senator has a way of heating the atmosphere on this floor. I guess I have a little of that talent myself.

In any case, all I was trying to do is state a neutral fact so that, as the Senators consider these other amendments that are coming down the line, they take that fact into consideration. If they still want to vote for the amendment, God bless them; let them do it. I have no power to prevent them.

I say on a personal note to the Senator that the Senator knows that, although we do clash on the floor from time to time, I am very fond of him personally. Our relationship goes back a lot longer than most people realize. I have never had reason to regret knowing him and enjoying his own talent for histrionics and his own talent for companionship, and, above all, his storytelling ability.

My role is not a storytelling role. My role is a fact-telling role, and I do the best I can, I say to the Senator. I hope I do not give preference to the things I am interested in. I hope any time I do or appear to do that, the Senator will hold my feet to the fire, because I do not wish to do that.

Mr. LONG. Will the Senator yield to me?

Mr. HASKELL. I yield 3 minutes to the Senator from Louisiana.

Mr. LONG. Let me say to the Senator from Maine that I think I better understand what the Senator's understanding and logic is at this moment. He is saying that when the $50 rebate was withdrawn, that required the Budget Committee to assume that business conditions next year will not be as good as they are this year and that there will be more unemployment. Therefore, while doing that resulted in a more favorable budget situation for now and a smaller deficit by about $11 billion, it would probably result in a less favorable situation in the following fiscal year. The result of that would be that, for fiscal year 1978, we might be about $2 billion worse off than this committee had anticipated.

Is that correct?

Mr. MUSKIE. Let me state it another way, though that is essentially correct.

The whole purpose of the $50 tax rebate was to stimulate the economy. Without the stimulus, the economy is bound to be less viable than with it. As a matter of fact, it is for that reason, as I understand the President, that he has withdrawn it, because he says we do not need the stimulus and, if we keep it, we may overheat the economy. So it is not necessarily a projection as to the state of the economy a year from now, but what it would be with or without the stimulus.

(At this point Senator LEAHY assumed the Chair.)

Mr. LONG. My point is that while I did not fully understand how the Senator arrived at the conclusion that a bill which we reported, which we thought had been cleared with the Budget Committee and which we had reason to believe was fully within what the Budget Committee was expecting, suddenly became one that was more than a billion dollars beyond the 1978 fiscal year estimate. I believe I now understand the Senator's logic.

Let me say that if, through a combi-

nation of circumstances, it be the judgment of the Senate that we will reduce the deficit in fiscal year 1977 by $11 billion and if that set of circumstances should result in a greater deficit of $2 billion by 1978, as far as the national debt is concerned, we would still be $9 billion better off than was originally anticipated. I would think if that were the circumstance, those who are concerned about the fiscal solvency of this Government would feel that the logical thing for the Senate to do, having made those decisions, would be to reduce the deficit in fiscal 1977 in its assumption and increase the projected deficit for the following year. I think that this is the same Senate, even though there might be one committee looking at one item and another committee looking at another. Whatever the combined judgment of the Senate might be, I should think that the Senate would be willing to accommodate itself to whatever the Senate decides it ought to do about these bills, having had the best information that all Senators can offer.

Would the Senator agree with that?

Mr. MUSKIE. Yes, but I would suggest that——

The PRESIDING OFFICER (Mr. ZORINSKY). The Senator from Colorado has the floor and has yielded 4 minutes, which has expired.

Mr. HASKELL. I yield an additional 2 minutes to the Senator from Maine.

Mr. MUSKIE. In the first place, the $11 billion number is not strictly accurate, but that is a detail for the moment. The table that I put in the RECORD will give harder figures.

But, yes, of course, it is possible, and the Senate should be willing to change its economic assumptions and its economic policy on the basis of changes in circumstances and on the basis of the most recent information. All I am saying is that when a change has taken place, it is my job to tell the Senate what it is.

Secondly, it would seem to me to be preferable to make the changes through the process that has been created for that purpose than to do it ad hoc on the Senate floor.

The Senate, of course, would vote on tax amendments on the Senate floor, but to try on the Senate floor to change the economic assumptions of the Congress budget policy, I think, is very risky business, indeed, because there are as many variations in philosophy on that score as there are Senators, as the Senator knows.

I think that the Senator and I are at least looking at the same picture at the moment and are in a position to discuss it at the moment.

I do not want to delay my good friend from Colorado from presenting his amendment. I want to assure him that his amendment is not any particular target of mine. I do not know what it is yet or whether I shall be for it or against it. I understand it is designed to improve something and I am all for improvement. I know the Senator is, so I may be for his amendment when I see it.

I think the Senator from Louisiana, after laboring as we have for almost a year now to understand each other on this budget process, may be beginning to close the gap in our understanding. If we are, I am delighted.

Mr. BUMPERS. Will the Senator from Colorado yield for a couple of minutes? I think I am ready for his amendment.

Mr. HASKELL. I yield for a couple of minutes without losing my right to the floor.

Mr. BUMPERS. Mr. President, I do not want to deal in any post mortems.

When I first came to the Senate the former Senator from North Carolina, Mr. Ervin, told me I would enjoy being in the Senate, but that occasionally I would be terribly disappointed because the majority of the Senate would not fully appreciate the wisdom of my views. Today is such a day.

But there is a piece of information contained in the State Farm ad that I think we would like to know.

On the investment tax credit increase, which the Senate just has at least indirectly approved, I will make one observation. Recently, I read in the Wall Street Journal where A.T. & T. announced that the last 3 months and last 12 months have been far and away the most profitable in their history.

During the last 12 months, their profits have been over $4 billion. In 1977, A.T. & T. budgeted $11.4 billion for construction.

I just did a little extrapolation to show what we have just done. If the A.T. & T. construction budget of $11.4 billion continues in that vein, and it will because they plan their construction way ahead and way beyond the effective deadline for ending this tax rebate, but if we can reasonably assume that 75 percent of that $11.4 billion will be eligible for the investment tax credit, that means A.T. & T., in the first 12 months this is in effect, will derive $171 million, or roughly 7 percent of the total amount that the increase in the investment tax credit is supposed to cost the Government.

I thought the Members would like to know they have just voted to give A.T. & T. 7 percent of $2.4 billion.

I thank the Chair.

AMENDMENT NO. 198, AS MODIFIED

Mr. HASKELL. Mr. President, I call up my amendment No. 198 and ask that it be modified.

Several Senators addressed the Chair.

Mr. JAVITS. I did not hear a thing.

The PRESIDING OFFICER. Will the Senator from Colorado use his microphone, please?

Mr. HASKELL. Yes, I will.

Mr. President, I call up my amendment No. 198 and ask that the reading be dispensed with and that it be modified to add in the table of contents, after section 302, a section 303 which will read "Alternative Economic Stimulus Credits."

Now, Mr. President, the purpose of this amendment——

Mr. JAVITS addressed the Chair.

Mr. HASKELL. Mr. President, I would like to explain the purpose of this amendment.

The PRESIDING OFFICER. It has not been agreed to. Is there objection?

Mr. CURTIS. Reserving the right to object, what have we agreed to?

Mr. HASKELL. I just offered the amendment. I do not know if it has to be agreed to. I am just offering it, that is all. We will have a vote on it at some later time.

The PRESIDING OFFICER. The Senator asked the reading be dispensed with and it be modified. It takes unanimous consent to dispense with reading.

Mr. HASKELL. Then by all manner and means, let us have the clerk read the amendment and I will modify it.

Mr. JAVITS addressed the Chair.

Mr. HASKELL. Mr. President, I ask the clerk to read the amendment.

The PRESIDING OFFICER. The amendment as offered is not in order.

Mr. HASKELL. Mr. President, I ask that it be modified in the manner that I suggested, that section 302 in the table of contents be amended to read "alternative economic stimulus credits and an increase in the jobs tax credit."

Mr. JAVITS addressed the Chair.

The PRESIDING OFFICER. Will the Senator send the modification to the desk?

Mr. HASKELL. Yes.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Colorado (Mr. HASKELL) proposes an amendment No. 198, as modified.

The amendment, as modified, is as follows:

Modify amendment No. 198 as follows: Strike lines 1 through 9, and at the end of section 302 in the table of contents after the word "credits" insert "and an increase in the jobs tax credit".

Mr. JAVITS. Mr. President, will the Senator yield for a parliamentary inquiry.

Mr. HASKELL. For a parliamentary inquiry?

Mr. JAVITS. I just want to know where we stand.

Mr. President, has the first committee amendment been read?

The PRESIDING OFFICER. The committee amendment which is pending has not been read. Does the Senator wish it be read?

Mr. JAVITS. Is there a pending committee amendment?

The PRESIDING OFFICER. There is a pending committee amendment.

Mr. JAVITS. Which one is it, may we know?

The PRESIDING OFFICER. Committee amendment No. 2, beginning on page 2, section 302.

Mr. JAVITS. This is the amendment to which my colleague is addressing himself?

Mr. HASKELL. The Senator is correct.

Mr. JAVITS. All right. I am sorry.

Mr. HASKELL. Mr. President, I would like to explain the background of the amendment which I propose.

Mr. CURTIS. May I inquire——

Mr. HASKELL. Let me explain.

Mr. CURTIS. Is the Senator amending anything but the table of contents?

Mr. HASKELL. If the Senator will let me explain, Mr. President, the purpose of the amendment, I think the whole thing will become clear.

Mr. CURTIS. Very well.

Mr. HASKELL. Mr. President, the present committee amendment provides an alternative which a taxpayer can take of a 2-percent investment credit or a jobs credit in the amount of $1,050 for certain additional people added to the payroll.

The second provision of this package is obviously geared to increase employment in this country and, hopefully, to cut down the over 7 percent unemployment which we have had for 28 months.

In the view of this Senator and in the view of the small business associations that are particularly interested in this credit, this is an inadequate inducement to increase employment.

For that reason, the suggestion has been made that the credit be increased to $2,100 per employee.

Furthermore, Mr. President, I think we all recognize that the Tax Code of our Nation is tilted toward the major business enterprises of the Nation. For example, we already have the investment credit and, if my memory serves me correctly, something in excess of 70 percent advantage of that credit in the year 1975 was taken by corporations with over $100 million in assets.

Now, that is big business, indeed. Big business benefits from the investment credit.

We have ADR which, of course, is really only the very large, who can afford separate accounting staffs, who can take advantage of it because of its immense complexity.

We also have the business of allowing to escape from U.S. income tax the earnings of foreign subsidiaries of domestic parent corporations. This, of course, is an advantage to the very large corporations of this country and, in fact, reduces the effective rate of multinational corporations to a very low level.

In addition to that, there are other advantages which really accrue as a matter of practice only to the very large. DISC would be one of them that allows overseas sales to have a favorable tax rate and, obviously, generally speaking, only the very large make overseas sales.

Therefore, it seemed appropriate that the jobs credit should be limited to the moderate-sized business and the small business.

This being the case, the amendment suggests that there be a so-called cap; in other words, no one employer could take more than a certain amount of tax credit for new employment.

So the amendment basically has two purposes: to put forward a meaningful job credit and to limit its use to the small and middle-sized businesses of this Nation.

For that reason, the amendment provides that no one employer can take more than $100,000 in credit.

Mr. President, the House has put a cap on its jobs credit. It has put a $40,000 cap rather than a $100,000 cap and, in many ways, I think the House cap is probably better than the one I am suggesting. But I doubt that, perhaps, we could get enough votes to pass a $40,000 limitation.

UP AMENDMENT 156—SECOND MODIFICATION OF AMENDMENT NO. 198

Mr. President, I further modify my amendment to include the material I now send to the desk.

The PRESIDING OFFICER (Mr. ZORINSKY). The amendment is so modified.

Mr. HASKELL's second modification (UP 156) is as follows:

SEC. 302. ALTERNATIVE ECONOMIC STIMULUS CREDITS.

(a) NEW JOBS CREDITS.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting after section 44A the following new section:

"SEC. 44B. CREDIT FOR EMPLOYMENT OF CERTAIN NEW EMPLOYEES.

"(a) GENERAL RULE.—At the election of the taxpayer, there shall be allowed as a credit against the tax imposed by this chapter the amount determined under subpart D of this part.

"(b) ELECTION.—The election referred to in subsection (a) shall be made by the employer (in the manner provided in regulations prescribed by the Secretary) on or before the due date (including any extensions of time) for filing its return of tax under this chapter for the last taxable year beginning during 1977. Once made, the election shall be effective for the year made and all subsequent taxable years beginning in 1977 or 1978. The Secretary shall prescribe regulations with respect to the continuation of the election in situations in which corporations and other persons are organized, reorganized, liquidated, or otherwise restructured. An election may not be made under this section by a corporation which is a member of a controlled group of corporations (within the meaning of section 52(a)) unless the election is made by all members of that controlled group. The election may not be made by a trade or business under common control (within the meaning of section 52(b)) unless all of the trades or businesses under common control have made the election.

"(c) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this section and subpart D."

(b) RULES FOR COMPUTING CREDIT.—Part IV of subchapter A of chapter 1 (relating to credits against tax) is amended by adding at the end thereof the following new subpart.

"Subpart D—Rules for Computing Credit for Employment of Certain New Employees

"Sec. 51. Amount of credit.
"Sec. 52. Special rules.
"Sec. 53. Limitation based on amount of tax.

"SEC. 51 AMOUNT OF CREDIT.

"(a) DETERMINATION OF AMOUNT.—The amount of the credit allowable by section 44B shall be—

"(1) for a taxable year beginning in 1977, an amount equal to 50 percent of the excess of the aggregate unemployment insurance wages paid during 1977 over 103 percent of the aggregate unemployment insurance wages paid during 1976, and

"(2) for a taxable year beginning in 1978, an amount equal to 50 percent of the excess of the aggregate unemployment insurance wages paid during 1978 over 103 percent of the aggregate unemployment insurance wages paid during 1977.

"(b) TOTAL WAGES MUST INCREASE.—The amount of the credit allowable by section 44B for any taxable year shall not exceed the amount which would be determined for such year under subsection (a) if—

"(1) the aggregate amounts taken into account as unemployment insurance wages were determined without any dollar limitation, and

"(2) '105 percent' were substituted for '103 percent' in the appropriate paragraph of subsection (a).

(c) TOTAL CREDIT LIMIT.—The amount of the credit allowable by sec. 44B shall not exceed $100,000.

"(d) MINIMUM PRECEDING YEAR WAGES.—For purposes of subsection (a), if 103 percent of the amount of the aggregate unemployment insurance wages paid during 1976 or 1977 is less than 50 percent of the amount of such wages paid during 1977 or 1978, respectively, 103 percent of the amount of such wages paid during the preceding year shall be increased to an amount equal to 50 percent of the amount of such wages paid during the year for which the determination is made.

"(e) UNEMPLOYMENT INSURANCE WAGES DEFINED.—For purposes of this subpart—

"(1) FUTA WAGES.—Except as otherwise provided in this subpart, the term 'unemployment insurance wages' has the meaning given to the term 'wages' by section 3306(b), except that, in the case of amounts paid during 1978, '$4,200' shall be subtituted for '$6,000' each place it appears in section 3306(b).

"(2) AGRICULTURE LABOR.—If the services performed by any empolyee for an employer during more than one-half of any pay period (within the meaning of section 3306(d)) taken into account with respect to any calendar year constitute agricultural labor (within the meaning of section 3306(k)), the term 'unemployment insurance wages' means, with respect to the remuneration paid by the employer to such employee for such year, an amount equal to so much of such remuneration as constitutes 'wages' within the meaning of section 3121(a), except that the contribution and benefit base for each calendar year shall be deemed to be $4,200.

"(3) RAILWAY LABOR.—If more than one-half of the remuneration paid by an employer to an employee during the calendar year is remuneration for service described in section 3306(c)(9), the term 'unemployment insurance wages' means, with respect to such employee for such year, an amount equal to ⅞ of such much of the remuneration paid to such employee during such year as is subject to contributions under section 8(a) of the Railroad Unemployment Insurance Act (45 U.S.C. 358(a)).

"(a) RULES FOR APPLICATION OF SECTION.—For purposes of this subpart—

"(1) REMUNERATION MUST BE FOR TRADE OR BUSINESS EMPLOYMENT WITHIN UNITED STATES.—Remuneration paid by an employer to an employee during any calendar year shall be taken into account only if more than one-half of the remuneration so paid is for services performed in the United States in a trade or business of the employer.

"(2) SPECIAL RULE FOR CERTAIN DETERMINATIONS.—Any determination as to whether paragraph (1) of this subsection, or paragraph (2) or (3) of subsection (d), applies with respect to any employee for any calendar year shall be made without regard to subsections (a) and (b) of section 52.

"SEC. 52. SPECIAL RULES.

"(a) CONTROLLED GROUP OF CORPORATIONS.—For purposes of this subpart, all employees of all corporations which are members of the same controlled group of corporations shall be treated as employed by a single employer. In any such case, the credit (if any) allowable by section 44B to each such member shall be its proportionate contribution to the increase in unemployment insurance wages giving rise to such credit. For purposes of this subsection, the term 'controlled group of corporations' has the meaning given to such term by section 1563(a), except that—

"(1) 'more than 50 percent' shall be substituted for 'at least 80 percent' each place it appears in section 1563(a)(1), and

"(2) the determination shall be made without regard to subsections (a)(4) and (e)(3)(C) of section 1563.

"(b) EMPLOYEES OF PARTNERSHIPS, PROPRIETORSHIPS, ETC., WHICH ARE UNDER COMMON CONTROL.—For purposes of this subpart, under regulations prescribed by the Secretary—

"(1) all employees of trades or businesses

(whether or not incorporated) which are under common control shall be treated as employed by a single employer, and

"(2) the credit (if any) allowable by section 44B with respect to each trade or business shall be its proportionate contribution to the increase in unemployment insurance wages giving rise to such credit.

The regulations prescribed under this subsection shall be based on principles similar to the principles which apply in the case of subsection (a).

"(c) ADJUSTMENTS FOR CERTAIN ACQUISITIONS, ETC.—Under regulations prescribed by the Secretary—

"(1) ACQUISITIONS.—If, after December 31, 1975, an employer acquires the major portion of a trade or business of another person (hereinafter in this paragraph referred to as the 'predecessor') or the major portion of a separate unit of a trade or business of a predecessor, then, for purposes of applying this subpart for any calendar year ending after such acquisition, the amount of unemployment insurance wages deemed paid by the employer during periods before such acquisition shall be increased by so much of such wages paid by the predecessor with respect to the acquired trade or business as is attributable to the portion of such trade or business acquired by the employer.

"(2) DISPOSITIONS.—If, after December 31, 1975—

"(A) an employer disposes of the major portion of any trade or business of the employer or the major portion of a separate unit of a trade or business of the employer in a transaction to which paragraph (1) applies, and

"(B) the employer furnishes the acquiring person such information as is necessary for the application of paragraph (1),

then, for purposes of applying this subpart for any calendar year ending after such disposition, the amount of unemployment insurance wages deemed paid by the employer during periods before such disposition shall be decreased by so much of such wages as is attributable to such trade or business or separate unit.

"(d) TAX-EXEMPT ORGANIZATIONS.—No credit shall be allowed under section 44B to any organization (other than a cooperative described in section 521) which is exempt from income tax under this chapter.

"(e) CHANGE IN STATUS FROM SELF-EMPLOYED TO EMPLOYEE.—If—

"(1) during 1976 or 1977 an individual has net earnings from self-employment (as defined in section 1402(a)) which are attributable to a trade or business, and

"(2) for any portion of the succeeding calendar year such individual is an employee of such trade or business,

then, for purposes of determining the credit allowable for a taxable year beginning in such suceeding calendar year, the employer's aggregate unemployment insurance wages for 1976 or 1977, as the case may be, shall be increased by an amount equal to so much of the net earnings referred to in paragraph (1) as does not exceed $4,200.

"(f) SUBCHAPTER S CORPORATIONS.—In the case of an electing small business corporation (as defined in section 1371)—

"(1) the amount of the credit determined under this subpart for any taxable year shall be apportioned pro rata among the persons who are shareholders of such corporation on the last day of such taxable year, and

"(2) any person to whom an amount is apportioned under paragraph (1) shall be allowed, subject to section 53, a credit under section 44B for such amount.

"(g) ESTATES AND TRUSTS.—In the case of an estate or trust—

"(1) the amount of the credit determined under this subpart for any taxable year shall be apportioned between the estate or trust and the beneficiaries on the basis of the income of the estate or trust allocable each, and

"(2) any beneficiary to whom any amount has been apportioned under paragraph (1) shall be allowed, subject to section 53, a credit under section 44B for such amount.

"(h) LIMITATIONS WITH RESPECT TO CERTAIN PERSONS.—Under regulations prescribed by the Secretary, in the case of—

"(1) an organization to which section 593 (relating to reserves for losses on loans) applies,

"(2) a regulated investment company or a real estate investment trust subject to taxation under subchapter M (section 851 and following), and

"(3) a cooperative organization described in section 1381(a),

rules similar to the rules provided in section 46(e) shall apply in determining the amount of the credit under this subpart.

"(i) CERTAIN SHORT TAXABLE YEARS.—If the employer has more than one taxable year beginning in 1977 or 1978, the credit under this subpart shall be determined for the employer's last taxable year beginning in 1977 or 1978, as the case may be.

"SEC. 53. LIMITATION BASED ON AMOUNT OF TAX.

"(a) GENERAL RULE.—Notwithstanding section 51, the amount of the credit allowed by section 44B for the taxable year shall not exceed the amount of the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under—

"(1) section 33 (relating to foreign tax credit),

"(2) section 37 (relating to credit for the elderly),

"(3) section 38 (relating to investment in certain depreciable property),

"(4) section 40 (relating to expenses of work incentive programs),

"(5) section 41 (relating to contributions to candidates for public office),

"(6) section 42 (relating to general tax credit), and

"(7) section 44A (relating to expenses for household and dependent care services necessary for gainful employment).

For purposes of this subsection, any tax imposed for the taxable year by section 56 (relating to minimum tax for tax preferences), section 72(m)(5)(B) (relating to 10 percent tax on premature distributions to owner-employees), section 408(f) (relating to additional tax on income from certain retirement accounts), section 402(e) (relating to tax on lump-sum distributions), section 531 (relating to accumulated earnings tax), section 541 (relating to personal holding company tax), or section 1378 (relating to tax on certain capital gains of subchapter S corporations), and any additional tax imposed for the taxable year by section 1351(d)(1) (relating to recoveries of foreign expropriation losses), shall not be considered tax imposed by this chapter for such year.

"(b) SPECIAL RULE FOR PASS-THROUGH OF CREDIT.—In the case of a partner in a partnership, a beneficiary of an estate or trust, and a shareholder in a subchapter S corporation, the limitation provided by subsection (a) for the taxable year shall not exceed a limitation separately computed with respect to such person's interest in such entity by taking an amount which bears the same relationship to such limitation as—

"(1) that portion of the person's taxable income which is allocable or apportionable to the person's interest in such entity, bears to—

"(2) the person's taxable income for such year reduced by his zero bracket amount (determined under section 63(d)), if any.

"(c) CARRYBACK AND CARRYOVER OF UNUSED CREDIT.—

"(1) ALLOWANCE OF CREDIT.—If the amount of the credit determined under section 51 for any taxable year exceeds the limitation provided by subsection (a) for such taxable year (hereinafter in this subsection referred to as the 'unused credit year'), such excess shall be—

"(A) a new employee credit carryback to each of the 3 taxable years preceding the unused credit year, and

"(B) a new employee credit carryover to each of the 7 taxable years following the unused credit year,

and shall be added to the amount allowable as a credit by section 44B for such years. If any portion of such excess is a carryback to a taxable year beginning before January 1, 1977, section 44B shall be deemed to have been in effect for such taxable year for purposes of allowing such carryback as a credit under such section. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 10 taxable years to which (by reason of subparagraphs (A) and (B)) such credit may be carried, and then to each of the other 9 taxable years to the extent that, because of the limitation contained in paragraph (2), such unused credit may not be added for a prior taxable year to which such unused credit may be carried.

"(2) LIMITATION.—The amount of the unused credit which may be added under paragraph (1) for any preceding or succeeding taxable year shall not exceed the amount by which the limitation provided by subsection (a) for such taxable year exceeds the sum of—

"(A) the credit allowable under section 44B for such taxable year, and

"(B) the amounts which, by reason of this subsection, are added to the amount allowable for such taxable year and which are attributable to taxable years preceding the unused credit year."

(c) DEDUCTION FOR WAGES PAID REDUCED BY AMOUNT OF CREDIT.—

(1) IN GENERAL.—Part IX of subchapter B of chapter 1 (relating to items not deductible) is amended by adding at the end thereof the following new section:

"SEC. 280C. PORTION OF WAGES FOR WHICH CREDIT IS CLAIMED UNDER SECTION 44B

"No deduction shall be allowed for that portion of the wages or salaries paid or incurred for the taxable year which is equal to the amount of the credit allowable for the taxable year under section 44B (relating to credit for employment of certain new employees) determined without regard to the provisions of section 53 (relating to limitation based on amount of tax). In the case of a corporation which is a member of a controlled group of corporations (within the meaning of section 52(a)) or a trade or business which is treated as being under common control with other trades, or businesses (within the meaning of section 52(b)), this section shall be applied under rules prescribed by the Secretary similar to the rules applicable under subsections (a) and (b) of section 52.".

(2) CLERICAL AMENDMENT.—The table of sections for such part is amended by adding at the end thereof the following new item:

"Sec. 280C. Portion of wages for which credit is claimed under section 44B.".

(d) ALTERNATIVE INCREASE IN INVESTMENT CREDIT.—Paragraph (2) of section 46(a) (relating to amount of credit for current taxable year) is amended by adding at the end thereof the following new subparagraph:

"(E) INCREASE IN PERCENTAGES FOR TAXPAYERS NOT CLAIMING SECTION 44B CREDIT.—

"(i) In the case of a taxpayer for whom an election to take the credit allowed by section 44B (relating to credit for employment of certain new employees) is not in effect, subparagraph (A) shall be applied by substituting '12 percent' for '10 percent', and

clause (i) of subparagraph (B) shall be applied by substituting '13 percent' for '11 percent'.

"(ii) The provisions of clause (i) shall apply only to—

"(I) property to which subsection (d) does not apply, the construction, reconstruction, or erection of which is completed by the taxpayer after December 31, 1976, but only to the extent of the basis thereof attributable to construction, reconstruction, or erection after such date and before January 1, 1981,

"(II) property to which subsection (d) does not apply, acquired by the taxpayer after December 31, 1976, and before January 1, 1981, and place in service by the taxpayer before January 1, 1981, and

"(III) property to which subsection (d) applies, but only to the extent of the qualified investment (as determined under subsections (c) and (d)) with respect to qualified progress expenditures made after December 31, 1976, and before January 1, 1981.

"(iii) In the case of a taxpayer with respect to whom an election under section 44B (b) is in effect for 1978, clause (ii) of this subparagraph shall be applied by substituting 'December 31, 1978,' for 'December 31, 1976,' each place it appears therein.".

(d) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) CLERICAL AMENDMENTS.—

(A) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting after the item relating to section 44A the following new item:

"Sec. 44B. Credit for employment of certain new employees."

(B) The table of subparts for part IV of subchapter A of chapter 1 is amended by adding at the end thereof the following new item:

"Subpart D. Rules for computing credit for certain new employees."

(2) MINIMUM TAX.—

(A) Section 56(c) (defining regular tax deduction) is amended by striking out "and" at the end of paragraph (7), by striking out the period at the end of paragraph (8) and inserting in lieu thereof ", and", and by adding at the end thereof the following new paragraph:

"(9) section 44B (relating to credit for employment of certain new employees)."

(B) Subparagraph (A) of section 56(e)(1) (relating to tax carryover for timber) is amended—

(i) by striking out "and" at the end of clause (ii),

(ii) by striking out "exceed" at the end of clause (iii) and inserting in lieu thereof "and", and

(iii) by inserting after clause (iii) the following new clause:

"(iv) section 44B (relating to credit for employment of certain new employees), exceed'".

(3) CORPORATE REORGANIZATIONS—

(A) Subsection (c) of section 381 (relating to items of the distributor or transferor corporation) is amended by adding at the end thereof the following new paragraph:

"(26) CREDIT UNION SECTION 44B FOR EMPLOYMENT OF CERTAIN NEW EMPLOYEES.—The acquiring corporation shall take into account (to the extent proper to carry out the purposes of this section and section 44B, and under such regulations as may be prescribed by the Secretary) the items required to be taken into account for purposes of section 44B in respect of the distributor or transferor corporation."

(B) Section 383 (relating to special limitations on unused investment credits, work incentive program credits, foreign taxes, and capital losses), as in effect for taxable years beginning after June 30, 1978, is amended—

(i) by inserting "to any unused new employee credit of the corporation under section 53(b)," and "section 50A(b),"; and

(ii) by striking out "WORK INCENTIVE PROGRAM CREDITS," in the section heading and inserting in lieu thereof "WORK INCENTIVE PROGRAM CREDITS, NEW EMPLOYEE CREDITS,".

(C) Section 383 (as in effect on the day before the date of the enactment of the Tax Reform Act of 1976) is amended—

(i) by inserting "to any unused new employee credit of the corporation which could otherwise be carried forward under section 53(c)," after "section 50A(b),"; and

(ii) by striking out "WORK INCENTIVE PROGRAM CREDITS," in the section heading and inserting in lieu thereof "WORK INCENTIVE PROGRAM CREDITS, NEW EMPLOYEE CREDITS,".

(D) The table of sections for part V of subchapter C of chapter 1 is amended by striking out "work incentive program credits," in the item relating to section 383 and inserting in lieu thereof "work incentive program credits, new employee credits,".

(4) STATUTES OF LIMITATION AND INTEREST RELATING TO NEW EMPLOYEE CREDIT CARRYBACK.—

(A) ASSESSMENT AND COLLECTION.—Section 6501 (relating to limitations on assessment and collection) is amended by adding at the end thereof the following new subsection:

"(p) NEW EMPLOYEE CREDIT CARRYBACKS.—In the case of a deficiency attributable to the application to the taxpayer of a new employee credit carryback (including deficiencies which may be assessed pursuant to the provisions of section 6213(b)(3)), such deficiency may be assessed at any time before the expiration of the period within which a deficiency for the taxable year of the unused new employee credit which results in such carryback may be assessed, or, with respect to any portion of a new employee credit carryback from a taxable year attributable to a net operating loss carryback, an investment credit carryback, a work incentive program credit carryback, or a capital loss carryback from a subsequent taxable year, at any time before the expiration of the period within which a deficiency for such subsequent taxable year may be assessed."

(B) CREDIT OR REFUND.—Section 6511(d) (relating to limitations on credit or refund) is amended by adding at the end thereof the following new paragraph:

"(9) SPECIAL PERIOD OF LIMITATION WITH RESPECT TO NEW EMPLOYEE CREDIT CARRYBACK.—

"(A) PERIOD OF LIMITATIONS.—If the claim for credit or refund relates to an overpayment attributable to a new employee credit carryback, in lieu of the 3-year period of limitation prescribed in subsection (a), the period shall be that period which ends with the expiration of the 15th day of the 40th month (or 39th month, in the case of a corporation) following the end of the taxable year of the unused new employee credit which results in such carryback (or, with respect to any portion of a new employee credit carryback from a taxable year attributable to a new operating loss carryback, an investment credit carryback, a work incentive program credit carryback, or a capital loss carryback from a subsequent taxable year, the period shall be that period which ends with the expiration of the 15th day of the 40th month, or 39th month, in the case of a corporation, following the end of such taxable year) or the period prescribed in subsection (c) in respect of such taxable year, whichever expires later. In the case of such a claim, the amount of the credit or refund may exceed the portion of the tax paid within the period provided in subsection (b)(2) or (c), whichever is applicable to the extent of the amount of the overpayment attributable to such carryback.

"(B) APPLICABLE RULES.—If the allowance of a credit or refund of an overpayment of tax attributable to a new employee credit carryback is otherwise prevented by the operation of any law or rule of law other than section 7122, relating to compromises, such credit or refund may be allowed or made, if claim therefor is filed within the period provided in subparagraph (A) of this paragraph. In the case of any such claim for credit or refund, the determination by any court, including the Tax Court, in any proceeding in which the decision of the court has become final shall not be conclusive with respect to the new employee credit, and the effect of such credit, to the extent that such credit is affected by a carryback which was not in issue in such proceeding."

(C) INTEREST ON UNDERPAYMENTS.—Section 6601(d) (relating to income tax reduced by carryback or adjustment for certain unused deductions) is amended by adding at the end thereof the following new paragraph:

"(5) NEW EMPLOYEE CREDIT CARRYBACK.—If the credit allowed by section 44B for any taxable year is increased by reason of a new employe credit carryback, such increase shall not affect the computation of interest under this section for the period ending with the last day of the taxable year in which the new employee credit carryback arises, or, with respect to any portion of a new employee credit carryback from a taxable year attributable to a net operating loss carryback, an investment credit carryback, a work incentive program credit carryback, or a capital loss carryback, or a capital loss carryback from a subsequent taxable year, such increase shall not affect the computation of interest under this section for the period ending with the last day of such subsequent taxable year."

(D) INTEREST ON OVERPAYMENTS.—Section 6611(f) (relating to refund of income tax caused by carryback or adjustment for certain unused deductions) is amended by adding at the end thereof the following new paragraph:

"(5) NEW EMPLOYEE CREDIT CARRYBACK.—For purposes of subsection (a), if any overpayment of tax imposed by subtitle A results from a new employee credit carryback, such overpayment shall be deemed not to have been made before the close of the taxable year in which such new employee credit carryback arises, or, with respect to any portion of a new employee credit carryback from a taxable year attributable to a net operating loss carryback, an investment credit carryback, a work incentive program credit carryback, or a capital loss carryback from a subsequent taxable year, such overpayment shall be deemed not to have been made before the close of such subsequent taxable year."

(5) TENTATIVE CARRYBACK ADJUSTMENTS.—

(A) APPLICATION FOR ADJUSTMENT.—Section 6411 (relating to quick refunds in respect of tentative carryback adjustments) is amended—

(i) by striking out "or unused work incentive program credit" each place it appears in such section and inserting in lieu thereof "unused work incentive program credit, or unused new employee credit",

(ii) by inserting after "section 50A(b)," in the first sentence of subsection (a) "by a new employee credit carryback provided in section 53(c),",

(iii) by striking out "or a work incentive program carryback from" in the second sentence of subsection (a) and inserting in lieu thereof ", a work incentive program carryback, or a new employee credit carryback from", and

(iv) by striking out "investment credit carryback" in the second sentence of subsection (a) and inserting in lieu thereof "investment credit carryback, or, in the case of a new employee credit carryback, to an in-

vestment credit carryback or a work incentive program carryback)".

(B) TENTATIVE CARRYBACK ADJUSTMENT ASSESSMENT PERIOD.—Section 6501(m) (relating to tentative carryback adjustment assessment period) is amended—

(i) by striking out "or a work incentive program carryback" and inserting in lieu thereof "a work incentive program carryback, or a new employee credit carryback", and

(ii) by striking out "(j), or (o)" each place it appears and inserting in lieu thereof "(j), (o), or (p)".

(6) DESIGNATION OF INCOME TAX PAYMENT.—Section 6096(b) (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44A" and inserting in lieu thereof "44A, and 44B".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1976, and to credit carryback from such years.

Mr. HASKELL. Mr. President, I think a smaller cap would be desirable because I think it is more the small business as opposed to the middle-sized business in this country that needs the greatest assistance. But in hopes of passing a limitation, a cap, at all, why, I picked the $100,000 limitation which, indeed, is extremely liberal because it means that a 2,500-employee firm could grow in employment by 5 percent and take advantage of the credit. So this is what I would consider a very liberal cap indeed.

Incidentally, the additional cost of my amendment over and above what is in the amendment of the Committee on Finance is $0.5 billion.

If you do not put some kind of a cap on, this $100,000 cap, there would be a loss of revenue of an additional $600 million, and I think, as I mentioned yesterday, in view of the annual reports and quarterly earnings statements that have come out in the financial publications recently, it is quite clear that the major corporations of this country that would be getting that additional $600 million certainly do not need any help.

So, Mr. President, that is my amendment. I would be glad to answer any questions that anybody may have on it.

Mr. MATSUNAGA. Mr. President, will the Senator yield?

Mr. HASKELL. I would yield for a question to the Senator from Hawaii.

Mr. MATSUNAGA. The Senator's proposal is to increase from 25 percent to 50 percent the allowable credit for each employee hired; is that correct?

Mr. HASKELL. The Senator is correct.

Mr. MATSUNAGA. It has nothing to do with the investment tax credit at this point?

Mr. HASKELL. It has nothing whatsoever to do with the investment tax credit. The Senator is correct.

Mr. MATSUNAGA. It does have a ceiling of $100,000 for each employee?

Mr. HASKELL. For each employer.

Mr. MATSUNAGA. For each employer rather.

Mr. HASKELL. The Senator is correct.

Mr. MATSUNAGA. I am wondering why we should put that ceiling of $100,000 on. I realize that at one time as a cosponsor of the amendment the Senator is now offering that it was to keep the bill within the initially projected budget.

However, inasmuch as the $50 rebate has been withdrawn, which would have accounted for about $10.6 billion or $10.7 billion, and in view of the fact that the bill's original intent was to not only stimulate the economy but to create jobs, and that about the only jobs-creating provision of the committee bill, as reported from the Committee on Finance and as reported out to the House and passed by the House, is this section which pertains to job credits, why could we not lift the ceiling which would, perhaps, mean an additional $600 million as compared to the $10.7 billion which we save by withdrawing the $50 rebate? Why can we not go ahead and lift that ceiling?

Mr. HASKELL. I think that is an excellent question. I would merely point out to the Senator that the amendment I introduced has a dual purpose. The first purpose, of course, is job creation. We all know we have passed, and I believe it is in conference, the public service jobs bill, and this is the private sector counterpart. That is purpose No. 1.

Purpose No. 2, in my mind, is to try to redress a little of the balance between big business and small business as they are treated under our tax code. There are multiple specific provisions that will help the very large corporations of the Nation. There are very few that help the small ones. So the second purpose is to try to redress that balance.

It would seem to this Senator, at least, if we give this jobs credit to everybody we are not redressing the imbalance that now exists, so that would be my answer to the Senator.

Mr. MATSUNAGA. Of course, we do have a provision in the bill as reported from the Committee on Finance that big business must make a choice between ITC and ETC, the job tax credit, big business cannot have both, and because of that safeguard in the bill as reported from the committee, I would think that, assuming now Sears & Roebuck—Sears & Roebuck has been mentioned quite frequently on the floor in debate on this measure—would like to hire 100 additional employees because of the job tax credit. But under the limitation imposed by the Senator's amendment Sears & Roebuck would be permitted to hire only 72 employees; is that not correct?

Mr. HASKELL. I believe the Senator is correct. I think probably 50 is nearer the mark.

Mr. MATSUNAGA. That is right, because the Senator has increased the maximum, so it would be only 50.

Yet Sears is more than willing to hire the additional 50. Why should we not permit Sears to hire because such hiring would serve the very purpose of the entire bill before us?

Mr. HASKELL. I think, Senator, it is a balancing of interests. Of course, we both recognize that the smaller business has to make the election, too. They cannot have both investment credit and jobs credit.

Mr. MATSUNAGA. That is correct.

Mr. HASKELL. Both of them make the election, so I suppose it is a balancing of interests, of how much money do you wish to give to what particular type of business enterprise to create more jobs.

So I suppose that when I say that I prefer a cap of $100,000 and if someone says there should not be any cap, the question is whether taking off the cap is worth the $600,000 we are giving to the largest corporate enterprises in the Nation. That is a judgmental matter, and I happen to come down on the negative side of it.

Mr. MATSUNAGA. The fact is for every 1 percent of unemployment which we reduce we will have increased our Federal revenues according to the testimony of experts by $16 billion. So an expenditure, if we may call it that, of $600 million would not be an expenditure but an investment, as I see it. So at the appropriate time, although I am a cosponsor of the Senator's amendment, I will offer an amendment to remove the $100,000 cap.

Mr. HASKELL. I understand.

Mr. MATSUNAGA. I do hope the Senator from Colorado will see fit to accept the amendment at the appropriate time.

Mr. HASKELL. The Senator discussed with me earlier his inclination to introduce such an amendment, and I understand the Senator's position. I am unable to accept it. I shall have to ask for a vote. I think maybe now, to expedite matters, might be a good time to offer such an amendment if the Senator wishes.

Mr. MATSUNAGA addressed the Chair.

Mr. HASKELL. Wait a minute.

A parliamentary inquiry.

The PRESIDING OFFICER. The amendment of the Senator from Colorado is in the second degree and amendment is not in order to it.

Mr. HASKELL. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HASKELL. Assuming my amendment is adopted, would the Senator from Hawaii then be able to offer his amendment to strike the cap?

The PRESIDING OFFICER. No, he would not. An amendment once agreed to is not subject to further amendment.

Mr. MATSUNAGA. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MATSUNAGA. Were I to offer a substitute amendment at this point, would that be in order?

The PRESIDING OFFICER. No amendment either in the nature of a substitute amendment or a perfecting amendment to the Haskell amendment is in order. It would be in the third degree.

Mr. HASKELL. Is or is not?

The PRESIDING OFFICER. Is not.

Mr. HASKELL. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. HASKELL. Assuming my amendment is adopted, could the Senator from Hawaii offer an amendment which states

notwithstanding anything in the Haskell amendment the following shall happen?

The PRESIDING OFFICER. There is no requirement for consistency of amendments in the Senate.

Mr. HASKELL. So I understand the Chair to say that this route will be open to the Senator from Hawaii.

The PRESIDING OFFICER. At the proper time it will be open.

Mr. HASKELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HASKELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HASKELL. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is not a sufficient second.

Mr. HASKELL. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HASKELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HASKELL. Mr. President, I ask unanimous consent that the Senator from Hawaii be added as a cosponsor to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HASKELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HASKELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HASKELL. I ask unanimous consent that John Cevette, of my staff, be accorded the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HASKELL. Mr. President, I suggest the absence of a quorum.

Mr. CURTIS. Mr. President, will the Senator withhold that?

Mr. HASKELL. Yes.

Mr. CURTIS. Mr. President, I rise for the purpose of propounding some inquiries concerning the pending amendment.

The PRESIDING OFFICER. The Senator will state his inquiries.

Mr. CURTIS. Is it true that the amendment as now stated by the distinguished Senator from Colorado amends the table of contents?

The PRESIDING OFFICER. The Senator is correct.

Mr. CURTIS. Is it also true that his amendment would lift certain pages out of the bill further back in the bill and insert those pages into the table of contents?

The PRESIDING OFFICER. The amendment would not affect any pages further back in the bill, but it would add——

Mr. HASKELL. Mr. President, I wonder if the Senator would yield, since we now have enough Senators present for seconds on the vote.

Mr. CURTIS. I would be happy to, but I did not hear the reply.

The PRESIDING OFFICER. Although it would not add additional pages at the end of the bill, it would add language in the bill into the table of contents.

Mr. CURTIS. Language that now appears further on in the bill?

The PRESIDING OFFICER. The Senator is correct.

Mr. CURTIS. Plus some additional language offered by the distinguished Senator?

The PRESIDING OFFICER. The Senator is correct.

Mr. HASKELL. Will the Senator allow me to ask for the yeas and nays? I think we have a sufficient second. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. CURTIS. Now, Mr. President, a further parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CURTIS. Is this amendment divisible?

The PRESIDING OFFICER. It is divisible.

Mr. CURTIS. In what way?

The PRESIDNG OFFCER. The first modification could be divided from the second modification, and the second modification could be further divided.

Mr. CURTIS. Mr. President, at what point may a timely request for division of the question be made?

The PRESIDING OFFICER. Will the Senator please repeat this inquiry?

Mr. CURTIS. At what point in the procedure may a timely request for a division of the question be made?

The PRESIDING OFFICER. That request can be made at any time prior to action on the amendment.

Mr. CURTIS. At any time before the vote?

The PRESIDING OFFICER. The Senator is correct.

Mr. CURTIS. I thank the distinguished Senator now occupying the Chair (Mr. ZORINSKY).

Mr. President, it matters not to me how this is presented. As I understand it, the fact that the distinguished Senator from Colorado has decided to proceed in this matter will not prejudice any other amendment or any of the rights of any Senator to offer an amendment. From that standpoint, I certainly have no objection to it. But I would point out that it might be a little better way to legislate if whatever amendment he wishes to have the Senate consider, that we could understand him a little bit better if it appeared in the logical place in the consideration of the bill.

Mr. HASKELL. Mr. President, the amendment is really extremely simple. It increases the job credit availability to $2,100 from $1,050, and it puts on a cap of $100,000, so that no one employer can get a credit for this purpose in more than that amount.

The additional fiscal cost is half a billion dollars.

Mr. President, I think we have probably talked about the amendment long enough, and I would hope that we could now vote.

Mr. CURTIS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CURTIS. What is the pending business?

The PRESIDING OFFICER. The pending question is on agreeing to the amendment (No. 198) of the Senator from Colorado (Mr. HASKELL), as modified.

Mr. CURTIS. Mr. President, I ask for a division of the amendment.

The PRESIDING OFFICER. The amendment will be divided. The first vote will occur on the first modification.

Mr. HASKELL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HASKELL. Would the Chair inform the Senate what the substantive issue in the first modification is?

The PRESIDING OFFCER. The clerk will state the first modification.

The legislative clerk read as follows:

Modify Amdt. No. 198 as follows: strike lines 1 thru 9, and at the end of sec. 302 in the table of contents after the word "credits" insert "and an increase in the jobs tax credit".

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HASKELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HASKELL. Mr. President, I would like to ask the Senator from Nebraska a question, if I might. It is my understanding, as I have been told by staff, that the Senator from Nebraska has no objection to the first part of the amendment, but he would want to vote on the second part. Am I correct there?

Mr. CURTIS. That is correct.

Mr. HASKELL. Then I ask unanimous consent, Mr. President, that the first modification be adopted by unanimous consent.

Mr. JAVITS. Mr. President, reserving the right to object, I do not quite understand that. What is this first modification to be adopted by unanimous consent?

Mr. HASKELL. Will the Chair inform the Senate what the first modification is?

The PRESIDING OFFICER. It would add the words "and an increase in the jobs tax credit" to the Table of Contents.

Mr JAVITS. Mr. President, I object.

The PRESIDING OFFICER. At the end of section 302.

Mr. JAVITS. Mr. President, I object.

Mr. HASKELL. Then, Mr. President, could we proceed to a rollcall vote? We have the yeas and nays. Does that apply to both votes?

The PRESIDING OFFICER. The yeas and nays applies to both votes.

Mr. HASKELL. Then I would suggest we proceed with the rollcall vote seriatim.

Mr JAVITS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. JOHNSTON). Without objection, it is so ordered.

Mr. LONG. Mr. President, it is my understanding that the Senators are willing to make some accommodations in order to bring about certain votes that will be meaningful. In the first instance, it serves no purpose to have a division between the title and the amendment, but a division is desired between the part of the amendment that provides an additional tax credit and the part of it which puts a cap or a lid of $100,000 on the extent to which any one business can use the tax credit. That being the case, Mr. President, I ask unanimous consent that the request for a division of the title from the rest of the amendment be withdrawn and that there be a division between the part of the bill that provides the additional tax credit and the part that provides the $100,000 cap.

The PRESIDING OFFICER. Is there objection?

Mr. HASKELL. Mr. President, I think that that is highly satisfactory, that we would be voting first on the additional tax credit and then the second vote would be on the so-called cap. With that understanding, it is satisfactory to me.

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JAVITS. Unanimous consent is required in order to consolidate one vote on two sections of an amendment which would otherwise be divided into three. We would then be voting first upon the first two divisible parts together, is that correct?

The PRESIDING OFFICER. If this unanimous consent is granted, there will be three votes instead of two.

Mr. LONG. What I am asking is that there just be two votes.

Mr. JAVITS. That is why I asked the question.

Mr. LONG. My request was that there be just two votes: one on all that part of the amendment down to the part that fixes the $100,000 limitation on the extent to which any one business can claim the credit; the second vote on the $100,000 credit limitation.

The PRESIDING OFFICER. As of now, there would be a separate division on the first piece, but the unanimous consent has to consolidate the first piece with all of that part of the bill down to the $100,000 cap.

Mr. JAVITS. Exactly.

The PRESIDING OFFICER. Under the unanimous-consent request, there would be two votes on two different things, the first part of that being down to $100,000.

Mr. LONG. I am asking that there be one vote on everything in the amendment that goes both before and after the cap or the limitation of $100,000, and that there be a second vote on the limitation of the $100,000, the part pertaining to that.

The PRESIDING OFFICER. If it is clearly understood, is there objection?

Mr. DOLE. Reserving the right to object.

What is the status, then, of other amendments to the employment tax credit? Some of us would like to target this to those who have been unemployed for 26 weeks or more. About 1.3 million people have been unemployed for that length of time. Others, particularly in the Northeast, are concerned about the 103-percent base. They think it ought to be 100 percent, so it would be more effective in areas of high unemployment. Would these amendments still be in order or would they be forcelosed if we adopt the Senator's unanimous-consent request?

Mr. LONG. They can be added afterward. While it is true that, technically, his amendment would not be subject to amendment, the Senator from Kansas has been around here long enough to know how to have a vote on his amendment of the nature that he is requesting. I am sure he does. If he does not, I shall be glad to show him. I might need the Parliamentarian to help me, but I know it can be done, I assure the Senator.

Mr. DOLE. Further reserving the right to object, the Senator from Kansas was talking about two amendments. Will the Senator show me how to offer two? Will he instruct me on how to offer two as well as one?

Mr. LONG. If the Parliamentarian will just stick around, I shall show the Senator how he can do all of that.

The PRESIDING OFFICER. Is there objection?

Mr. JAVITS. Mr. President, reserving the right to object, and I shall not object to this particular unanimous-consent request, but I am a little appalled at what we are starting to do here.

This is a substantive amendment of considerable consequence. A Member on this side of the aisle feels that he wishes to deal with the issue in substance. I would not wish, therefore, by consenting to the request, to which I have no objection, to assume that this amendment will not be very thoroughly debated or that any motions to it will be waived. I only rise to alert my colleagues: This is a very substantive thing we are doing.

Sure, we can walk up the hill and down again, as Senator LONG says, but that is hardly befitting the Senate of the United States. Senator HASKELL is making a very serious proposal, which costs an awful lot of money and has no real conditions in terms of long-term unemployed. We should debate it and debate it thoroughly. I think that to just kind of slough this over and say to Senator DOLE, come along later—I understand Senator LONG's feeling about the matter. He wants this and it is OK as far as he is concerned.

As to my other colleagues, they had better know exactly what is in this, and we had better not just treat it any old way.

Mr. LONG. Mr. President, I am not suggesting to anyone that he should vote lightly on the amendment. It is, of course, a completely worthy proposition from the point of view of the sponsor.

While there may be some effort for one Senator to offer his amendment before others can get in to offer theirs, I am sure everybody realizes if the Senator is anxious to offer his amendment and would like to have a vote on it, he has to offer it when he has the chance. In this case, the Senator offered his amendment to the first committee amendment.

Now, it really does not make a lot of difference the order in which amendments are offered. The question is, what does the Senate want to do. All of these suggestions Senators want to offer can all be accommodated.

All I have undertaken to say is that the amendment offered by the Senator from Colorado, is not subject to amendment at this time, because it is in the second degree and it is offered to the first committee amendment. So there is no way one can get in ahead of him to offer some other amendment.

But at the same time, I think we all understand that however the vote goes on this amendment, it involves a number of facets, and that anything in it is subject to being changed by motion of the Senate or by amendment or parliamentary device available to every Senator in this body. So that no one is being prejudiced, because no matter how the vote goes, on the first part of the amendment or the second part of the amendment, in the end the Senate is going to do what the Senate in its best collective wisdom thinks should be done. Every Senator who has something to offer which meets with the approval of 51 percent of this body will have his turn and will prevail.

Several Senators addressed the Chair.

The PRESIDING OFFICER. Is there objection?

Mr. CURTIS. Mr. President, reserving the right to object, may I inquire, if we agree to this unanimous-consent request, will there then be an opportunity to debate the remaining parts of the amendment of the distinguished Senator from Colorado?

The PRESIDING OFFICER. Is the Senator referring to between the first and second vote?

Mr. CURTIS. All I want to know is this, if we agree to dispose of this amendment which merely amends the table of contents, then will there be an opportunity to debate the question of going from 25 percent to 50 percent credit, and after that is disposed of, if that is the first one, will there be an opportunity to vote for or against the cap on the total amount of the credit?

The PRESIDING OFFICER. Each division is debatable.

Mr. CURTIS. Each division is debatable?

The PRESIDING OFFICER. That is correct.

Mr. CURTIS. So when we dispose of the amendment relating to the table of contents, Mr. President, I believe that we would be much clearer if, instead of agreeing to the unanimous-consent request, we let a vote occur now by voice vote on the first part, the amendment to the table of contents.

Mr. HASKELL. Mr. President, I have to object because suppose the folks that were opposed to voting on the table of contents had loud voices, we might not amend the table of contents.

Then I am a little bit in the dark about having amended the table of contents whether we could proceed to the substantive issues.

The PRESIDING OFFICER .The Chair would like to clarify one thing.

The entire amendment is to the table of contents. There would be two votes on this amendment if the unanimous consent were agreed to.

Mr. CURTIS. What would the two votes be?

The PRESIDING OFFICER. The first vote would be on all of the amendment other than the $100,000 cap. The second vote, which would also be debatable, would be on the question of the amendment with the $100,000 cap.

Mr. JAVITS addressed the Chair.

Mr. McCLURE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McCLURE. Mr. President, do I understand that if the unanimous-consent agreement is agreed to and there is that division as stated by the Chair, that each of the divisions would be debatable, would each be subject to perfecting amendments?

The PRESIDING OFFICER. No. Each amendment is in the second degree and would not, therefore, be subject to further amendment.

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JAVITS. Mr. President, would not the original House text to which this is an amendment be subject to a perfecting amendment?

The PRESIDING OFFICER. The original text is amendable in two degrees, and such an amendment would take precedence over the pending amendment since amendments to the part to be stricken take precedence over amendments to the part to be inserted.

Mr. JAVITS. Mr. President, a further parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JAVITS. May I ask the Senator a question, in order to get this inquiry answered?

The Senator tore a lot of pages out of the bill and——

Mr. HASKELL. I did not hear the Senator.

Mr. JAVITS. I say, the Senator took a lot of pages out of the bill and put them in at the desk.

Mr. HASKELL. The Senator is correct.

Mr. JAVITS. None of us have really had a chance to read it, so I take the Senator's word completely for what he would say in answer to this question.

Is it correct that the three things which are different in the Senator's amendment from what is the text of the bill as we have all read it are, one, the title, which he is changing somewhat; two, the substitution of 50 percent for 25 percent?

Mr. HASKELL. That is correct.

Mr. JAVITS. And three, the $100,000 cap; other than that there is no substantive change?

Mr. HASKELL. The Senator is correct.

Mr. JAVITS. I thank my colleague.

Mr. HASKELL. May I address a parliamentary inquiry to the Chair?

The PRESIDING OFFICER. The Senator will state it.

Mr. HASKELL. We may be able to dispose of this unanimous-consent request.

Mr. President, would not a proper and parliamentarily proper division of this amendment be everything except the cap, and then the cap?

The PRESIDING OFFICER. That is the Chair's understanding of the unanimous-consent as made.

Mr. HASKELL. Mr. President, my inquiry is, would not this be a proper division absent the unanimous-consent request, so we can stop arguing about the unanimous-consent request?

The PRESIDING OFFICER. Absent the unanimous-consent request, the Chair is of the opinion that this is subject to three divisions, not two.

Mr. HASKELL. I suggest to my friend from New York, if we cannot agree on the unanimous-consent request, all we need do is have three votes instead of two.

Mr. JAVITS. My suggestion is we do without the unanimous consent. I think Senator LONG is right, that we have to take a minute to explain it.

The point is this—I would like to make my point clear—if we are not going to have any substance, why change the title; and if we are going to have substance, we should change the title, as long as the substantive items are in both debates, one on percentage and the other on the amount of the cap.

That seems to be an intelligent way in which to debate them both.

Mr. HASKELL. I could not agree more.

Mr. JAVITS. I am just explaining it for those who may have some doubts on something hidden in it. I do not think there is anything.

Mr. HASKELL. I do not see anything hidden either. I agree 100 percent.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Mr. President, reserving the right to object, the Senator from Kansas, of course, as the Senator from New York pointed out, is very serious about two amendments. Is the Haskell amendment now subject to a perfecting amendment?

The PRESIDING OFFICER. No. The Haskell amendment is in the second degree and is not subject to further amendment.

Mr. HASKELL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HASKELL. Assuming the Haskell amendment is adopted and assuming the Senator from Kansas or any other Senator wanted to change something that was adopted, would it not be possible to introduce a separate amendment that says, "Notwithstanding anything within the Haskell amendment, the following shall take place"?

The PRESIDING OFFICER. The Senator is correct. There is no rule requiring consistency; that could be done.

Mr. DOLE. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOLE. Will the Senator from Colorado object to the Senator from Kansas offering an amendment to his amendment by unanimous consent?

Mr. HASKELL. Yes, the Senator from Colorado would at this point, I say to the Senator from Kansas, because he would like to get a vote on this.

Then if this fails, it fails. If it is successful, then everybody can go ahead and put in such amendments as they want to in a perfectly orderly fashion. But, having gotten this far, I would like to have a vote, and then at such time as anybody, including myself, wants to change what has been adopted, we could put in another amendment. I prefer to proceed on that basis.

Mr. DOLE. The Senator from Kansas will not object on the basis that he will be protected in his rights to offer an amendment; and, hopefully, the Senator from Colorado can support at least one of the two amendments.

Mr. HASKELL. I will not object to them. Whether I can support them or not is another question.

Mr. President, can we proceed now?

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. CURTIS. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the first part of the Haskell amendment, which is all of the amendment other than the $100,000 cap.

Mr. JAVITS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BURDICK). Without objection, it is so ordered.

UP AMENDMENT NO. 157

Mr. DOLE. I send to the desk a perfecting amendment to the language of the bill, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. Dole) proposes an unprinted amendment numbered 157:

On page 2 of section 302, between the words "new" and "jobs" add the following:

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment will be printed in full in the RECORD.

The amendment is as follows:

H.R. 3477

On page 2 in Sec. 302 between the words "new" and "jobs" add the following:

SEC. 302. ALTERNATIVE ECONOMIC STIMULUS CREDITS.

(a) NEW JOBS CREDIT.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting after section 44A the following new section:

"SEC. 44B. CREDIT FOR EMPLOYMENT OF CERTAIN NEW EMPLOYEES.

"(a) GENERAL RULE.—At the election of the taxpayer, there shall be allowed as a credit against the tax imposed by this chapter the amount determined under subpart D of this part.

"(b) ELECTION.—The election referred to in subsection (a) shall be made by the employer (in the manner provided in regulations prescribed by the Secretary) on or before the due date (including any extensions of time) for filing its return of tax under this chapter for the last taxable year beginning during 1977. Once made, the election shall be effective for the year made and all subsequent taxable years beginning in 1977 or 1978. The Secretary shall prescribe regulations with respect to the continuation of the election in situations in which corporations and other persons are organized, reorganized, liquidated, or otherwise restructured. An election may not be made under this section by a corporation which is a member of a controlled group of corporations (within the meaning of section 52(a)) unless the election is made by all members of that controlled group. The election may not be made by a trade or business under common control (within the meaning of section 52 (b)) unless all of the trades or businesses under common control have made the election.

"(c) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this section and subpart D."

(b) RULES FOR COMPUTING CREDIT.—Part IV of subchapter A of chapter 1 (relating to credits against tax) is amended by adding at the end thereof the following new subpart:

"Subpart D—Rules for Computing Credit for Employment of Certain New Employees

"Sec. 51. Amount of credit.
"Sec. 52. Special rules.
"Sec. 53. Limitation based on amount of tax.

"SEC. 51. AMOUNT OF CREDIT.

"(a) DETERMINATION OF AMOUNT.—The amount of the credit allowable by section 44B shall be—

"(1) for a taxable year beginning in 1977, an amount equal to 50 percent of the excess of the aggregate unemployment insurance wages paid to eligible employees during 1977 over the aggregate unemployment insurance wages paid to such employees during 1976, and

"(2) for a taxable year beginning in 1978, an amount equal to 50 percent of the excess of the aggregate unemployment insurance wages paid to eligible employees during 1978 over the aggregate unemployment insurance wages paid to such employees during 1977.

"(b) TOTAL WAGES MUST INCREASE.—The amount of the credit allowable by section 44B for any taxable year shall not exceed the amount which would be determined for such year under subsection (a) if the aggregate amounts taken into account as unemployment insurance wages paid to eligible employees were determined without any dollar limitation.

"(c) MINIMUM PRECEDING YEAR WAGES.—For purposes of subsection (a), if the amount of the aggregate unemployment insurance wages paid to eligible employees during 1976 or 1977 is less than 50 percent of the amount of such wages paid to such employees during 1977 or 1978, respectively, the amount of such wages paid to such employees during the preceding year shall be increased to an amount equal to 50 percent of the amount of such wages paid to such employees during the year for which the determination is made.

"(d) UNEMPLOYMENT INSURANCE WAGES DEFINED.—For purposes of this subpart—

"(1) FUTA WAGES.—Except as otherwise provided in this subpart, the term 'unemployment insurance wages' has the meaning given to the term 'wages' by section 3306 (b), except that, in the case of amounts paid during 1978, '$4,200' shall be substituted for '$6,000' each place it appears in section 3306(b).

"(2) AGRICULTURAL LABOR.—If the services performed by any employee for an employer during more than one-half of any pay period (within the meaning of section 3306(d)) taken into account with respect to any calendar year constitute agricultural labor (within the meaning of section 3306(k)), the term 'unemployment insurance wages' means, with respect to the remuneration paid by the employer to such employee for such year, an amount equal to so much of such remuneration as constitutes 'wages' within the meaning of section 3121(a), except that the contribution and benefit base for each calendar year shall be deemed to be $4,200.

"(3) RAILWAY LABOR.—If more than one-half of the remuneration paid by an employer to an employee during the calendar year is remuneration for service described in section 3306(c)(9), the term 'unemployment insurance wages' means, with respect to such employee for such year, an amount equal to ⅞ of such much of the remuneration paid to such employee during such year as is subject to contributions under section 8(a) of the Railroad Unemployment Insurance Act (45 U.S.C. 358(a)).

"(4) ELIGIBLE EMPLOYEE.—The term "eligible employee" means an individual who immediately prior to his employment by the taxpayer, was unemployed for at least 26 consecutive weeks.

"(e) RULES FOR APPLICATION OF SECTION.—For purposes of this subpart—

"(1) REMUNERATION MUST BE FOR TRADE OR BUSINESS EMPLOYMENT WITHIN UNITED STATES.—Remuneration paid by an employer to an employee during any calendar year shall be taken into account only if more than one-half of the remuneration so paid is for services performed in the United States in a trade or business of the employer.

"(2) SPECIAL RULE FOR CERTAIN DETERMINATIONS.—Any determination as to whether paragraph (1) of this subsection, or paragraph (2) or (3) of subsection (d), applies with respect to any employee for any calendar year shall be made without regard to subsections (a) and (b) of section 52.

"SEC. 52. SPECIAL RULES.

"(a) CONTROLLED GROUP OF CORPORATIONS.—For purposes of this subpart, all employees of all corporations which are members of the same controlled group of corporations shall be treated as employed by a single employer. In any such case, the credit (if any) allowable by section 44B to each such member shall be its proportionate contribution to the increase in unemployment insurance wages giving rise to such credit. For purposes of this subsection, the term 'controlled group of corporations' has the meaning given to such term by section 1563(a), except that—

"(1) 'more than 50 percent' shall be substituted for 'at least 80 percent' each place it appears in section 1563(a)(1), and

"(2) the determination shall be made without regard to subsections (a)(4) and (e)(3)(C) of section 1563.

"(b) EMPLOYEES OF PARTNERSHIP, PROPRIETORSHIPS, ETC., WHICH ARE UNDER COMMON CONTROL.—For purposes of this subpart, under regulations prescribed by the Secretary—

"(1) all employees of trades or businesses (whether or not incorporated) which are under common control shall be treated as employed by a single employer, and

"(2) the credit (if any) allowable by section 44B with respect to each trade or business shall be its proportionate contribution to the increase in unemployment insurance wages giving rise to such credit.

The regulations prescribed under this subsection shall be based on principles similar to the principles which apply in the case of subsection (a).

"(c) ADJUSTMENTS FOR CERTAIN ACQUISITIONS, ETC.—Under regulations prescribed by the Secretary—

"(1) ACQUISITIONS.—If, after December 31, 1975, an employer acquires the major portion of a trade or business of another person (hereinafter in this paragraph referred to as the 'predecessor') or the major portion of a separate unit of a trade or business of a predecessor, then, for purposes of applying this subpart for any calendar year ending after such acquisition, the amount of unemployment insurance wages deemed paid by the employer during periods before such acquisition shall be increased by so much of such wages paid by the predecessor with respect to the acquired trade or business as is attributable to the portion of such trade or business acquired by the employer.

"(2) DISPOSITIONS.—If, after December 31, 1975—

"(A) an employer disposes of the major portion of any trade or business of the employer or the major portion of a separate unit of a trade or business of the employer in a transaction to which paragraph (1) applies, and

"(B) the employer furnishes the acquiring person such information as is necessary for the application of paragraph (1),

then, for purposes of applying this subpart for any calendar year ending after such disposition, the amount of unemployment insurance wages deemed paid by the employer during periods before such disposition shall be decreased by so much of such wages as is attributable to such trade or business or separate unit.

"(d) TAX-EXEMPT ORGANIZATIONS.—No credit shall be allowed under section 44B to any organization (other than a cooperative described in section 521) which is exempt from income tax under this chapter.

"(e) CHANGE IN STATUS FROM SELF-EMPLOYED TO EMPLOYEE.—If—

"(1) during 1976 or 1977 an individual has net earnings from self-employment (as defined in section 1402(a)) which are attributable to a trade or business, and

"(2) for any portion of the succeeding calendar year such individual is an employee of such trade or business,

then, for purposes of determining the credit allowable for a taxable year beginning in such succeeding calendar year, the employer's aggregate unemployment insurance wages for 1976 or 1977, as the case may be, shall be increased by an amount equal to so much of the net earnings referred to in paragraph (1) as does not exceed $4,200.

"(f) SUBCHAPTER S CORPORATIONS.—In the case of an electing small business corporation (as defined in section 1371)—

"(1) the amount of the credit determined under this subpart for any taxable year shall be apportioned pro rata among the per-

sons who are shareholders of such corporation on the last day of such taxable year, and

"(2) any person to whom an amount is apportioned under paragraph (1) shall be allowed, subject to section 53, a credit under section 44B for such amount.

"(g) ESTATES AND TRUSTS.—In the case of an estate or trust—

"(1) the amount of the credit determined under this subpart for any taxable year shall be apportioned between the estate or trust and the beneficiaries of the basis of the income of the estate or trust allocable to each, and

"(2) any beneficiary to whom any amount has been apportioned under paragraph (1) shall be allowed, subject to section 53, a credit under section 44B for such amount.

"(h) LIMITATIONS WITH RESPECT TO CERTAIN PERSONS.—Under regulations prescribed by the Secretary, in the case of—

"(1) an organization to which section 593 (relating to reserves for losses on loans) applies,

"(2) a regulated investment company or a real estate investment trust subject to taxation under subchapter M (section 851 and following), and

"(3) a cooperative organization described in section 1381(a),

rules similar to the rules provided in section 46(e) shall apply in determining the amount of the credit under this subpart.

"(i) CERTAIN SHORT TAXABLE YEARS.—If the employer has more than one taxable year beginning in 1977 or 1978, the credit under this subpart shall be determined for the employer's last taxable year beginning in 1977 or 1978, as the case may be.

"SEC. 53. LIMITATION BASED ON AMOUNT OF TAX.

"(a) GENERAL RULE.—Notwithstanding section 51, the amount of the credit allowed by section 44B for the taxable year shall not exceed the amount of the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under—

"(1) section 33 (relating to foreign tax credit),

"(2) section 37 (relating to credit for the elderly),

"(3) section 38 (relating to investment in certain depreciable property),

"(4) section 40 (relating to expenses of work incentive programs),

"(5) section 41 (relating to contributions to candidates for public office),

"(6) section 42 (relating to general tax credit), and

"(7) section 44A (relating to expenses for household and dependent care services necessary for gainful employment).

For purposes of this subsection, any tax imposed for the taxable year by section 56 (relating to minimum tax for tax preferences), section 72(m)(5)(B) (relating to 10 percent tax on premature distributions to owner-employees), section 408(f) (relating to additional tax on income from section 408(f) (relating to additional tax on income from certain retirement accounts), section 402(e) (relating to tax on lump-sum distributions), section 531 (relating to accumulated earnings tax), section 541 (relating to personal holding company tax), or section 1378 (relating to tax on certain capital gains of subchapter S corporations), and any additional tax imposed for the taxable year by section 1351(d)(1) (relating to recoveries of foreign expropriation losses), shall not be considered tax imposed by this chapter for such year.

"(b) SPECIAL RULE FOR PASS-THROUGH OF CREDIT.—In the case of a partner in a partnership, a beneficiary of an estate or trust, and a shareholder in a subchapter S corporation, the limitation provided by subsection (a) for the taxable year shall not exceed a limitation separately computed with respect to such person's interest in such entity by taking an amount which bears the same relationship to such limitation as—

"(1) that portion of the person's taxable income which is allocable or apportionable to the person's interest in such entity, bears to—

"(2) the person's taxable income for such year reduced by his zero bracket amount (determined under section 63(d)), if any.

"(c) CARRYBACK AND CARRYOVER OF UNUSED CREDIT.—

"(1) ALLOWANCE OF CREDIT.—If the amount of the credit determined under section 51 for any taxable year exceeds the limitation provided by subsection (a) for such taxable year (hereinafter in this subsection referred to as the 'unused credit year'), such excess shall be—

"(A) a new employee credit carryback to each of the 3 taxable years preceding the unused credit year, and

"(B) a new employee credit carryover to each of the 7 taxable years following the unused credit year,

and shall be added to the amount allowable as a credit by section 44B for such years. If any portion of such excess is a carryback to a taxable year beginning before January 1, 1977, section 44B shall be deemed to have been in effect for such taxable year for purposes of allowing such carryback as a credit under such section. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 10 taxable years to which (by reason of subparagraphs (A) and (B)) such credit may be carried, and then to each of the other 9 taxable years to the extent that, because of the limitation contained in paragraph (2), such unused credit may not be added for a prior taxable year to which such unused credit may be carried.

"(2) LIMITATION.—The amount of the unused credit which may be added under paragraph (1) for any preceding or succeeding taxable year shall not exceed the amount by which the limitation provided by subection (a) for such taxable year exceeds the sum of—

"(A) the credit allowable under section 44B for such taxable year, and

"(B) the amounts which, by reason of this subsection, are added to the amount allowable for such taxable year and which are attributable to taxable years preceding the unused credit year."

(c) DEDUCTION FOR WAGES PAID REDUCED BY AMOUNT OF CREDIT.—

(1) IN GENERAL.—Part IX of subchapter B of chapter 1 (relating to items not deductible) is amended by adding at the end thereof the following new section:

"SEC. 280C. PORTION OF WAGES FOR WHICH CREDIT IS CLAIMED UNDER SECTION 44B

"No deduction shall be allowed for that portion of the wages or salaries paid or incurred for the taxable year which is equal to the amount of the credit allowable for the taxable year under section 44B (relating to credit for employment of certain new employees) determined without regard to the provisions of section 53 (relating to limitation based on amount of tax). In the case of a corporation which is a member of a controlled group of corporations (within the meaning of section 52(a)) or a trade or business which is treated as being under common control with other trades or businesses (within the meaning of section 52(b)), this section shall be applied under rules prescribed by the Secretary similar to the rules applicable under subsections (a) and (b) of section 52.".

(2) CLERICAL AMENDMENT.—The table of sections for such part is amended by adding at the end thereof the following new item:

"Sec. 280C. Portion of wages for which credit is claimed under section 44B.".

(d) ALTERNATIVE INCREASE IN INVESTMENT CREDIT.—Paragraph (2) of section 46(a) (relating to amount of credit for current taxable year) is amended by adding at the end thereof the following new subparagraph:

"(E) INCREASE IN PERCENTAGES FOR TAXPAYERS NOT CLAIMING SECTION 44B CREDIT.—

"(i) In the case of a taxpayer for whom an election to take the credit allowed by section 44B (relating to credit for employment of certain new employees) is not in effect, subparagraph (A) shall be applied by substituting '12 percent' for '10 percent', and clause (i) of subparagraph (B) shall be applied by substituting '13 percent for '11 percent'.

"(ii) The provisions of clause (i) shall apply only to—

"(I) property to which subsection (d) does not apply, the construction, reconstruction, or erection of which is completed by the taxpayer after December 31, 1976, but only to the extent of the basis thereof attributable to construction, reconstruction, or erection after such date and before January 1, 1981,

"(II) property to which subsection (d) does not apply, acquired by the taxpayer after December 31, 1976, and before January 1, 1981, and place in service by the taxpayer before January 1, 1981, and

"(III) property to which subsection (d) applies, but only to the extent of the qualified investment (as determined under subsections (c) and (d)) with respect to qualified progress expenditures made after December 31, 1976, and before January 1, 1981.

"(iii) In the case of a taxpayer with respect to whom an election under section 44B(b) is in effect for 1978, clause (ii) of this subparagraph shall be applied by substituting 'December 31, 1978,' for 'December 31, 1976,' each place it appears therein.".

(d) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) CLERICAL AMENDMENT.—

(A) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting after the item relating to section 44A the following new item:

"Sec. 44B. Credit for employment of certain new employees."

(B) The table of subparts for part IV of subchapter A of chapter 1 is amended by adding at the end thereof the following new item:

"Subpart D. Rules for computing credit for employment of certain new employees."

(2) MINIMUM TAX.—

(A) Section 56(c) (defining regular tax deduction) is amended by striking out "and" at the end of paragraph (7), by striking out the period at the end of paragraph (8) and inserting in lieu thereof ", and", and by adding at the end thereof the following new paragraph:

"(9) section 44B (relating to credit for employment of certain new employees)."

(B) Subparagraph (A) of section 56(e)(1) (relating to tax carryover for timber) is amended—

(i) by striking out "and" at the end of clause (ii),

(ii) by striking out "exceed" at the end of clause (iii) and inserting in lieu thereof "and", and

(iii) by inserting after clause (iii) the following new clause:

"(iv) section 44B (relating to credit for employment of certain new employees), exceed".

(3) CORPORATE REORGANIZATIONS.—

(A) Subsection (c) of section 381 (relating to items of the distributor or transferor corporation) is amended by adding at the end thereof the following new paragraph:

"(26) CREDIT UNDER SECTION 44B FOR EMPLOYMENT OF CERTAIN NEW EMPLOYEES.—The acquiring corporation shall take into account (to the extent proper to carry out the pur-

poses of this section and section 44B, and under such regulations as may be prescribed by the Secretary) the items required to be taken into account for purposes of section 44B in respect of the distributor or transferor corporation."

(B) Section 383 (relating to special limitations on unused investment credits, work incentive program credits, foreign taxes, and capital losses), as in effect for taxable years beginning after June 30, 1978, is amended—

(i) by inserting "to any unused new employee credit of the corporation under section 53(c)," after "section 50A(b),"; and

(ii) by striking out "WORK INCENTIVE PROGRAM CREDITS," in the section heading and inserting in lieu thereof "WORK INCENTIVE PROGRAM CREDITS, NEW EMPLOYEE CREDITS,".

(C) Section 383 (as in effect on the day before the date of the enactment of the Tax Reform Act of 1976) is amended—

(i) by inserting "to any unused new employee credit of the corporation which could otherwise be carried forward under section 53(c)," after "section 50A(b),"; and

(ii) by striking out "WORK INCENTIVE PROGRAM CREDITS," in the section heading and inserting in lieu thereof "WORK INCENTIVE PROGRAM CREDITS, NEW EMPLOYEE CREDITS,".

(D) The table of sections for part V of subchapter C of chapter 1 is amended by striking out "work incentive program credits," in the item relating to section 383 and inserting in lieu thereof "work incentive program credits, new employee credits,".

(4) STATUTES OF LIMITATION AND INTEREST RELATING TO NEW EMPLOYEE CREDIT CARRYBACK.—

(A) ASSESSMENT AND COLLECTION.—Section 6501 (relating to limitations on assessment and collection) is amended by adding at the end thereof the following new subsection:

"(p) NEW EMPLOYEE CREDIT CARRYBACKS.—In the case of a deficiency attributable to the application to the taxpayer of a new employee credit carryback (including deficiencies which may be assessed pursuant to the provisions of section 6213(b)(3)), such deficiency may be assessed at any time before the expiration of the period within which a deficiency for the taxable year of the unused new employee credit which results in such carryback may be assessed, or with respect to any portion of a new employee credit carryback from a taxable year attributable to a net operating loss carryback, an investment credit carryback, a work incentive program credit carryback, or a capital loss carryback from a subsequent taxable year, at any time before the expiration of the period within which a deficiency for such subsequent taxable year may be assessed."

(B) CREDIT OR REFUND.—Section 6511(d) (relating to limitations on credit or refund) is amended by adding at the end thereof the following new paragraph:

"(9) SPECIAL PERIOD OF LIMITATION WITH RESPECT TO NEW EMPLOYEE CREDIT CARRYBACKS.—

"(A) PERIOD OF LIMITATIONS.—If the claim for credit or refund relates to an overpayment attributable to a new employee credit carryback, in lieu of the 3-year period of limitation prescribed in subsection (a), the period shall be that period which ends with the expiration of the 15th day of the 40th month (or 39th month, in the case of a corporation) following the end of the taxable year of the unused new employee credit which results in such carryback (or, with respect to any portion of a new employee credit carryback from a taxable year attributable to a new operating loss carryback, an investment credit carryback, a work incentive program credit carryback, or a capital loss carryback from a subsequent taxable year, the period shall be that period which ends with the expiration of the 15th day of the 40th month, or 39th month, in the case of a corporation, following the end of such taxable year) or the period prescribed in subsection (c) in respect of such taxable year, whichever expires later. In the case of such a claim, the amount of the credit or refund may exceed the portion of the tax paid within the period provided in subsection (b)(2) or (c), whichever is applicable to the extent of the amount of the overpayment attributable to such carryback.

"(B) APPLICABLE RULES.—If the allowance of a credit or refund of an overpayment of tax attributable to a new employee credit carryback is otherwise prevented by the operation of any law or rule of law other than section 7122, relating to compromises, such credit or refund may be allowed or made, if claim therefor is filed within the period provided in subparagraph (A) of this paragraph. In the case of any such claim for credit or refund, the determination by any court, including the Tax Court, in any proceeding in which the decision of the court has become final shall not be conclusive with respect to the new employee credit, and the effect of such credit, to the extent that such credit is affected by a carryback which was not in issue in such proceeding."

(C) INTEREST ON UNDERPAYMENTS.—Section 6601(d) (relating to income tax reduced by carryback or adjustment for certain unused deductions) is amended by adding at the end thereof the following new paragraph:

"(5) NEW EMPLOYEE CREDIT CARRYBACK.—If the credit allowed by section 44B for any taxable year is increased by reason of a new employee credit carryback, such increase shall not affect the computation of interest under this section for the period ending with the last day of the taxable year in which the new employee credit carryback arises, or, with respect to any portion of a new employee credit carryback from a taxable year attributable to a net operating loss carryback, an investment credit carryback, a work incentive program credit carryback, or a capital loss carryback from a subsequent taxable year, such increase shall not affect the computation of interest under this section for the period ending with the last day of such subsequent taxable year."

(D) INTEREST ON OVERPAYMENTS.—Section 6611(f) (relating to refund of income tax caused by carryback or adjustment for certain unused deductions) is amended by adding at the end thereof the following new paragraph:

"(5) NEW EMPLOYEE CREDIT CARRYBACK.—For purposes of subsection (a), if any overpayment of tax imposed by subtitle A results from a new employee credit carryback, such overpayment shall be deemed not to have been made before the close of the taxable year in which such new employee credit carryback arises, or, with respect to any portion of a new employee credit carryback from a taxable year attributable to a net operating loss carryback, an investment credit carryback, a work incentive program credit carryback, or a capital loss carryback from a subsequent taxable year, such overpayment shall be deemed not to have been made before the close of such subsequent taxable year."

(5) TENTATIVE CARRYBACK ADJUSTMENTS.—

(A) APPLICATION FOR ADJUSTMENT.—Section 6411 (relating to quick refunds in respect of tentative carryback adjustments) is amended—

(i) by striking out "or unused work incentive program credit" each place it appears in such section and inserting in lieu thereof "unused work incentive program credit, or unused new employee credit,"

(ii) by inserting after "section 50A(b)," in the first sentence of subsection (a) "by a new employee credit carryback provided in section 53(c).",

(iii) by striking out "or a work incentive program carryback from" in the second sentence of subsection (a) and inserting in lieu thereof ", a work incentive program carryback, or a new employee credit carryback from," and

(iv) by striking out "investment credit carryback)" in the second sentence of subsection (a) and inserting in lieu thereof "investment credit carryback, or, in the case of a new employee credit carryback, to an investment credit carryback or a work incentive program carryback."

(B) TENTATIVE CARRYBACK ADJUSTMENT ASSESSMENT PERIOD.—Section 6501(m) (relating to tentative carryback adjustment assessment period) is amended—

(i) by striking out "or a work incentive program carryback" and inserting in lieu thereof "a work incentive program carryback, or a new employee credit carryback," and

(ii) by striking out "(j), or (o)" each place it appears and inserting in lieu thereof "(j), (o), or (p)."

(6) DESIGNATION OF INCOME TAX PAYMENT.—Section 6096(b) (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44A" and inserting in lieu thereof "44A, and 44B."

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1976, and to credit carrybacks from such years.

Mr. LONG. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LONG. I would like to know how that amendment is fitted in between the words "new" and "jobs." How is that done? That is a new one on me.

Mr. CURTIS. It comes right after "new" and just before "jobs."

Mr. DOLE. It is a perfecting amendment to the language of the bill the committee seeks to strike.

The PRESIDING OFFICER. The amendment is in order.

Mr. DOLE. I thank the distinguished Senator from Louisiana for his instructions.

Mr. President, I think now we can discuss the entire issue of the jobs tax credit, because it is all contained in the perfecting amendment that is now before the Senate. It accommodates the distinguished Senator from Hawaii as far as the cap is concerned; it removes the cap. It accommodates the distinguished Senator from Colorado, because it provides for a 50-percent credit. It accommodates anyone who has been unemployed for 26 weeks or more, because it is now targeted at and accommodates those persons from predominately high unemployment areas. It accommodates small business, because we have reduced the base from 103 to 100 percent. Those are the provisions of the amendment.

It seems to the Senator from Kansas that the real emphasis on the employment tax credit should be on those who have been unemployed for long periods of time. We suggest that 26 weeks is an appropriately long period of time. The facts indicate that about 1.3 million people have been unemployed for that length of time.

This amendment will target the jobs tax credit on those workers who have been unemployed for that long or longer.

This restriction is similar to that contained in S. 731, part of the Republican economic package. Both would offer an employment tax credit for those workers who need the help in finding work the most.

Mr. President, this targeted approach offers help to those workers who need jobs the most. The long term unemployed workers of America deserve special consideration in any economic stimulus program.

FOCUS IS ON PEOPLE, NOT BUSINESSES

While Congress has spent millions on unemployment benefits, truly meaningful programs which are directly tied to long-term jobs have been sorely lacking. I believe that this problem would continue if the Finance Committee version or any other amendment is passed. The House bill focuses credits on businesses most able to increase hiring. The targeted credit focuses on the unemployed themselves, those who need the assistance the most.

A targeted employment tax credit program can provide significant assistance and incentive in securing private employment for individuals not presently or adequately served by public training and employment programs. Employment of persons who face particular difficulty in finding a job and acquiring marketable skills and experience would be encouraged while total employment in the economy is increased. This approach represents a partnership of the Government and the private sector in resolving the difficult unemployment problem faced by the economy.

CREDIT NOT RESTRICTED TO HIGH GROWTH INDUSTRIES

The second major change that this amendment makes in the present bill is that it would lower the employment base from 103 to 100 percent. Many industries throughout the country, especially in the Northeast, expect only small increases in employment for 1977. The Finance Committee bill allows a credit to an employer only if his total wages are more than 3 percent above his total wages for the previous years.

Use of the 100 percent employment base contained in my amendment would not restrict the availability of the credit to those expanding businesses which are currently in a healthy economic condition. With more employers eligible for the credit due to the lower threshold, the benefit of the program will be spread over a larger part of the economy and country. The justification for the 103-percent base is to deny the credit for "normal" growth. By targeting on unemployed workers rather than businesses, this restriction is not needed.

The lower employment base is particularly important to the small businesses in America. Many of these have only a few employees and have not experienced a 3-percent rise in employment in many years. My amendment would allow businesses to have the advantage of the credit even if they can afford to only hire one new employee. Of course, the larger the business, the larger the number of additional employees that can be hired.

MORE HELP FOR HIGH UNEMPLOYMENT AREAS

Payment of an employment tax credit to private employers can be an effective way to bring about easier and more extensive employment—shorter job search and less unemployment—of targeted labor force groups and increased total employment in the economy. Since extended unemployment is most prevalent in areas with high overall unemployment rates, this target would also serve to focus program benefits in high unemployment regions. There are presently approximately 1.3 million people who have been unemployed 26 weeks or longer. Between the second quarter of 1977 and the fourth quarter of 1978, as many as 3 million persons may have experienced unemployment of this duration.

PROGRAM WOULD BE EFFICIENT

The target group, those unemployed at least 26 weeks, is large enough sufficiently well-defined to allow program success. As of December 1976, 1.2 million persons would have been eligible. These people can be identified from the rolls of other Government programs. Establishment of eligibility requirements would not be administratively burdensome.

WINDFALL PROFITS REDUCED

One significant problem with all the nontarget jobs tax credits is the windfall profits it would give to many businesses. Many employers will simply hire the same employees they would have without the incentive provided by the jobs tax credit. Targeting reduces the amount of credits for employment situations that would have occurred in any case with the targeting approach. The new employees have been unemployed at least 26 weeks and are more likely to be hired because of the incentive given.

Even with the lower 100 percent employment base, the windfall gains for certain businesses is less with the targeting mechanism. Many employers will employ an eligible person in addition to, rather than instead of the employee they originally intended to hire. Those persons who are not eligible are those generally most capable of securing employment even without a subsidy benefit. Their job search may be prolonged only slightly because of the preferential treatment of long-term unemployed.

Under any of the proposals considered so far, at least 80 percent of the benefits to businesses are windfall, according to a Congressional Budget Office memorandum. Targeting may reduce the windfall portion by 20 to 30 percent. This is a significant gain in real new employment.

AMOUNT OF CREDIT DOUBLED

This amendment would give a credit equal to 50 percent of the FUTA wages for the hiring of a worker who has been unemployed at least 26 weeks. This is equal to $2,100 per employee, double the credit contained in the Finance Committee version of the jobs tax credit.

INCENTIVE TO HIRE INCREASED

Some experts have expressed doubts whether the $1,050 credit proposed by the Finance Committee is adequate to have a significant impact on unemployment. By focusing on structural unemployment, the incentive to hire a given worker can be doubled.

REVENUE LOSS REDUCED

The targeted jobs tax credit would be less expensive than either the Finance Committee bill or the House jobs tax credit. The Joint Committee on Taxation has estimated the revenue losses at $0.7 billion for fiscal year 1977, $1.9 billion for fiscal year 1978, and $2 billion for fiscal year 1979. This compares with the reduction in budget receipts under the Finance Committee bill of $0.9 billion, $2.4 billion, and $2.4 billion for 1977–79 respectively. Over the 3 fiscal years, my amendment would save an estimated $1.1 billion. This savings is achieved at the same time as the problem of structural unemployment is attacked in a way that I believe will be effective.

DIRECT REDUCTION IN UNEMPLOYMENT BENEFITS

Most eligible persons would be taken directly off the unemployment rolls. Along with the tax credit there would be a balancing reduction in unemployment payments. While any of the jobs tax credits would take some workers off of unemployment, the target approach would have a much more direct and substantial feedback effect.

CONTROLS ON ABUSES RETAINED

The rest of the changes that the Finance Committee made in the House version of the jobs tax credit have been unchanged. A business will not receive a deduction for an amount of wages equal to the credit. No ceiling is imposed, as the Finance Committee recommended, because this amendment is aimed at assisting long-term unemployed workers and not at the current economic problems of small versus large businesses. The credit is limited in the case of a new business to 50 percent of the current year's unemployment insurance wages.

OPTIONAL INVESTMENT TAX CREDIT

My amendment would leave undisturbed the option for a company to take the 12-percent investment tax credit. I agree with the majority of the Finance Committee that the business community deserves to have the choice of these two opportunities. American business is too diverse for any one program to be suited to the expansion needs of all of them. This option makes the crucial distinction between the capital intensive and labor intensive segments of our economy. However, I would also note that the purchases of new equipment stimulated by an increase in the investment also has a beneficial impact on the unemployment situation.

INFLATIONARY IMPACT LESS THAN OTHER PROGRAMS

Another section of this legislation, the $50 rebate, was withdrawn by the President because it would have been too inflationary. The inflationary impact of every penny that Congress spends must be a prime consideration at all times. Compared to other Government programs designed to reduce unemployment, the targeted tax credit is less inflationary. The Government subsidizes only part of the wages rather than providing most or all of the funds as in public works projects. Those hired because of the jobs tax credit would have produc-

tive jobs and be paying taxes rather than living off of Government largesse.

TARGETING LEAVES ROOM FOR LATER EXPANSION

Because this approach to stimulating the economy has not been tried extensively, the exact effects of the jobs tax credit are not known. As compared to other methods of attempting to increase employment, however, the jobs tax credit directly encourages productive private sector jobs with high prospects of permanent employment. Those employed under the credit will be earning full wages paid mostly by private employers and will be paying taxes rather than drawing unemployment compensation and other income supplements. If the targeted jobs tax credit is a success, it could easily be extended to a broader eligibility as a method of expanding employment without added inflation.

CONCLUSION
